In addition, I believe the United States must dramatically increase basic and applied research on environmental problems that affect the globe. As most of you know, scientists speculate that the climate during the last 50 to 100 years has been unusually mild and favorable to agriculture; they believe we may be in for a gradual return to more difficult temperatures. Changes in rainfall patterns during the past few years have brought drought to a number of countries—so much so that towing icebergs from the Arctic is seriously discussed. The transport of "acid rains" has caused serious economic damage, but abatement of these rains is complicated by our uncertainty as to where such rains originate. Rational long-term management of living resources in the oceans is made more difficult because of our inadequate knowledge of the size of fish populations and their migratory patterns. Our attempt to reach international agreement on the exploitation of mineral resources in the oceans is hampered not only by political and geographical considerations, but also by our ignorance of the amount and variety of resources to be found there.

Each of these problems calls for research that must be performed in the common interest, but not all nations are equally equipped to do so. Such research will be expensive, and will require the diversion of scientific talent from other tasks. Let me conclude with this observation: I do not believe there is such a thing as the "U.S. role" in global environmental affairs. On some of the topics I have mentioned—energy and resource conservation, for example—the United States has much to learn from other countries. Some industrialized states of Western Europe have living standards close to that of the United States, but use much less energy. If we can adopt some of their practices without struggling to rediscover their ideals, we should do so, in the interests of economic efficiency as well as environmental protection. While we continue to differ with the Soviet Union on the harvesting of whales, our wildlife scientists have worked closely with theirs on a number of projects involving migratory birds. I understand that East Germany has achieved zero population growth, and that a few Third World states—Costa Rica and Taiwan, for example—have curbed their rates of population increase by a significant degree. In relatively short periods, they, too, may be able to add to the stock of human knowledge in ways that my country cannot. In the Middle East, we know that environmental officials from officially hostile states are meeting in a common determination to save the Mediterranean Sea.

In sum, our common perception of global environmental problems has led to surprising cooperation, and it will lead to more. If there is such a thing as a "U.S. role" in global environmental affairs, it is this: not to assert "leadership" in any chauvinistic or arrogant sense, but to join with our member-states of every political and economic condition as we work together to protect and renew our endangered planet. Instead of seeking leadership of a foolishly competitive sort, the U.S. and all other nations must seek an equal partnership.

If we achieve that, we will all have much to be proud of and grateful for.

Douglas Costle, the new Administrator of the Environmental Protection Agency, focused his remarks on "Environmental Interdependence." This is a topic familiar to this body, as we consider the potential international impacts of domestic SST noise regulations, or the effects of certain water projects upon Mexico or Canada. I believe the remarks which follow by Mr. Costle remind us all of the more complicated aspects of certain environmental problems:

EPA is thought by many to be a strictly domestic body. In fact, our international activity is extensive.

We most actively cooperate, of course, with our neighbors, Canada and Mexico. What we do, especially along our borders, can have very real impacts on our neighbors. And these impacts can be profound.

For example, without modification, the Garrison Irrigation Project in North Dakota threatens to produce flows of nutrients and pesticides that could endanger Canadian waters, including Lake Winnipeg.

Similarly, the coal-fired power plant at Coronach, Saskatchewan will have impacts on the air in northeastern Montana and on the quality of the Poplar River, which flows from Canada into the United States.

And most of us are familiar with the problem of salinity in the Colorado River, which runs into Mexico from the United States.

The catalogue of similar transnational pollution problems along our northern and southern frontiers is long. The point is this: controlling pollution in these areas requires close cooperation with our neighbors.

In Europe and in other parts of the world where the countries are smaller and closer together, the necessity for cooperation is even more apparent.

Even where countries are not contiguous or share a common waterway, environmental regulations in one nation can directly affect other national interests. For example, the newly enacted Toxic Substances Control Act will compel foreign chemical exporters who wish to market their products in the United States to comply with our regulations.

I think most of you are aware that our domestic regulations for the control of aircraft noise can generate problems with foreign carriers and their governments.

And our automotive emissions regulations bring us into continuous contact with foreign manufacturers whose products must conform to U.S. specifications before they are offered for sale here.

On a global scale as well, cooperation between nations on environmental issues is gaining in importance. Because all nations share the world's oceans and its resources, we are seeking to ensure that adequate environmental safeguards are built into the Law of the Sea Treaty.

We are also concerned about threats to the atmospheric ozone layer. Man's activities, especially the release of chlorofluorocarbon gases, threaten the ozone layer, and ultimately all nations will need to cooperate if the danger is to be avoided.

International pollution problems have added a new dimension to diplomacy and have defined new areas of potential conflict.

The United States and Canada have pioneered in the resolution of transboundary environmental conflicts. Fortunately, we had a strong legal base from which to build. The authors of the 1909 Boundary Waters Treaty between the United States and Canada were foresighted enough to include a provision that neither country would pollute the other "to the injury of health or property." That treaty also established the International Joint Commission, a body enjoying the status of an international organization.

At the same time, the U.S. and Canadian Governments have chosen to resolve many of their transboundary problems directly rather than referring them to the commission.

Here, too, new ground is being explored with each case handled.

Each country has shown itself sensitive to environmental impacts across the frontier. We have given Canada our pledge that we would take whatever action might be necessary to protect her waters from the run-off effects of the Garrison project.

Our Canadian friends have consulted with us in establishing the safety features for their offshore drilling project in the Beaufort sea. They are also cooperating with us in providing environmental safeguards on other projects, such as the open pit coal mine being planned on a tributary of the Flathead River and the power plant on the Poplar River, both on the northern border of Montana.

Our relations with Canada also provide a model of how two countries can work together to protect a shared water resource from environmental degradation.

By the nineteen-sixties it had become apparent to both the United States and Canada that the Great Lakes, the greatest fresh water system in the world, were becoming dangerously polluted and that, if they were to be preserved, effective joint action would have to begin soon. Officials of the two governments set about drawing up an agreement that would establish the programs necessary to arrest the deterioration of the Great Lakes water quality and create conditions that would preserve the lakes as a vital resource for future generations.

The Great Lakes Water Quality Agreement was signed in 1972 to provide the institutional mechanisms through which the two countries share scientific and regulatory expertise in a project vital to them both.

The task has not been easy, and successes have not come quickly. But water quality is improving. It will take many more years and billions of dollars more before the goals are reached. But we have made a good start and have demonstrated what can be accomplished when good neighbors set about a common task together.

In addition to our work with Canada and Mexico, the United States has formal environmental agreements with the Soviet Union, Japan, and Germany, under which joint projects are carried out. Our work with the Soviet Union, alone, encompasses some forty-one projects in a large number of fields.

Multilaterally, our most active forums are the Organization for Economic Cooperation and Development (OECD), and the Committee on Challenges of Modern Society, an adjunct of NATO, where there are over forty active projects at the moment. We also work closely with the United Nations Environmental Program, the World Health Organization and the environment programs of a number of other international organizations.

The purpose of these joint endeavors whether bilateral or multinational, is to share intellectual and financial resources so that we can all find early solutions to our common environmental problems.

World-wide environmental cooperation remains in its infancy. As our scientific knowledge increases, as our perspective of this fragile globe takes on the view of the astronaut, the task we face ahead will require the common efforts and good will of all the nations of the world. We cannot do it alone. No less than our best efforts will be required to meet the great challenge of world environmental protection.

Finally, the problems or underdeveloped or developing countries were addressed in this U.S. observance of World Environment Day. The speaker on the subject of "Environment and Develop-

ment" was Curtis Farrar, the Assistant Secretary for Technical Assistance of the Agency for International Development.

In Mr. Farrar's perceptive remarks, the relationship of the environmental problems of industrialized nations to the environmental problems of developing nations was described. His comments complement those of Secretary Mink's as well as those of other speakers, and demonstrate how the various environmental programs in the U.S. Government are finally being brought together.

An excerpt from Mr. Farrar's statement follows:

The major environmental problems of developing countries are primarily effects of poverty. In both the towns and in the countryside, not merely the quality of life, but life itself is threatened by poor water supplies, deficient nutrition, inadequate sanitation and sewage, poor housing, sickness and disease and vulnerability to natural disasters.

Poverty evokes exploitation of both natural resources and human resources. The biophysical environment often exhibits the ravages of long years of mismanagement under the conditions of poverty. Examples include soil erosion and infertility of once fertile agricultural land, water contamination from lack of sanitary facilities, deforestation, air and water pollution from marginal industries, and loss of human productivity through disease and malnutrition. These problems of poverty in the developing countries are just as environmentally significant as the direct pollution of air, water and soil in our own country. Both lead to rapid depletion of natural resources and degradation of the environment.

Of course the environmental problems of developing countries are not limited to problems of poverty. The process of development whether in agriculture, industry, water supply, transportation or other fields can generate adverse environmental effects as experience has clearly shown. The list of environmental kickbacks is long and some general but poignant examples include: Agricultural schemes where natural ground cover was completely removed have left lands incapable of supporting intended monocultures or even the removed vegetation; poorly planned dams have resulted in schistosomiasis, deceased agricultural acreage, great alterations of aquatic ecosystems and social upheavals; mining projects where mountain sides were stripped away have resulted in the killing of abundant reefs of food production; Poorly planned roads have provided easy access to land not previously available to human use and often for uses completely disruptive to soils, vegetation and the entire ecosystems.

The cumulative impacts are taking their toll. We recognize that development activities which commonly stressed short term gain have often been at the expense of the environment's sustainable productivity. For developing countries, the natural resource base—their soils, waters, forests and minerals—largely determine their economic potential for meeting the needs of poor people and for national development. The vicious circle is apparent.

If improving the well being of citizens in developing nations is indeed the goal of economic development, sustained success is possible only when the environment is capable of providing needed resources and suitable life support.

All of these environmental problems whether they stem from poverty or the development process itself, occur against the stark backdrop of population growth. Stabilization of world population growth does not seem likely for the next 25 to 50 years; therefore, the problems facing developing

countries and the world in areas of environment and natural resources are not likely to disappear quickly. Definitely a challenge is before all people, organizations and nations which have sincere concern for human well being and the global ecosystem that supports mankind.

#### TRIBUTE TO TWO OF ELKHART'S FINEST CITIZENS, PHILIP E. BYRON AND ELDON F. LUNDQUIST

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Indiana (Mr. BRADEMAS) is recognized for 5 minutes.

Mr. BRADEMAS. Mr. Speaker, I rise today to pay tribute to two valued friends and outstanding citizens of Elkhart, Ind., who recently passed away: Philip E. Byron, Jr. and former State Senator Eldon F. Lundquist.

Phil Byron practiced law in Elkhart since 1949 and had served as president of the Elkhart City and county bar association. He served in a number of State government positions in the 1960's and was a member of the Elkhart School Board from 1957 to 1967. As the Elkhart truth said in an editorial:

Mr. Byron, throughout his distinguished career was a student of the law and a practitioner of its highest principles. His service to the bar association in many capacities over the years reflected his unyielding beliefs in fairness, honesty and the integrity of law.

Former State Senator Eldon F. Lundquist was one of the most popular and respected legislators ever to serve northern Indiana. A State representative from 1961 to 1964 and a member of the Indiana State Senate thereafter until his retirement in 1976, Eldy was the "Mr. Education" of the Indiana General Assembly.

During his service as chairman of both the House and Senate education committees, Eldon Lundquist was a strong voice for high quality education—particularly vocational and higher education.

At the time of his death he was serving as assistant to the president of Indiana University. He was also well known as a radio announcer from 1939 to 1968 and played a major role in the growth of Elkhart General Hospital while serving as its director of resources and development.

Mr. Speaker, Philip Byron and Eldon Lundquist contributed substantially to the people of Elkhart County and of the State of Indiana, and all who knew them, as I had the privilege of doing, will miss them.

I extend my deepest sympathies to both their families.

#### ANATOLY SCHARANSKY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. WAXMAN) is recognized for 5 minutes.

Mr. WAXMAN. Mr. Speaker, yesterday Anatoly Scharansky was accused of treason by the Soviet Government, after being held incommunicado for over 2

months, with only rumors of the charges against him being the only word of his whereabouts and condition.

Not since Stalin's reign of authoritarian terror have such serious charges been leveled against a Soviet citizen in such an insidious manner. Samuel Lipavsky, a Soviet Jewish doctor whose father and son have been charged with jailable offenses, has spurned his earlier request to emigrate to Israel and has in turn accused Mr. Scharansky and other dissidents of collaborating with Western journalists and U.S. embassy employees in collecting "secret" information and other "subversive" activities.

The State Department and all the news organizations involved have called the charges preposterous.

What Scharansky was really engaged in was the monitoring, in anticipation of the upcoming Belgrade conference, of Soviet compliance with the Helsinki Final Act. As a signatory to that document, the Soviet Union pledged the assurance of basic human rights to its citizens, including the right of freedom of emigration, equal protection of the law, fair and public hearings if one is accused, and a presumption of innocence until guilt is proven. But in the past 22 months, Soviet compliance with these principles of basic human rights has been disgraceful. The Soviet Government has launched a massive campaign of arrests and propaganda designed to intimidate the dissidents and discredit them in the eyes of their fellow citizens.

Concurrently, the charges against them have steadily escalated—from "parasitism" and other similarly ambiguous charges to treason which carries a minimum 10-year sentence and a possible death penalty.

Thus, the stage is now set, by virtue of these totally unfounded claims against Scharansky, for a massive show trial in Moscow, replete with an insistent anti-Semitic campaign designed to link, under the guise of treason, those who wish to emigrate with those who wish to reform the system.

Such are the first fruits of the campaign of quiet diplomacy which has ensued since the visit to Moscow of Secretary of State Vance. Rather than expressing appreciation for the change of attitude which so many urged, rather than modifying its hard line in response to our new tact, the arrest, imprisonment, and pending treason trial of Mr. Scharansky is nothing less than a slap at President Carter and all who have conscientiously applied their efforts in behalf of those who are so systematically persecuted.

The fact is that the Soviet drive against those who dissent began long before President Carter was inaugurated. In anticipation of the 60th anniversary of the Bolshevik revolution, the Soviet leadership made a decision to liquidate organized opposition to the party. Many believe that the drive has been so successful that the dissident movement has been destroyed.

And even now, after these arrests, there

are those who continue to state that we who have spoken out in protest on the denial of human rights have brought this misery upon the dissidents. Are we now to remain silent in the face of these further outrages? Are we to allow Mr. Scharansky and his colleagues to languish before the bar of Soviet injustice?

The answer must be a resounding "No." Let us be as refuseniks, and urge the President to work for the release of Mr. Scharansky, to make the issue of human rights in the Soviet Union the highest priority on the agenda in Belgrade, and to continue our Government's very visible commitment to basic human rights.

Those most affected by these events—the dissidents themselves—have made extraordinarily clear their desire that we continue our efforts. We can do no less. They deserve so much more.

I wish to take this opportunity to share with my colleagues some recent articles on these developments:

[From the New York Times, Mar. 5, 1977]

#### SOVIET LINKS DISSIDENTS TO C.I.A.; ARRESTS EXPECTED

(By David K. Shtipler)

Moscow.—The Government newspaper Izvestia today accused several leading dissidents, all of them Jews, of working for the Central Intelligence Agency. Tonight, according to Jewish sources, apartments of several of the dissidents were being searched and some of them believed that arrests were imminent.

The evening newspaper published the allegations in the form of an open letter purportedly written by a former dissident, Dr. Sanya L. Lipavsky, who contended that American diplomats responsible for reporting to Washington on the human rights movement were in fact C.I.A. officers recruiting dissidents for purposes of espionage. It was the most serious charge yet in a series of recent Soviet attempts to portray dissidents as tools of Western subversion.

#### SOME OF ACCUSED SEEK TO EMIGRATE

It came amid the most severe crackdown on dissidents in several years, aimed especially at an unofficial group monitoring Soviet violations of the human rights provisions of the 1975 East-West Helsinki accords. Two of the group's members are already in jail—the chairman, Yuri F. Orlov, and Aleksandr Ginzburg, a close friend of Aleksandr I. Solzhenitsyn, the exiled writer.

Two more members were among those accused today of working for the C.I.A.—Anatoly Scharansky, an engineer whose wife is in Israel, and Vladimir Slepak, also an engineer, who received a telegram of support from Jimmy Carter during the Presidential campaign. Both men have been trying for years to emigrate to Israel.

In addition, Vitaly Rubin, an expert on Chinese philosophy who was one of the group's founding members and has since emigrated, was mentioned, as was Aleksandr Lerner, a computer scientist who has been trying to leave the country.

Mr. Scharansky and Mr. Slepak, reached tonight at Mr. Slepak's apartment, vehemently denied the charges of involvement with the C.I.A. "We never collected any illegal information, absolutely never, and never sent anything in an illegal way," Mr. Scharansky declared. "We never talked about espionage—nobody [from the United States Embassy] ever made any approaches to get information."

He speculated that the continued cam-

paign against dissidents was an effort by Soviet leaders to convince the Carter Administration that its public outspokenness on human rights would be counterproductive. The President has angered Moscow by criticizing Soviet oppression.

"But whatever happens to us," Mr. Scharansky said, "we remain in the same position: that Western pressure is the only possible way of saving the movement and of having real detente."

#### K.G.B. OFFICERS OUTSIDE APARTMENT

Tonight, two officers of the K.G.B., the security and intelligence service, were waiting on the stairway outside Mr. Slepak's apartment and several carloads of others were outside the building.

"If we are arrested," Mr. Slepak declared, "we will know that they want the West and Carter to feel that their pressure may make our situation worse, but the West must be strong."

The open letter in *Izvestia* with the C.I.A. allegations and a long accompanying article accused two American diplomats, Melvin Levitsky and Joseph A. Presel, of persuading dissidents to provide defense-related information. The open letter contended that Mr. Presel once said that he had come to the Soviet Union "to shatter the pillars" of the system.

The attack on the two diplomats seemed a clear effort to sever contacts between dissidents and the United States Government, just as efforts have been made to weaken contacts between dissidents and the Western press in recent months.

Mr. Presel is currently assigned to monitor the dissident movement for the embassy—a job that Mr. Levitsky, now in Washington, had before him—and as such he is the most visible American official in the activists' circles.

Earlier this week, two Jewish dissidents were seized and taken away by policemen or security police officers outside the United States Embassy as they were going to a meeting with diplomats there. The dissidents tried three times to enter the embassy, without success. The United States protested twice to the Foreign Ministry.

*Izvestia* reiterated charges that two former American correspondents in Moscow, Alfred Friendly Jr., formerly of *Newsweek*, and George Krinsky of *The Associated Press*, were C.I.A. agents. Mr. Krinsky was expelled from the Soviet Union last month. Mr. Friendly's tour ended last year.

Earlier, the official press also accused Christopher S. Wren of *The New York Times* of working for the C.I.A. but his name was not included in the charges today. All three have denied the allegations.

The *Izvestia* letter signed by Dr. Lipavsky, a surgeon who was frequently seen by Westerners at the homes of dissidents, contended that Mr. Levitsky had tried to persuade him to have a friend, the chief of a Moscow scientific institute, provide information to the C.I.A.

"I found myself in a very difficult situation because espionage and the prospect of being a paid agent of American intelligence contradicted my views and intentions," the letter said, adding that Dr. Lipavsky had withdrawn his application to emigrate to Israel.

#### UNITED STATES CALLS CHARGE PREPOSTEROUS

WASHINGTON.—State Department officials described as preposterous the *Izvestia* allegation that three present or former embassy officers in Moscow were actually working for the Central Intelligence Agency.

Officially, the department, in line with its long-established policy, refused to comment

on allegations of C.I.A. membership or activities.

But privately the article in *Izvestia* touched off both irritation and wry comments among State Department officers, who knew the three officials named by *Izvestia*. Friends of the three said they were regular Foreign Service officers who had never had any connection with the C.I.A.

[From the New York Times, Mar. 22, 1977]

#### SOVIET DRIVE ON DISSIDENT BEGAN BEFORE CARTER'S STAND

(By Christopher S. Wren)

Moscow.—Although the Carter Administration has come under fire here for advocacy of human rights, the evidence is that the Soviet leadership was beginning a crackdown on dissidents even before Mr. Carter moved into the White House.

Soviet officials have encouraged the notion that Washington's outspokenness may jeopardize cooperation in arms control and there is a risk that Soviet-American relations, now at an uncertain stage, may deteriorate further. But the President's support of human rights seems to have complicated the Soviet leadership's internal situation as much as its relations with Washington.

Speaking in the Kremlin today, Leonid I. Brezhnev stressed what he saw as the internal necessities of dealing firmly with dissidents, branding them tools in a Western campaign to undermine the unity of the Soviet bloc.

Internally the rights issue has been thrust back into the limelight by the arrest several days ago of Anatoly Scharansky, one of three Jews accused by the Government newspaper *Izvestia* of working for the Central Intelligence Agency.

#### SOME SEE CHALLENGE TO CARTER

Because *Izvestia's* charges also implicate Americans, his arrest was seen by some as a challenge to President Carter, possibly calculated to nudge him back toward the quieter diplomacy practiced by his predecessors. But other sources feel that the harassment of dissidents would have occurred anyway.

In advance of Mr. Carter's inauguration, the Soviet authorities began moving against domestic critics with searches, interrogation and other pressure. An apparent motivation was to prepare for the conference scheduled for Belgrade, Yugoslavia, in June to review progress made in fulfilling the East-West convention signed in 1975 in Helsinki, Finland.

The Soviet Union apparently underestimated the extent to which the agreement's provisions for freer movement of persons and ideas, included at Western insistence, would become a yardstick for its performance on human rights. A normally fragmented dissident movement began to coalesce around the issue of compliance with the Helsinki pact.

A dissident group headed by Yuri F. Orlov, a physicist, was formed to collect information on human rights abuses and forward it to the West. The group spawned others in the Ukraine and Lithuania. The emergence of even a haphazard opposition concerned the Kremlin because, as a Western diplomat commented, "organized dissident groups are viewed by this regime as a greater threat than individuals."

#### LINK TO 60TH ANNIVERSARY CELEBRATION

Meanwhile, ideologists began their buildup for the 60th anniversary of the Bolshevik Revolution next November and found that dissidents were likely to challenge the basic theme of the celebration, namely that the Soviet people were content and prosperous.

"It is clear from articles in *Pravda* and in other signs that the leadership took a decision at the highest level to liquidate or-

ganized opposition in this anniversary year," a Russian familiar with party thinking said.

Other factors also favored a crackdown on dissidents. The Kremlin has been worried about the expression of dissent in Eastern Europe and wanted to forestall problems in the Soviet Union, particularly in view of some latent consumer discontent over food shortages this winter.

Hopes for arriving at an arms agreement and for a visit by Mr. Brezhnev to the United States are also thought to have influenced a decision to muffle domestic critics, far enough in advance to put a better gloss on all these events.

Though Moscow had braced for Western complaints, it did not expect the new President to become a catalyst for dissident resistance. "This campaign happened to coincide with Carter's comments on human rights," said the Soviet source. "If Nixon had been in power, he would have remained silent."

At the turn of the year, security police raided the apartments of dissidents and reported finding foreign currency and other contraband. Dr. Orlov, the leader of the Moscow monitoring group, was picked up and questioned for seven hours. Other dissidents were interrogated in an evident attempt to link them with an explosion on the Moscow subway in early January.

In the face of protests from Washington, four members of the monitoring groups, Dr. Orlov and Aleksandr I. Ginzburg in Moscow, and Mikola Rudenko and Oleksa Tikhy in the Ukraine, were arrested in early February. Another member, Lyudmila Alekseyeva, was given permission to follow two earlier members into exile abroad.

Other dissidents in Moscow, Kiev and Vilna were searched or interrogated. But Moscow also sought to mollify criticism by transferring an ailing dissident, Sergei Kovalev, from a labor camp to a prison hospital and by releasing another, Vladimir Borisov, from a mental asylum. Before the K.G.B. seized Mr. Scharansky, another Helsinki group member, the Government first released a jailed Jewish physician, Mikhail Shtern.

*Pravda* implied that the drive against dissidents would continue despite Washington's complaints. "The freedom of the individual is the sacred and inalienable right of all honest citizens and workers, but not of those who expect a free rein activity against the people," the party newspaper said.

While the Kremlin dismissed the Carter Administration's early concern as interference in Soviet internal affairs, it became furious when the President sent a letter to Andrei D. Sakharov, the physicist and leading human rights advocate, and later met with Vladimir K. Bukovsky, the deported dissident. Both actions were restrained, but the nuances, along with Mr. Carter's assurance that he was not singling out the Soviet Union, seemed lost on the Russians.

The response was a counterattack in the press assailing the United States for its own alleged human rights violations, to show, as one Soviet insider said, that "every stick has two ends."

While Moscow's response to Mr. Carter showed evident pique, it was also calibrated to avoid going too far. "Given their feelings of inferiority toward the United States, the Russians in their panic and fury did a good job of restraint," a West European diplomat said.

It has seemed equally significant that the Kremlin chose not to postpone Secretary of State Vance's visit as a sign of displeasure. Western diplomats feel that the Soviet leaders remain eager to push toward a new arms agreement and to discuss the Middle East. Mr. Vance's visit should offer the best gauge of just how deeply Moscow's resentment runs.

[From the New York Times, June 2, 1977]  
**SOVIET CHARGES A KEY JEWISH HUMAN-RIGHTS  
 ACTIVIST WITH TREASON**  
 (By David K. Shipler)

MOSCOW.—A leading Jewish dissident and human-rights activist has been formally charged with treason in a move by Soviet authorities that has few precedents since the days of Stalin.

The accusation, against Anatoly Scharansky, represents the severest attack in years against the advocates of an open society, and it dramatizes a growing campaign by the K.G.B.—the secret police—to discredit and eliminate dissidents by linking them to the United States Central Intelligence Agency. Some diplomats believe that the Scharansky case and the accompanying attempts to crush the small human-rights movement could have grave consequences for Soviet-American relations.

News of the charge, which carries a minimum sentence of 10 years' imprisonment and a maximum penalty of death, was contained in a letter received today by Mr. Scharansky's mother, Ida, from the prosecutor's office. Details were passed to Western correspondents by Yelena Bonner, wife of Andrei D. Sakharov, the dissident physicist and Nobel Peace Prize winner.

Mr. Scharansky, a 29-year-old computer specialist, has been under arrest since March 15 after accusations in the Government newspaper *Izvestia* that he and other Jewish activists were recruited by American diplomats for C.I.A. work.

#### SLAP AT CARTER SEEN

The case has been the focus of keen interest here as a likely indicator of Soviet attitudes toward President Carter's shift in tactics on human rights. Soviet clemency would have been seen as a positive response to the President's tempering of remarks on the issue. In recent weeks he has avoided the pointed criticism of the Soviet Union and the specific references to and contacts with Soviet dissidents that marked the beginning of his Administration.

The softer approach has won the private approval of some Soviet insiders who told Westerners last week that they even welcomed an ideological debate. But the stern action against Mr. Scharansky, coming just two weeks before human rights becomes an issue of international discussion at Belgrade, is being interpreted here as a slap at Mr. Carter and a high-level decision to pursue a tough line with Washington in this and other areas.

One American diplomat named by *Izvestia*, Joseph A. Presel, has since been constantly followed by three or four K.G.B. agents, harassed by late-night phone calls and denied permission to travel outside Moscow. Although his main job is reporting to the State Department on dissident affairs, he has had to stop going to activists' homes, as he once did. The United States has reportedly protested to the Soviet Government and had denied Soviet diplomats in Washington travel permission on a reciprocal basis.

#### STUDY DUE AT BELGRADE

The Belgrade conference will examine the effect of the 1975 European Security Act signed at Helsinki by the Soviet Union, the United States and most European states. The document has a human-rights section calling for freer exchange of people and ideas, family reunification across borders and the like.

Mr. Scharansky, whose wife is in Israel, had applied to emigrate, been denied and became a member of an unofficial group formed to monitor Soviet violations of the Helsinki act.

His role was important in the dissident movement, for he provided a key link between Jews seeking emigration and Russians and others wanting to stay and liberalize

the society. Furthermore, he was a consummate public relations man, fluent in English and scrupulously accurate with his facts, who acted as a spokesman to the Western press on behalf of Jewish activists. As such, he was part of a chain that Soviet authorities have found threatening, a chain of communication that runs from the dissidents through Western correspondents to worldwide publications and back into the Soviet Union again via foreign radio stations such as BBC and the Voice of America.

The authorities have been selecting the most influential dissidents for arrest. Yuri Orlov, for example, a stocky physicist who headed the Helsinki group, introduced people from various strains of dissent to each other. He has been in jail for three months, but no charges have been made known.

All told, nine members of the Helsinki watchdog group have been arrested. A tenth, Malva Landa, was sentenced yesterday to two years in Siberia on the charge that her carelessness caused a fire in her apartment. Other group members have been given exit visas, which was what Mr. Scharansky had wanted.

Pressure has continued against a wide range of dissidents. Today, a would-be emigrant, Iosif Begun, who had been stopped several times by policemen as he tried to enter the American Embassy, was sentenced to two years of Siberian exile for "parasitism," meaning that he had no job. Friends say he lost his job when he applied for his visa.

In addition, the K.G.B. seems to be on a campaign to recruit informants, entrap dissidents and smear American correspondents with the C.I.A. label in an effort to break the communications chain. At a news conference held by the Helsinki watchdog group today, Eric Udam, an Estonian, said he had been summoned by a K.G.B. agent named Albert Molok and offered 500,000 rubles (\$670,000) to form a bogus dissident group and make contact with the C.I.A. through American correspondents.

The letter from the prosecutor's office to Mrs. Scharansky, which was a response to her inquiries about her son, said that he was being charged under Article 64 of the Criminal Code, which names among varieties of treason "rendering aid to a foreign state in carrying out hostile activity." Mr. Scharansky is apparently the first one in the mainstream of the dissident movement to be accused of treason.

The campaign of the K.G.B. has not destroyed the dissident movement, but it has weakened it severely. Among those who are discontented but not yet outspoken, there is more fear now, more hesitation, dissidents say.

#### COMMEMORATING THE 200TH ANNIVERSARY OF GEN. KAZIMIERZ PULASKI'S ARRIVAL TO AMERICA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ROSTENKOWSKI) is recognized for 5 minutes.

Mr. ROSTENKOWSKI. Mr. Speaker, this year marks the 200th anniversary of Gen. Kazimierz Pulaski's arrival to America, and provides a great opportunity for informing the American people of the contributions Poles made in the fight for American independence.

Kazimierz Pulaski with Thaddeus Kosciuszko, symbolizes not only the highest ideals of freedom for the Polish people, but also extraordinary service in the battle for American independence. The participation in the Revolutionary War of these two distinguished Poles and

their contributions are universally accepted.

Even so, many Americans are ignorant of their contributions and thus, on the 200th anniversary of Pulaski's arrival to America, all of us should make a special effort to insure proper recognition of not only Pulaski but of all Poles who fought for and helped build this country.

In order to better appreciate the spirit which animated General Pulaski, the activity and zeal in the defense of justice and human liberty which prompted him to come to a strange land, where he was unknown, and whose language and customs he did not understand, it is fitting to refer to his past in the struggle for liberty in the United States.

His American career was tragically brief. Arriving on July 23, 1777, he served as an aide to Washington at the Battle of Brandywine. At Brandywine Washington's Army was repulsed, and a large part of it might have been captured had it not been for the masterly aid given by Pulaski at the head of a cavalry squad, who delayed the progress of the British and thus enabled the army of Washington to retreat in an orderly way.

When Congress on September 15, 1777, elected Pulaski "Commander of the House with rank of Brigadier," he became the highest ranking officer of the cavalry, having under his command four regiments of cavalry.

Pulaski's early involvement in the Continental Army was wrought with difficulty. He was dissatisfied with the condition of the cavalry of which he was in command, and with the fact that his pleas for the reorganization and strengthening of the unit were unnoticed. Feeling the lack of cooperation from his officers, who did not like to be subjected to the authority of a foreigner, Pulaski resigned his command in March 1778, and asked Washington and Congress to grant him leave to organize an independent corps, known later as the famous "Pulaski Legion." Congress, upon the recommendation of Washington, resolved that an independent corps be established by Count Pulaski and that he retain the rank of brigadier general.

During the recruitment of the legion, Pulaski visited Bethlehem, Pa., where the Moravians lived. When stationed at Bethlehem, Pulaski always placed guards at the home of the Moravian Nuns during the passage of troops through the town. In grateful acknowledgement for the protection thus afforded them, the nuns, upon Pulaski's request, made for his legion a special banner. Longfellow has immortalized the making and presentation of the banner in his "Hymn of the Moravian Nuns at the Consecration of Pulaski's Banner."

The Pulaski Legion spent the winter around Minisink in New Jersey, where the hostile attitude of the Tories and Indians required their presence for the protection of the frontiers. Later Congress resolved that Count Pulaski march his legion to South Carolina to support General Lincoln.

On May 8, General Pulaski reached Charleston, a mere 3 days before General Provost of the British forces in-

vaded the city. Scarcely had Provost landed when Pulaski made an assault upon the advance lines. His courage, self-possession, and disregard of his own safety, gave an inspiring example to his troops, and raised the spirits of the people; while the inexperienced soldiers felt a new confidence in themselves under the command of such an officer. Even though his legion was not large, Pulaski knew how to make it impressive.

The growing numbers of the enemy coupled with the inability of General Lincoln's forces to reach Charleston in time to rescue the city from the British, prompted the greater portion of the inhabitants to speak of capitulation. In fact, the Governor and council agreed on terms of capitulation, not the most honorable, when General Pulaski repaired to the council chamber to protest against the precipitate measure, declaring that, as a Continental officer, he would defend the city for the United States. By his eloquence, General Pulaski almost single-handedly persuaded them to reject any offer of submission, and the same night General Provost, who had heard that General Lincoln was marching to Charleston with 4,000 men, retreated across the river.

Early in September, General Lincoln received information that Count d'Estaing was off the coast with a large French fleet and stood ready to assist Lincoln in his contemplated attack on Savannah, Ga., a stronghold of the British. The plan of operation called for Lincoln to send troops with all dispatch to Georgia, while the French were to land at Beuleau and form a junction in the neighborhood of Savannah.

The assault was made as planned as to time and center of attack, but was betrayed to the enemy by a deserter from the American ranks. When the American troops advanced, they were greeted with a deadly, galling fire.

The French and American cavalry were both under Pulaski's command, and seeing the apparent confusion and fearing that the French would be disheartened, Pulaski rushed forward to animate them by his own example and courage. Dashing ahead into a withering flame of shot and shell, he himself was struck by a swivel shot and fell from his horse mortally wounded.

Pulaski was carried away by his soldiers and placed on the American brig *Wasp*. Despite the utmost skill of the French surgeons, General Pulaski did not recover from the wound. Gangrene had set in, and as the ship pulled out of the harbor for Charleston, Pulaski expired.

It is only proper and just that America and grateful people enjoying the blessings of liberty, peace, and prosperity should recall the life of this great man and pay tribute to his valor. He gave his last measure of devotion to the American cause. Millions of his countrymen residing in the United States rejoice with the American nation, of which they are a part, that Pulaski along with that other illustrious Polish patriot, Thadeusz Kosciuszko, and other distinguished men

and women of Polish blood stood by the cradle of American Independence and helped to lay the foundation for a new government in the New World, dedicated to the principles of human liberty and justice.

#### CONTROLLING QUALITATIVE IMPROVEMENTS IN STRATEGIC ARMS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. BINGHAM) is recognized for 10 minutes.

Mr. BINGHAM. Mr. Speaker, for several years many Members of Congress and the academic community have become increasingly concerned about the destabilizing effects of qualitative improvements in strategic weapons. After the Vladivostok agreement of 1974 seemed to bring within reach a ceiling on the number of strategic weapons for both the United States and the Soviet Union, attention has shifted to the problem of restraining the impulse to improve the accuracy and destructive power of these arms. Without such restraints the arms race would not be slowed at all, but would merely have shifted arenas.

I have been greatly encouraged by the Carter administration's recognition of this problem and especially by Secretary of State Vance's comprehensive proposal for a new SALT Treaty which would include a halt in qualitative improvements. Although the Russians have initially treated this proposal with scorn and derision, I hope their attitude will change as they too begin to recognize the destabilizing threat these improvements pose. The Soviet Union has been developing and deploying increasingly powerful and accurate ICBM's causing concern which has bordered on panic in some circles here in the United States. At the same time our own research and development on qualitative improvements is proceeding full speed ahead, with such things as the maneuverable reentry vehicle the MX land-mobile giant missile, and the cruise missile moving steadily closer to the point where they are no longer on the drawing boards but instead on the production lines. There can be no question that the Soviets are as worried about these developments as we are about their heavy missiles.

There is ample evidence that the most troubling of these improvements is the MK12A warhead and the NS-20 guidance system for our Minuteman III ICBM's. These are not on the drawing boards, but instead are extremely significant qualitative improvements which are about to be deployed, beginning this fall. The new warheads will have double the explosive power of the warheads they will replace, and the guidance system will double the accuracy of the warheads. Together these refinements will give our ICBM force a huge advantage in hard target kill capability, thus threatening the 1,600 Soviet ICBM's in their hardened silos which are the backbone of the Soviet

strategic forces. While the U.S. comprehensive SALT proposal would block the introduction of these improvements, it is extremely unlikely it can be put into effect before these new capabilities are added to our Minuteman III missiles. When they are deployed, the United States will have an advantage which the Defense Department estimates it will take the Soviets 5 years to overcome, which can only make them less receptive to our comprehensive proposal for a halt to qualitative improvements. And the vicious cycle of the arms race would continue.

In the last few months, however, the administration has come to realize the implications of the Minuteman program and will be far more cautious about its implementation. The June 1 New York Times carried an article by Bernard Weinraub on the MK12A warhead and the NS-20 guidance system, and yesterday the President's spokesman Jody Powell answered a number of questions about the administration's intentions.

I will include copies of the June 1 New York Times article as well as an article summarizing the White House comments at the end of my remarks. I am encouraged that Mr. Powell said that the United States "can make changes" in the Minuteman improvement program if the Soviet Union exhibits a willingness to undertake serious negotiations on overall limitations on qualitative improvements. He also said that President Carter believes that qualitative improvements in strategic weapons is "as serious or more serious" an issue than mere numbers of weapons possessed by each side. Although some press accounts of Mr. Powell's comments chose to emphasize the President's refusal "unilaterally to forgo all technological improvements . . . absent similar restraint by the Soviet Union," I think the President's clear understanding of the dangerous implications of the Minuteman improvement program and his expressed willingness to alter it are far more significant and encouraging.

Support for delay is growing. Today, 11 strategic experts urged the administration to delay the modernization of Minuteman III ICBM's to avoid "foreclosing future agreement" and to "preserve our leverage" at the SALT talks. The experts included a former Presidential science adviser, two former Deputy Directors of the CIA, a former Deputy National Security Adviser to President Kennedy, a former Deputy Director of the Arms Control and Disarmament Agency, a former Under Secretary of the Air Force, and the director of the Federation of American Scientists. I include the text of the statement and the names of the signers at this point in my remarks:

#### STRATEGIC EXPERTS QUESTION SALT STRATEGY

"To avoid foreclosing future agreement to maintain land-based missile survivability, and to preserve our leverage at SALT, we believe the Administration should defer the reported doubling of accuracy and yield on Minuteman III missiles which would other-

wise appear irrevocably to give the U.S. major counterforce effectiveness."

George Kistlakowsky, Robert Amory, Herbert Scoville, Carl Kaysen, Phillip Farley, Marvin Goldberger, George W. Rathjens, Harvey Brooks, Townsend Hoopes, Admiral John M. Lee, Jeremy J. Stone.

[From the New York Times, June 1, 1977]

# DEPLOYMENT OF NEW U.S. WARHEAD VIEWED AS MAJOR STEP IN ARMS RACE

(By Bernard Weinraub)

WASHINGTON, May 31.—The United States shortly will quietly pass a new—and complicating—milestone in the arms race by deploying a more accurate and powerful warhead capable of destroying Soviet missiles in their silos.

The warhead, designated 12A, sharply increases the ability of the United States to attack Soviet missiles in their steel and concrete silos. Deployment of the new weapon will be undertaken in two stages; in October, when the Air Force starts installing an improved guidance system in its Minuteman III land-based missile force; and in 1979 when the new and powerful warhead is placed atop each missile.

Taken together, the upgrading of the missile force will enable 10 of the Minutemen III missiles to destroy 20 Soviet silos, compared with the present six. The new warhead will have an 80 percent chance of destroying any hardened target, in contrast with the 20 percent "kill probability" of the current warhead.

In recent years, military planners in the United States have feared that when the Soviet Union combines more accurate warheads with its large ballistic missile force, it would acquire an ability in the mid-1980's to eliminate a sizeable number of United States land-based ballistic missiles.

With the deployment of the 12A, the United States would in theory be acquiring the same capacity before the Soviet Union, although Pentagon planners insist that is not the intention of the 12A program.

## NO THREAT TO SOVIET FORCE

Although Paul C. Warnke, director of the Arms Control and Disarmament Agency, has said that the 12A was a potentially destabilizing factor, he expressed hope that agreement could be reached on a new arms treaty before the warhead was deployed.

What has disquieted the Soviet Union—as well as American critics of the Pentagon's plan to deploy the 12A—is the fear that the refitted Minuteman III missile would serve as a destabilizing force that would accelerate the arms race. Pentagon officials, and some liberals, say that the improving American capacity matches growing Soviet strength and that failure by the United States to deploy the new missile would "hobble" whatever balance the United States retains in strategic arms.

"This program is so far short of actually threatening the Soviet deterrent force that there's no reasonable way it could be seen as a destabilizing factor," said one senior Pentagon official. "Given the size of the Soviet force—and the scale of the program involved on our side—there's no way that the Minuteman improvement force would make the Soviet force vulnerable to American attack."

Others strongly disagree. "The Mark-12A warhead is eliminating any room for negotiating maneuver" in arms limitation talks, said Jeremy J. Stone, director of the Federation of American Scientists.

The Soviet Union has already indicated that deployment of the 12A warhead was potentially more alarming than such other new weapons as the cruise missile, or the mobile missile program called the M-X, a \$34 billion system that is being developed as

the next generation of intercontinental ballistic missiles.

The Minuteman III is the backbone of the United States missile arsenal. This force, 550 land-based, 60-foot-long ballistic missiles, carries three independently targeted nuclear warheads. With a range of 8,000 miles, the warheads are now accurate to within 1,200 feet of their targets; the new 12A, which is also a multiple independently targeted warhead, would have an even chance to land within 600 feet of the target.

## U.S. WOULD GAIN ADVANTAGE

According to critics of the deployment of the 12A, the new warhead would give the United States an advantage over the Soviet Union because the bulk of Soviet missiles, perhaps 75 percent, are land-based, and therefore will become increasingly vulnerable. On the other hand, only about 25 percent of the warheads in the American strategic force are based on land, with the rest aboard submarines or on bombers.

In deploying the warhead then, critics say, the United States moves beyond "negotiable restraint," and takes a competitive lead over the Soviet Union, a lead that would spur the arms race. Mr. Stone has pointed out in testimony before a Senate Foreign Relations subcommittee that the deployment of the new warhead will produce a five-year lead in "hard-target kill capability," or the ability of both sides to destroy targets specially hardened against nuclear attacks; in particular, missile silos.

Although the deployment issue has stirred some debate, the breakthrough—and its potential negative impact on arms limitation—has failed so far to generate substantial opposition in Congress. Several prominent liberals involved in military matters, including Senator William Proxmire, the Wisconsin Democrat, support deployment of the 12A.

It is unclear how, if at all, the planned deployment of the 12A warhead would be affected by adoption of various strategic arms proposals advanced by the Carter Administration.

Partly to foreclose the possibility of the Soviet Union's achieving a first-strike capability against American land-based missiles, the Administration, in one of its proposals, has suggested a reduction in the number of large missiles permitted the Soviet Union and a ban on modernization of missiles and a limitation on flight testing.

It is not clear, however, whether such restrictions on modernization would apply to replacement of a warhead on an existing missile.

[From the New York Times, June 2, 1977]

# UNITED STATES TO ALTER DEPLOYMENT OF ITS NEW WARHEAD

(By Charles Mohr)

WASHINGTON, June 1.—The White House spokesman, Jody Powell, said today that if the Soviet Union was willing to undertake "serious negotiations" on limitation of strategic nuclear weapons, the United States "can make changes" in plans to deploy a more accurate intercontinental missile warhead capable of destroying more Soviet missiles in their launching silos.

At a daily news briefing, Mr. Powell declined to call the new nuclear warhead, designated 12A, and its refined guidance system, as a "bargaining chip" in strategic arms talks with the Soviet Union. He also declined to say that the decision to deploy the guidance system this fall and the warheads by 1979 had been triggered by Russian rejection in March of Mr. Carter's "comprehensive" proposal for substantial arms reductions.

However, he said that the comprehensive proposal "would have specifically prohibited this and many other sorts of qualitative improvements" in intercontinental missiles.

He added that the President believed that "qualitative" improvements in strategic weapons was "as serious or more serious" an issue than mere numbers of weapons possessed by each side.

Mr. Powell said, however, that "we do not feel it is reasonable" to expect the United States, on its own, to forgo deployment of something like the 12A warhead without equivalent and "verifiable" steps by the Soviet Union. The Russians have extra-large missiles that can destroy launch silos with the high-explosive yield of their warheads rather than the pinpoint accuracy attributed to the 12A.

## CARTER'S CPA SUPPORT APPLAUDED

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. Moss) is recognized for 5 minutes.

Mr. MOSS. Mr. Speaker, President Carter's strong support for Consumer Protection Act legislation deserves commendation.

This legislation was doomed in past years due to the threat of a presidential veto. Now, with President Carter in the White House, that threat is gone.

His statements, made yesterday, are very encouraging. The President said:

Now when it is sure that the White House will approve this legislation the lobbyists have come out of the woodwork and the Congress is under intense pressure.

Congress too should reject the pleas of a few special interests who blindly oppose efforts to protect consumers.

The Consumer Protection Act is a modest, but constructive bill which, as President Carter correctly says, deserves our support.

With your permission, a copy of the Washington Star article reporting the President's supportive statements is offered here for inclusion in the RECORD:

[From the Washington Star, June 1, 1977]

## CARTER FIGHTS FOR OK OF CONSUMER AGENCY

(By John Holusha)

President Carter today threw his personal support behind the increasingly difficult effort to establish an Agency for Consumer Protection.

Addressing a meeting of supporters of the bill, Carter said, "We've permitted misinformation put forth by the special interest groups to capture the attention of the public . . . almost by default."

The bill has been the subject of intense lobbying by business interests. It was approved in committee in the House by a scant one-vote margin.

At the time of the committee vote, some supporters complained that the President had done little to round up support for the bill, although he long ago had pledged to sign it.

Carter sought to refute business arguments that the agency would be an expensive, ponderous addition to the federal bureaucracy.

He said that 13 consumer offices within other branches of government could be eliminated if the bill were passed, at a savings of \$10.4 million.

In any case, he said that the \$15 million-a-year agency would spend less than what the Defense Department or HEW spends in an hour.

"It is a tiny amount," Carter said, "but very, very important."

Carter dwelled on the fact that many individual businesses have supported the bill,

even though their organized spokesmen, led by the national Chamber of Commerce, are in opposition.

Carter also referred to a remark made by the Chamber's president, who described presidential consumer adviser Esther Peterson as having the fury of a "woman scorned."

"Esther Peterson is one person it is impossible to scorn," Carter said to the cheers of the audience.

He also noted that one of the companies supporting the bill is Levi Strauss, the maker of blue jeans. "I'm one of their best customers," he quipped.

Carter was flanked by a delegation of Cabinet officers, including HEW's Joseph Califano, Labor's F. Ray Marshall and OMB Director Bert Lance.

Chief White House lobbyist Frank Moore said the vote on the bill "is very close," and said the President would hold a meeting with the congressional leadership next Tuesday, to discuss a timetable for bringing it to the House floor.

#### PANAMA CITY, FLA., JAYCEES LEAD IN FLORIDA

(Mr. SIKES asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. SIKES. Mr. Speaker, it is a natural thing for Members of the House to take pride in the accomplishments of the people in our districts. It is particularly pleasing to me to be able to call attention to an outstanding series of accomplishments by the Panama City, Fla., Junior Chamber of Commerce. This group, in a recently held State convention, was recognized as the outstanding Jaycee chapter in the State of Florida. They received more awards than any other of the more than 300 Jaycee chapters in Florida. Among the awards received were: Most Outstanding Chapter in Community Development; Most Outstanding Chapter in Individual Development; Most Outstanding Chapter in Chapter Management; Most Outstanding Chapter in its population division; Most Outstanding Chapter in Overall Excellence in all of Florida.

In addition to these awards, the Panama City Jaycees won 17 of 19 individual project area awards and the best overall project of the year. Numerous individual membership achievements awards were received.

The chapter president, Leon Foster, was recognized as one of the top five local chapter presidents in the State. Tom Najjar, incoming president of the Panama City Jaycees, was recognized as the most outstanding State director in Florida. Congratulations are extended to them and to all of the Panama City Jaycees for their outstanding accomplishments. Not to be outdone, the Panama City Jaycee Auxiliary was recognized as the Most Outstanding Jaycette Chapter in the State of Florida. They, too, are due warm congratulations.

#### LT. GEN. JOHN A. KJELLSTROM RETIRES

(Mr. SIKES asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. SIKES. Mr. Speaker, on May 31, one of America's most distinguished and outstanding military leaders, Lt. Gen. John A. Kjellstrom, retired after 34 years of dedicated service to this country. General Kjellstrom is highly respected at all levels of the Government and enjoys the finest reputation throughout the Department of Defense. He is a man of honor, integrity, and exceptional ability.

General Kjellstrom's vast experience and expertise in the area of financial management led to his being named to the important post of Comptroller of the Army 3 years ago by the late Gen. Creighton W. Abrams. He served in the field of comptrollership and financial management for 23 of his nearly 33 years of commissioned service. He very ably filled this position until the time of his retirement.

As Comptroller of the Army, General Kjellstrom directed the financial management improvement program with short- and long-range goals and objectives designed to strengthen financial management in the army. These goals and objectives provided a framework for practitioners of comptrollership at all levels of the army. General Kjellstrom's leadership in financial matters has had the important effect of increasing the involvement of commanders and staff officers at all echelons of the Army. His effort to make these officers more aware of their financial management obligations and duties will have lasting benefits in the improved manner in which the Army financial matters are conducted.

Mr. Speaker, as a longtime associate of General Kjellstrom, I have especially admired his candor and forthrightness. He testified before Congress defending the Army's operations and maintenance budget for 8 consecutive years. Normally a man of lesser rank would have appeared to defend this budget estimate but, because of the critical status of the O. & M. fund, the Chief of Staff and the Secretary of the Army felt that the operations and maintenance appropriation for the army was their most important appropriation and that General Kjellstrom's expertise should be used to support it. I echo their sentiments, General Kjellstrom has always proven to be an extremely knowledgeable and highly competent witness. Despite his position as a witness for administration requests, he has always answered questions fully and frankly and won the respect and admiration of the members of the committee.

It seems particularly noteworthy that General Kjellstrom's commission as an officer came through the Officers' Candidate School program at Fort Benning, Ga., in 1944. He was subsequently integrated into the regular army in 1946 at the recommendation of Col. Philip R. Dwyer, commander 407th Infantry Regiment, 102d Division.

I congratulate General Kjellstrom on his outstanding record of achievements. His illustrious career has greatly benefited our nation. He has provided exemplary service and is deserving of the highest accolades. I extend my very best wishes to him, Mrs. Kjellstrom and to

their family in whatever course of future endeavors they may pursue.

#### CURE FOR CANCER

(Mr. BRINKLEY asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. BRINKLEY. Mr. Speaker, the Congress has shown by its legislation that it places a high priority on finding a cure for cancer, both with the National Cancer Law of 1971 and annual appropriations to the National Cancer Institute, a unit within our National Institutes of Health.

It is important that we monitor the way this legislation is implemented. The American citizen should know. It is appropriate that the matter is fully discussed publicly.

We have had numerous articles in the press on cancer in recent months and the CONGRESSIONAL RECORD recently reprinted some which severely criticized the National Cancer Institute for not paying sufficient attention to various compounds in our environment which cause cancer.

This is a serious charge worth discussing and, in the interest of hearing both sides, I have appreciated having the following two articles for my own use and offer them now to my colleagues who, in coming months, will be called upon to vote on aspects of the National Cancer program.

One article is written by two of the Nation's foremost cancer experts, R. Lee Clark, M.D., a member of the President's Cancer Panel and president of the University of Texas System Cancer Center in Houston as well as, this year, the elected president of the American Cancer Society; and the other author is Frank J. Rauscher, Ph. D., one of the world-recognized cancer virus researchers and, for 5 years, the Director of the National Cancer Institute.

One of the main criticisms they answer is that the American Cancer Society is dominated by industrialists and others who protect their selfish interests at the expense of the average citizen, for instance, by going easy on cleanup of industrial pollution.

The facts are, Dr. Clark and Dr. Rauscher show, that the American Cancer Society constitution requires that 50 percent of its board be nonphysicians specifically to make sure that the patient, the consumer of medical care, is adequately represented in society work. Further, the facts are that only one banker and no industrialists are on the society board.

A second article addressing this question is a paper by Solomon Garb, M.D., the scientific director of the American Cancer Research Institute in Denver, a small hospital of recognized high quality which has followed a policy for years of accepting all patients it has room for, whether they can pay for treatment or not.

Dr. Garb shows that much of the criticism of the national cancer program in recent months is about matters over

which the National Cancer Institute has no control. The National Cancer Institute has done its job on the chemicals in our environment which cause cancer. It has identified them, proven their dangerousness, and informed the world.

But the National Cancer Institute has no regulatory power. It was not created to have any. It does not seek regulatory power. That is the work of other Federal and State agencies.

Dr. Garb's paper demonstrates a real need for action, agreeing with the general aim of the criticism but showing how it is unjustly directed at the National Cancer Institute.

I think these two documents deserve to be read by each of us who will vote on the cancer matters that come before the Congress:

**CANCER: A SEARCH FOR BOTH CURES AND CAUSES**

An article that appeared in The Washington Post May 1 accused the American Cancer Society of focusing on the search for cures rather than on environmental causes. The society does indeed focus on early diagnosis and cures to save lives from cancer; the allegation regarding the society's negligence of environmental causes is entirely untrue.

As for cures: There are nearly 700,000 new cases of cancer in this country each year, and about 385,000 cancer deaths—more than 1,000 a day, one every one and one-half minutes. As an organization started and directed by volunteers to fight cancer, and supported by public contributions, it is obviously our first priority to do everything we can to reduce this intolerable toll. And we are succeeding.

Through public and professional education we have changed the attitude toward cancer—the vital first step—from one of hopeless passivity to one of active combat. And, partly as a result of this, and through continued research—in which we have invested more than \$400 million—tens of thousands of lives have been saved from cancer in the United States over the past two decades. That is, whereas only one in four patients was cured of cancer in the 1950s, today one in three is being cured. And science and medicine already have the knowledge and techniques to cure at least 50 per cent of all cancer patients.

The article also stated that "environmental sources" account for between 50 and 90 per cent of all cancers. This general concept, with which we agree, was put forth more than 10 years ago by the American Cancer Society and responsible scientists in France and England.

However, to many (such as the writers of the Post article) the word "environment" in this context signifies dangerous chemicals in our air, food and water. And the percentages are only estimates.

Actually, the real meaning of the concept is that many cancers are extrinsically induced and are related to our health habits and ways of life, as well as to things beyond our personal control.

The leading cause of cancer deaths in the United States is clearly extrinsically induced—from smoking cigarettes. They are now implicated in 35 to 40 per cent of all U.S. male cancer deaths—and to an even larger percentage in England and Finland. This includes not only lung cancer, the largest cause of cancer deaths (85,000 this year in the United States, of which about 70,000—mostly men—are directly related to smoking) but also cancers of the lip, tongue, larynx, esophagus, stomach, bladder and possibly pancreas, adding an additional 30,000 to 40,

000 cancer deaths a year. Smoking, of course, involves conscious behavior, which can be changed—and cancers thus eliminated.

A portion of other cancers may also be extrinsically related to the kinds of food we eat. So far, the most likely culprit is the high-animal-fat diet, which is also implicated in abnormal blood cholesterol and heart attacks.

There is no evidence to implicate food preservatives or additives now on the market in human cancer, if there were, these would automatically be removed under the Delaney clause or other provisions of the Food, Drug and Cosmetic Act.

Thus, smoking and perhaps diet are related to one-half to three-quarters of all killing cancers in this country (we except the 300,000 or so skin cancers caused by overexposure to the sun, 95 per cent of which are curable).

What about other cancers in the United States? Between 1 and 2 per cent occur because of intense exposure to carcinogens in the workplace; an estimated 3 per cent are related to long-term exposure in the general environment; perhaps 5 per cent are related to the use of medications in controlling deadly human diseases.

As for our other cancers, we have no clue to the proximate cause. Only research can provide answers.

The American Cancer Society has led the fight against known carcinogens "in the environment." It was ACS research that first identified cigarettes as a leading cause of cancer. And the society's record of courageous follow-through on this information in educating the public in the teeth of opposition from the powerful tobacco interests needs no reiteration.

The same attitude guides the society in finding and eliminating other known causes of cancer. It was ACS research that helped identify asbestos and polyvinyl chloride as carcinogenic dangers to workers. And it was ACS activism with the involved companies and trade unions that helped to lead to control of these dangers.

Despite this clear record of vigorous public service the Post article makes the false allegation that the society's national board of directors is supposedly controlled by industrialists and bankers who direct the society's activities away from prevention, which, according to the article, would damage their economic interests.

The facts and record clearly refute these untruths.

The board of directors of the American Cancer Society, under our by-laws, includes 50 per cent physicians, scientists and other professionals; and 50 per cent laymen.

At present there is no industrialist and only one representative of a major bank on our board. The names selected by the writers of the Post article as evidence of corporate control are honorary life members, who have no vote.

An examination of our finances shows that of our total income, only 2.9 per cent comes from corporate gifts.

We are proud that some businessmen and lawyers are among those with enough community responsibility to volunteer for society work and that some have been elected by their fellow volunteers to our national board. If they choose to join in this crusade against cancer, their public spirit should be praised. Many contribute organizational and financial expertise to help make the cancer society a more effective organization.

The society's policies are based solely on scientific and medical knowledge; no individual or group in our organization could direct our energies away from any supposedly "sensitive" area. Nor in any way does the society direct the affairs or determine the priorities of the National Cancer Institute.

We cooperate very closely and will continue to do so in all ways that will contribute to greater people benefit and in ways that will continue to eliminate undesirable duplication.

R. LEE CLARK, M.D.  
FRANK J. RAUSCHER, Ph. D.

**DOES THE NATIONAL CANCER INSTITUTE GIVE TOO MUCH EMPHASIS TO CURE AND NOT ENOUGH TO PREVENTION?**

A common complaint, echoed by a recent article in the Washington papers is that although 80 to 90% of cancers are environmentally induced, the National Cancer Institute (NCI) spends far less than 80% of its budget on prevention. This argument overlooks the realities of cancer prevention.

NCI's assigned task in cancer prevention is identification of carcinogens. It has no authority to ban use or sale of carcinogens, to require warning labels, or to inspect chemical plants. It hasn't the funds for a public relations campaign to urge people to avoid specific items. All these other actions are reserved by the government to other agencies such as FDA, Department of Agriculture, OSHA, FTC, EPA, etc.

How has NCI performed its task of identifying carcinogens? They have done quite well. There is every indication that NCI, its grantees, contractors and allies such as the American Cancer Society have already identified the major environmental carcinogens that are responsible for most human cancers. They have identified many hundreds and reported them in the scientific literature over the last twenty years and more. I will not try to list all of them, but will take a few examples and then show what use has been made of the information.

1. Tobacco—the major single cause of cancer of the lip, tongue, throat and lung and a contributory cause of cancer of the esophagus, colon and probably bladder.
2. Asbestos—epithelioma.
3. Sunlight—skin cancer and malignant melanoma.
4. Radiation—many cancers and leukemia.
5. Sawdust—nose and sinuses.
6. Red dye 40—several.
7. Diethylstilbesterol (DES)—vagina and probably testis.
8. Chromium, powdered—upper respiratory tract.
9. Charcoal broiling—gastrointestinal tract.
10. Petroleum oils—several.
11. Benzidine—bladder.

**TO WHAT EXTENT HAS KNOWLEDGE OF THE CARCINOGENICITY OF THESE MATERIALS BEEN USED BY FEDERAL REGULATORY AGENCIES TO REDUCE CANCER?**

Asbestos—after some 20 years, minimal actions are being taken for the first time against asbestos exposure from building. However, thousands of tons of powdered asbestos are discharged into the air from car brake linings each year and nothing is done about it.

Red Dye 40—FDA refuses to ban it.

DES—FDA refuses to ban it in animal feed.

Petroleum oils—Diesel trucks that are badly tuned continue to pour black smoke into the air and no one stops them.

Radiation—Parts of Colorado are now contaminated by radioactive cesium and federal authorities still insist on preempting and blocking any state efforts to reduce or prevent further radioactive contamination.

Benzidine—See attached article.

**TO WHAT EXTENT HAS KNOWLEDGE OF THE CARCINOGENICITY OF THESE MATERIALS BEEN USED BY THE PUBLIC TO REDUCE CANCER?**

Tobacco—Smoking is on the increase.

Sunlight—People have not noticeably reduced their sunbathing and now use reflectors to increase the intensity of exposure.

**Sawdust**—At lumberyards, I've seen workers in clouds of sawdust without any respirators.

**Charcoal Broiling**—At backyard barbecues, charcoal is still the main fuel by an overwhelming margin. Restaurants advertise charcoal broiled steak and hamburgers.

**Petroleum oils**—People get oil over their clothing and keep working. They tolerate clouds of oil from badly tuned trucks.

Clearly in all these examples, the problem is not that NCI didn't do the studies, but that after the studies were done, few people paid attention to them. The government agencies that have the power to do something drag their feet or behave capriciously so as to call the entire issue into question.

Why is the NCI being blamed instead of the other agencies and those citizens who ignore the available information? Enclosed is a copy of a newspaper article indicating that the National Institute of Occupational Safety and Health (NIOSH) deliberately withheld information from 78,000 workers that they had been exposed to potent carcinogens. Imagine the outcry if NCI had done this!

Suppose NCI did devote the bulk of its efforts to carcinogenesis studies instead of seeking a cure? Suppose they were successful and identified every single carcinogen in our environment? The list would probably exceed 10,000. Is there any reason to believe that government agencies and the general public would be more diligent in avoiding exposure to those 10,000 than they now are in avoiding exposure to the eleven I listed?

I estimate that with present attitudes of federal regulatory agencies and the general public, if NCI came up with a complete list of all environmental carcinogens, the death rate from cancer would drop by only 1 to 2%. We need better enforcement! By contrast, NCI efforts to find cures and better treatments have already achieved better results in those with many kinds of cancer.

I believe that NCI should expand its carcinogenesis testing program to a reasonable extent. However, to do so, it will have to find a way to get around obstructions caused by the Division of Research Grants (DRG) of NIH. NCI asked DRG to set up a study section to evaluate grant applications for carcinogenesis testing using the Ames test. DRG ignored NCI suggestions on the kind of scientists for the study section and selected a group of academic purists. They promptly turned down almost all the grant applications on the grounds that they were not scientifically "innovative."

I believe there is a solution, however. If the Conference Committee appropriates a reasonable amount (over \$900 million) to NCI, it would be practical also to require each Regional Comprehensive Cancer Center to set up a carcinogenesis testing facility within a year. For this purpose, each Center would receive an additional \$250,000 allocated by the Centers Study Section. (In regions not served by a Comprehensive Center, smaller centers could be designated to set up such facilities). These facilities would be responsible for testing possible carcinogens in their areas and for reporting the results properly and promptly.

SOLOMON GARB, M.D.,  
Scientific Director, American Cancer  
Research Center.

#### AGENCY WITHHOLDS CANCER-RISK DATA

WASHINGTON.—A federal health agency hasn't informed tens of thousands of American workers whose names it has collected that they have been exposed to substances known to cause cancer, even though early warnings can result in cures or prolonged life.

The names and addresses of the 74,000 workers who stand a far greater chance of developing cancer than the general public, have been gathered in scores of statistical research projects undertaken by the Na-

tional Institute for Occupational Safety and Health over the past five years.

The head of the institute, Dr. John F. Finklea, said the workers hadn't been informed of the risks partly because his agency lacked the necessary funds and authority and partly because of his belief that notification without an effective followup system "might do more harm than good."

Finklea, a physician, said that further institute studies probably would identify 123,000 more workers who are high cancer risks, and that the question of what the government should do to help them is one of the major national health issues.

Dr. Kenneth Bridbord, head of the agency's Office of Extramural Coordination and Special Projects, said that if a government agency, corporation or union possessed the names of workers "whom they knew were at risk of cancer, and if they did not notify the workers of this risk, then all parties could conceivably be liable should any of these workers subsequently develop cancer." Finklea, asked whether the institute's inaction conflicted with his professional responsibilities as a physician, replied, "That question is being tested in the courts."

The Department of Health, Education and Welfare, the institute's parent agency, is being sued by 400 asbestos workers on the grounds that they have contracted asbestosis because the government failed to give them timely warning about this frequently fatal lung disease.

One of the dozens of research projects in which workers and former workers who faced special risks were identified involved two substances that have for more than 20 years been known to cause bladder cancer. The substances are benzidine and betanaphthylene.

Recent experience has shown that, if detected in its early stages, bladder cancer frequently can be cured.

Finklea said that because many of the workers who regularly were exposed to hazardous substances were poor and highly mobile, simply notifying them of the increased likelihood of cancer wasn't of much value.

An effective program to control cancer, he said, would require at least three other elements:

A national health care system that could provide low-income workers with medical treatment by doctors skilled and knowledgeable in dealing with occupational diseases.

A workmen's compensation system that would provide adequate payments for workers who have developed chronic diseases such as cancer because of working conditions.

A national job security program that would require companies to find jobs in less hazardous areas—without loss of pay—for workers whose health has been damaged while working with substances such as lead, coal tar pitch or benzene.

FDA IGNORES WARNINGS BY TOP SCIENTISTS—  
REFUSES TO BAN CANCER-CAUSING FOOD  
ADDITIVE

(By Leon Wagener)

Despite dire warnings by top scientists that Red Dye No. 40 causes cancer, the Food and Drug Administration (FDA) has decided to keep the food additive on the market for at least another two years while it completes more tests.

Americans consume over a million pounds of Red Dye No. 40 a year. It's found in soda, candy, ice cream and other products.

"Data from a study done on mice by Hazelton Laboratories clearly shows that Red Dye No. 40 induces lymphomas, cancer of the lymph system," said cancer specialist Dr. Samuel Epstein, professor of occupational and environmental medicine at the University of Illinois Medical Center.

"It's abundantly clear that the material is highly carcinogenic (cancer-causing). This dye poses a carcinogenic risk to millions of Americans of all ages without any matching benefits."

The dye, he said, has no purpose except to make products look "fresher and prettier than they really are." He said FDA officials should be prosecuted for failing to ban the dye to protect the public. "I would like to see the FDA officials behind bars," he stormed.

Dr. Epstein said the FDA approved the food additive for public consumption in 1970 after an initial study on its safety, a study he charged was "incomplete, shoddy and grossly inadequate."

"A second study on mice by Allied Chemical Corp.—the manufacturer of Red Dye No. 40—showed that the material was highly carcinogenic," he told The Enquirer.

Now the FDA plans to continue testing the dye two more years before it decides whether or not to ban it, he said.

"There is no reason to wait any longer—it should be taken off the market immediately," Dr. Epstein said, pointing out that the dye is banned in nearly every other nation in the world.

Dr. Michael Jacobson, a Ph.D. and co-director of the Center for Science in the Public Interest, Washington, D.C., agreed: "The manufacturers should stop using Red Dye No. 40 immediately and use a safe coloring agent. There is great likelihood that it causes cancer and represents an imminent hazard to health. The commissioner of FDA should ban it immediately."

A leading FDA pathologist and researcher told The Enquirer: "There is unequivocal evidence that Red Dye No. 40 causes cancer, but the FDA apparently is not disposed to take it off the market at this time."

"There is no other substitute for the dye now."

But an official FDA spokesman insisted that the Red Dye No. 40 tests were "preliminary" and that "there is no definitive data yet on Red Dye No. 40."

[From the Denver Post, May 11, 1977]

#### ONLY A FLUKE BLOCKED EPA CANCER TESTS ON HUMANS

WASHINGTON.—To get around a U.S. ban against testing dangerous drugs on humans, senior officials of the Environmental Protection Agency (EPA) approved a plan in 1975 to have a hospital in Mexico feed known cancer-causing fungicides to Mexican citizens in massive doses to see what effect it would have on the human thyroid.

The proposal, which would have used \$100,000 in U.S. tax money to pay for the Mexican tests, was approved by all the top echelons of EPA's Division of Criteria and Evaluation and signed by the director of that division. The proposal was blocked at the last moment only because an administrative fluke led to intervention by an EPA attorney.

The attorney, Jeffrey Howard, told Newsday he thought the plan was inhumane, "absolutely shocking . . . completely against the principles the agency was working under."

The Mexican proposal, which is outlined fully in documents obtained by Newsday, called for EPA to negotiate a \$100,000 contract with Hospital de Gineco-Obstetricia in Mexico City. One document stated: "This facility, which operates a continuing effort in the human testing of drugs for major U.S. pharmaceutical firms . . . has developed a highly specialized expertise in the field . . . of thyroid studies with human subjects."

And the proposal was quite specific about why Mexicans should be used in the studies, stating, "The recent HEW (Department of Health, Education and Welfare) moratorium on human testing has put severe constraints on the ability to have studies involving hu-

man subjects performed in the United States." Mexico had no such moratorium.

The EPA proposal called for huge doses of the carcinogenic group of fungicides known chemically as EBDC to be fed to humans. "If possible, 1,000 times (higher than the) average daily intake" that the Americans normally would be exposed to in residues of the poison that would be found on vegetables and other crops sold in food markets. The proposal noted that the fungicides (used extensively to kill fungi that damage vegetables) when fed to animals caused thyroid defects at low levels and thyroid cancer at higher levels.

It was precisely because of this cancer-causing effect in animals that some high-ranking EPA scientists wanted to test the fungicides in humans. Among them was Dr. Lamar Dale, chief of the metabolics effects branch of the division that approved the proposal.

"My question was at what level (of dosage) would there be a no-effect level upon humans, and what level would have an effect (on the thyroid)," Dale said when contacted by telephone. "Then we would have a direct knowledge of whether we had a problem."

What about the humans involved? Dale said he couldn't see "any human hazard" at the levels in the proposed Mexican tests. He added, however, "But I don't see that it (human testing) would be acceptable in today's climate (of public opinion)."

Howard resigned along with two other top officers in the EPA general counsel's office last year and accused the agency before Congress of failing to adhere to the laws in the regulation of carcinogens.

Howard said that after reading the proposal he complained to both Russell E. Train, former EPA administrator, and Edwin L. Johnson, deputy assistant administrator for EPA's pesticide program, and advised them to turn it down. Johnson then turned it down because he felt it was "unethical."

However, it was only by an administrative fluke that the proposal even reached Howard and Johnson, both men said.

The signature of Leonard R. Axelrod, head of the Criteria and Evaluation Division, who has died since the proposal was formulated was all that was needed to seek competitive bids on the project. But the fluke occurred because Axelrod sought to give the Mexican hospital a sole-source contract, without taking bids. Under EPA rules, Johnson's signature also was required for such a contract.

#### HOW EFFECTIVE HAS THE NATIONAL CANCER PROGRAM BEEN?

Two years ago, articles in the Washington newspapers and elsewhere challenged the entire concept of a National Cancer Program. A reporter charged that there had been no improvement in survival and quoted anonymous statisticians at NIH and elsewhere. Our reply at that time was that you can't have survival statistics until several years after a new treatment has started.

We now have those statistics and they come from several sources. None are anonymous.

They show that there are dramatic increases in survival rates in several cancers. Despite an overall increase in cancer incidence due to smoking, some groups are now showing a decrease in cancer death rate. Many, many more patients are having a useful, significant increase in comfortable, productive life expectancy. The following enclosures may be helpful to you.

1. Report from Metropolitan Life Insurance Company showing a drop in cancer death rate of their policyholders to 97 percent, the first such drop in history. For the general public, the rate did not drop because many people do not yet have access to the

newer treatments. We are asking you to help them get the better treatments.

2. A July 18, 1976, article in the Denver Post describing a change from a 5 percent survival rate after 30 months in 1971 to a 70 percent survival rate in 1976 in bone cancer.

3. The most recent article, in the May 17, 1977, Enquirer points out that this year, we will achieve a 50 percent cure rate for all cancers! Details are given in the article and are correct.

In my own small hospital, I can see marked improvement. We care for patients with advanced cancer whom other doctors and hospitals can no longer help. In 1971, only 11 percent of our patients were alive at the end of a year. Last year that figure was 16 percent and it's going up. I have had to add to our outpatient physician coverage to take care of the increasing number of patients who are home, living normal lives. We believe that many will achieve five year and longer survivals.

SOLOMON GARB, M.D.,  
Scientific Director, American Cancer  
Research Center.

#### PROGRESS AGAINST CANCER CUTTING DEATHS DRASTICALLY

(By John Boslough)

Researchers have made more progress in the war against cancer in the past 4½ years than "in all the previous history of medicine," says the physician member of the President's Cancer Panel.

"We're getting to the point now where we're starting to turn the corner on a number of different types of cancer," said Dr. R. Lee Clark, in Denver last week to attend the Rocky Mountain Cancer Conference.

For example, said Clark, who is president of the M.D. Anderson Hospital and Tumor Institute in Houston, Tex., the survival rate for patients with bone cancer has improved remarkably during the 1970s.

"Five years ago, there was a 5 percent survival rate after 30 months," he said. "Today the survival rate is 70 percent."

Additionally, Clark said, "we're making great progress in detecting cancers. For example, the Pap smear is now available to virtually every woman in the country, and we soon expect to have a similar test for breast cancer."

The breast-cancer test, when it becomes available within a few years, probably will be administered only to women in certain age groups, he added.

A proponent of the "War on Cancer," initiated by President Richard Nixon in 1971, Clark said the federal government spent \$763 million in cancer research in 1975 compared with \$174 million in 1971.

And, he said, the results are beginning to show.

"We've already made great headway with leukemia, both in children and adults," Clark said. "We don't have a cure, but we're getting remission rates of up to 70 percent now. So that means we're just about to turn the corner."

"And we're also getting improved survival rates for cancers of the kidney, placenta and some muscle tumors," he added. "Also for breast cancer that's spread throughout the body."

In addition to improved research, the war on cancer, which is coordinated by the National Cancer Institute (NCI), has resulted in the establishment of a number of comprehensive cancer centers throughout the nation.

In 1971, there were only three of the centers, which specialize in both cancer treatment and research. But now there are 15, including one in Denver.

Clark said NCI officials are now working to cut the time between development of a new cancer drug and its ultimate use on humans from the current 15 years to about seven years.

#### HALF OF THIS YEAR'S 690,000 CANCER VICTIMS WILL BE CURED

(By Chuck Michelini)

Half of the 690,000 Americans who get cancer this year will be cured because of stunning advances in the war against the disease.

And, according to the American Cancer Society (ACS), the two million former cancer patients alive today offer living proof that America is winning the fight against the world's most dreaded disease.

The good news in the fight against cancer was supported by top North American researchers contacted by The Enquirer.

The cancer picture has brightened considerably since 1967 when only one-third of the victims of the dread disease survived.

"This 50 percent rate is just about the best news that Americans could have this year," said Dr. Julian Ambrus of famed Roswell Park Memorial Institute in Buffalo, N.Y.

"There is reason for people to be hopeful now. It is very good news."

Another expert pleased with the present 50 percent cure rate is top oncologist Dr. Richard Jenkin of Princess Margaret Hospital in Toronto, who told The Enquirer: "Historically it is quite a landmark that we have reached the 50 percent mark."

Now, after extensive interviews with leading specialists, The Enquirer has learned of dramatically increased odds for surviving the most common forms of cancer.

Stomach cancer: "The cure rate is probably around 50 percent today," said Dr. Luther W. Brady Jr., chairman of the department of radiation therapy and nuclear medicine at Hahnemann Medical College in Philadelphia.

Ten years ago, according to the National Cancer Institute (NCI), the cure rate for stomach cancer was only 13 percent. The Cancer Society estimates that 23,000 Americans will get the disease this year.

Childhood leukemia: "Ten years ago the survival rate was about 15 percent and today there's a 50 percent chance of survival," declared Dr. Joseph Simone, leukemia specialist at St. Jude Children's Research Hospital in Memphis, Tenn.

The ACS attributed the increased cure rate to new forms of chemotherapy. This year about 2,500 children will be stricken with this disease.

Hodgkin's disease: "Fifty percent of the victims were cured ten years ago but today

the overall cure rate is slightly above 80 percent," said Dr. Jenkin. He said improved methods of radiation therapy and new chemotherapy agents are responsible for the better cure rate.

Hodgkin's disease will strike about 7,400 Americans this year.

Cancer of the uterus: "Today we can cure 80 to 90 percent of the victims," said Dr. Brady.

Ten years ago, the NCI said, the success rate was only 66 percent.

The present success is linked directly to education, improved personal hygiene and wider use of Pap tests, according to the ACS, which estimates there will be 47,000 new cases this year.

Cancer of the colon: Ten years ago the survival rate was 45 percent, according to the NCI.

"Now it stands at about 60 percent," said Dr. Brady. "Postoperative radiation therapy has had a significant impact on the potential for cure of this type of cancer."

The ACS estimates that 70,000 Americans will be stricken with the disease in 1977.

Cancer of the rectum: The NCI said the cure rate was 41 percent in 1967. "We can now cure 50 percent of the cases," said Dr. Brady.

"Postoperative radiation therapy has helped improve the situation."

The ACS says 31,000 new cases will be diagnosed in 1977.

Cancer of the prostate: The survival rate ten years ago was 56 percent, according to the NCI. "The present cure rate is probably 60 to 65 percent," said Dr. Brady.

The NCI attributes the increase to improved surgical techniques, and chemotherapy. The ACS estimates there will be 57,000 new cases of the disease this year.

Cancer of the breast: In 1967, 64 percent were cured, said the NCI. "Overall cure rate now stands at 65 to 68 percent," said Dr. Brady.

"However, we can cure about 95 percent of those women who are diagnosed early."

"The improved survival rate is caused by using combination treatments of surgery, radiation therapy and chemotherapy."

About 90,000 women will develop breast cancer this year, according to the ACS.

The American Cancer Society has acknowledged the tremendous strides in fighting cancer. In a recent report the ACS stated:

"Of the two million Americans alive today after a diagnosis of cancer five or more years ago, most can be considered cured."

The ACS emphasized that the two major factors responsible for the rising cure rates are that more people are seeking early diagnosis when warning signals of cancer appear and that cancer victims are receiving new and successful treatments.

Added a spokesman for the National Cancer Institute:

"Right now half of all cancer cases could and should be cured, but a lot of it depends on people getting to their doctor in time."

"The technology and the expertise are available."

### ENERGY FACTS

(Mr. ARMSTRONG asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. ARMSTRONG. Mr. Speaker, a few weeks ago, President Carter proposed new legislation to cope with the Nation's worsening energy shortage. He recom-

mended new and more complex price controls, tax incentives, rebates, regulations, exhortations, the creation of a new Department of Energy—to name a few components of what Mr. Carter himself termed "one of the most complicated legislative packages—that a President has ever sent to Congress."

Such a proposal provides Congress an ideal excuse to further postpone decisive action. Cloakroom gossip, usually reliable, says there will be months, probably years, of hearings before a dozen or more congressional committees; and it is doubtful that much of the President's program will survive this process.

Much as I personally regret again putting off the legislation needed to end the oil and natural gas shortages, indefinite delay of many parts of the administration program is for the best. Certainly delay is preferable to enactment of more controls and regulations, as Mr. Carter has suggested. We are already suffering from such measures.

Within the past 4 years Congress has created the Federal Energy Administration to regulate oil producers and consumers; in turn, FEA has promulgated regulations which make a pile 3 feet thick; 10,000 persons have been hired to interpret and enforce these regulations and, awful thought, to think up new regulations.

The result of this frenzy of Federal activity is as depressing as it is obvious: In 1976, domestic oil consumption reached an all-time high; but domestic oil production dropped to the lowest level since 1961; imported oil averaged 42 percent of U.S. petroleum consumption, and at some times during the year accounted for half of U.S. consumption; since 1972 the dollar costs of imported oil have jumped from \$4.3 billion to \$34.6 billion in 1976; yet petroleum accounts for a greater percentage of U.S. energy use now than it did in 1970—up from 44 percent to 46 percent. Under the circumstances, Congress would be foolhardy to agree to the President's proposals.

Over the past 4 years, I have submitted several proposals to alleviate the Nation's fuel shortage. The centerpiece of my recommendations and, in my judgment, of any plausible energy policy is decontrol of energy prices and elimination of at least the worst of the regulatory burdens.

In the near future I will discuss these issues in greater detail. As prelude to that discussion, however, I submit the following digest of energy facts.

#### I. U.S. ENERGY PATTERNS

##### A. U.S. ENERGY CONSUMPTION BY FUEL TYPE<sup>1</sup>

|                    | 1950 | 1960 | 1970 | 1975 |

#### C. THE ENERGY USERS, BY SECTOR

[In percent]

|  | 1950 | 1960 | 1970 | 1974 | 1975 |
|--|------|------|------|------|------|
| Industrial.....                        |      | 36   | 34   | 31   | 27   |
| Transport.....                         |      | 27   | 25   | 24   | 25   |
| Residential/commercial.....            |      | 23   | 24   | 24   | 23   |
| Electrical generation energy loss..... |      | 9    | 11   | 15   | 17   |
| Nonenergy (petrochemicals, etc.).....  |      | 5    | 5    | 6    | 6    |

Note: 21 percent of all energy consumed in the United States is in the form of motor gasoline.

Source: Center for Strategic and International Studies.

#### D. ENERGY EFFICIENCY

[In percent]

|                    | 1950 | 1960 | 1970 | 1974 | 1975 |
|--------------------|------|------|------|------|------|
| Energy used.....   | 53.8 | 49.4 | 50.5 | 48.5 | 47.7 |
| Energy wasted..... | 46.2 | 50.6 | 49.5 | 51.5 | 52.3 |

Source: Center for Strategic and International Studies.

#### E. ENERGY LOSS (WASTE) BY SECTOR

[In percent]

|                                  | 1950 | 1960 | 1970 | 1974 | 1975 |
|----------------------------------|------|------|------|------|------|
| Electrical power generation..... | 77.3 | 66.7 | 64.8 | 63.8 | 63.5 |
| Residential/commercial.....      | 25.0 | 30.0 | 25.4 | 26.0 | 25.0 |
| Industrial.....                  | 25.0 | 29.6 | 24.3 | 24.5 | 24.7 |
| Transport.....                   | 75.6 | 75.5 | 75.5 | 75.0 | 74.7 |

Note: For example, 63.5 percent of all energy used in generating electrical power in 1975 was wasted.

#### II. PETROLEUM

##### A. HISTORIC U.S. SUPPLY AND DEMAND PATTERNS

[In billions of barrels per year]

| Year      | Domestic demand | Domestic production | Imports | Imports as a percent of demand |
|-----------|-----------------|---------------------|---------|--------------------------------|
| 1950..... | 2.38            | 2.19                | 0.19    | 8                              |
| 1955..... | 3.10            | 2.73                | .37     | 12                             |
| 1960..... | 3.59            | 2.93                | .66     | 18                             |
| 1962..... | 3.80            | 3.04                | .76     | 20                             |
| 1964..... | 4.03            | 3.21                | .82     | 20                             |
| 1966..... | 4.41            | 3.47                | .94     | 21                             |
| 1968..... | 4.90            | 3.86                | 1.04    | 21                             |
| 1970..... | 5.37            | 4.12                | 1.25    | 23                             |
| 1971..... | 5.55            | 4.12                | 1.43    | 26                             |
| 1972..... | 5.99            | 4.34                | 1.65    | 28                             |
| 1973..... | 6.30            | 4.24                | 2.06    | 33                             |
| 1974..... | 6.08            | 3.20                | 2.88    | 47                             |
| 1975..... | 5.95            | 3.05                | 2.90    | 49                             |
| 1976..... | 6.35            | 2.96                | 3.39    | 53                             |

## B. NUMBER OF DOMESTIC OIL WELLS DRILLED ANNUALLY

| Year              | New production wells | Total wells drilled | Total wells in production |
|-------------------|----------------------|---------------------|---------------------------|
| 1950              | 24,000               | NA                  | 466,000                   |
| 1955              | 32,000               | NA                  | 524,000                   |
| 1960              | 22,200               | 40,700              | 591,000                   |
| 1962              | 21,700               | 38,700              | 592,000                   |
| 1964              | 21,000               | 38,600              | 588,000                   |
| 1966              | 15,900               | 30,500              | 583,000                   |
| 1968              | 13,800               | 26,300              | 554,000                   |
| 1970              | 12,600               | 23,400              | 531,000                   |
| 1971              | 11,400               | 21,400              | 517,000                   |
| 1972              | 10,800               | 21,400              | 508,000                   |
| 1973              | 9,555                | 19,600              | 497,000                   |
| 1974              | 12,784               | 18,000              | NA                        |
| 1975              | 16,408               | 24,000              | NA                        |
| 1976 <sup>1</sup> | 17,024               | 25,000              | NA                        |

<sup>1</sup> Preliminary.

Sources: BOM, FEA.

## C. THE PETROLEUM END-USERS—WHO ARE THEY? HOW EFFICIENT?

|                             | 1950 | 1960 | 1970 | 1974 | 1975 | Percent energy wasted, 1975 |
|-----------------------------|------|------|------|------|------|-----------------------------|
| Transport                   | 52   | 53   | 53   | 54   | 55   | 74.7                        |
| Residential/commercial      | 20   | 21   | 18   | 16   | 14   | 25.0                        |
| Industrial                  | 16   | 14   | 11   | 11   | 11   | 24.7                        |
| Nonenergy (petrochemicals)  | 7    | 9    | 11   | 10   | 10   | ( <sup>1</sup> )            |
| Electrical power generation | 5    | 3    | 7    | 9    | 10   | 63.5                        |

<sup>1</sup> Used as a product.

Note: For example, in 1960, 14 percent of all petroleum was used in the industrial sector, and the industrial sector wastes 24.7 percent of energy supplied (in 1975).

Source: Center for Strategic and International Studies.

## D. Imported oil—the dollar cost

|      | Billions |
|------|----------|
| 1960 | \$1.6    |
| 1965 | 2.1      |
| 1967 | 2.1      |
| 1968 | 2.4      |
| 1970 | 2.8      |
| 1971 | 3.3      |
| 1972 | 4.3      |
| 1973 | 7.6      |
| 1974 | 23.6     |
| 1975 | 26.6     |
| 1976 | 34.6     |

## IV. COAL

## A. U.S. CONSUMPTION AND PRODUCTION, 1950-76

[Millions of short tons per year]

|       | Domestic demand | Domestic production | Exports |
|-------|-----------------|---------------------|---------|
| Year: |                 |                     |         |
| 1950  | 491.1           | 560.4               | 29.0    |
| 1955  | 447.0           | 490.8               | 54.1    |
| 1960  | 398.0           | 434.3               | 37.7    |
| 1962  | 408.8           | 438.0               | 40.2    |
| 1964  | 445.5           | 503.0               | 49.3    |
| 1966  | 497.7           | 546.8               | 50.7    |
| 1968  | 509.0           | 556.7               | 51.7    |
| 1970  | 523.9           | 612.6               | 72.4    |
| 1971  | 502.2           | 560.9               | 58.0    |
| 1972  | 525.7           | 596.5               | 56.0    |
| 1973  | 556.0           | 591.8               | 52.0    |
| 1974  | 552.7           | 603.4               | 59.9    |
| 1975  | 556.3           | 648.4               | 65.7    |
| 1976  | 597.5           | 665.0               | 59.4    |

Note: Totals will not add because of stockpiling.

## B. The conversion loss problem

Depending on the fuel mix burned under the steam boiler, the conversion of fossil fuels to electrical energy results in a loss of 60-75 percent of the potential energy (or an efficiency of only 25-40 percent).

Older style nuclear plants have an efficiency of as low as 1 percent. With effective breeder reactors, however, the efficiency may approach 80 percent (20 percent energy waste) . . . even though the amount of heat loss is tremendous.

## C. NUCLEAR POWER, OPERABLE PLANTS AND CAPACITY

|       | Number of plants | Capacity (thousands of kilowatts) |
|-------|------------------|-----------------------------------|
| Year: |                  |                                   |

## D. The nuclear future, a few observations

1. On January 1, 1973, 131 nuclear power plants were under construction or had reactors on order.

2. By January 1, 1975, construction of 60 of those nuclear plants had been postponed 1-3 years . . . and 18 had been cancelled outright.

3. In some states, it now requires approval from 36 different local, state and federal agencies to site and build a nuclear power plant—stretching lead times to 10 years.

4. Two principal problems are still not solved to regulatory groups' complete satisfaction—the waste disposal problem and emergency reactor cooling systems.

5. Even so, electric utilities plan over 30% of the new power plants built in the next ten years as nuclear (comprising almost 60% of the generating capacity).

## OIL—A GOVERNMENT CREATED SHORTAGE

The United States is using more and more petroleum each year. But we are producing less and importing an increasing proportion of our needs from overseas sources, primarily from the OPEC nations.

In the last 5 years, U.S. production has declined from a daily average of 9.5 million barrels to 8.1 million barrels in 1976. Consumption rose from about 15 million barrels daily in 1970 to 17.3 million barrels in 1972. The embargo reduced demand somewhat, but the daily average rose to a new high of 17.4 million barrels by the end of 1976.

As a consequence, we are now dependent on foreign sources for 42 percent of our day-to-day needs. The cost of this imported oil has skyrocketed from \$2.1 billion in 1966 to \$34.6 billion in 1976, a 1,500 percent increase. And, oil producing nations are now threatening another additional price increase.

Aside from the purely financial considerations and the drain on our balance of trade and balance of payments, our heavy dependence on foreign sources for a crucial raw material has ominous geopolitical and strategic implications. It literally makes our Nation's energy-based prosperity the hostage of the oil sheikhs. Is it not about time that we face the facts about why domestic oil production is lagging and start solving the problem?

## OIL PRICE REGULATION—A FLOP

After 4 years' experience with oil price controls and substitution of bureaucratic controls and regulations for marketplace decisionmaking, the results are clear.

The regulatory bureaucracy has been spectacularly successful in creating jobs for regulators. There are over 7,300 employees at FEA alone. The regulatory scheme has promulgated a stunning number of regulations—over 3,200 pages of such regulations and proposed regulations were issued by FEA in its first year alone. The FEA manual is now over 36 inches thick, and monthly revisions add 50-100 pages at a crack. While solving some injustices, the regulations and regulators have created many new injustices, disrupted the Nation's oil industry, and imposed severe hardships on many producers, refiners, distributors, retailers, and consumers.

But all this economic regimentation has not prevented consumer price increases—gasoline has gone from about 32 cents a gallon to over 64 cents a gallon in the last 4 years. Nor has this reg-

ulation encouraged new U.S. oil production. Quite obviously, the whole regulatory scheme has had the opposite effect.

While consumer prices have responded to the unregulated prices of OPEC oil, domestic oil prices have been held below the level at which producers have an economic incentive to discover, produce, and market oil. So we are producing less oil at home and becoming even more dependent on overseas sources. The situation will surely grow worse until free market pricing is restored.

Will a return to free market oil prices result in still higher consumer gasoline and oil product prices? Probably not, although a modest price increase would be better than the present trend toward ever-increasing dependency on OPEC, which means vastly higher consumer prices and unhealthy reliance on un dependable sources.

Both letters from my own constituents and public opinion polls show that while a slight majority of the American people believe we face an energy problem, a majority also feels that the oil companies are "getting too much" and somehow to blame.

Yet both the current laws and regulations and the President's proposal do nothing to deal with one of the principal problems of the current situation. Domestic crude oil discovered in the United States before 1973 is price-regulated at \$5.17/barrel, while imported oil sells for around \$13.70/barrel.

So the current Government policy rewards U.S. companies for having explored and produced foreign oil, while penalizing domestic production.

While there is a chance that some type of oil price deregulation might cause price increases and untoward profit margins, the first priority should be a price policy which will encourage exploration, new discoveries, and new production of oil and natural gas.

Then if the resulting profits are truly windfalls, Congress could and should enact windfall tax legislation, including plowback provisions to encourage oil companies to reinvest profits in increased new production.

But the main thing is to encourage production through either gradual decontrol of prices or by legislating the end of the entire price-control allocation scheme.

## ENDING THE NATURAL GAS SHORTAGE

In the 94th Congress, I introduced legislation to end the Nation's worsening natural gas shortage by removing Federal controls on the wellhead price of natural gas. And I continue to support deregulation.

But after the worst winter for the east coast in many years, spring is here, and the natural gas crunch of 3 to 4 months ago seems largely forgotten.

The severe curtailments of gas service which have plagued many areas could have been averted if Congress had heeded warnings of the impending problem. Unfortunately, however, until gas curtailments began to close schools and factories, most Members of Congress tended to ignore the consequences of Federal price regulations which encourage consumption while virtually eliminating incen-

tives to increase, or even maintain, production.

## AN ARTIFICIAL SHORTAGE

Even now some of our colleagues are reluctant to face the central fact about the natural gas shortage—it has been artificially created by these Federal controls. Until these restrictions are eliminated, or drastically modified, the situation is bound to grow worse. And the longer a decision is delayed, the more serious the consequences will become.

Until 9 years ago, America enjoyed an abundant supply of this efficient and environmentally desirable fuel. Gas consumption rose dramatically, but production more than kept pace. Year after year, more new gas was developed than consumed; reserves steadily increased.

But in 1968 the Supreme Court upheld the Federal Power Commission's complicated system of price regulation which was imposed on all natural gas sold for transmission in interstate commerce.

The effect was dramatic. Incentive to produce new gas for interstate commerce vanished almost overnight. The Nation's total gas production leveled out after rising for years, and the country began to use more gas than was produced. By 1973 new reserve additions were less than one-third of consumption and the Nation's total natural gas reserves dropped from a 15-year supply in 1967 to a 10-year reserve in 1976.

Actual new reserve discoveries in 1976 amounted to about 7.5 trillion cubic feet—36 percent of 1976 consumption levels. And of that 7.5 TCF, only 3.5 TCF were actually new discoveries. The rest was "discovered" by revisions in existing reserves.

As Federal Power Commission regulations have held down the price of gas, more and more has been diverted to intrastate use. Even though the highest regulated price for new natural gas has been increased to \$1.42/mcf, the average price paid by gas suppliers is still only 77 cents/mcf for interstate sales. But almost all intrastate gas is being sold at close to \$2/mcf.

Consequently, new discoveries in the continental United States are mostly sold inside State boundaries—and less and less of U.S. gas is sold in interstate commerce.

## U.S. natural gas production—decline of interstate sales

|            | Production (tcf) | Percent Interstate |
|------------|------------------|--------------------|
| 1966 ..... | 17.5             | 67                 |
| 1968 ..... | 19.3             | 66                 |
| 1969 ..... | 20.8             | 67                 |
| 1970 ..... | 21.8             | 64                 |
| 1971 ..... | 22.6             | 67                 |
| 1972 ..... | 22.5             | 65                 |
| 1973 ..... | 22.6             | 62                 |
| 1974 ..... | 21.6             | 58                 |
| 1975 ..... | 20.1             | 55                 |
| 1976 ..... | 19.9             | NA                 |

<sup>1</sup> Estimate.

Sources: AGA, FEA, FPC.

As a result of these short-sighted Federal policies, shortages have plagued the Nation for the past 5 years.

In my own State of Colorado, lack of natural gas has at times closed schools, shut down factories, and slowed new home construction. In Colorado Springs, all interruptible gas customers are shut off the majority of the winter—and new customers have been added only on a replacement basis.

In Denver, the waiting list for natural gas, begun in 1973, is almost a year long, and Public Service Co. sees no improvement in sight.

Meanwhile, industries located in areas with local supplies of natural gas have a significant competitive advantage over firms which must rely on other forms of energy. Consequently, firms are foregoing plans to expand in nonproducing areas and relocating plants to take advantage of abundant natural gas available in a handful of States where it is produced in great quantity.

The magnitude of this trend—and the extent to which this premium fuel is being diverted from home heating to use by industries which could use oil or coal with proper environmental safeguards—is revealed by the consumption statistics:

Four gas-producing States already consume about 30 percent of the natural gas used in the Nation. Of this amount, 90 percent is used industrially. A large part of this consumption is used to generate electricity. Nationwide about 16 percent of all natural gas production is used to generate electricity. Four gas-producing States account for 65 percent of that amount. In summary, electric power generation in just four States accounts for 10 percent of all natural gas consumption in the United States.

Homeowners and industries elsewhere who are, in effect, prohibited from bidding on natural gas are being forced to switch to higher priced substitutes.

In Colorado Springs, for example, the city council spent \$1 million for equipment to inject a propane-air mixture into natural gas lines at times of peak demand. This cost, and the use of higher priced propane, became necessary simply because regular gas supplies were inadequate to maintain pressure in the lines on the coldest days when peak demand occurs.

Other communities have responded in other ways: Burlington, for example, maintains a large supply of fuel oil for emergency use if their interruptible supply of gas is cut off, leaving the powerplant—and city buildings, including the hospital—without service.

As municipalities and other priority users are increasingly forced to depend on propane, coal, and oil, the price of these substitutes is bid up in response to increased demand. Mobile homeowners who use propane for heating and farmers who use it extensively in crop drying were horrified when the price per gallon jumped from around 18 cents to over 60 cents within a few months. Although part of the reason for the increase was the unconsidered impact of an FEA regulation, even after that was rectified, propane has remained twice as expensive as it was 4 years ago, and an even worse price-supply crunch may develop in the future.

The price of coal has been similarly affected—since 1968, the average price per short ton for coal has gone from \$4.68 to \$20.00.

#### OTHER AREAS OF THE NATION

Although I have mentioned hardships and dislocations in my own State, the shortage of natural gas is causing similar consequences elsewhere. Recently, the Federal Power Commission turned down an oil company's request to supply domestic natural gas to New York State users at a cost of 52 cents/mcf. So instead these users ended up with imported liquefied natural gas from Algeria at \$1.86/mcf.

In New Jersey, gas curtailment levels last winter averaged 28 percent. If they rise to 30 percent next winter, the State estimates that 120,000 workers could be laid off, and that the working hours of another 40,000 employees would be reduced. In Ohio, in 1970, a 10-day shutdown of natural gas caused 1,500 man-years of unemployment.

These are just a few of many dislocations that have resulted from the Federal Government's unwise attempt to substitute administrative judgments and regulations for the efficient working of the free market. Even the Federal Power Commission, the agency which regulates the field price of gas, has repeatedly called for legislation to decontrol gas altogether. FPC studies, and much other evidence, including an ERDA study earlier this year, indicate that decontrol is the only feasible way to assure the nation a dependable supply of natural gas.

#### OBJECTIONS TO DECONTROL

The main objection to returning to free-market pricing seems to be the fear of a drastic increase in home heating costs. Such increases may be justified by comparison to other fuels which are harder to transport and use, less desirable environmentally and far more expensive on an energy equivalent basis. Fortunately, however, further higher prices to residential users do not seem likely.

Most of the burner-tip cost of natural gas to the consumer is the cost of distribution, not gas. Only about 20-25 percent of the price paid for home heating is accounted for by the fuel cost, the balance representing the distribution charges. So even if the field price of gas were to double or triple, a pessimistic estimate, I believe, the effect on most homeowners would be relatively modest, certainly far less than converting to other fuels if natural gas stocks are further depleted. And such increases would probably be phased over many years.

The alternative should also be considered. If nothing is done, and the volume of gas carried in interstate pipelines declines, the shrinking volume of gas will necessarily become more expensive as the cost of the pipeline—the major component of the cost—is amortized over fewer and fewer units of natural gas. In short, some experts believe that price increases resulting from decontrolling the wellhead price will be less than price increases inherent in the present regulatory structure. As FPC Chairman John Nassikas pointed out:

Whatever the cost of deregulation may ultimately be, it will be far less than the costs associated with current and anticipated curtailments of gas deliveries, idle pipeline capacity, high cost supplemental supplies.

#### THE FREE MARKET APPROACH

The Nation has suffered long enough as a result of this experiment with regimentation in the natural gas industry. By substituting Government decision-making for the free market, we have curtailed supply, increased costs, fostered economic dislocations, and permitted the Nation to become increasingly dependent on foreign sources of natural gas.

There are over 4,000 producers of natural gas in this country. I think it is time to turn them loose again. Let us go back to the kind of competition that provided us with abundant natural gas before and will do so again.

There is no reason to delay. This subject has been exhaustively studied and the conclusions are obvious.

By deregulating natural gas, Congress can do more to alleviate the Nation's overall energy shortage than by any other piece of legislation before Congress.

#### MORE TAXES IN THE U.S. ENERGY FUTURE?

The President has proposed a system of taxes and more taxes.

This approach should be rejected. Americans pay far too much in taxes as it is—and usually the burden falls on those least able to bear it.

While some taxes may be necessary to shift preferences where the market system does not reflect the true cost of energy—in most cases due to Government intervention—the up to \$40 billion a year which the President has proposed could drag down the economy at a time when unemployment is far too high—and without making a substantial impact on the energy problem.

For example, unemployed Americans are not likely to buy any cars, let alone smaller ones. Neither will higher taxes cause Americans to use less gas and oil if the regulations keep the price low.

And higher taxes will certainly not prompt the oil companies to look for more oil or create alternatives to our excessive cost of importing oil and natural gas.

#### TRANSITION TO NEW TECHNOLOGIES

Much has been said about the need for new technologies—from solar energy, geothermal, tidal, and wind-powered systems to the dream of unlimited clean fusion power.

All of these can and will make a substantial contribution to our energy situation, but what we need is both the time to make that transition and the encouragement of both businesses and individuals.

Some encouragement should come through the price system. How does maintaining an artificially low price for natural gas encourage the development of solar heating for homes? Deregulating natural gas prices would give a natural boost to solar heating and cooling. So would tax credits for individuals who installed their own solar heating systems.

Electric rates which place a heavy emphasis on the first kilowatt hours tend to discourage both conservation and pri-

vate power supplementation, yet many remote locations might be better off with either independent or supplementary systems. High rise buildings are prodigious wasters of electricity, but the current rate structure does not really reflect any need for conservation.

There are certainly other changes that could be made in the income tax structure to encourage technological innovation—as well as in building codes, Federal and local regulations, and transportation pricing.

All of these should be explored, especially with an eye to reducing the more meaningless and oppressive Federal regulations.

#### WHO REALLY MUST BEAR THE BURDEN?

In conclusion, I would like to comment briefly on an implicit misunderstanding which seems to complicate much of the public discussion of energy issues. It is often implied, and sometimes openly charged, that a handful of affluent consumers are using so much energy that the shortage could be largely or completely alleviated if they would reduce their consumption. So many proposed solutions to the energy problem are based on cutting off or reducing "excessive" use of energy by snowmobiles, motor boats, private aircraft, racing cars, et cetera.

Such proposals might reduce consumption marginally, but they would not solve the main problem. Over 40 percent of the demand for petroleum in 1976 was for automotive transportation. Less than 1 percent was for snowmobiles, motorboats, and private aircraft.

Moreover, American families with incomes of more than \$30,000 comprise about 10 percent of the population and have 16 percent of the cars—around 19 million. Their actual mileage per car is about the same as all American families who make more than \$7,000 a year. Since more than 70 percent of all American families make more than \$7,000 and Americans consumed over 100 billion gallons of gasoline last year, it is obvious that any real reduction in gasoline use must involve all Americans, not just a few high income gas hogs.

The same pattern holds true for natural gas consumption. According to studies by natural gas companies around the United States, there is only about a 20-percent difference in consumption levels between the highest income areas and the low income areas.

Obviously, meaningful energy proposals will affect all Americans.

Domestic oil and natural gas production are continuing to decline, and even after the embargo of 1973-74, our reliance on imported fuels continues to increase, while the prices we shell out for such fuels also skyrocket. In 1973, U.S. dependence on petroleum imports was 34 percent; in 1974 it increased to 37 percent; and this year to over 42 percent.

The failure of Congress to come up with a realistic energy policy has also created a situation where Americans who invested in the oil and natural gas business in the United States are being penalized, while Americans who invested abroad are being rewarded.

I think it is clear; we have no choice. Regardless of Government policies, political promises, self-deception, and little white lies, energy prices have gone up and will continue to go up.

Unless we choose a tremendous loss of personal freedom for all Americans which will result from the increase in Government controls and regulations, we cannot choose lower prices. As we have seen, even thousands of pages of regulations could not keep energy prices from some increase. So, more regulations, and the corresponding loss of personal freedoms are no answer.

What we can choose, however, is the kind of future we pay for with higher energy prices. Will it be one where we have new energy sources, a continuation of personal freedom, and a faith in personal initiative? Or will it be one where the Government controls energy use, legislates the morality of energy consumption, and mandates all phases of the economy?

I believe the choices we face are that fundamental and that there is no escaping a choice, because U.S. prosperity is based on energy.

Refusing to make a choice is, in effect, choosing higher prices and surrendering control of energy policy and our economy to the oil producers of the world.

Continuing the present situation is merely a "share the shortage" philosophy requiring greater and greater Government involvement as the shortages become worse, as they will.

And if the Government controls energy, it must control our most personal choices.

I feel the choices which face this Congress should be made as an active decision, rather than as a passive acceptance of current policies.

We can encourage new technologies, new discoveries, and new ways of life—or we can blindly assume that everything will somehow remain the same—and that we can scrape up another \$40 billion to pay off foreign oil suppliers this year, and the year after, and the year after, ad infinitum.

After the experience of the past 4 years, I suggest we choose the American tradition of letting Americans be free to work out solutions, rather than opting for more and more regulations.

#### LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows to:

Mr. ADDABO, for June 3 on account of death in family.

Mr. PEPPER (at the request of Mr. WRIGHT), after 3 p.m. today, on account of a death in the family.

Mr. ST GERMAIN (at the request of Mr. WRIGHT), after 4:30 p.m. today, on account of dental treatment.

Mr. SEIBERLING, for June 2 and 3, on account of subcommittee field inspection by Interior Subcommittee on General Oversight.

Mr. ZEPERETTI (at the request of Mr. WRIGHT), for today, on account of official business.

#### SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. WALKER) to revise and extend their remarks and include extraneous material:)

Mr. QUIE, for 10 minutes, today.

Mr. WHALEN, for 10 minutes, today.

(The following Members (at the request of Mr. CORNWELL) to revise and extend their remarks and include extraneous material:)

Mr. ANNUNZIO, for 5 minutes, today.

Mr. GONZALEZ, for 5 minutes, today.

Mr. FLOOD, for 5 minutes, today.

Mr. DRINAN, for 30 minutes, today.

Mr. ROBERTS, for 5 minutes, today.

Mr. CARR, for 5 minutes, today.

Mr. CORNWELL, for 5 minutes, today.

Mr. BROWN of California, for 10 minutes, today.

Mr. BRADEMAS, for 5 minutes, today.

Mr. WAXMAN, for 5 minutes, today.

Mr. DINGELL, for 5 minutes, today.

Mr. ROSTENKOWSKI, for 5 minutes, today.

Mr. BINGHAM, for 10 minutes, today.

Mr. MOSS, for 5 minutes, today.

#### EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. BOLAND, in two instances today, and to include extraneous matter.

Mr. BRINKLEY, and to include extraneous matter notwithstanding the fact that it exceeds two pages of the Record and is estimated by the Public Printer to cost \$1,127.

Mr. BAUMAN, to extend his remarks just prior to the adoption of the Brooks amendment to title I of the bill today.

(The following Members (at the request of Mr. WALKER) and to include extraneous matter:)

Mr. QUIE.

Mr. SARASIN.

Mr. HYDE in two instances.

Mr. DERWINSKI in two instances.

Mr. FORSYTHE.

Mrs. HOLT in two instances.

Mr. MCCLORY.

Mr. MCCLOSKEY.

Mr. CRANE.

Mr. MARRIOTT.

Mr. BADHAM.

Mr. BROOMFIELD.

Mr. EVANS of Delaware.

Mr. CEDERBERG.

Mr. DEL CLAWSON in two instances.

Mr. LAGOMARSINO in two instances.

Mr. BURKE of Florida.

(The following Members (at the request of Mr. CORNWELL), and to include extraneous matter:)

Mr. O'NEILL.

Mr. ANDERSON of California in three instances.

Mr. GONZALEZ in three instances.

Mr. MURPHY of Illinois.

Mr. MINISH.

Mr. RODINO.

Mr. EILBERG in three instances.

Mr. DE LA GARZA in 10 instances.

Mr. STARK in two instances.  
 Mr. MICHAEL O. MYERS.  
 Mr. COTTER.  
 Mr. VENTO in two instances.  
 Mr. HANNAFORD in two instances.  
 Mr. BENJAMIN.  
 Mr. LEGGETT.  
 Mr. RICHMOND.  
 Mr. McDONALD in five instances.  
 Mr. PHILLIP BURTON.  
 Mr. WOLFF in three instances.  
 Mr. BROWN of California.  
 Mr. YATRON.  
 Mr. VANIK in two instances.  
 Mrs. COLLINS of Illinois.  
 Mr. WEISS in two instances.  
 Mr. SIMON in two instances.  
 Mr. PATTEN.  
 Mr. HOLLAND.  
 Mr. BADILLO.  
 Mrs. SCHROEDER.  
 Mr. ANDREWS of North Carolina.  
 Mr. HARRINGTON.  
 Mr. MOSS.

#### ENROLLED BILLS SIGNED

Mr. THOMPSON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 6206. An act to authorize appropriations for fiscal years 1978, 1979, and 1980 to carry out the Commercial Fisheries Research and Development Act of 1964.

H.R. 6774. An act to make certain technical and miscellaneous amendments to provisions relating to higher education contained in the Education Amendments of 1976.

#### ADJOURNMENT

Mr. CORNWELL. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 11 minutes p.m.) the House adjourned until tomorrow, Friday, June 3, 1977, at 10 o'clock a.m.

#### EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1608. A letter from the Acting General Counsel, Office of Telecommunications Policy, Executive Office of the President, transmitting a report on the Office's activities under the Freedom of Information Act during calendar year 1976, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

1609. A letter from the Administrator, Federal Energy Administration, transmitting the first annual report on FEA employees performing functions under the Energy Policy and Conservation Act who have financial interests in energy businesses or properties, pursuant to section 522(b)(2) of the act; to the Committee on Interstate and Foreign Commerce.

#### REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. STEED: Committee on Appropriations. H.R. 7552. A bill making appropriations for the Treasury Department, the U.S. Postal Service, the Executive Office of the President, and certain independent agencies for the fiscal year ending September 30, 1978, and for other purposes (Rept. No. 95-378). Referred to the Committee of the Whole House on the State of the Union.

Mr. BEVILL: Committee on Appropriations. H.R. 7553. A bill making appropriations for public works for water and power development and energy research for the fiscal year ending September 30, 1978, and for other purposes (Rept. No. 95-379). Referred to the Committee of the Whole House on the State of the Union.

Mr. BOLAND: Committee on Appropriations. H.R. 7554. A bill making appropriations for the Department of Housing and Urban Development, and for sundry independent executive agencies, boards, bureaus, commissions, corporations, and offices for the fiscal year ending September 30, 1978, and for other purposes (Rept. No. 95-380). Referred to the Committee of the Whole House on the State of the Union.

Mr. FLOOD: Committee on Appropriations. H.R. 7555. A bill making appropriations for the Departments of Labor, and Health, Education, and Welfare, and related agencies, for the fiscal year ending September 30, 1978, and for other purposes (Rept. No. 95-381). Referred to the Committee of the Whole House on the State of the Union.

Mr. SLACK: Committee on Appropriations. H.R. 7556. A bill making appropriations for the Departments of State, Justice, and Commerce, the Judiciary, and related agencies for the fiscal year ending September 30, 1978, and for other purposes (Rept. No. 95-382). Referred to the Committee of the Whole House on the State of the Union.

Mr. McFALL: Committee on Appropriations. H.R. 7557. A bill making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1978, and for other purposes (Rept. No. 95-383). Referred to the Committee of the Whole House on the State of the Union.

Mr. WHITTEN: Committee on Appropriations. H.R. 7558. A bill making appropriations for Agriculture and related agencies programs for the fiscal year ending September 30, 1978, and for other purposes (Rept. No. 95-384). Referred to the Committee of the Whole House on the State of the Union.

Mr. JOHNSON of California: Committee of conference. Conference report on S. 521. (Rept. No. 95-385). Ordered to be printed.

Mr. MAHON: Committee on Appropriations. Report on Appropriations Committee recommendations compared with the allocation of budget totals to the Appropriations Committee for fiscal year 1978 (Rept. No. 95-386). Referred to the Committee of the Whole House on the State of the Union.

Mr. FOLEY: Committee on Agriculture. Supplemental report to H.R. 6135. A bill to amend the United States Grain Standards Act with respect to recordkeeping requirements and supervision, fees, and for other purposes (Rept. No. 95-345, pt. II). Referred to the Committee of the Whole House on the State of the Union.

Mr. JOHNSON of California: Committee on Public Works and Transportation. Report on suballocation of spending authority from the revised third concurrent resolution for fiscal year 1977, and the first concurrent resolution for fiscal year 1978 in accordance with section 302(b)(2) of the Congressional Budget Act of 1974 (Rept. No. 95-387). Referred to the Committee of the Whole House on the State of the Union.

Mr. McKAY: Committee on Appropriations. H.R. 7589. A bill making appropriations for military construction for the Department of Defense for the fiscal year ending September

30, 1978, and for other purposes (Rept. No. 95-388). Referred to the Committee of the Whole House on the State of the Union.

#### REPORTED BILLS SEQUENTIALLY REFERRED

Under clause 5 of rule X, bills and reports were delivered to the Clerk for printing, and bills referred as follows:

Referral of H.R. 6796. A bill to authorize appropriations to the Energy Research and Development Administration in accordance with section 261 of the Atomic Energy Act of 1954, section 305 of the Energy Reorganization Act of 1974, and section 16 of the Federal Nonnuclear Energy Research and Development Act of 1974, and for other purposes; to the Committees on Armed Services and International Relations, extended for an additional period ending not later than June 8, 1977.

#### PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. STEED:

H.R. 7552. A bill making appropriations for the Treasury Department, the U.S. Postal Service, the Executive Office of the President, and certain independent Agencies, for the fiscal year ending September 30, 1978, and for other purposes.

By Mr. BEVILL:

H.R. 7553. A bill making appropriations for public works for water and power development and energy research for the fiscal year ending September 30, 1978, and for other purposes.

By Mr. BOLAND:

H.R. 7554. A bill making appropriations for the Department of Housing and Urban Development, and for sundry independent executive agencies, boards, bureaus, commissions, corporations, and offices for the fiscal year ending September 30, 1978, and for other purposes.

By Mr. FLOOD:

H.R. 7555. A bill making appropriations for the Departments of Labor, and Health, Education, and Welfare, and related agencies, for the fiscal year ending September 30, 1978, and for other purposes.

By Mr. SLACK:

H.R. 7556. A bill making appropriations for the Departments of State, Justice, and Commerce, the Judiciary, and related agencies for the fiscal year ending September 30, 1978, and for other purposes.

By Mr. McFALL:

H.R. 7557. A bill making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1978, and for other purposes.

By Mr. WHITTEN:

H.R. 7558. A bill making appropriations for Agriculture and related agencies programs for the fiscal year ending September 30, 1978, and for other purposes.

By Mr. ANDERSON of California (for himself, Mr. ALLEN, Mr. CORNELL, Mr. GIBBONS, Mr. GUYER, Mrs. HECKER, Mr. SAWYER, Mr. WATKINS, Mr. WINN, and Mr. CHARLES H. WILSON of California):

H.R. 7559. A bill to amend title 38, United States Code, to provide for the payment of service pensions to veterans of World War I and the surviving spouses and children of such veterans; to the Committee on Veterans' Affairs.

By Mr. BRINKLEY:

H.R. 7560. A bill to amend title 38, United States Code, to provide for the payment of

service pensions to veterans of World War I and the surviving spouses and children of such veterans; to the Committee on Veterans' Affairs.

By Mr. CONTE (for himself and Mr. ROSTENKOWSKI):

H.R. 7561. A bill to amend title II of the Social Security Act so as to liberalize the conditions governing eligibility of blind persons to receive disability insurance benefits thereunder; to the Committee on Ways and Means.

By Mr. DINGELL (for himself, Mr. RANGEL, Mr. BONIOR, Mr. BEDELL, and Mr. GILMAN):

H.R. 7562. A bill to increase the efficiency of the production and use of electric energy, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. EILBERG:

H.R. 7563. A bill to amend title 39, United States Code, to provide for the mailing of correspondence to Members of the Congress free of postage, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. EILBERG (for himself, Mr. NIX, Mr. MICHAEL O. MYERS, Mr. LEDERER, Mr. ZEFERETTI, Mr. ERTTEL, and Mrs. MEYNER):

H.R. 7564. A bill to amend the Omnibus Crime Control and Safe Streets Act of 1968, as amended, to authorize group life insurance programs for public safety officers and to assist State and local governments to provide such insurance, and for other purposes; to the Committee on the Judiciary.

By Mr. EVANS of Delaware:

H.R. 7565. A bill to amend the Internal Revenue Code of 1954 to allow individuals a deduction for amounts paid for commuting to and from work on public transportation systems; to the Committee on Ways and Means.

By Mrs. LLOYD of Tennessee (for herself, Mr. ADDABBO, Mr. DUNCAN of Tennessee, Mr. HALL, Mr. DOWNEY, Mr. BRODHEAD, Mr. ROSE, and Mr. GILMAN):

H.R. 7566. A bill to authorize financial assistance to States for major highway repairs; to the Committee on Public Works and Transportation.

By Mr. LUNDINE (for himself, Ms. HOLTZMAN, and Mr. JENNETTE):

H.R. 7567. A bill to provide for a program, to be carried out through the Secretary of Labor, of projects and an advisory council to promote economic stability by increasing productivity, improving job security, encouraging retention of jobs in lieu of cyclical layoffs, and promoting the better use of human resources in employment; jointly, to the Committees on Banking, Finance and Urban Affairs, and Education and Labor.

By Mr. METCALFE (for himself, Mr. BADILLO, Mr. CONYERS, Mr. DIGGS, Mr. FAUNTROY, Mr. GILMAN, Mr. HAWKINS, Ms. HOLTZMAN, Mr. MITCHELL of Maryland, Mr. MOAKLEY, Mr. NOLAN, Mr. PATTERSON of California, Mr. RANGEL, Mr. SIMON, Mr. STARK, Mr. STOKES, and Mr. WAXMAN):

H.R. 7568. A bill to amend title 18 of the United States Code to establish an Office of the United States Correctional Ombudsman; to the Committee on the Judiciary.

By Mrs. MEYNER:

H.R. 7569. A bill to amend title 39, United States Code, to authorize the appropriation of funds necessary to operate the U.S. Postal Service, to provide that revenues of the Postal Service shall be deposited in the Treasury of the United States, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. MICHEL (for himself, Mr. ARMSTRONG, Mr. BADHAM, Mr. CEDERBERG, and Mr. LAGOMARSINO):

H.R. 7570. A bill to reform the food stamp program by improving and strengthening

various provisions relating to eligibility benefits and administration; improving the nutritional focus of the program; and redirecting benefits to those truly in need; to the Committee on Agriculture.

By Mr. QUIE:

H.R. 7571. A bill to amend certain programs relating to elementary and secondary education, and for other purposes; to the Committee on Education and Labor.

By Mr. RUPPE:

H.R. 7572. A bill to amend title XVIII of the Social Security Act to include prescription drugs, hearing aids, and eyeglasses (and related examinations), and dentures among the items and services for which payment may be made under the supplementary medical insurance program; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

By Mr. ST GERMAIN:

H.R. 7573. A bill to amend title 39, United States Code, to prohibit the U.S. Postal Service from reducing the frequency of weekly mail delivery service below the frequency in effect on March 15, 1977; to the Committee on Post Office and Civil Service.

H.R. 7574. A bill to amend title II of the Social Security Act so as to liberalize the conditions governing eligibility of blind persons to receive disability insurance benefits thereunder; to the Committee on Ways and Means.

By Mr. SARASIN (for himself, Mr. ANDERSON of Illinois, Mr. BADHAM, Mr. BROWN of Michigan, Mr. CLEVELAND, Mr. COLLINS of Texas, Mr. CORNELL, Mr. EMERY, Mr. ERLBORN, Mrs. FENWICK, Mr. FRENZEL, Mr. GRADISON, Mr. HYDE, Mr. KEMP, Mr. KETCHUM, Mr. MATHIS, Mr. MAZZOLI, Mr. MILFORD, and Mr. WHITEHURST):

H.R. 7575. A bill to improve the safety of products manufactured and sold in interstate commerce, to reduce the number of deaths and injuries caused by such products, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. TRAXLER:

H.R. 7576. A bill to amend title XVI of the Social Security Act to permit the payment of supplemental security income benefits to individuals in publicly operated infirmaries and other publicly operated community residences, without regard to the 16-bed limitation presently applicable; to the Committee on Ways and Means.

By Mr. ANDREWS of North Carolina (for himself and Mr. PERKINS):

H.R. 7577. A bill to amend the Economic Opportunity Act of 1964, and for other purposes; to the Committee on Education and Labor.

By Mr. BALDUS (for himself, Mr. PATTON of New York, and Mr. KASTENMEIER):

H.R. 7578. A bill to authorize the Small Business Administration to make grants to support the development and operation of small business development centers in order to provide small business with management development, technical information, product planning and development, and domestic and international market development, and for other purposes; to the Committee on Small Business.

By Mr. GEPHARDT:

H.R. 7579. A bill to amend title 18 of the United States Code to change the applicability of certain provisions now applying only to females so that those provisions apply to both males and females, and for other purposes; to the Committee on the Judiciary.

By Mr. HOLLAND:

H.R. 7580. A bill to provide for the payment of losses incurred as a result of the ban on the use of the chemical Tris in apparel, fabric, yarn, or fiber and for other purposes; to the Committee on the Judiciary.

H.R. 7581. A bill to amend the Internal

Revenue Code of 1954 to provide that certain income from a nonmember telephone company is not taken into account in determining whether any mutual or cooperative telephone company is exempt from income tax; to the Committee on Ways and Means.

By Mr. KETCHUM (for himself, Mr. LOTT, Mr. KINDNESS, Mr. GUYER, Mr. JOHN L. BURTON, Mr. WHITE, Mr. YOUNG of Florida, Mr. EDWARDS of Oklahoma, Mr. CLEVELAND, Mr. PANETTA, Mr. HARRIS, Mr. MINETA, Mr. FORSYTHE, Mr. GLICKMAN, Mr. PATTERSON of California, Mr. BAUCUS, Mr. CHARLES WILSON of Texas, and Mr. BADHAM):

H.R. 7582. A bill to repeal a restriction on the availability of health care under the civilian health and medical program of the uniformed services (CHAMPUS); to the Committee on Appropriations.

By Mr. LAFALCE:

H.R. 7583. A bill to extend the inapplicability of State usury ceilings to certain obligations issued to small businesses, agricultural entities, and other concerns by member banks and their affiliates; to the Committee on Banking, Finance and Urban Affairs.

By Mr. RAILSBACK (for himself and Mr. KASTENMEIER, and Mrs. MEYNER):

H.R. 7584. A bill to regulate lobbying and related activities; to the Committee on the Judiciary.

By Mr. SCHULZE:

H.R. 7585. A bill to amend the Federal Election Campaign Act of 1971 to prohibit certain political committees from making contributions to any candidate, and for other purposes; to the Committee on House Administration.

By Mr. SIMON (for himself, Mr. BADILLO, Mr. NIX, Mr. MOAKLEY, Mr. DRINAN, Mr. BEILSON, Mr. HARRINGTON, Mr. OTTINGER, Mr. EILBERG, Mr. NEAL, Mr. HOLLENBECK, Mrs. MEYNER, Mr. FRASER, Mr. MURPHY of Pennsylvania, Mr. PERKINS, Mr. MINETA, and Mr. GEPHARDT):

H.R. 7586. A bill to require the Secretary of Labor to establish a pilot program for the provision of guaranteed employment opportunities in selected counties of the United States; to the Committee on Education and Labor.

By Mr. WOLFF:

H.R. 7587. A bill to amend the Internal Revenue Code of 1954 to allow certain individuals whose employers make contributions to pension plans a deduction for their contributions to employer pension funds and to allow certain individuals to establish modified individual retirement plans when the employer-employee pension contributions are small; to the Committee on Ways and Means.

By Mr. MCKAY:

H.R. 7589. A bill making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1978, and for other purposes.

By Mr. CONTE (for himself and Mr. CORCORAN of Illinois):

H.J. Res. 495. Joint resolution designating "National Coaches' Day"; to the Committee on Post Office and Civil Service.

By Mr. JACOBS:

H.J. Res. 496. Joint resolution proposing an amendment to the Constitution of the United States with respect to the compelling of testimony from a defendant in a criminal case in open court, and with respect to the right of a defendant in a criminal case to be informed of the evidence against him; to the Committee on the Judiciary.

By Mr. LAGOMARSINO:

H.J. Res. 497. Joint resolution designating the period March 1, 1978, through March 7, 1978, as "National Weights and Measures Week"; to the Committee on Post Office and Civil Service.

By Mr. MARRIOTT:

H.J. Res. 498. Joint resolution proposing an amendment to the Constitution of the United States for the protection of unborn children; to the Committee on the Judiciary.

By Mr. JOHN T. MYERS (for himself, Mr. AEDNOR, Mr. ADDABO, Mr. ALEXANDER, Mr. ANDREWS of North Carolina, Mr. ANNUNZIO, Mr. ARCHER, Mr. ASHBROOK, Mr. BADILLO, Mr. BALDUS, Mr. BEARD of Rhode Island, Mr. BEARD of Tennessee, Mr. BENJAMIN, Mr. BENNETT, Mr. BEVILL, Mr. BLOUIN, Mr. BOLAND, Mr. BREAUX, Mr. BRINKLEY, Mr. BRODHEAD, Mr. BROWN of Ohio, Mr. BROWN of Michigan, Mr. BROWN of California, Mr. BROYHILL, and Mr. BUCHANAN):

H.J. Res. 499. Joint resolution to authorize the President to issue a proclamation designating the week in November which includes Thanksgiving Day in each year as "National Family Week"; to the Committee on Post Office and Civil Service.

By Mr. JOHN T. MYERS (for himself, Mr. BURGNER, Mrs. BURKE of California, Mr. JOHN L. BURTON, Mr. EUTLER, Mr. CARTER, Mr. CAVANAUGH, Mr. CEDERBERG, Mr. CLAY, Mr. CLEVELAND, Mr. COCHRAN of Mississippi, Mr. COHEN, Mr. COLLINS of Texas, Mr. CONTE, Mr. CORRADA, Mr. CRANE, Mr. DAN DANIEL, Mr. ROBERT W. DANIEL, Jr., Mr. DE LA GARZA, Mr. DELLUMS, Mr. DE LUGO, Mr. DICKINSON, Mr. DUNCAN of Tennessee, Mr. DUNCAN of Oregon, and Mr. EDWARDS of Alabama):

H.J. Res. 500. Point resolution to authorize the President to issue a proclamation designating the week in November which includes Thanksgiving Day in each year as "National Family Week"; to the Committee on Post Office and Civil Service.

By Mr. JOHN T. MYERS (for himself, Mr. EMERY, Mr. ERLBORN, Mr. EVANS of Indiana, Mr. EVANS of Colorado, Mrs. FENWICK, Mr. FINDLEY, Mr. FISH, Mr. FISHER, Mr. FITHIAN, Mr. FLOOD, Mr. FRENZEL, Mr. FUQUA, Mr. GEPHARDT, Mr. GIAIMO, Mr. GRADISON, Mr. GRASSLEY, Mr. GUYER, Mr. HALL, Mr. HAMILTON, Mr. HANLEY, Mr. HANSEN, Mr. HAWKINS, Mr. HEFNER, and Mr. HIGHTOWER):

H.J. Res. 501. Joint resolution to authorize the President to issue a proclamation designating the week in November which includes Thanksgiving Day in each year as "National Family Week"; to the Committee on Post Office and Civil Service.

By Mr. JOHN T. MYERS (for himself, Mr. HILLIS, Mr. HORTON, Mr. HYDE, Mr. ICHORD, Mr. JACOBS, Mr. JEFFORDS, Mr. JOHNSON of California, Mr. JOHNSON of Colorado, Mr. JONES of Tennessee, and Mr. LENT):

H.J. Res. 502. Joint resolution to authorize the President to issue a proclamation designating the week in November which includes Thanksgiving Day in each year as "National Family Week"; to the Committee on Post Office and Civil Service.

By Mr. CHARLES H. WILSON of California (for himself, Mrs. SPELLMAN, Mr. SOLARZ, Mr. ANDREWS of North Dakota, Mr. BAFALIS, Mr. BRODHEAD, Mr. BYRON, Mr. CAPUTO, Mr. CAVANAUGH, Mr. COLEMAN, Mr. CORCORAN of Illinois, Mr. GINN, Mr. GORE, Mr. GRASSLEY, Mr. HARRINGTON, Mr. HIGHTOWER, Mr. HUBBARD, Mr. LEACH, Ms. MIKULSKI, Mr. PATTEN, Mr. RAHALL, Mr. ROBINSON, Mr. WOLFF, Mr. YOUNG of Florida, and Mr. ZEFRETTI):

H. Con. Res. 239. Concurrent resolution expressing the sense of the Congress that the U.S. Postal Service should not reduce the

frequency of mail delivery service; to the Committee on Post Office and Civil Service.

By Mrs. SMITH of Nebraska (for herself, Mr. ASPIN, Mr. BAUCUS, Mr. BEDDELL, Mr. BEVILL, Mr. BURGNER, Mr. CORRADA, Mr. ERTTEL, Mr. EVANS of Delaware, Mr. GEPHARDT, Mr. GLICKMAN, Mr. HYDE, Mr. KRUEGER, Mr. MAGUIRE, Mr. MAZZOLI, Mr. MINETA, Mr. NEAL, Mr. QUIE, Mr. ROSE, Mr. SOLARZ, and Mr. WALGREEN):

H. Res. 612. Resolution expressing the sense of the House of Representatives that the effect on our society of the level of violence depicted on television requires more consideration and study; to the Committee on Interstate and Foreign Commerce.

## PRIVATE BILLS AND RESOLUTIONS

### Under clause 1 of rule XXII.

Mr. KETCHUM introduced a bill (H.R. 7588) to confirm a conveyance of certain real property by the Southern Pacific Railroad Co. to M. L. Wicks, which was referred to the Committee on Interior and Insular Affairs.

## PETITIONS, ETC.,

### Under clause 1 of rule XXII.

The SPEAKER presented a petition of the 26th Saipan Municipal Council, Saipan, Mariana Islands, congratulating the President and the Congress on their elections; to the Committee on Interior and Insular Affairs.

## AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 6804

By Mr. DINGELL:

Page 90, strike out line 21 and everything that follows through page 95, line 17, and insert in lieu thereof the following:

### TITLE V—ADMINISTRATIVE PROCEDURES JUDICIAL REVIEW

SEC. 501. (a) Subject to the other requirements of this title, the provisions of subchapter II of chapter 5 of title 5, United States Code, shall apply in accordance with its terms to any rule or regulation, or any order having the applicability and effect of a rule (as defined in section 551(4) of title 5, United States Code), issued pursuant to authority vested by law in, or transferred or delegated to, the Secretary, or required by this Act or any other Act to be carried out by any other officer, employee, or component of the Department, other than the Federal Energy Regulatory Commission, including any such rule, regulation, or order of a State, or local government agency or officer thereof, issued pursuant to authority delegated by the Secretary in accordance with this title. If any provision in any Act, the functions of which are transferred, vested, or delegated pursuant to this Act, provides administrative procedure requirements in addition to those provided in this title, such additional requirements shall also apply to actions under that provision.

(b) (1) In addition to the requirements of subsection (a) of this section, notice of any proposed rule, regulation, or order described in subsection (a) shall be given by publication of such proposed rule, regulation, or order in the Federal Register. Such publication shall be accompanied by a statement of the research, analysis, and other available information in support of the need for, and the probable effect of, any such proposed rule, regulation, or order. Other effective means of publicity shall be utilized as may be reasonably calculated to notify concerned

or affected parties of the nature and probable effect of any such proposed rule, regulation, or order. In each case, a minimum of thirty days following such publication shall be provided for opportunity to comment prior to the effective date of any such rule, regulation, or order; except that the requirements of this subsection as to time of notice and opportunity to comment may be waived, subject to paragraph (3) of this section, where strict compliance is found by the Secretary to be likely to cause serious harm or injury to the public health, safety, or welfare, and such finding is set out in detail in such rule, regulation, or order.

(2) Public notice of all rules, regulations, or orders described in subsection (a) which are promulgated by officers of a State or local government agency pursuant to a delegation under this Act shall be provided by publication of such proposed rules, regulations, or orders in at least two newspapers of statewide circulation. If such publication is not practicable, notice of any such rule, regulation, or order shall be given by such other means as the officer promulgating such rule, regulation, or order determines will reasonably assure wide public notice.

(3) The requirements of this subsection may be satisfied within a reasonable period of time subsequent to the promulgation of the rule, regulation, or order if the Secretary finds, under paragraph (1), that an emergency exists requiring the immediate implementation of any such rule, regulation, or order.

(c) (1) If the Secretary determines at the time of publication of a proposed rule, regulation, or order described in subsection (a) that no substantial issue exists and that such rule, regulation, or order is unlikely to have a substantial impact on the nation's economy or large numbers of individuals or businesses, the proposed rule, regulation, or order may be promulgated in accordance with section 553 of title 5, United States Code, except that subsection (a)(2) of section 553 shall not apply. If the Secretary determines at the time of publication of any such rule, regulation, or order that a substantial issue exists or that such rule, regulation, or order is likely to have a substantial impact on the nation's economy or large numbers of individuals or businesses, an opportunity for oral presentation of views, data, and arguments shall be provided.

(2) Any person, who would be adversely affected by the implementation of any proposed rule, regulation, or order issued pursuant to the first sentence of paragraph (1) and who desires an opportunity for oral presentation of views, data, and arguments, shall offer evidence supporting the existence of such substantial issues or such impact during the period established for public comment. If the Secretary determines that such evidence is sufficient to establish the existence of such issues or impact, the Secretary shall provide an opportunity for such oral presentation.

(3) Following the notice and comment period, including any oral presentation required by this subsection, the Secretary may promulgate such rule, regulation, or order, which shall include therewith an explanation responding to the major comments, criticisms, and alternatives offered during the comment period.

(4) A transcript shall be kept of any oral presentation with respect to a rule, regulation, or order described in subsection (a).

(d) The Secretary, or any officer authorized to issue rules, regulations, or orders under the Federal Energy Administration Act, the Emergency Petroleum Allocation Act of 1973, the Energy Supply and Environmental Coordination Act of 1974, or the Energy Policy and Conservation Act shall provide for the making of such adjustments, consistent with the other purposes of the rele-

vant Acts, as may be necessary to prevent special hardship, inequity, or unfair distribution of burdens, and shall, by rule, establish procedures which are available to any person for the purpose of seeking an interpretation, modification, or rescission of, exception to, or exemption from, such rule, regulation, or order. The Secretary or any such officer shall additionally insure that each decision on any application or petition requesting an adjustment shall specify the standards of hardship, inequity, or unfair distribution of burden by which any disposition was made, and the specific application of such standards to the facts contained in any such application or petition. If any person is aggrieved or adversely affected by a denial of a request for adjustment under the preceding sentences, such person may request a review of such denial by the Secretary and may obtain judicial review in accordance with this title when such a denial becomes final. The Secretary shall, by rule, establish appropriate procedures, including a hearing when requested, for review of a denial, and where deemed advisable by the Secretary, for considering other requests for action under this subsection, except that no review of a denial under this subsection shall be made by the same officer denying the adjustment.

(e) (1) With respect to any rule, regulation, or order, the effects of which, except for indirect effects of an inconsequential nature, are confined to—

(A) a single unit of local government or the residents thereof;

(B) a single geographic area within a State or the residents thereof; or

(C) a single State or the residents thereof; the Secretary shall, in any case where appropriate, afford an opportunity for a hearing or the oral presentation of views and provide procedures for the holding of such hearing or oral presentation within the boundaries of the unit of local government, geographic area, or State described in paragraphs (A) through (C) of this paragraph as the case may be.

(2) For purposes of this subsection—

(A) the term "unit of local government" means a county, municipality, town, township, village, or other unit of general government below the State level; and

(B) the term "geographic area within a State" means a special purpose district or other region recognized for governmental purposes within such State which is not a unit of local government.

(3) Nothing in this subsection shall be construed as requiring a hearing or an oral presentation of views where none is required by this section or other provision of law.

(f) (1) Judicial review of agency action taken under any law the functions of which are vested by law in, or transferred or delegated to, the Secretary or any officer, employee, or component of the Department shall, notwithstanding such vesting, transfer, or delegation, be made in the manner specified in such law.

(2) Notwithstanding the amount in controversy, the district courts of the United States shall have exclusive original jurisdiction of all other cases or controversies arising under this Act, or under rules, regulations, or orders issued exclusively thereunder, other than any actions taken to implement or enforce any rule, regulation, or order by any officer of a State or local government agency under this Act, except that nothing in this section affects the power of any court of competent jurisdiction to consider, hear, and determine in any proceeding before it any issue raised by way of defense (other than a defense based on the unconstitutionality of this Act or the validity of action taken by any agency under this Act). If any such proceeding an issue by way of defense is raised based on the unconstitutionality of this Act,

or the validity of agency action under this Act, the case shall be subject to removal by either party to a district court of the United States in accordance with the applicable provisions of chapter 89 of title 28, United States Code. Cases or controversies arising under any rule, regulation, or order of any officer of a State or local government agency State court, or (B) without regard to the amount in controversy, the district courts of the United States.

(3) Where authorized by any law vested, transferred, or delegated pursuant to this Act, the Secretary may, by rule, prescribe procedures for State or local government agencies authorized by the Secretary to carry out such functions as may be permitted under applicable law. Such procedures shall apply to such agencies in lieu of this section, and shall require that prior to taking any action, such agencies shall take steps reasonably calculated to provide notice to persons who may be affected by the action, and shall afford an opportunity for presentation of views (including oral presentation of views where practicable) a reasonable time before taking the action.

(4) Notwithstanding any other law, the litigation of the Department shall be subject to the supervision of the Attorney General pursuant to chapter 31 of title 28, United States Code. This paragraph shall not apply to the Federal Energy Regulatory Commission.

Sec. 502. (a) Section 501 of this title shall remain in effect for two years after the effective date of this Act. Any proceeding commenced under such section prior to the termination of its effect shall, notwithstanding such termination, be conducted in accordance with such section. Orders shall be issued in such proceedings, appeals shall be taken therefrom, and payment shall be made pursuant to such orders as if such section had not terminated; and orders issued in any such proceedings shall continue in effect until modified, terminated, superseded, or revoked by a duly authorized official, by a court of competent jurisdiction, or by operation of law. Nothing in this section shall be deemed to prohibit the discontinuance or modification of any such proceeding under the same terms and conditions and to the same extent that such proceeding could have been discontinued or modified if such section had not terminated.

(b) Within one year after effective date of this Act, the Secretary shall submit a report to Congress concerning the actions taken to implement section 501. The report shall include a discussion of the adequacy of such section from the standpoint of the Department and the public, including a summary of any comments obtained by the Secretary from the public about such section and implementing regulations, and such recommendations as the Secretary deems appropriate concerning the extension and revision of such section.

(c) Nothing in this title shall be construed as repealing by implication any existing provision of law relating to administrative procedures and judicial review applicable to any authority vested, transferred, or delegated pursuant to this Act, except that such existing provisions shall, to the extent provided by section 501, be superseded by the provisions of such section during the two years specified in subsection (a).

By Mr. ECKHARDT:

Insert the following new section to Title V:

Sec. 503(a) If upon investigation, the Secretary or his authorized representative believes that a person has violated any regulation, rule, or order promulgated pursuant to the Emergency Petroleum Allocation Act, he may issue a remedial order to the person. Each remedial order shall be in writing and shall describe with particularity the nature

of the violation, including a reference to the provision of the rule, regulation, or order alleged to have been violated. For purposes of this section "person" includes any individual, association, company, corporation, partnership, or other entity however organized.

(b) If within thirty days from the receipt of the remedial order issued by the Secretary, the person fails to notify the Secretary that he intends to contest the remedial order, the may be heard in either (A) any appropriate remedial order shall become effective and shall be deemed a final order of the Secretary and not subject to review by any court or agency.

(c) If within thirty days from the receipt of the remedial order issued by the Secretary, the person notifies the Secretary that he intends to contest a remedial order issued under subsection (a) of this section, the Secretary shall immediately advise the Economic Regulatory Administration of such notification. Upon such notice, the Administrator shall stay the effect of the remedial order except where he finds the public interest requires immediate compliance with such remedial order. The Administrator shall, upon request, afford an opportunity for a hearing, including the submission of briefs, evidence (oral or documentary) and oral arguments. To the extent that the Administrator in his discretion determines such is required for a full and true disclosure of the facts, he shall afford the right of cross examination. The Administrator shall thereafter issue an order, based on findings of fact, affirming, modifying, or vacating the Secretary's remedial order, or directing other appropriate relief, and such order shall, for the purpose of judicial review, constitute final agency action.

(d) The Secretary may set reasonable time limits for the Administration to complete action on a proceeding referred to it pursuant to this section.

(e) Nothing in this section shall be construed to affect any procedural action taken by the Secretary prior to or incident to initial issuance of a remedial order which is the subject of the hearing provided herein, but such procedures shall be reviewable in the hearing.

By Mr. MATHIS:

Add the following new section to Title V—Administrative Procedures and Judicial Review:

"Sec. 502. (a) (1) Notwithstanding any other provision of this Act, simultaneously with promulgation or repromulgation of any rule or regulation, the agency promulgating or repromulgating the rule or regulation shall transmit a copy thereof to the Secretary of the Senate and the Clerk of the House of Representatives. Except as provided in paragraph (2), the rule or regulation shall not become effective, if—

"(A) within 90 calendar days of continuous session of Congress after the date of promulgation, both Houses of Congress adopt a concurrent resolution, the matter after the resolving clause of which is as follows: 'That Congress disapproves the rule or regulation promulgated by dealing with the matter of, which rule or regulation was transmitted to Congress on the blank spaces therein being appropriately filled; or

"(B) within 60 calendar days of continuous session of Congress after the date of promulgation, one House of Congress adopts such a concurrent resolution and transmits such resolution to the other House, and such resolution is not disapproved by such other House within 30 calendar days of continuous session of Congress after such transmittal.

"(2) If at the end of 60 calendar days of continuous session of Congress after the date of promulgation of a rule or regulation, no committee of either House of Congress has reported or been discharged from further

consideration of a concurrent resolution disapproving the rule or regulation, and neither House has adopted such a resolution, the rule or regulation may go into effect immediately. If, within such 60 calendar days, such a committee has reported or been discharged from further consideration of such a resolution, or either House has adopted such a

resolution, the rule or regulation may go into effect not sooner than 90 calendar days of continuous session of Congress after its promulgation unless disapproved as provided in paragraph (1) (A).

"(b) (1) The agency may not promulgate a new rule or regulation identical to one disapproved pursuant to this section unless a

statute is adopted affecting the agency's powers with respect to the subject matter of the rule or regulation.

"(2) If the agency proposes a new rule or regulation dealing with the same subject matter as a disapproved rule or regulation, the agency shall comply with the procedures required for the issuance of a new rule or regulation.

## EXTENSIONS OF REMARKS

### MUNICIPAL CHILD HEALTH SERVICES, CAMBRIDGE, MASS.

HON. THOMAS P. O'NEILL, JR.

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. O'NEILL. Mr. Speaker, during this period of rising health costs and the Congress commitment to enact national health insurance I would like to bring to the attention of my colleagues a health care program from my hometown of Cambridge, Mass., that has actually reduced the cost of health care for children. The success of this program is described in the following memorandum given to me by the city of Cambridge and the Robert Wood Johnson Foundation.

#### MUNICIPAL CHILD HEALTH SERVICES, CAMBRIDGE, MASS.

Cambridge, Massachusetts is successfully providing comprehensive medical and hospital services to 9,000 inner-city children, mainly through nurse practitioner staffed clinics located in schools, and at a cost of \$100 per child per year. Furthermore, the program has been created by shifting existing public health, municipal hospital and school resources and has not required federal or foundation grants or large increases in local taxes.

Since the program began in 1968, it has:

Cut in half the inappropriate use by children of emergency services at Cambridge Hospital, while use of these services by a control group went up or remained stable.

Dropped the prevalence of blood lead levels in preschoolers from 7% to 0.5%.

Cut the rate of anemia in one to two year olds from 16% to 4%, and in two to three year olds from 22% to 7%.

Increased the immunization level city-wide from 55% in 1966 to 97% in 1974 for children entering school.

The program has been developed by Philip Porter, M.D., Director, Department of Pediatrics at Cambridge Hospital. When he came to Cambridge in 1965, he was confronted with a pediatric emergency service that was heavily used for routine medical care by parents from the eastern half of Cambridge. The reasons for this "misuse" were clear. These families—approximately 60,000 people in all—were blue-collar or on welfare and were served by one pediatrician at the point of retirement and twelve general practitioners (no new physicians had entered practice in the poorer half of Cambridge in 15 years).

In 1967 the city voted to merge the municipal hospital and health department, and Dr. Porter became overall director of all pediatric services. Determined to develop a pediatric care system within a few years which cared for children from birth to age 16, he replaced retiring school nurses with pediatric nurse practitioners and stationed

them in five primary care clinics, four of which are located in schools. Cambridge has a neighborhood school system, so these clinics are all within easy walking distance for the people with the greatest need for medical services. They are staffed five days a week, twelve months a year by the nurse practitioners who serve as combination school-public health nurses and primary care practitioners for school and preschool children in the neighborhoods.

As the school nurse, the nurse practitioner manages medical problems and keeps the required records, but the annual physical has been abandoned. Instead, each year teachers are interviewed by the pediatric nurse practitioners to identify kids that seem to have physical or behavioral problems. When questioning reveals anything that suggests possible pathology, the child is seen by the nurse practitioner, who then refers to Cambridge Hospital pediatricians all children who are suspected of having either medical or behavioral problems requiring definitive diagnosis and care.

The clinical activities of the pediatric nurse practitioners encompass all of the routine procedures in a general pediatric office practice. This includes the "routine, periodic look, weigh and measure" of well-baby care, plus diagnosis and treatment of upper respiratory infections, sore throats, otitis media, and skin problems. The nurses also counsel mothers on problems related to raising children.

The pediatric nurse practitioners are specifically charged with the responsibility of ensuring that all referral appointments are kept and that problems they identify are managed or resolved by a physician or other appropriate specialist.

The health department's part of the system—the primary care network and the school health program—costs less today in 1965 dollars than the ineffective 1965 operation did. Total cost of the pediatric system—hospital and primary care network, including school health—is estimated at \$100 per child/year. The primary care network alone accounts for \$35 per child/year of the total.

### PROTECTING THE RIGHT TO LIFE OF UNBORN CHILDREN

HON. DAN MARRIOTT

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. MARRIOTT. Mr. Speaker, today I introduced a joint resolution to amend the Constitution and protect the right to life of unborn children and make abortions illegal except to save the life of a mother.

The right to life is sacred, and along with many of my colleagues and millions of Americans, I am alarmed by the

indiscriminate spread of abortions in this country, thus violating that right. I believe very firmly that something should be done to reverse that trend. This bill is my attempt to do that.

According to the latest figures available at the Center for Disease Control in Atlanta, Ga., in my home State of Utah in 1975 there were 2,146 reported abortions, or 68 for every 1,000 live births. The national average was 274 abortions per 1,000 live births, for a total of 854,853 in the Nation.

And the most shocking statistic was right here in Washington, D.C., where there are more than 1,000 abortions for every 1,000 live births—and those are only the reported ones. New York City came in second, sharing the same distinction of reporting more abortions than live births. To me, that is an alarming and unacceptable trend.

The notion that a human fetus is not a person is apparently the major justification for such a situation. Well, that is purely and simply wrong. An embryo is an individual. True, it depends on its mother for life-supporting fluids and nutrients, but it has its own biological system, needing only time and the proper nourishment to become a self-supporting human being.

My resolution would clarify the terminology in the 5th and 14th amendments, where it says all "persons" have the right to life and are protected from the government or anyone else taking that life away.

With my amendment, the word "person" would be interpreted to include "unborn human offspring." Thus, our embryonic citizenry would be guaranteed the same rights the rest of us boast so loudly about but so casually deny the defenseless, unseen, unborn child. The only exception should be when the life of the mother is threatened by an impending birth.

There is little need, as I see it, to refute the idea that an individual have complete control over another life simply because it would inconvenience his lifestyle. To destroy a life simply to avoid the responsibility of rearing a child is narrowminded and selfish and goes against the grain of any right-thinking person. If there is a question about the life of the mother, that is a different story. But embarrassment over a pregnancy is no justification for abortion. Even in cases of rape, the resulting child would be considered a blessing by couples who cannot have children of their own and would be willing to adopt it.

The question of overpopulation is also

a fallacious excuse for abortion. We have the technology and resources to feed and house many times the number of people in America. We need to concentrate on making America a better place to live for the children of the future rather than stopping them from coming here.

And what about mentally and physically deficient parents? Should not a child from such a union be done away with so as to spare it a life of misery and unhappiness? Here is a case that will answer that question without doubt: A doctor was once presented with a case involving a man and wife who discovered they were going to have a child. The father was syphilitic and the mother had epilepsy. When asked what he would do with the unborn child, the doctor replied, "Abort it."

"Then you would have killed Beethoven," came the answer.

None of us can ever know what potential unborn children have, and I do not think young potential mothers really want the responsibility of denying precious life to their own flesh and blood. I have seen too many sadly remorseful girls who have had an abortion and are haunted constantly by the impact of their decision.

I sincerely hope this amendment is accepted by both Houses and then is subsequently ratified by the States, so that we can put an end to the indiscriminate spread of abortion and protect the God-given rights of future generations.

#### TRIBUTE TO ILLINOIS' CFC CHAIRMEN

#### HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. HYDE. Mr. Speaker, I would like to take this opportunity to publicly commend 22 Federal employees in Illinois who recently served as chairmen in their area for the Combined Federal Campaign. This annual fundraising drive, conducted among Federal civilian and military employees across the country, benefits a variety of health and social service organizations.

Mr. Richard Lockhart who serves as the coordinator for the 14 national health agencies in Illinois has informed me that this year's drive in Illinois was the most successful to date producing a total pledged amount of \$2,735,426. Contributors have the option of designating their donations to specific agencies. Through this method the health agencies of Illinois will receive \$284,286—32 percent, the United Way, \$559,927—63 percent, and the international service agencies, \$46,316—5 percent. Final distribution of contributions to these fine organizations is \$656,943—24 percent—to the health agencies; \$1,894,831—69 percent—to the United Way; and \$180,204—7 percent—to the international service agencies.

These excellent results are in large part due to the time and effort put forth by each CFC chairman. Their work on the fundraising drive comes in addition to their regular duties in Government. Because of their fine demonstration of leadership and generosity, I would like to commend them at this time.

Adams County CFC: Ernest Bickhaus, Social Security Administration.

Aurora CFC: Ernest Grob, Air Route Traffic Control Center.

Carbondale CFC: Hubert Goforth, U.S. Post Office.

Carroll County CFC: Arlen Dahlman, Savannah Army Depot.

Champaign County CFC: Colonel Daryl Rhyner, Chanute Air Force Base.

Cook-DuPage Counties CFC: Frank Resnik, GSA.

Elgin CFC: George Beckwith, Post Office.

Jefferson County CFC: Boyd Holmes, Social Security.

Kankakee County CFC: Clark McKenna, Post Office.

Knox County CFC: Bill Tipsword, Post Office.

Lake County CFC: Capt. William Lamm, Great Lakes Naval Base.

LaSalle-Peru CFC: Joseph Zandecki, Post Office.

McLean County CFC: Robert Buhrke, Post Office.

Macon County CFC: J. D. Myers, IRS.

Peoria County CFC: Emmett Russell, Post Office.

Rock Island County CFC: Robert Glese, U.S. Army Arsenal.

Sangamon County CFC: Ben Thompson, FFA.

St. Louis (Madison & St. Clair Counties) CFC: Col. James St. Clair, Defense Mapping Agency.

Vermilion County CFC: Dee Schaffer, Social Security.

Will County CFC: Charles Caton, Post Office.

Williamson County CFC: B. J. Tolson, U.S. Penitentiary.

Winnebago County CFC: Alfonso Mera, Post Office.

#### CONSUMER PROTECTION IS MORE THAN LAWS

#### HON. ELFORD A. CEDERBERG

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. CEDERBERG. Mr. Speaker, once again, the Congress is being requested to create a Federal agency to protect the consumer interest. Even if the consumer interest can be defined with sufficiency, it is questionable whether another layer of Federal bureaucracy could adequately protect it.

The proposed function of the Agency for Consumer Protection does not include addressing consumer complaints. Rather, it would possess broad powers, without any accountability, to challenge the platform of any Government activity on the behalf of "consumer interest."

The granting of this unchecked power is unwise. Additionally, the new layer of bureaucracy would only add to the red-tape and regulation that encumbers the Federal Government and erodes the consumer interest. Finally, the new agency

would add to the financial burden of running the Federal Government without any guarantees or certainty of corresponding benefits.

These disadvantages and the availability of more promising alternatives have raised many objections from those who are truly concerned with the consumer interest. In a recent editorial, reproduced from the Wall Street Journal, the Daily News-Banner, located in Greenville, Mich., in the 10th Congressional District, expressed the growing concern of many taxpayers and consumers concerning the Agency for Consumer Protection.

I would like to take this opportunity to share with my colleagues this editorial which I think expresses well the problems of this legislative proposal:

[From the Greenville (Mich.) News-Banner, Apr. 22, 1977]

#### CONSUMER PROTECTION IS MORE THAN LAWS

Congress is once again considering creation of a Consumer Protection Agency and since Jimmy Carter, not Jerry Ford, is President, it has a better chance than last time around. We've been wondering once again why it is that we don't think much of the idea, since we count ourselves consumer defenders of long standing.

The answer boils down to one thing: We have doubts whether the backers of the CPA, and thus the people who would likely have influence in the staffing of this new government agency, are philosophically attuned to the consumer's interests. Do they really want consumers to have a wide choice of products and services at the lowest possible prices or do they just want more laws?

The two approaches may in some instances be compatible, but usually not. Laws that affect the manufacture and distribution of consumer products usually are restrictive preventing manufacturers or distributors from doing this or that—like maybe putting saccharine or cyclamates in a diet soft drink.

Restrictive laws reduce the consumer's range of choices—between say, a shoddy but cheap product and a high quality but expensive one. They also, by definition, reduce the potential for competition.

This newspaper has always felt that the interest of consumers were best served by a minimum of barriers to market entry and free competition. That is why it has supported, at odds with segments of the business community, such causes as unrestricted international trade—so that U.S. consumers will be free to buy Datsuns and Sonys if they choose—or elimination of the so-called "fair trade" laws, which barred retailers from cutting prices on certain branded merchandise.

Now it just might be possible that a CPA would be staffed by people who would fight crusades to break down legal barriers to entry into the various markets. If so, it could perhaps be useful.

But given the past crusades of the Naderites and others who style themselves "consumerists," we have stronger visions of a CPA that would lobby for laws that would actually deny consumers goods and services by trying to legislate prices down and quality up. Such laws end up serving as legislation against the consumer rather than for him. The word "market" is simply another name for consumers everywhere making free, voluntary choices of what to sell and how much to ask. Anything that thwarts this process is not consumerist at all. Until we are firmly assured that the CPA would promote rather than thwart free markets, we will view it with skepticism.

—Wall Street Journal.

## UKRAINIAN ARRESTS

## HON. WILLIAM S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. BROOMFIELD. Mr. Speaker, when the Final Act of the Helsinki Conference on Security and Cooperation in Europe was completed in 1975, it raised many hopes among the peoples of Europe and the whole world. The completion of the Conference was truly an outstanding achievement—a landmark in worldwide diplomacy.

The issues negotiated at the historic Helsinki Conference were considered under four categories or "baskets": First, political-military security in Europe; second, economic, scientific, technical, and environmental cooperation; third, cultural and humanitarian cooperation; and fourth, the consideration of a follow-up conference. Already several initial steps have been taken to implement many of the "confidence-building" measures of the act such as improved cooperation in the areas of economics science, technology, and the environment. At the same time, however, progress in the very important humanitarian area known as Basket Three, has been uneven, to say the least. In particular, there have been numerous difficulties in providing for the freer movement of people, ideas, and information, as recently reported by the congressional mission to the Commission of Security and Cooperation in Europe.

To some extent, difficulties over Basket Three have resulted because of several escape clauses to this particular part of the agreement. Just as importantly, however, has been the idea that some of the signatory states do not desire the full implementation of the human rights provisions of the Helsinki agreement. For these reasons, citizen groups were formed in some of the signatory states in order to better monitor full compliance with the terms of the Helsinki accord.

Throughout the Soviet Union, for example, citizen groups were formed to insist on the full and true implementation of the agreement. One such group has been the Ukrainian public group to promote the implementation of the Helsinki accords. Led by Mykola Rudenko, a writer and poet, this group has tried to better acquaint the Ukrainian public with the Helsinki agreement and provide for a freer flow of information and ideas.

On February 5 of this year, Mykola Rudenko and a Ukrainian group associate, Oleksa Tykhy, were arrested by the KGB. These arrests were followed by the arrests of two more group members, Mykola Matysevych and Myroslav Marynovych. All four arrests are indicative of the continued Soviet policy of harassment for dissidents, and in particular, Ukrainian dissidents.

Recently, there has been a sharp increase in the Soviet repression of stubborn opposition to "Russification," the

long term goal of Soviet authorities to homogenize all minorities into one "Soviet nation." This has been especially true in the Ukraine, an area large and fertile enough to be a major European nation.

Just as importantly, the arrests of these Ukrainian dissidents who not only insist that national rights but also human rights be respected by Soviet leadership, continues to damage the spirit of the Helsinki accords. On June 15 of this year, the first post-Helsinki meeting of the 35 signatories is to begin. We must, to the fullest extent possible, express our concern for the continued Soviet repression of these dissidents and insure that the Soviet Union and Warsaw Pact countries do not attempt a post-Helsinki whitewash. It is only in this way that we can provide for a new and better Europe and in particular, fully guarantee the dignity and the rights of all individuals affected by the Helsinki accords.

THE 31ST ANNIVERSARY OF  
DEMOCRACY IN ITALY

## HON. JOSEPH G. MINISH

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. MINISH. Mr. Speaker, today, on the 31st anniversary of democracy in Italy, I feel it is appropriate for us to reflect on the many contributions made by every generation of Italians.

When Italy cast aside its final days of monarchy to embrace democracy, it did so knowing of the firm foundation of past greatness on which it could build. Beginning in the days of the Roman Empire and continuing through the present, Italians have made important contributions to the arts, engineering, political thought, and religion. No one would deny that Italian genius has ranked in the forefront of those serving the greater good of mankind.

From Giotto and Cimabue in the 13th century, through Da Vinci and Raphael, Titian and Michaelangelo, Italian artists ranked second to none. In music, such noteworthy developments as the musical staff and the refinement of operatic style can be attributed to Italians.

Italian writers, from Dante to Petrarch, have ranked among the world's greatest. Luigi Pirandello, the Nobel prize winning playwright, is an inspiration to the young playwrights of today. And in the most modern of arts, the cinema, Italian film makers such as Fellini, Antonioni, and deSica are recognized among the greats of the film world.

The list could go on: Columbus, Galileo, Machiavelli, Marconi, Fermi. Obviously, without the contributions of these and others, the world would be a poorer place in which to live.

And so, today, with the memory of consistent Italian greatness fresh in our minds, let us also be mindful of Italy's

current struggle to sustain democracy. It is my utmost hope that the Italian nation, which has done so much to shape the world as we know it, will achieve the success and freedom for which it has so long striven.

EDUCATION FOR VIETNAM  
VETERANS

## HON. LESTER L. WOLFF

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. WOLFF. Mr. Speaker, earlier this year I introduced H.R. 2231, the Comprehensive Veterans Readjustment Assistance Act of 1977. Since that time this legislation has been cosponsored by more than 70 of my colleagues in the House.

As many of my colleagues are aware, there presently exists a structural inequity in the GI Bill which denies many of our most needy and deserving Vietnam veterans access to readjustment programs. The legislation which I have introduced would cure these deficiencies by establishing a system of accelerated entitlement and, under certain circumstances, extend the present 10-year delimiting date for a maximum of 2 years for those veterans who were unable to initiate or complete their education.

I am pleased to be able to inform my colleagues who have joined with me in cosponsoring this legislation that the Washington Post, in a Memorial Day editorial, endorsed this legislation stating that it deserves the "immediate attention" of the Congress. For the benefit of my colleagues who may have missed this editorial, I now submit it for the RECORD:

## THOSE WHO SERVED—CONTINUED

Among those reflecting upon the meaning of Memorial Day, we would assume, are approximately eight million veterans of the Vietnam years. For many of them, it comes as one more painful reminder that this country still lacks a comprehensive program to deal with their needs and entitlements. It cannot have escaped their notice that a nation capable of prolonged discussion and strong emotion on the merits of amnesty for no more than 10,000 young men who did not serve—by evading the draft—is strangely incapable of dealing equitably with those who served, including two and a half million who actually went to Vietnam and 400,000 who suffered wounds. To examine some of the current attitudes about Vietnam-era veterans is to see graphically why so many of them feel ignored or frustrated. It is also to understand why those who are trying to help them are finding it so difficult.

There is, to begin with, the GI Bill itself. At the moment, many of the most needy veterans are denied meaningful access to educational assistance. The GI Bill was inadvertently structured to provide benefits to veterans with access to low-cost public institutions. The problem is that many states and cities have few, if any, of these institutions. Sen. Alan Cranston, chairman of the Veterans Affairs Committee, has spoken of this unfairness and has pledged to "explore the matter and to come up with a remedy." Un-

fortunately, the leadership of the House Veterans Committee and, surprisingly, the new administrator of the Veterans Administration, Max Cleland, have not made a similar commitment. Another group with limited access includes some veterans who are married and have children; for them, the GI Bill's allowances are too low to be meaningful. Veterans with less than high-school educations are often left out also. Still another group is the one comprised of veterans who fought during the years 1966 to 1972; they were discharged at a time when benefits in many states were effectively so low that the most needy could not afford to go to school.

A second problem is the lack of attention given to the personal adjustment problems of Vietnam veterans, especially the disabled. Many came home unthanked and unnoticed for their sacrifice. Being forgotten became one of the heaviest emotional burdens, particularly as South Vietnam collapsed and the country's leaders were content, as President Ford urged, to put Vietnam behind us. One of the government's failures is that it hasn't conducted the research to learn how widespread the emotional problems may be. One unofficial VA estimate holds that one out of five new veterans suffers serious and prolonged readjustment problems.

From these examples alone—and there are others—it is clear that, despite the efforts of a few public officials as well as some of the more alert veterans groups, there is no coherent national policy for dealing with the problems of returned service personnel. It is not as though solutions are unknown, or that teachers, counselors and others are unwilling to work individually with the veterans. An article on the opposite page today tells the story of a few people involved in programs that are as worthwhile on the local level as they are deserving of support from higher levels.

In other words, it can be done—it just isn't being done enough.

At the moment, Congress is considering an across-the-board increase in GI benefits. This approach, as a recent report to the National League of Cities and the U.S. Conference of Mayors notes, is far from ideal: It may overcompensate those veterans who already are receiving too much, while others will remain without access to schooling. Rep. Lester Wolff (D-N.Y.), along with 75 cosponsors, has introduced legislation that would accelerate the availability of GI Bill benefits. This bill and another—providing tuition equalization—deserve immediate attention.

Evidence suggests that the veterans have a number of supporters scattered throughout Congress. But it is the responsibility of the President to pull together that support, as well as coordinate the energies of his own administration. In January, the Secretary of Labor, with considerable fanfare, announced a \$1.3 billion program to provide more jobs for veterans. Four months later, unemployment among veterans remains high with veterans groups still awaiting signs of effective followup. One issue that has aroused the anxiety of these groups is that the mandatory veterans quotas—ones assuring that the jobs go to veterans rather than others—have been dropped from the administration's bill now on its way through Congress.

The President has spoken movingly of the plight of the Vietnam veterans. But his actions—the efforts to provide a form of amnesty for deserters and veterans with "bad paper" discharges, the hastily assembled jobs program—fall short of the sort of comprehensive, high-priority approach that is needed. Today, as always, we salute those who served and suffered in all wars—and, above all, those who gave their lives. But our urgent concern is with the veterans of the Vietnam

years—and with the unfinished business of that war.

## TV AND CONGRESS

### HON. ROBERT MCCLORY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. MCCLORY. Mr. Speaker, the President of the United States has demonstrated the effectiveness of television in promoting programs and policies of his administration. The Members of the Congress are becoming more aware each day of the disadvantage which they are experiencing while the President—and the executive branch—tend to dominate the TV medium while sessions of the Congress are never seen by television viewers except when the President himself appears at a joint session of the Congress.

Mr. Speaker, as some of our States have shown, there is wide public interest in the sessions of State legislative bodies—particularly when issues of great importance are being debated.

Mr. Speaker, for too long the efforts to authorize the televising of sessions of the House of Representatives have languished in the Rules Committee with no definitive policy having been established for televising our sessions. I am confident that limited televising of the debates which occur here in this Chamber would attract widespread attention, increase public knowledge—and add to the reputation and respect for the Congress as an institution.

Mr. Speaker, the distinguished journalist, Roscoe Drummond, commented upon this subject in a most constructive way in a recent May 18 issue of the Christian Science Monitor. I am attaching hereto Mr. Drummond's column:

#### TV AND CONGRESS

(By Roscoe Drummond)

WASHINGTON.—I should like to offer a postscript to The Christian Science Monitor's insightful series on how TV is changing our society.

It has changed some things well and many things badly.

But it hasn't changed the Congress of the United States at all.

It is time they got together. Both would benefit—and the public most of all. Live commercial television ought to get acquainted with Congress and Congress ought soon to make peace with TV. They have been strangers far too long. A respectful alliance between the two could go a long way—at a very needed time—to bring Congress closer to the voters and to enable it to do its job better.

Each has its reasons for ignoring the other and most of these reasons are outworn, outmoded, and disproved. Live commercial TV just automatically assumed that covering Congress effectively at firsthand would produce too small an audience and too little profit. And the congressmen feel that living color would make them seem more inept or irrelevant than they sometimes are.

It seems fantastic bordering on the incredible that floor debates in both the Senate and the House are being blacked out 53 years

after the first piece of legislation was put forward to permit radio coverage and 33 years after the original bill was introduced to allow television coverage!

Congress prides itself on being a great deliberative body, but isn't this carrying deliberation a little too far?

Especially when experience in the use of television in the state legislatures has proved altogether acceptable to the legislators and welcome by the public.

At first state legislators were apprehensive that TV would turn the sessions into a circus that would make voter opinion even more critical than it already is.

It hasn't worked out that way and Congress ought to take notice and bring itself into friendly terms with the one instrument of communication which can do most to make government into a better and more responsive partnership between those who vote in the elections and those who vote in the legislatures.

In nearly every state the results of broadcasting the debates have been positive. The substance of legislation has visibly improved under its impact and public interest in the business of government has been heightened.

And right now is the moment when it can render the greatest service. Watergate and cynicism have been largely dissolved. Voters are demanding the right and the opportunity to make their views count in the decision-making process of government. The movement is toward a greater voter participation. To bring Congress into closer contact with its constituents and to bring the voters into more direct communication with Congress will be a boon at the most opportune moment.

After watching the instrument of television from the sidelines, as if they weren't quite sure it is here to stay, and holding back more than three decades, the congressmen ought to quit fooling around and make television a tool of democratic governing.

A minute beginning is in prospect. Last year the majority leader of the House stonewalled a bill which would have authorized such broadcasts and thereby kept it from going to a vote. This year he has moved an inch or two; that is, he is prepared to allow a test of closed-circuit television—not to the public—but to the offices of the members!

Time was when the state legislatures were the experimental proving ground for new social legislation. Now the states are leading the way in the modern use of television to put government in the drawing rooms of the voters. It's working well. Congress, please take notice.

## SILVER ANNIVERSARY OF TEMPLE BETH SHALOM

### HON. MARK W. HANNAFORD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. HANNAFORD. Mr. Speaker, in just a few days, a noted house of worship in the 34th Congressional District of California will be celebrating its silver anniversary.

I hope all of my colleagues in the House of Representatives will join with me in commemorating this most joyous anniversary of Temple Beth Shalom in Long Beach.

For the past quarter-century, Temple Beth Shalom has served as a leading community resource for Greater Long Beach and as a spiritual asset for its

large and vibrant congregation. Mr. Speaker, I have personally watched Temple Beth Shalom grow and serve the community, and I feel that no institution is more worthy of our congratulations.

Let today's CONGRESSIONAL RECORD reflect the heartfelt best wishes of the 95th Congress on this landmark in the history of Temple Beth Shalom. May God's blessings continue to protect this holy place.

#### WHEN THE DOOR IS CLOSED TO ILLEGAL ALIENS, WHO PAYS?

**HON. PAUL SIMON**

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. SIMON. Mr. Speaker, few problems we face are as complex and perplexing as the problem of illegal aliens. We have a serious unemployment problem in this Nation which compounds all the difficulties. I have met with fruit-growers who have given me their side of the story. I have talked with the aliens and the relatives of the aliens. Perhaps our colleague Representative E DE LA GARZA summarized it best when I asked him a few weeks ago what the answer is, "The answer primarily rests in Mexico rather than in the United States." His answer—which increasingly I believe is correct—is a good illustration why we have to work with other countries to solve problems of poverty and population explosion.

Yesterday's New York Times had an article by Prof. Wayne A. Cornelius, of Massachusetts Institute of Technology, which sheds some light on this problem. I am having it inserted into the RECORD:

WHEN THE DOOR IS CLOSED TO ILLEGAL ALIENS,  
WHO PAYS?

(By Wayne A. Cornelius)

CAMBRIDGE, MASS.—A very predictable thing happens in this country whenever the economy takes a sharp turn for the worst: The illegal alien is rediscovered. Politicians, journalists, organized labor, and other interest groups rush to blame him for every imaginable problem afflicting American society, from high unemployment to rising crime rates, escalating social-service costs, overpopulation, and balance-of-payments deficits.

Immigration authorities crank out ever-more-frightening "guess-timates" of the numbers of illegal aliens "silently invading" the country. The public is warned in urgent and ominous tones that illegal aliens are out to take their jobs away and add billions of dollars to their tax bills.

We are now witnessing yet another "rediscovery" of the illegal alien. Pressures for new restrictive measures—particularly legislation that would impose civil or criminal penalties and fines on United States employers who "knowingly" hire illegal aliens—have mounted steadily. Such restrictive measures form the core of the policy package reportedly recommended to President Carter by his Cabinet-level task force on illegal aliens, and they have been proposed repeatedly by various members of Congress.

The case for a more restrictive immigration policy is based on three principal assumptions: that illegal aliens compete effectively with, and displace, large numbers

of American workers; that the benefits to American society resulting from the aliens' contribution of low-cost labor are exceeded by the "social costs" resulting from their presence here; and that most illegal aliens entering the United States eventually settle here permanently, thus imposing an increasingly heavy, long-term burden upon the society.

There is as yet no direct evidence to support any of these assumptions, at least with respect to illegal aliens from Mexico, who still constitute at least 60 to 65 percent of the total flow and more than 90 percent of the illegal aliens apprehended each year.

Where careful independent studies of the impact of illegal immigration on local labor markets have been made, they have found no evidence of large-scale displacement of legal resident workers by illegal aliens. Studies have also shown that Mexican illegals make amazingly little use of tax-supported social services while they are in the United States, and that the cost of the services they do use is far outweighed by their contributions to Social Security and income tax revenues.

There is also abundant evidence indicating that the vast majority of illegal aliens from Mexico continue to maintain a pattern of "shuttle" migration, most of them returning to Mexico after six months or less of employment in the United States. In fact, studies have shown that only a small minority of Mexican illegals even aspire to settle permanently in the United States.

While illegal aliens from countries other than Mexico do seem to stay longer and make more use of social services, there is still no reliable evidence that they compete effectively with American workers for desirable jobs. The typical job held by the illegal alien, regardless of nationality, would not provide the average American family with more than a subsistence standard of living. In most states, it would provide less income than welfare payments.

Certainly in some geographic areas, types of enterprises, and job categories, illegal aliens may depress wage levels or "take jobs away" from American workers. But there is simply no hard evidence that these effects are as widespread or as serious as most policy-makers and the general public seem to believe.

The notion that curtailing illegal immigration will significantly reduce unemployment among the young, the unskilled, members of minority groups, and other sectors of the United States population allegedly being displaced by illegal aliens may prove to be a cruel illusion.

Many of the jobs "liberated" in this way are likely to be eliminated through mechanization or through bankruptcy of the enterprises involved, and many others cannot be "upgraded" sufficiently—even with higher wages and shorter hours—to make them attractive to native workers.

While the benefits of a more restrictive immigration policy to the American worker have been grossly exaggerated, the costs of such a policy to both the United States and the illegal aliens' countries of origin have been consistently underestimated.

The impact of "closing the door" to illegal aliens will be felt by the American consumer, in the form of higher prices for food and many other products currently produced with alien labor. Failures among small businesses—those with 25 or fewer employees, which hire more than half of the illegal aliens from Mexico—will also increase, eliminating jobs not only for illegals but for native Americans.

But the adverse impact of restrictive measures will be felt most intensely in Mexico, which is currently struggling to recover from its most serious economic crisis since the 1930's. At least 20 percent of the population—

and a much higher proportion of the rural labor—depend upon wages earned in the United States for a large share of their cash income.

An employer-sanction law that is even partly effective in denying jobs to illegal aliens is likely to produce economic dislocations and human suffering on a massive scale within Mexico. This will not be simply a problem for Mexico; the implications for United States economic and foreign policy interests are obvious.

All available evidence indicates that employer sanctions and other restrictive measures—short of erecting a Berlin-type wall—will fail to deter economically desperate Mexicans from seeking employment in the United States.

In the long run, every dollar that is spent trying to enforce new restrictive policies would be much better spent on programs to reduce the "push" factors within Mexico and other sending countries that are primarily responsible for illegal immigration: rural unemployment and underemployment, low incomes, and rapid population growth.

For example, studies indicate that resources invested in labor-intensive, small-scale rural industries could significantly reduce the flow of illegal aliens within five to eight years.

In the short run, the best approach would be an expanded program of temporary worker visas permitting up to six months of employment in the United States each year. A temporary-worker program that did not require a prearranged contract between the alien worker and a particular United States employer (in contrast to the former *bracero* program of contract labor) would minimize exploitation of alien workers while reducing illegal immigration and keeping open a critically important safety valve for Mexico. It would also benefit United States workers, since the use of legal alien labor is likely to have a less depressing effect on wages and working conditions than the use of illegal alien labor.

It is ironic that a more restrictive immigration policy is being advocated by many at a point in our history when declining birth rates, the end of unlimited legal immigration, and an American labor force with more education and higher job expectations than ever before all foreshadow a shortage of workers to fill low-skill, low-wage, low-status jobs in the United States economy. When this occurs, in the not-to-distant future, the aliens who are now viewed as a burden on United States society may be seen as a highly valuable asset.

#### OSHA FINALLY FACING UP TO MORE OF THE REAL ISSUES

**HON. BRUCE F. VENTO**

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. VENTO. Mr. Speaker, the new Occupational Safety and Health Administration focus announced recently by Labor Secretary Ray Marshall and Assistant Secretary of Labor Eula Bingham has been hailed by the Washington Post in an editorial on May 26, 1977.

The Carter administration deserves high praise from all Americans for taking an agency plagued with troubles and giving it new direction, without once relaxing its commitment to the saving of human lives at the workplace.

The Post editorial speaks for itself and I submit it herewith:

## OVERHAULING OSHA

OSHA—the name has become synonymous with federal regulation gone awry. In part it's a bum rap, because the Occupational Safety and Health Administration has taken effective action against vinyl chloride and some other serious threats to workers' health. The agency has suffered, though, from indifferent leadership and a tendency to dissipate its resources on nit-picking programs and trivial rules. While many of the tales about OSHA inspections and requirements have been overblown, there has been enough truth in them to fuel the folklore about bureaucratic paternalism and pettiness. In short, OSHA has not been as bad as its critics maintain—but neither has it been as persistent and purposeful as it should be.

Labor Secretary Ray Marshall and Assistant Secretary Eula Bingham are now setting out to give the beleaguered agency more focus and force. Their plan, announced last week, includes something for everyone. Organized labor, congressional committees and the General Accounting Office should like the decision to concentrate on substantial health and safety problems in high-risk industries such as construction, manufacturing, transportation and petrochemicals. Business groups should applaud the new emphasis on simplified regulations, voluntary compliance and consultation, and fewer inspections of small businesses in low-risk fields.

If pursued with enough determination, this sensible strategy should make OSHA much more effective—but not necessarily more popular. Indeed, a vigorous regulatory campaign, especially against health hazards, is bound to take OSHA even farther into areas full of scientific uncertainty and political strain. Workers these days are exposed to a host of substances whose effects on human health are not fully understood. Even where something is known to be toxic, the precise degree of risk—or an acceptable amount of exposure—may be very hard to calculate, and the costs of full protection can run very high. There are no simple formulas for weighing all the variables and determining how much a company, an industry or society in general should invest to safeguard a given number of lives.

The Carter administration is not shying away from these tough problems. Last month the Labor Department announced an emergency crackdown on workers' exposure to benzene, a petroleum derivative generally believed to cause leukemia. Though the United Rubber Workers and other unions have been urging such a step for years, some labor spokesmen have criticized the proposed 90 percent reduction as inadequate. Petroleum companies, on the other hand, are challenging the order as excessive in some respects.

As the OSHA overhaul proceeds, more controversies of this sort are bound to arise. Indeed, they should be welcomed, as evidence that government and society are finally facing up to more of the real issues of industrial health and safety in a world of complex technology.

HUMAN RIGHTS RESOLUTION OF  
CAPITOL REGION CONFERENCE  
OF CHURCHES

## HON. WILLIAM R. COTTER

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. COTTER. Mr. Speaker, I would like to take this opportunity to share the following declaration on human rights

with my colleagues. It was adopted recently by the Capitol Region, Hartford, Conference of Churches:

THE CAPITOL REGION  
CONFERENCE OF CHURCHES,  
Hartford, Conn., May 27, 1977.

President JAMES CARTER,  
The White House,  
Washington, D.C.

DEAR PRESIDENT CARTER: The Spring Assembly of the Capitol Region Conference of Churches at which 150 delegates were present adopted the following resolution:

Whereas, God's love is magnificent and extends to all beings,

Therefore be it resolved that the General Assembly of the Capitol Region Conference of Churches recognizes a universal demand and God-given purpose of inalienable human rights, applauds the commitment of this nation to human rights as expressed by President Carter in his Inaugural Address and commends him for his valiant and steadfast actions to fulfill that commitment.

We are encouraged by your concern for human rights and applaud your efforts.

Sincerely,

Rev. Dr. DAVID D. MELLON,  
Executive Director.

## FIDDLING WITH HEALTH

## HON. ROBERT E. BAUMAN

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. BAUMAN. Mr. Speaker, President Carter's proposal to place an artificial limit on hospital costs is contrary to every basic law of economics and commonsense. The Banner, published in Cambridge, Md., suggested in a recent editorial that the President would be well advised to propose something besides the "thoroughly discredited and thoroughly dangerous tool" of price controls if he wants to do something worthwhile to stop the cost spiral in health care. I strongly agree with the Banner's comments and commend them to the Congress:

## FIDDLING WITH HEALTH

The American economy is such a complex thing that if you push down here, something far over there is likely to pop up. Flip this switch, and the ground shakes miles away. Pull that lever, and the whole thing might collapse like a house of cards.

The interrelationship of cogs and wheels and gears and cams and levers and shafts is so intricate that no man or group of men can comprehend the whole machine. Most men, however, are wise enough not to fiddle.

President Jimmy Carter is fiddling. His proposal to clamp a lid on runaway hospital costs undoubtedly strikes a resonant chord among millions of wheezing, irregularly thumping American breasts. Not just the sick, however, but all Americans who pay taxes are suffering from rising costs of medical care.

In 1976, when the consumer price index increased about seven per cent, health care costs increased at double that rate. In 1950, hospital care cost \$16 a day. By 1966 that figure had risen to \$48. Now it is \$154 to \$175 a day. An American family of four pays an estimated \$2,600 per year on health care, or about \$650 per person. Twelve cents of every dollar the federal government spends goes to health care. Other statistics could be cited, and they are equally disturbing.

The motivation to fiddle, therefore, is very strong. But, as we have stated in an earlier editorial, price control cannot be imposed on one part of the health care system—hospital costs—without leading to price controls throughout the system and, inevitably, throughout the entire economy.

The American Hospital Association has vowed "united opposition from both hospitals and physicians" to the Carter plan. We hate to say it, but the "heavies" in this little drama are correct.

The federal government has a constructive role to play in keeping hospital costs and all other costs from going through the roof. It can ensure greater efficiency and better utilization of medical resources. It can make it harder on crooked doctors and malpractice-happy attorneys. But it cannot do any of these things through price control, a thoroughly discredited and thoroughly dangerous tool in the hands of fiddlers.

THE 100TH ANNIVERSARY OF THE  
PRESENCE OF THE SISTERS OF  
NOTRE DAME DE NAMUR IN THE  
SACRED HEART PARISH, SPRING-  
FIELD, MASS.

## HON. EDWARD P. BOLAND

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. BOLAND. Mr. Speaker, I recently had the privilege of attending a liturgy of thanksgiving marking the 100th anniversary of the presence of the Sisters of Notre Dame de Namur in the Sacred Heart Parish, Springfield, Mass. On May 15, I joined with hundreds of other parishioners of Sacred Heart in a Mass celebrated by the bishop of Springfield, the Most Reverend Christopher J. Weldon, his coadjutor, the Most Reverend Joseph Maguire, and 18 other concelebrants to pay tribute to the devotion of these holy women. Mayor William Sullivan of Springfield, an alumnus of the school, acted as a lector, as did Sister Eileen Sullivan, the provincial superior of the order.

The sisters became the first faculty in the Sacred Heart Elementary School, which opened in 1877 in the first parish building, a combination school and parish hall dedicated in 1874. The sisters first came to Sacred Heart at the invitation of Father McDermott, the first pastor of Sacred Heart Parish. They have taught and trained the youth of the parish for the last 100 years in the same spirit of giving which prompted their arrival in the parish's formative years.

Three hundred thirty students were enrolled the first day that the parochial school of Sacred Heart was opened, and the school was staffed with seven sisters. Sister Johanna acting as superior. Today the enrollment is 1,000 students and there are 29 teaching sisters under the direction of Sister Superior Agnes Philipps. From a humble beginning—down through the years to the present—the sisters of Notre Dame have labored endlessly for the spiritual and temporal welfare of the children of Sacred Heart parish.

The record of the sisters of Notre Dame at Sacred Heart is a glorious one. Their

ideals are as real today as they were when their foundress, Saint Julie, first directed them to teach and train the little ones to love God and devote themselves to duty. The parish of the Sacred Heart is perpetually grateful to the Order of Notre Dame for the Christian family education which the good sisters have given to so many hundreds of boys and girls these past 100 years.

As time has passed, there have been many changes in educational methods and Notre Dame has modified its courses of study as conditions demanded or warranted. Yet, there has been no change in that ideal of devotedness to duty that is a mark of the sisters of Notre Dame.

So, it is in this memorable year, as we celebrate the 100th anniversary of Notre Dame at Sacred Heart, that I wish to raise my voice in recognition of the splendid achievements of these beloved sisters, to witness their love and loyalty to Notre Dame and pray God to bless their work—not only at Sacred Heart, but in their worldwide mission, so that they may continue to draw souls closer to God and His Mother, to whom their lives are dedicated.

#### THE FLYING DUTCHMEN

#### HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. YATRON. Mr. Speaker, we often hear complaints to the effect that today's youth is largely an aimless group, hardly the peer of young people in years past. However, every day I am encouraged by evidence that such complaints are, for the most part, unfounded.

Today, I take considerable personal pride in bringing to the attention of my colleagues, one such encouraging event. During the week of June 5 through June 11, the Flying Dutchmen Aeromodelers of Reading, Pa., will hold a 6-day model air show. The aeromodelers' program helps publicize a hobby which has brought great recreational enjoyment to young and old alike. Not only does aeromodeling provide young people with an educational pastime, but through its broad appeal to all age groups, it helps bridge the generation gap. Members of the Flying Dutchmen, for example, range in age from 9 to 78.

The Flying Dutchmen show team is one of seven groups in the country nationally sanctioned by the Academy of Model Aeronautics, the national governing body of airplane model clubs. At the request of the national headquarters, 12 members of the 50-member group will represent model aviation in exhibits in Pennsylvania as well as in other States. Among the seven designated show teams, the Reading group is the only one flying control line planes rather than radio-operated models. The Flying Dutchmen have promoted their activities by conducting 6-week courses on a regular

basis for civic groups and other organizations.

It is a source of great optimism in view of the quickening pace of American life, that clubs such as the Flying Dutchmen Aeromodelers continue to flourish and grow, attracting people who, regardless of age, are young-at-heart. The value of the group's activities such as Berks County Model Aviation Week is best summarized by a recent statement made by Mr. Alvah Schaeffer, show team president:

My wife files with me. It's a family hobby, and as a matter of fact we look for Flying Dutchmen members who apply to the club as a family unit.

The aeromodelers have my most genuine admiration and my highest commendation for their outstanding contributions to the community of Reading and Berks County.

#### ILLEGAL ALIENS

#### HON. MORGAN F. MURPHY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. MURPHY of Illinois. Mr. Speaker, our country is silently being invaded by an army of illegal aliens. While illegal immigrants are here to seek the American dream, many persons fear they may be destroying it for others.

The Immigration and Naturalization Service—INS—which administers the immigration laws, reports there are between 6 and 8 million illegal aliens now living in the United States. At a time of high unemployment, illegal aliens are taking hundreds of thousands of jobs away from Americans, because of their willingness to work for low wages.

The INS estimates that today there are over 1 million jobs held by illegal immigrants that could be filled by Americans. If U.S. workers held those jobs, our unemployment rate could drop from 7.3 to 6.3 percent.

In addition, illegal aliens are burdening our severely strained social welfare system. Aliens are getting on Medicare and Medicaid rolls, sending their children to public schools, and getting free medical treatment at hospital emergency rooms. All told, INS believes that illegal aliens cost American taxpayers \$13 billion per year in social services.

It is not surprising, then, that Americans favor changes in immigration policy. According to an April 24 Gallup poll, an overwhelming 82 percent of the public say they support a law prohibiting employers from hiring aliens without proper papers. And some 42 percent favor a decrease in present immigration levels.

A task force created by President Carter has sent him a legislative package dealing with the problem of illegal immigration. While there may be some points that need further consideration, the basic thrust of the proposals is sound.

Mr. Speaker, I would like to draw my

colleagues' attention to an article I have written for my weekly news column on the subject of illegal immigration:

#### THE SILENT INVASION OF ILLEGAL ALIENS

(By Representative MORGAN F. MURPHY)

Give me your tired, your poor,

Your huddled masses yearning to be free . . .

These words, inscribed on the Statue of Liberty, are America's welcome to immigrants seeking a better life. Traditionally, America has enjoyed and clung to its image as the land of opportunity to the rest of the world.

But as our population has grown and economic conditions have worsened, the U.S. has had to take a second look at its immigration policies.

The reason: our country is silently being invaded by an army of illegal immigrants. As a recent article in Time magazine pointed out, these "invaders," eager to share in America's bounty, are coming by land, sea, and air. Some hop planes, others jump ships, and some even pass through the San Antonio sewer system. While illegal immigrants are here to seek the American Dream, many persons fear they may be destroying it for others.

Who are the illegal aliens? Eight out of ten come from Mexico, which has an unemployment rate of almost 40 per cent. Mexicans who are able to find a job may be paid as little as \$1 per day.

Where do they live? Most illegal immigrants work on farms in the South or Southwest. But a growing number live in large Northern cities, where they work as dishwashers, porters, laundrymen, and busboys.

Currently, only 290,000 persons are allowed to migrate to the U.S. each year. That contrasts with the four million immigrants who settled in our country shortly after the turn of the century.

But this seemingly strict immigration quota has not been enforced. The Immigration and Naturalization Service (INS), which administers the immigration laws, reports there are between six and eight million illegal aliens now living in the U.S.

The number of illegal immigrants has increased dramatically over the past sixteen years. For instance, last year the INS apprehended and expelled 875,000 illegal aliens—almost ten times the number expelled in 1961.

Because of the recession, the problem of illegal immigration finally has caught the eye of the public and government officials. At a time of high unemployment, illegal aliens are taking hundreds of thousands of jobs away from Americans because of their willingness to work for low wages.

For example, Time magazine reported that even though Houston is enjoying a building boom, there is widespread unemployment among union carpenters. This is because contractors are waiting to hire Mexican immigrants who will work for less than the minimum wage. The INS estimates that today there are over 1 million jobs held by illegal immigrants that could be filled by Americans. If U.S. workers held those jobs, our unemployment rate could drop from 7.3 per cent to 6.3 per cent.

In addition, Time noted that illegal aliens are adding new burdens to our social welfare system. Aliens are getting on Medicare and Medicaid rolls, receiving free medical treatment at hospital emergency rooms, and sending their children to public schools. In 1975, 370 illegal aliens seized in New York were found to have received \$500,000 in welfare payments. All told, the INS believes that illegal aliens cost American taxpayers \$13 billion per year in social welfare services.

It is not surprising, then, that Americans favor changes in immigration policy. Accord-

ing to an April 24 Gallup poll, an overwhelming 82 per cent of the public say they support a law prohibiting employers from hiring illegal aliens without proper papers. And some 42 per cent favor a decrease in present immigration levels. (Only 7 per cent favor an increase, and 37 per cent support present immigration levels.)

What can be done about illegal immigration? On April 27, a task force created by President Carter sent him a legislative package dealing with this problem.

Among the recommendations:

Civil fines for employers who knowingly hire illegal aliens. (Currently there are no penalties.)

Stricter enforcement of wage-and-hour laws to reduce employers' incentives to hire aliens.

Tougher patrol of the 2,000 mile-long Mexican border.

Economic aid to Mexico, with an emphasis on farming projects, to help reduce that country's persistent unemployment problem.

Amnesty for illegal aliens who have lived long enough in the U.S. to build up substantial "equity."

Not all of the recommendations have been readily accepted. Some employers insist that many low-paying or high-risk jobs would go unfilled if they could not hire aliens. Others believe that the risk of penalties could result in discrimination against Hispanics, since employers might be afraid of hiring potential illegal aliens.

While there may be problems with some of the particulars of the package, the basic thrust of the proposals is sound. America should maintain its image as the land of opportunity, but we must also send out a sobering message to the world that our resources are not unlimited.

#### CITY'S MOST DISTINGUISHED SERVANT

#### HON. ROBERT E. BADHAM

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. BADHAM. Mr. Speaker, I would like to bring to the attention of my colleagues a special event that is about to take place in the city of Newport Beach, Calif. on June 9, 1977 in honor of one of the city's most distinguished public servants. A retirement testimonial dinner is being held for Newport Beach Police Chief B. James Glavas by the "10-4" Club of the Newport Harbor Chamber of Commerce in cooperation with the Newport Beach Employees Association.

The event is designed to thank Chief Glavas for his outstanding service and reflect on his 16-year tenure as the city's top law enforcement official and on his numerous professional accomplishments.

Chief Glavas has served as president of the Southern California Juvenile Officers Association—1959, president of the California State Juvenile Officers Association—1961, president of the Orange County Chiefs of Police Association—1967, president of the California Peace Officers' Association—1972-73. Currently he sits on the executive board of the International Association of Chiefs of Police.

In addition to his professional accomplishments he has made a major contribution in the field of teaching and

youth services. An instructor for 17 years in police science, he has taught at both the University of Southern California and at the California State University at Los Angeles. He has served on many community advisory committees, including: The Pueblo District Council for the Boy Scouts of America; Youth Study Center at USC; Citizens Advisory Committee to the Attorney General on Juvenile Violence; and the Harbor Area Boys Club.

It is with a touch of regret I say goodbye to Chief Glavas because my constituents of the 40th Congressional District as well as myself and my family who live in Newport Beach are losing a fine law enforcement official and administrator. But I extend my hearty congratulations on the conclusion of a fine career and best wishes to Jim and Melva Glavas for a happy and prosperous retirement.

#### TREASURY TAX AND LOAN ACCOUNTS

#### HON. MARK W. HANNAFORD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. HANNAFORD. Mr. Speaker, earlier this year, the Banking, Finance and Urban Affairs Committee and the Ways and Means Committee considered and passed legislation which would permit Treasury to realize net earnings of \$50 to \$100 million annually. This legislation, which grants Treasury investment authority over its tax and loan account funds held in commercial banks, was subsequently passed by the House on April 25 by a margin of 384 to 0. Efforts to push this measure through began in the early 1970's, and during the last Congress a similar measure was laid to rest in the Senate in the final days of the second session due to the inclusion of several controversial provisions.

As a staunch supporter of the investment authority embodied in H.R. 5675 and its inclusion of savings and loan associations into our tax and loan account system, as well as its special consideration for softening the impact of the investment authority on small and minority-owned banks, it is with great interest that I anticipate upcoming Senate activity on a comparable proposal. It can certainly be said that this legislation is long overdue and that among its most impressive features is the advocacy of efficient cash management by the Federal Government, reducing potential revenue losses to taxpayers. Furthermore, H.R. 5675 would permit reimbursement to depository institutions for certain services rendered in connection with maintaining T.T. & L. accounts on a more equitable basis than is currently the case. As a Treasury Department study on the tax and loan account system revealed, during 1972 commercial banks were able to utilize Federal T.T. & L. funds to generate earnings which exceeded the expenses of handling these accounts by \$170 million.

Mr. Speaker, recently, however, Treasury has taken certain steps to limit its losses from the current system. In 1976, for instance, average T.T. & L. balances in commercial banks declined to 21 percent of Treasury's operating cash as opposed to 65 percent during 1974. The average T.T. & L. balance in fiscal year 1974 was \$3.9 billion compared to \$1.4 billion in fiscal year 1976. Thus, Mr. Speaker, Treasury has been able to reduce potential earnings losses. Yet, as Fiscal Assistant Secretary David Mosso stated before the Domestic Monetary Policy Subcommittee, a substantial loss occurs through the inability to turn tax and loan funds in-transit between commercial banks and Federal Reserve banks into an earning asset. While no firm estimates of this loss are available, the amount of in-transit funds may be as high as \$1 billion.

T.T. & L. INVESTMENT AUTHORITY AND MONETARY POLICY

Mr. Speaker, an occurrence in late April involving Treasury's tax and loan account funds and the Fed's conduct of monetary policy illustrates why the proposed new tax and loan system is far superior than that which exists. As a New York Times article on April 29 discloses, 3 days earlier, on April 26:

The Fed could not complete its reserve adding operations . . . because of "an acute shortage of collateral," or Treasury securities which the Fed purchases from dealers, frequently for short periods of time.

A few days earlier, Treasury had withdrawn almost \$3 billion of noninterest bearing T.T. & L. funds from commercial banks. With the shortage of Treasury securities on the market, however, Treasury was forced to redeposit the amount withdrawn. This cumbersome action resulted in Treasury's losing interest for that day on about \$3 billion. The full sum of that loss, moreover, will probably never be recouped even though some adjustments for that loss will be attempted. In addition, this redeposit represented a temporary but destabilizing influence on the money market with potential adverse effects on short-term interest rates. Under the new system granting Treasury an income-earning capability for T.T. & L. funds, "massive swings" of Treasury funds could be eliminated. Thus, with the avoidance of redeposits, the smooth conduct of monetary policy by the Federal Reserve can be enhanced. Without objection, Mr. Speaker, I request that the article mentioned above be printed in the Record at this point:

#### BIG SWINGS IN TREASURY'S BALANCE ROILS FED OPEN MARKET OPERATIONS

Massive swings in the Treasury's balance at Federal Reserve Banks last week caused difficulty in the Fed's open market operations and uncertainty in the credit markets about the level at which the Fed wishes to peg the target for the trend-setting Federal funds rate.

Tax receipts in the latest week, being larger than expected, were a major factor in draining an average of \$3.4 billion a day from the banking system, according to a spokesman for the central bank.

To offset the large drains, the Fed's trading desk added a total of \$1.9 billion to its holdings of United States Government secu-

rities during the week. However, that was not enough to do the job and on Tuesday, the Treasury had to make the unusual move of redepositing \$2.4 billion of tax and loan accounts at large commercial banks to aid the Fed in adding reserves to the system.

The central banker said the Fed could not complete its reserve adding operations on Tuesday because of "an acute shortage of collateral," or Treasury securities which the Fed purchases from dealers, frequently for short periods of time. The Fed sells securities when it is draining reserves.

#### SHORTAGE IN TREASURY BILLS

The shortage in Treasury bills was caused by Treasury paydowns on maturing debt, strong demand for the bills by foreign borrowers and, according to some analysts, caution on the part of dealers who are carrying smaller inventories in anticipation of rising short-term interest rates.

The central bank spokesman said it was the first time in a couple of years that the Treasury had redeposited receipts in its accounts at large commercial banks.

He indicated, however, that it had been routine at one time. In 1975, the Treasury, at the urging of Congress, initiated a policy of minimizing its tax and loan balances and maximizing its balances at the Fed. Congress had argued that banks were getting to use Treasury cash balances on which interest is not paid for long periods of time.

Most key short-term interest rates moved up slightly in the latest week. The Federal funds rate, an important indicator of monetary policy, averaged 4.82 percent, up from 4.71 percent. This was its highest average in five months.

Whether the rise in the Fed funds average signals a slight firming in Fed policy appeared to be a key issue in the money markets last week as the task of interpreting Fed moves was complicated by the Fed's timing and difficulty in conducting open market operations.

By the end of the statement week, however, many analysts had concluded that the Fed had indeed moved.

Robert H. Ried of McCarthy, Ried, Crisanti & Maffei, a money market research firm, said yesterday, "the rate has firmed to at least 4 1/2 percent but could be 4 3/4 to 5 percent."

Mr. Ried added, "It doesn't have tremendous implications for price changes and was probably based on money supply forecasts for double-digit growth in the April-May period."

#### RESERVE REPORT

(In billions of dollars)

#### RHYS CAPARN RETROSPECTIVE

#### HON. RONALD A. SARASIN

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. SARASIN. Mr. Speaker, currently at the Bethel Gallery in Bethel, Conn., is a show by one of America's foremost sculptors, Rhys Caparn. This show which recently opened on May 28 will continue to June 22. I would urge all of my colleagues to come to Connecticut to see this collection of sculptures which Miss Caparn has done over the past 47 years.

Rhys Caparn was trained in the classical traditions of sculpture and her early work might have led one to believe that here was yet another traditional sculptor. Yet she became one of the most original and experimental sculptors of her time, bringing to an ancient art new insights to expand the hitherto unexplored potential of her medium.

Her early work consisted of portraiture and the human figure. But in retrospect, these works have played but a minor role in her overall work which has proved to be of a much broader content, based on the whole of nature, on natural forms and natural forces. And though, over the years, there have been intervening trends, there is an essential order to her work. It is a movement from animals that stand upon the Earth, to birds released from the Earth, then to landscapes of the Earth itself and finally toward abstractions inspired by the quiet and distant spaces of the Moon.

About her sculpture, Miss Caparn has said:

I believe that sculpture must render visible through form that which lies beyond appearance. The artist is responsible for growth of consciousness. The manner in which he achieves this is his own, and has no limits. Sculpture is a monumental art, whatever the size of its execution. To have permanence it must make a complete statement: at once violent and serene. It is no medium for the frenetic. It must be highly organized, have aloof unity, and always come to rest. Its eloquence depends upon depth and density of volume, either stated or suggested.

I gather my forms from the apparitions of life: man, animals, birds; the lines of trees, the bulk of rocks, the shadows of ravines and crevasses, the slope of hills under snow. I am interested in the sound of movement: the round sound of birds beating their wings near water; the thin sound of wind in trees; and the silence of flight. The bas-relief, with its suggestions of light, remains yet almost unexplored. I have used the arch not only for its symbolism of passage and therefore change, but because in the midst of ruins it remains at ease with nature.

Besides the sculpture of Rhys Caparn, the Bethel Gallery in Bethel, Conn. is itself a work of art. The gallery is housed in a magnificent Federal structure which was formerly used as an opera house. Its dramatic proportions—40 feet by 65 feet with 15-foot ceilings and tall, small-paned windows—make it literally one of the most beautiful art galleries in the country and is particularly appropriate for the showing of sculpture.

I hope none of you will miss this opportunity to see some of the most beautiful

sculpture in this country as well as one of our finest art galleries.

U.N. AMBASSADOR ANDREW YOUNG

#### HON. MARJORIE S. HOLT

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mrs. HOLT. Mr. Speaker, last week, our ambassador to the United Nations, Andrew Young, was quoted as saying that "the Swedes are terrible racists," which caused the Swedish Ambassador to ask our U.N. mission for an explanation.

Also last week, Mr. Young was quoted as saying he was not very concerned about the presence of Cuban military advisers in Ethiopia, although he noted that our State Department was expressing "grave concern." Mr. Young said that "maybe the Cubans might be a little more rational than the Ethiopians at this point."

But these are only the latest in a series of astonishing statements by the Ambassador. We all recall his statement that Cuban troops were bringing "a certain stability and order to Angola."

Mr. Speaker, there is much confusion as to our foreign policy. If Mr. Young is not representing American foreign policy, then obviously he should not be the Ambassador to the U.N. If he is representing our foreign policy, then we certainly ought to know more about that policy and how it was derived. Perhaps we should just inquire as to whether there is a foreign policy.

Frankly, I am becoming embarrassed, not to say alarmed. Diplomacy should not be conducted in the manner of random pie throwing. It should be conducted with carefully measured language representing policy decisions made by the President after consultation with his advisers. We are involved in some very sensitive negotiations in this world, and it is necessary to cultivate good will and trust to pursue our goals.

Without further comment, I am listing some newspaper accounts of the activities of Ambassador Young.

On April 18, the London Times carried an article by Fred Emery which said:

It is becoming time-consuming as well as tedious keeping track of Mr. Young's dicta. The latest furor concerns his United Nations Arab colleagues who are still upset about his offhand comparison of their hatred for Jews with the Ku Klux Klan's hatred for blacks.

On April 17, The Washington Star reported that "Twenty Arab U.N. delegations have criticized Ambassador Andrew Young for saying that Arab hatred of Jews reminded him of Ku Klux Klan hatred of blacks." Young gave the Arabs a clarification.

On April 16, the Washington Star reported on the controversy that erupted when Ambassador Young said that the South African Government was "illegitimate." "Secretary of State Cyrus Vance telephoned Young to tell him that the remark about illegitimacy was wrong."

On April 15, a Chicago Tribune article said that "Young jolted the world with an impolitic charge, in a BBC interview, that the British were 'a little chicken on race,' and had, in fact, 'invented racism.'" Young apologized.

On April 13, a column by Jack W. Germond and Jules Witcover in the Washington Star said that:

The U.N. ambassador is less Jimmy Carter's point man on foreign policy, as Young himself once described it, than a cannon rolling loose on the deck of a pitching ship.

On April 12, the Washington Star reported that:

The White House has again defended U.N. Ambassador Andrew Young, this time for his controversial statement that Americans are "paranoid about a few Communists" in Africa.

The article quoted Young as saying:

The only thing I'm thinking is, don't get paranoid about a few Communists—even a few thousand Communists. Americans shouldn't be afraid of Communists—they just shouldn't. It offends me, really.

On March 20, the Manchester Guardian editorialized:

Mr. Andy Young is a jolly fellow. He thinks (in a southern Africa context) that "no one has any confidence in the British." He would like to see a U.N. Force—of American Marines—run Rhodesia. He reckons "there's some sense in which the Cubans bring a certain stability and order to Angola." He has "a queer understanding" with Mr. Cyrus Vance.

This editorial went on to say that "Washington's foreign policy voice these days is more babble than baritone."

#### ITALIAN NATIONAL DAY

**HON. PETER W. RODINO, JR.**

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. RODINO. Mr. Speaker, I wish today to join with the citizens of Italy and Americans of Italian descent in celebrating the anniversary of the founding of the Italian republic.

Not until 1870 were all the many independent city states of the Italian peninsula united into one nation under the constitutional monarchy of King Victor Emmanuel II.

Following the Second World War, a referendum, open to all adult citizens, was held on June 2, 1946, and a decisive vote was cast in favor of the establishment of a republican form of government. Under the able leadership of Alcide De Gasperi the new republican government formulated policies along moderate lines, and was supported by the allied powers.

For over 30 years, the freedom-loving Italian people have maintained their cherished republic, often in the face of serious adversity. Through international associations, Italy has demonstrated its commitment to free world goals by participation in the North Atlantic Treaty Organization, the Council of Europe, and the European Economic Community.

Mr. Speaker, the contributions of Italians both to this country and to the

entire world are far too numerous and well-known to need detailing in this brief tribute. Needless to say, I personally take deep pride in my own heritage as an American of Italian origin. I am sure that all Americans join me in my sincere hope that the Italian republic will continue to vigilantly guard the liberties of its people, and will endure.

#### BRIG. GEN. EBENEZER LEARNED REVOLUTIONARY HERO: TRIBUTE BY THE OXFORD, MASS., HISTORICAL SOCIETY

**HON. EDWARD P. BOLAND**

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. BOLAND. Mr. Speaker, Brig. Gen. Ebenezer Learned served his native town of Oxford, Mass., in many capacities. His outstanding contributions to Oxford, to the Commonwealth of Massachusetts, and to the fledgling United States of America will be the subject of a special program this fall in Oxford. The historical commission of the town has provided me with a short synopsis of General Learned's career and accomplishments. I include this material in the RECORD at this point:

#### OXFORD HISTORICAL SOCIETY NOTES ON GEN. EBENEZER LEARNED

Ebenezer Learned began his distinguished career at the age of 28 in 1756, when he commanded a company raised for service in the French and Indian War. During the summer of 1756, he enlisted, equipped and drilled his company with the valuable aid, as tradition informs us, of Reverend John Campbell, who was skilled in military tactics. On the ninth of September, we find him at the head of 51 men at Lake George, where he had marched from Oxford. We have very little of the details of his services here. Mr. Jennison, in his papers (now in the archives of the American Antiquarian Society of Worcester) says that Ebenezer Learned served from 1756 to 1763, and was at Fort Edward when Fort William Henry was beleaguered and marched without orders to its relief. There is reason, however, to believe that he returned home as early as 1758, as he was elected selectman in that year and each year following until 1764.

The troubles with the mother country began soon, and in the excitement which followed, he took a decided stand with the patriots and officially was active in influencing the doings of the town in that period of doubt and perplexity.

His patriotism has never been questioned. He was unwavering in his devotion to his country, standing almost alone in his family and among the people of his neighborhood in his loyalty. At the time of Shay's Rebellion, he was almost the only man in his section of the town who adhered to the government. He was a marked man in this controversy, and as related, the Shays men decided on a certain night to pay him a visit. Having heard of their plan, he took down a favorite gun which he carried in his Revolutionary campaigns, and procuring a musket for his son-in-law, Adjutant Pray, Ebenezer Learned put them in order and loaded them with powder and ball—making no secret of what he had done. The visit was indefinitely postponed.

General Learned was prominent in civil affairs and, in the 25 years between 1758 and 1794, he was a selectman. He was moderator several years and in 1772 he was one of a Com-

mittee of three to make answer to the petition of the inhabitants of the northeasterly part of the town—which with parts of Worcester, Leicester and Sutton, asked to be set off as an independent corporation and later, a Ward. In 1778 he was chosen as one of the first board of assessors. As selectman, and having previously acted in that capacity, he became in 1779 a delegate to the convention at Cambridge to form a state government. In 1783 he became a representative. In August, 1776, the Court of Sessions at Worcester appointed General Learned one of a committee to superintend the inoculating hospitals in Worcester County. He was a justice of the peace and officially present at the terms of court at Worcester for 1776, 1778, 1789 and 1783, and every year from 1787 to 1795.

In person, he is said to have been above the average in size, erect and in manner, sedate and dignified. He was esteemed as a townsman and as a neighbor, was a devout member of the First Congregational Church of Oxford, a constant attendant on public worship and for many years active in ecclesiastical affairs.

General Learned possessed the prerequisites of a great soldier, and so far as he had opportunity, developed those qualities. Although hampered by a lack of early educational advantages, and in later years by ill health which cut short his service, he was able to establish for himself a worthy military reputation. Whatever his faults may have been, no hint of them appears in the records. We may point with pride to his achievements during the two major battles of Saratoga. On October 7 and October 20, 1777, when the action peaked, as the fate of our country was trembling in the balance, he did in his sphere invaluable service—and there earned for himself the gratitude and honorable remembrance of succeeding generations.

During the Bicentennial Anniversary, the current generation of citizens in Oxford recalled with gratitude the sacrifices of Ebenezer Learned, who also rendered invaluable service at the Battle of Bunker Hill and the Evacuation of Boston. During the winter of 1777-78, Learned and two of his fellow Oxford citizens camped at Valley Forge with General George Washington.

On April 2, 1777, the Congress recognized his accomplishments by appointing him Brigadier General. General Learned retired from the Continental Army after the Battle of Saratoga due to ill health, but he remained an active patriot for which we can all be grateful 200 years later.

Preserved in the Oxford Museum are a 24-pound cannon ball that Ebenezer Learned brought home from Bunker Hill and a silver spoon (inscribed "J.A.B. 1776") which once belonged to General Burgoyne, that General Learned brought home from the Battle of Saratoga.

A bill has been filed in the Massachusetts Legislature to honor Oxford's native, General Ebenezer Learned, on October 7, 1977, the Two Hundredth Anniversary of the Battle of Saratoga.

#### HEARINGS ON CHILD PORNOGRAPHY REVEAL GRAVITY OF PROBLEM

**HON. MARIO BIAGGI**

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. BIAGGI. Mr. Speaker, on Tuesday, May 31, I had the occasion to chair a hearing of the House Select Education Subcommittee examining the shock-

ing spread of child pornography in this Nation. We conducted the hearing at the Covenant House in the Times Square area of New York City. The Covenant House is an agency dedicated to providing care and services for runaways. The program is aimed at preventing these nomadic children from being swooped up by a vicious multi-million-dollar child pornography industry.

The committee was pleased to receive testimony from the executive director of Covenant House, Father Bruce Ritter. His testimony was eloquent and depicted in a most graphic form, the horrors which befall victims of child pornography. I offer his testimony for the close consideration of my colleagues.

Legislation including my bill H.R. 5522 has been proposed to slap new penalties on those persons procuring children 16 and under for pornography as well as those who transport, ship, or use the mail to distribute these materials. The legislation needs careful deliberation if we are to effectively deal with this menace.

I feel that the close attention of the Congress must continue to be focused on this problem and we should not rest until we have dismantled the child pornography industry and assisted its helpless victims.

At this point I offer Father Ritter's testimony as well as my opening statement delivered at the hearing:

#### TESTIMONY OF FATHER BRUCE RITTER

I am Fr. Bruce Ritter, a Franciscan priest, and executive director of Covenant House, a child care agency in New York City, that specializes in caring for runaway and homeless teenagers. I am delighted that Covenant House has been able to offer our facilities to host these important public hearings, and I am honored to have this opportunity to testify before this distinguished House Subcommittee on Select Education concerning the proposed Child Exploitation Prevention Act.

I think it important that I establish my credentials to address this subcommittee on the subject of children and pornography. Ten years ago, in order to exercise a ministry of services to the urban poor, in 1968, I left a teaching career at Manhattan College and moved into a tenement on East 7th Street in the East Village of Manhattan. Almost immediately I became involved in the tragic problem of many thousands of homeless, drifting children in our city. One night, six kids, all under 16, knocked on my door at two o'clock in the morning. They asked if they could sleep on the floor of my apartment. I said yes and gave them some food and blankets and they lined up in a row on my living room floor and went to sleep. The next day—it was very cold and snowy outside—the kids did not want to go away. One kid did go outside and brought back four more kids: this is the rest of our family, he said. I asked them where they had been staying and they told me: in one of the abandoned buildings on the block, but that they had been burned out the night before by some junkies because the junkies wanted to exploit the kids sexually and they had had quite a bit of that. They had arrived in the East Village via Yonkers where a friendly couple had taken in these runaway kids for several days. The price they had to pay was to star in a pornographic movie, which they did. They were good kids and really did not want to do that so they came down to the East Village . . .

I tried very hard to find a place for these kids in the child welfare system, but could not. So (feeling chagrined and angry that I had been caught by my own rhetoric—I was

in the East Village to be useful, I had a bed and these kids did not) I kept them. I moved some bunk beds into my apartment—four small rooms—and the kids moved in with me. Overnight I became the unwilling Father of ten street kids—something that a background in medieval theology does not quite prepare one for. I thought the solution a temporary one—that human ingenuity would find a way to solve their problem, but the next day two more kids came in, and the day after that, a couple more, so as the junkies in my building died or got busted or moved away, I would take over the apartment, clean and paint it, and move kids in, using volunteers from Manhattan College and Fordham to help me care for them.

That was the beginning of Covenant House. For four years we operated extra legem, as an illegal child care agency, caring for thousands of drifting, homeless children, very many of them victims of sexual exploitation, as were my first ten kids. (Life on the street inevitably, inexorably leads to that for many thousands.) We did not have a charter, a staff, a budget or any funding sources. We did have hundreds and hundreds of runaway and throwaway kids knocking on our doors at any hour of the day and night. In 1972 because of the pressures of these kinds and the lack of money and staff we decided to become legal and Covenant House obtained a charter empowering us to care for a large variety of homeless kids especially nomads and runaways. Today we operate nine residences with a capacity of 120 children and a 24 hour no-questions-asked crisis intervention center here on Eighth Avenue called Under Twenty-one. It is located next to this auditorium.

Times Square as you well know, is the entertainment mecca of New York City and many other Eastern States as well. It is also, as you know, the unofficial redlight district of New York City and one of the centers of the sex industry in the world. It is estimated that this sex industry in the ten blocks surrounding the site of these hearings is a billion and a half dollars a year. Every day hundreds of young people are in this area to make their living in the sex business. Most of them are runaway, walkaway, throwaway, self-emancipated kids, urban nomads, quite easily victimized and exploited by our sex merchants.

When boys or girls are 14 or 15 or 16—or 17 and 18—and they are cold, hungry, homeless, very scared, with no place to stay and no marketable skills, they market themselves. Here in Times Square the sex industry is quite willing to employ them. Indeed, they are vigorously sought out and recruited: the raw materials, the commodities for a sick, savage industry that preys on the children of the poor. The Minnesota Strip and 42d Street are a huge meat market where hundreds of children are forced to display their wares every day.

Because of the concern of the Roman Catholic Church of New York for the thousands of exploited young people in the Times Square area of our city, His Eminence, Cardinal Cooke has directed us to open our Under Twenty-one Center. In the first two months of operation, almost 1,000 children have come to us for help, seeking a bed, food, shelter, protection from their pimps, a job, a chance to go to school. Some desperately want to return home. Others simply can't because they are just not wanted or because no home exists for them.

Let the distinguished members of this committee think I am speaking in generalities, the following are recent occurrences at our center next door. Last Tuesday a boy came to Under Twenty-one—he was 15—a very good looking kid, a runaway from Connecticut. He was approached in Port Authority Bus Terminal and offered quite a bit of money to star in a filmed sex orgy. Last week, Wednesday, a girl, also fifteen, a runaway from Queens was wine and dined and almost persuaded by a so-called "fashion

coordinator" who just happened to run a model studio on 49th Street to pose for photographs and to join him and some friends at a "party" for some film making. Before that, a girl that came to our program for help had accepted a similar offer, did pose, and was then raped. Before that, a boy of 17, a go-go boy who danced on a bar on Second Avenue—if the Johns liked him they would stick a 5 dollar bill in his jock strap. He was also a stripper in a male burlesque house on Eighth Avenue: four performances a night. His performances were filmed. Before that a 14 year old girl, a runaway from out of state, was seduced, raped, held prisoner by a friendly couple in the neighborhood who got her a false I.D., saying she was 18 and got her a job as a stripper on Eighth Avenue.

The horror stories are literally endless. Our society has permitted to develop an enormous sex industry that we seem powerless to do anything about. Under the protection of the First Amendment we are witnessing an almost anything goes explosion of exploitation and abuse that is destroying thousands of young people every year. Our political leaders our law enforcement agencies, the judiciary blame each other and point accusatory fingers elsewhere.

In the last three weeks I have received, in response to a column about Under Twenty-one by Mr. William Reel that appeared in the New York Daily News May 6, 1977, almost two thousand letters from people who are outraged and sickened by the enormous outpouring of filth, particularly regarding the sexual exploitation and abuse of our children for money by our sexual entrepreneurs. One common theme runs through these letters: why don't the politicians and judges and police do something about it. Why do they permit it. Many are concerned that this recent interest in pornography by just about everybody, and in particular the abuse of children, will, like most popular interests of the moment, soon fade and that nothing will be done. I applaud the distinguished members of Congress who are here today to show their interest in this problem. I hope they will take back to the full membership of their committee and the Congress the urgent concern of the citizens of this city that something in fact be done to protect our children.

I would like now to address myself specifically to the actual legislation, H.R. 4571, the so-called Child Exploitation Prevention Act:

1. The focus of this act is, I feel, much too narrow, since it does not also explicitly address the problem of child prostitution. Child pornography and child prostitution are two sides of the same coin. I have never met a child involved in pornography that was not also somehow involved with prostitution or that did not soon get into it.

2. Our children must also be protected from a too compliant, too lenient judiciary that apparently looks on the sexual abuse of children as a minor peccadillo. The new legislation should not only contain stiff penalties but make them mandatory.

3. The age up to which children should be protected from these abuses should certainly be 18, bringing this legislation in line with that general understanding of our society that brings a child to majority at 18, giving them the right to vote and to serve in our armed services, etc. The legislation, already passed by the Assembly in Albany, and pending before the New York State Senate, and your own proposed legislation, established only that children 15 and under receive the protection of law. In my view, a child of 16 and 17 needs the same protection. There is nothing particularly magical about a sixteenth birthday cake. It surely cannot be the seems to be the intent, if only by default, of this legislation.

4. Furthermore, if it is going to be a crime to make and distribute these films involving children, it should be a crime to show them. If it is a crime to make, distribute and watch

a snuff film because it shows a crime of murder actually being committed—forget the very horror of it—it should be a crime to make, distribute and show a film that depicts the crime of child abuse being committed.

Distinguished members of this subcommittee, how much filth must we wallow in before our lawmakers will give us the relief we obviously are crying out for? Many of our citizens are quite frankly questioning the will and intent of our political leaders to do something about this mess. We have a pure food and drug administration in our country that does not hesitate to take off the market very lucrative cosmetics and drugs that are found to be harmful to our people. The fact that children are being exploited and destroyed for money is such a self-evident reality that it is beyond question. Can we not take off the shelves of our sex super markets up and down this street the poisonous materials that show people in the very act of corrupting our young people? Can we not pass effective legislation that will protect them and us from these purveyors and producers of every kind of grossness?

We all look with a kind of sick sympathetic horror at the voyeur found peeping under some window blind. Yet we permit thousands of such voyeurs to crowd our porno book stores and theatres to be educated in depravity, buying books that teach them how to seduce a child and watching films showing pre-teens engaged in all kinds of sexual activity. And we blame the First Amendment.

Most of the legal efforts to establish safeguards for our children seem to run afoul of the First Amendment guarantees of freedom of speech. Surely no right thinking person can hold that the First Amendment was written by the framers of our constitution to protect pornographers and the sex lords that use up children to make money. The First Amendment does not give anyone the right to cry fire in a crowded theatre. It does not give anyone the right to abuse sexually and use and exploit children either. It is inconceivable to me and to many Americans why our Congress and our legislators cannot pass effective legislation.

The time for pious rhetoric and expressions of concern is long past. We need appropriate, effective action. I doubt that the voters of this country will be satisfied with less for much longer. A great city is dying at its heart because nothing can be done. We are wallowing in unspeakable filth and we wring our hands about the First Amendment. More importantly, our children are being daily, used and exploited and sometimes being killed while we stand around helplessly.

Is it wrong to be outraged? Did we not see this coming long ago? Has outrage become too unsophisticated for us? Are we incapable of saying very simply that this is wrong and we will not tolerate it any longer? For God's sake, gentlemen, and for the sake of the children, do something about it.

#### OPENING STATEMENT OF THE HONORABLE MARIO BLAGGI

As chairman of this morning's hearing of the House Select Education Subcommittee, I welcome my colleagues, our distinguished witnesses and guests. This promises to be a sobering day for we will be discussing a shocking and deplorable subject—the use of children in pornography.

There is a highly sophisticated and organized child pornography industry operating in this Nation. It has already captured an estimated 300,000 children nationally as victims. It has produced more than 264 different publications sold nationally depicting pornographic activities involving children as young as three years old. The industry is both national and international in scope. Large quantities of pornographic materials are imported each year, primarily from

Europe. Hundreds of children from Mexico are smuggled into this Nation each year to engage in child pornography.

Who are the victims of child pornography? They vary in age and circumstance. Some come from broken homes—some are victims of child abuse and neglect, some are even foster children recruited from homes for pornography. While the particulars about each victim may vary—they do share some things in common.

As victims, they endure sexual abuse and exploitation. They become helpless victims of extortion—many are induced into pornography through drugs—subsequently forming an addiction. Some eventually turn to serious crime. In reality, we are talking about children being transformed into merchandise in a massive sex for sale operation.

We know that some of the victims of child pornography come from the ranks of the one million runaway children of this Nation. Our hearing this morning is being conducted in a facility which assists the thousands of nomadic children of New York City. We will receive testimony from Father Bruce Ritter, discussing the relationship of runaway children to pornography.

It is obvious that the great public outcry condemning the spread of child pornography must be translated into legislation on the local, State and Federal levels. A main focus of this morning's hearing will be on a number of Federal legislative proposals, including my bill, H.R. 5522, which proposes new and stiff penalties on those persons procuring children under 16 for pornography. Penalties under my bill also apply to those persons transporting, shipping or mailing such pornographic materials using interstate commerce. Finally, we also hope to discuss the feasibility of imposing criminal sanctions against those parents and guardians who knowingly consent to their child being used for pornography.

As an original sponsor of the 1974 child abuse prevention and treatment act, I am aware of the relationship between child pornography and child abuse. My concern was reflected in an amendment I offered, which was accepted by the full House and Education and Labor Committee, to the child abuse act extension, adding sexual exploitation as a definition of child abuse. The purpose of this amendment is to allow some of the treatment funds under the act to aid victims of child pornography.

We have seen movement on the part of States to deal with this problem. Legislation imposing strict new penalties against pornographers has already been passed in the Louisiana legislature, and most recently in the New York State assembly. Numerous other States are considering new legislation in this area. The concern of Congress can in part, be reflected in our appearance here today. One thing is obvious, we must wage the war against child pornography from all fronts. Child pornographers who are nothing more than traffickers in human perversion, must be punished. The victims of child pornography must be helped.

The scourge of child pornography has shocked the conscience of a nation. It must be dealt with before its poison is allowed to spread.

#### TREASURY DEPARTMENT AWARD IS GIVEN TO PHILADELPHIA'S MAYOR RIZZO

#### HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. EILBERG. Mr. Speaker, I am pleased to be able to announce that

Philadelphia Mayor Frank L. Rizzo has received an award from the U.S. Treasury Department for his efforts in increasing the number of city employees who purchase U.S. savings bonds.

The framed plaque was presented by Larry Lowder, Regional Director, U.S. Savings Bonds Division, Treasury Department, at a ceremony in City Hall.

Since Mayor Rizzo came to office, city employee participation in the savings bond plan rose from 19 percent to 25 percent or 7,171 bond buyers to 9,017.

The presentation by Lowder was accompanied by Mayor Rizzo's proclamation designating the month of June as "U.S. Savings Bonds Month in Philadelphia."

The proclamation urges Philadelphians to use the payroll savings plan where they work or the bond-a-month plan where they bank.

#### MEMORIAL DAY SPEECH OF JUDGE ALDONA APPLETON

#### HON. EDWARD J. PATTEN

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. PATTEN. Mr. Speaker, I wish all Americans had the spirit that the Polish veterans who joined the U.S. Forces in Italy have. Many of them crossed the channel with General Eisenhower.

This past Monday, I attended the Polish Veterans Memorial Service in city hall in Perth Amboy, and that spirit was shown by my good friend, Judge Aldona Appleton.

I wanted to share her comments with my colleagues today:

#### MEMORIAL DAY SPEECH OF JUDGE ALDONA APPLETON

We have gathered here today to pay tribute to those men who gave their lives for us—they who accomplished their duty in this world and left an indelible mark on our hearts.

For the sake of these men who gave their lives for us let us resolve that their lives were not given in vain.

Let us resolve that the principles which actuated them have inspired us to carry on their work.

I am proud to join you in preserving the memory of these fine men. May I congratulate you, the Polish veterans of World War II, for holding these annual services to preserve the memory of these honored men.

As we honor these men, let us recall that they gave their lives so that we may continue to enjoy the happiness of meeting freely (as we are doing now)—of speaking freely—of praying freely and of living in dignity as decent human beings.

Let us learn from these men, that even during the days of peace we must continue to keep fighting to preserve our democracy. We must be as ready to meet the obligations of peace as they were ready to meet the obligations of war.

Today we are all soldiers of peace—and as such we must be ready to come to the aid of our country.

This country must be prepared at all times during peace and war.

When it needs to be protected from enemies on the outside it is the responsibility of the men in uniform—of Congress and the President of the United States.

But when our country needs to be kept safe from dangers inside of our country—then we, as soldiers of peace—must keep fighting at all times to keep our country safe.

To accomplish this we must work together in one whole part. Only then will we have greatness and peace.

Our Nation has been strong because we had faith in God and faith in our fellow men—we were willing to help one another.

We in the United States have so much to teach the world and so much to give the world, but we must continue to keep faith with each other.

There is too much weakness—too much selfishness and too much greed today.

How long can America stand this erosion of faith and morals?

We must carry on the things which made America great. That's what these men died for—those things which are guaranteed in the Declaration of Independence and the American Constitution.

We, Americans in whose veins flows Polish blood, let us be guided by Kosciuszko and Pulaski—the ideas for which they sacrificed everything—their fortunes and one gave his life. Let them not have died in vain.

As we pay tribute to these men today—let us include all the Americans of Polish descent who fought for peace and freedom in every battle this country had since the beginning of America. And let us include those who fought with you at Monte Cassino when you helped turn the tide of war towards victory for peace.

Now let us bow our heads in prayer for all these men and ask that God give us strength to carry on the principles which actuated these men whom we honor today.

Towards that end—may God guide us.

#### DEALING WITH ILLEGAL ALIENS

**HON. ELIZABETH HOLTZMAN**

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Ms. HOLTZMAN. Mr. Speaker, the problem of dealing with illegal aliens in the United States is one of the most complex and controversial issues facing the new administration and the Congress.

I commend to my colleagues an excellent and important article from the June 1 New York Times written by Prof. Wayne Cornelius of MIT, who has done a substantial amount of research in this field. The views expressed deserve careful study.

The text follows:

[From The New York Times, June 1, 1977]  
WHEN THE DOOR IS CLOSED TO ILLEGAL ALIENS,  
WHO PAYS?

(By Wayne A. Cornelius)

CAMBRIDGE, MASS.—A very predictable thing happens in this country whenever the economy takes a sharp turn for the worst: The illegal alien is rediscovered. Politicians, journalists, organized labor, and other interest groups rush to blame him for every imaginable problem afflicting American society, from high unemployment to rising crime rates, escalating social-service costs, overpopulation, and balance-of-payments deficits.

Immigration authorities crank out ever-more-frightening "guess-timates" of the numbers of illegal aliens "silently invading" the country. The public is warned in urgent and ominous tones that illegal aliens are out to take their jobs away and add billions of dollars to their tax bills.

We are now witnessing yet another "rediscovery" of the illegal alien. Pressures for new restrictive measures—particularly legislation that would impose civil or criminal penalties and fines on United States employers who "knowingly" hire illegal aliens—have mounted steadily. Such restrictive measures form the core of the policy package reportedly recommended to President Carter by his Cabinet-level task force on illegal aliens, and they have been proposed repeatedly by various members of Congress.

The case for a more restrictive immigration policy is based on three principal assumptions: that illegal aliens compete effectively with, and displace, large numbers of American workers; that the benefits to American society resulting from the aliens' contribution of low-cost labor are exceeded by the "social costs" resulting from their presence here; and that most illegal aliens entering the United States eventually settle here permanently, thus imposing an increasingly heavy, long-term burden upon the society.

There is as yet no direct evidence to support any of these assumptions, at least with respect to illegal aliens from Mexico, who still constitute at least 60 to 65 percent of the total flow and more than 90 percent of the illegal aliens apprehended each year.

Where careful independent studies of the impact of illegal immigration on local labor markets have been made, they have found no evidence of large-scale displacement of legal resident workers by illegal aliens. Studies have also shown that Mexican illegals make amazingly little use of tax-supported social services while they are in the United States, and that the cost of services they do use is far outweighed by their contributions to Social Security and income tax revenues.

There is also abundant evidence indicating that the vast majority of illegal aliens from Mexico continue to maintain a pattern of "shuttle" migration most of them returning to Mexico after six months or less of employment in the United States. In fact, studies have shown that only a small minority of Mexican illegals even aspire to settle permanently in the United States.

While illegal aliens from countries other than Mexico do seem to stay longer and make more use of social services, there is still no reliable evidence that they compete effectively with American workers for desirable jobs. The typical job held by the illegal alien, regardless of nationality, would not provide the average American family with more than a subsistence standard of living. In most states, it would provide less income than welfare payments.

Certainly in some geographic areas, types of enterprises, and job categories, illegal aliens may depress wage levels or "take jobs away" from American workers. But there is simply no hard evidence that these effects are as widespread or as serious as most policy-makers and the general public seem to believe.

The notion that curtailing illegal immigration will significantly reduce unemployment among the young, the unskilled, members of minority groups, and other sectors of the United States population allegedly being displaced by illegal aliens may prove to be a cruel illusion.

Many of the jobs "liberated" in this way are likely to be eliminated through mechanization or through bankruptcy of the enterprises involved, and many others cannot be "up-graded" sufficiently—even with higher wages and shorter hours—to make them attractive to native workers.

While the benefits of a more restrictive immigration policy to the American worker have been grossly exaggerated, the costs of such a policy to both the United States and the illegal alien's countries of origin have been consistently underestimated.

The impact of "closing the door" to illegal aliens will be felt by the American consumer,

in the form of higher prices for food and many other products currently produced with alien labor. Failures among small businesses—those with 25 or fewer employees, which hire more than half of the illegal aliens from Mexico—will also increase, eliminating jobs not only for illegals but for native Americans.

But the adverse impact of restrictive measures will be felt most intensely in Mexico, which is currently struggling to recover from its most serious economic crisis since the 1930's. At least 20 percent of the population—and a much higher proportion of the rural poor—depend upon wages earned in the United States for a large share of their cash income.

An employer-sanction law that is even partly effective in denying jobs to illegal aliens is likely to produce economic dislocations and human suffering on a massive scale within Mexico. This will not be simply a problem for Mexico; the implications for United States economic and foreign policy interests are obvious.

All available evidence indicates that employer sanctions and other restrictive measures—short of erecting a Berlin-type wall—will fail to deter economically desperate Mexicans from seeking employment in the United States.

In the long run, every dollar that is spent trying to enforce new restrictive policies would be much better spent on programs to reduce the "push" factors within Mexico and other sending countries that are primarily responsible for illegal immigration: rural unemployment and underemployment, low incomes, and rapid population growth.

For example, studies indicate that resources invested in labor-intensive, small-scale rural industries could significantly reduce the flow of illegal aliens within five to eight years.

In the short run, the best approach would be an expanded program of temporary worker visas permitting up to six months of employment in the United States each year. A temporary-worker program that did not require a prearranged contract between the alien worker and a particular United States employer (in contrast to the former *bracero* program of contract labor) would minimize exploitation of alien workers while reducing illegal immigration and keeping open a critically important safety valve for Mexico. It would also benefit United States workers, since the use of legal alien labor is likely to have a less depressing effect on wages and working conditions than the use of illegal alien labor.

It is ironic that a more restrictive immigration policy is being advocated by many at a point in our history when declining birth rates, the end of unlimited legal immigration, and an American labor force with more education and higher job expectations than ever before all foreshadow a shortage of workers to fill low-skill, low-wage, low-status jobs in the United States economy. When this occurs, in the not-too-distant future, the aliens who are now viewed as a burden on United States society may be seen as a highly valuable asset.

#### FOOD AND POPULATION: X

**HON. FREDERICK W. RICHMOND**

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. RICHMOND. Mr. Speaker, Anthony Wayne Smith, the president and general counsel of the National Parks and Conservation Association of Washington, D.C., has written a beautiful edi-

torial in the June 1977, edition of this organization's environmental journal.

Spring has arrived to most parts of America. We all can see it in the birds, the flowers, the cool rivers and the farms beginning to bloom. Yet another spring has come to America, says Smith. Our public life has once again become free, more open. We have a new President and a new Congress.

There is hope now that conservation and the protection of America's natural environment and agricultural heritage will become a moral imperative, rather than simply an occasional fad somewhere down the list of America's concerns.

As Mr. Smith explains:

The humane purposes of an industrial society are not served by a squandering of natural resources or the dissipation of the industrial product. The true industrial purpose is the release of human beings from drudgery and poverty into a life of security, sufficiency, leisure, and opportunity for esthetic and intellectual fulfillment. Towards these ends conservation is a moral imperative.

But much will depend on decisions in matters which have not thus far had much attention. Whether we are interested in energy, water, or the control of urban sprawl, the quality of life in America cannot be improved, nor even sustained, unless we can bring our numbers under control.

What is true of America is also true for the world. Unfortunately, too many of the proposed solutions to alleviate world poverty rely simply on redistributing wealth or resources. These answers will make little difference if the foundation upon which our economies rest—our natural resources and environment—is being irreversibly destroyed by the pressures of growing populations.

Striking a theme which he underlined as a participant in the Environmental Agenda's Task Force report in February, Mr. Smith wisely points out:

Suppose it to be true, for the sake of argument, that the world could feed its present population adequately, without destructive effect on the planetary ecosystem, if the wealth were equitably distributed. It is not so distributed, and there is small chance that this will happen before famine overtakes us and solves the problem brutally by a rapid rise in death rates. Direct approaches to the problem of proliferation become imperative in the name of humanity. If our overseas aid is to be coupled with libertarian issues and to economic efficiency, then let it be linked as well to effective efforts at the reduction in birth rates.

The editorial by Anthony Wayne Smith is eloquent and I wish to bring it to the attention of my colleagues at this time:

#### AN AMERICAN SPRINGTIME

Springtime came late this year after the hard winter, but poured its abundance of new life into the world with its old extravagance. After the melting snows, the spring peepers and chorus frogs awoke as always and filled the warming nights with ancient music. And then came the birds, and the morning choruses, robins searching the lawns, meadowlarks calling in the fields, red-winged blackbirds dropping metallic notes from tree-tops. You may follow the cool

creek through the pasture, discover the fragile trout lily in an earthy nook, and everywhere bluebells. You can breathe more freely again, looking ahead toward the abundance of the unfolding year.

Spring came also to the public life of America. For those who remembered an old mission toward freedom but found themselves too often locked in partnership with tyranny, there was a new call for liberty. In place of the habitual acceptance of a deadly weight of armaments, there was a voice for at least a beginning cut in the arsenals of insanity. And instead of drifting with the tide of nuclear proliferation, the new President proposed to stem it.

In keeping with the spirit of Spring, the rivers of America may once again run free. No doubt the last useless and destructive dam has not yet been built, but the challenge has been raised. We look ahead to strong programs for the reforestation of the land, for the rigorous control of strip mining for the protection of farmlands, for the recovery of the forests. And we have confidence that as the mortal dangers of nuclear power are constantly more clearly understood, this nation first, and others perhaps later, will turn toward the sun and the winds to harness by an advanced technology the energy needed by an industrial society.

The revolution which has occurred may be much more profound than supposed. When the new people arrived, in many cases there had indeed been nobody there. Youthful enthusiasts stepped into positions of power, and no one to gainsay them. Their judgment in some instances has been poor, and their inexperience occasionally colossal. But their spirits are high, and their desire for change; new deeds are afoot in the land.

For our part, with our particular mission for the wildlands of America, we shall press for the better protection of the great primeval national parks with more confidence that our voices will be heard. We shall concern ourselves with the difficult problems of plans and money for the recreational parks near the cities with more assurance that the needs of city people for contact with nature will be understood by those in power. We shall believe it possible once again to unfold programs for the restoration of generous open space in the cities, coupled with industries and homes for all.

We shall believe that the new legislation governing the forestry agencies will be administered for the restoration of natural balances, not for simple-minded economic productivity. We shall dare to suppose that an Administration concerned for human rights will lend its aid toward the humane treatment of animals and the survival of endangered species everywhere.

We shall watch for and support a rigorous restraint upon the deadly chemicals, pesticides, herbicides, additives, nuclear wastes, the modern multiplicity of carcinogenics, which have been poisoning our world. A vast indignation has been building up throughout the nation about these atrocious dangers; the new President will have strong support from the people in these matters, in spite of the interests, and he has proposed to stay close to the people.

We welcome the emphasis on conservation expressed in the President's message on energy and elsewhere. The humane purposes of an industrial society are not served by a squandering of natural resources or the dissipation of the industrial product. The true industrial purpose is the release of human beings from drudgery and poverty into a life of security, sufficiency, leisure, and opportunity for esthetic and intellectual fulfillment. Toward these ends conservation is indeed a moral imperative.

There may well be a closer conjunction between the President and Congress than

some of the first skirmishes have suggested. The new men and women who came to the Capitol in recent years arrived during a winter of adversity in Presidential attitudes. It was not Congress which failed the nation in respect to strip mining. Nor was it Congress that denied funding to the national parks. Many of the obstructionists have taken their seniority and departed. A revitalized committee structure promises new energy, greater competence, a more magnanimous outlook in Congress in the years ahead. The new Congress can be expected to welcome the new leadership in the White House in most matters, and to support, not resist the fresh initiatives.

Much will depend on decisions in matters which have not thus far had much attention. The quality of life in America cannot be improved, nor even sustained, unless we can bring our numbers under control. The younger generations have done well in recent years in establishing the small family as the moral norm. The natural increase of the American nation will soon level off; but the tides of illegal immigration threaten to submerge all these good efforts. Conservationists should be making common cause with organized labor to protect American jobs and the American environment. Programs should be developed for jobs on farms for the unemployed of the cities; farm organizations should support such programs instead of resisting immigration controls. There is strong sentiment in Congress for action; when will the Administration move?

The population issue worldwide is more deadly. Suppose it to be true, for the sake of argument, that the world could feed its present population adequately, without a destructive effect on the planetary ecosystem, if the wealth were equitably distributed. It is not so distributed, and there is small chance that this will happen before famine overtakes us and solves the problem brutally by a rapid rise in death rates. Direct approaches to the problem of proliferation become imperative in the name of humanity. If our overseas aid is to be coupled to libertarian issues and to economic efficiency, then let it be linked as well to effective efforts at the reduction of birth rates.

As environmentalists we are inveterate internationalists. The world movement for national parks was an early-blooming flower of planetary cooperation. One of America's most generous gifts to the world was the example of its National Park System. It was a gift that belied our supposed materialism. That it was accepted so readily and spread so rapidly around the planet is a tribute to the love of life and beauty which lies serenely nonetheless in the depths of the human heart everywhere and always. But the contribution of Western Europe was of incalculable historic significance. And more recently the heroism of so many of the people who inherited responsibility for the great parks of Africa has set an example for devotion everywhere.

The United Nations Conference on the Law of the Sea resumes its sessions as we go to press. Unfinished, hardly begun, is the vast work for the protection of the oceanic fisheries, vital to the food supply of a hungry planet, and the restoration of the endangered marine mammals. Unfinished also is the salvation of the oceans from the pollution which is the evil hallmark of irresponsible economic systems. Also unsolved as yet is the administration of the great wealth of minerals which is thought to lie on the deep floors of the oceans, whether for the benefit of a few or of all, and whether with care for the environmental matrix of life, or ruthlessly, with the death of the world just ahead. The President's choice of Ambassador Richardson as the head of the American delegation to Law of the Sea, one

of the most experienced and talented public servants America has produced in recent years, bodes well for the outcome. Environmentalists everywhere should support these efforts.

Three million years or so: a long, long time have man-like creatures walked the earth. Just recently we left the savannahs for the cultivated fields, exploring the ways of agriculture. More recently we built the sprawling cities, centers of intense cooperation, but of lost contact with surrounding life. A short, short time ago came writing; later the ways of science; and now our powers outrun our sense.

The crisis deepens; on every hand the danger seems to mount; as persons and as nations we live in fear and trembling. Yet now perhaps, here in America, the winter may be lifting. Faith, hope, and charity, as in other dark days long ago, will be needed to warm our hearts until the springtime be fulfilled.

#### CONSUMER EDUCATION PROJECTS EXPANDING

**HON. LESTER L. WOLFF**

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. WOLFF. Mr. Speaker, I would like to call to the attention of my colleagues the current consumer education project of the Office of Consumer's Education of the Department of Health, Education, and Welfare. I feel that this joint effort by labor officials, educational institutions, and community organizations is most commendable and worthy of note. The following article appeared originally in the AFL-CIO News, and is reprinted here in its entirety. "Consumer Education Projects Expanding."

The article follows:

#### CONSUMER EDUCATION PROJECTS EXPANDING

(By Sidney Margolius)

In a number of States, labor officials are joining with schools, colleges and community organizations to help operate the most thorough nationwide effort yet to provide urgently needed consumer education for both school students and adults.

In the first year of this new national consumer education effort, the federal Office of Consumer's Education (OCE) has financed 66 diversified projects in various states, selected from 839 applications, for a total of \$3 million. The OCE recently has been accepting applications for another \$3 million worth of financing of grass roots projects, with the deadline Mar. 10. The government grants are used to supplement cash and other resources supplied by the community groups running the educational projects.

While somewhat over half the projects are being sponsored by traditional educational institutions such as schools and colleges, the OCE sees its effort as different from much of the traditional consumer education in schools. Such classes usually are related to homemaking business education or industrial arts.

In this new concept, school students would get consumer education in a wide variety of subject areas, such as consumer math in a regular math course.

But just as important, the projects include consumer education for adults, and especially those with special needs or those trying

to manage on relatively small incomes. The nonschool groups include senior citizens, handicapped people, industrial workers, and low income families.

They share common consumer problems, of course, such as high food costs, but have their own special problems. The classes, consumer information clinics and service activities in which these special groups are now engaged, are aimed at developing the knowledge needed to cope with their special problems.

Several of the projects seek to teach consumers their legal rights. One, operated by the Tampa, Fla., Legal Services, helps answer individual legal questions but also tries to educate the public through group discussions of rights and responsibilities.

Another project, in Flagstaff, Ariz., is concentrating on consumer legal education for low income people.

An interesting program sponsored by the New York City Community College, called "seniors teaching seniors," is training older people to be consumer educators. This is a job at which seniors can be very useful and effective with their long experience in surviving depressions and inflations.

Several projects are helping native Americans and Spanish-speaking groups solve urgent consumer problems. In the west, the Coalition of Indian Controlled School Boards is developing a consumer education program for reservation schools.

Several projects are aimed at helping handicapped consumers, such as the deaf. Also noteworthy are projects being developed to help people returning to society. The Southern Illinois University Dept. of Family Economics is planning consumer education for prison residents and parolees. The University of Alabama is sponsoring a project for prerelease mental patients.

A project under way in San Francisco, which is potentially useful for other communities, is concerned with health education. It aims especially to educate consumers against useless and sometimes even harmful quack medical products and services.

In general the projects have been designed so that the methods and materials they develop can be used in other communities and schools around the country. Thus, the \$3 million authorized so far by Congress for each of the three years should have a very useful ripple effect.

As directly useful as the services flowing from these pilot projects may be to the individual groups, another value is what the country as a whole is going to learn about specific consumer information and service needs. The community groups and educators running these projects may learn as much from the people being educated as they will from the teachers.

#### PERSONAL EXPLANATION

**HON. PATRICIA SCHROEDER**

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mrs. SCHROEDER. Mr. Speaker, Wednesday, June 1, I was absent. Had I been present I would have voted as follows:

Rollcall No. 292, "yea."  
Rollcall No. 293, "yea."  
Rollcall No. 294, "yea."  
Rollcall No. 295, "yea."  
Rollcall No. 296, "yea."

#### THE PUBLIC TRANSPORTATION TAX INCENTIVE ACT

**HON. THOMAS B. EVANS, JR.**

OF DELAWARE

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. EVANS of Delaware. Mr. Speaker, I am today introducing the Public Transportation Tax Incentive Act of 1977. This legislation would stimulate public transportation use in the United States by permitting persons to deduct from their Federal tax bill the costs of commuting to and from work on public transportation.

I am convinced that we must encourage greater use of mass transit if we are to make a dent in our Nation's energy problems. There are simply too many cars on the road today. This fact is especially true in urban areas where public mass transportation could have a significant impact in lowering energy usage and traffic congestion.

Since its inception, the Urban Mass Transit Administration has received a grand total of \$16.1 billion in budget authority. This is obviously a significant amount of money, but it pales in comparison to the funding we have provided for highway projects in this country. As of December 31, 1976, the Federal Government has provided \$55.6 billion in funding for the Interstate System and another \$26.1 billion in Federal aid to primary, secondary and urban highway systems. That works out to some \$81 billion, or more than five times the amount spent on mass transportation.

I certainly do not want to disparage the interstate, primary, secondary and urban highway systems. They have brought economic growth and prosperity to almost every section of our country. But we must work to achieve a greater balance between funds for highway projects and those of mass transit. The Nation's energy shortage makes this need doubly urgent.

My legislation would permit the deduction of costs incurred by individuals using public transportation between one's residence and his place of employment. Any public transportation system which provides scheduled common carrier passenger land transportation, along regular routes is eligible for the deduction. This includes such transportation systems as subways, buses, commuter trains, trolleys and other light rail systems. It would not include taxis, since that vehicle does not follow a scheduled and regular route nor would it allow persons to deduct the cost of airfare between cities as a commuting expense.

Mr. Speaker, most public transportation systems operate at a loss. Obviously, if new ridership is encouraged by our Nation's tax policy, that operating loss could be significantly cut, thus allowing more Federal dollars to go into capital programs and less into operating subsidies.

The Joint Committee on Taxation estimates that my proposal would decrease

tax revenues by approximately \$300 million. Yet when this figure is compared to the social benefits it would bring to our society as well as the economic benefits it will bring to public transportation systems throughout the country, I say that it is money well spent.

Our Nation's cities are in trouble. One of the reasons for this condition is the lack of adequate transportation resources. Urban transportation is caught in a vicious circle. On one hand, ridership is low because service is generally poor. Yet, on the other hand, service cannot improve in most localities because user revenues are not sufficient to cover even operating expenses, much less capital improvements.

My bill would break this vicious circle by encouraging people to make greater use of mass transit. Some would prefer to encourage ridership through punitive means, such as high gasoline taxes or parking fees, or even banning cars from downtown areas. That is a "stick" approach. I prefer to use the "carrot" approach by rewarding people economically who use mass transportation.

We need a better mass transit system in this country. The Public Transportation Tax Incentive Act is one way to encourage development of that system, and I urge the House to consider it promptly.

#### HUMAN RIGHTS IN THAILAND

### HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. STARK. Mr. Speaker, while in Bangkok recently I met with several non-political representatives of various religious groups concerned about the severe infringement of human rights presently directed against dissidents and minorities in Thailand. The religious groups have been working fervently to protect the rights of individuals arbitrarily detained on the vague charge of endangering society. These human rights groups, and the political prisoners they seek help for, eagerly look to the United States to fulfill President Carter's commitment to human rights abroad. I submit this "Summary Report on the Human Rights Situation in Thailand" to the CONGRESSIONAL RECORD as this problem deserves our closest attention:

COMPILED BY THE COORDINATING GROUP FOR RELIGION IN SOCIETY, THAILAND

After the military coup on 6th October, 1976, many thousands of people were arrested under martial law edicts, and have still not been brought to trial.

Those arrested fall into main categories: Over 3,000 people arrested at Thammasat University prior to the coup. Most of those were rapidly released on bail, but was only refused to thirty, however a large number of poor people who could not possibly afford the \$1,000.00 bail stayed in jail for almost five months. Most of these had nothing to do with the Thammasat demonstration but included Janitors, Noodle Vendors, and ordinary spectators. Now, all except for 30 of those arrested at Thammasat have been released. Only 110 of those arrested are

being charged, (mainly for being communists) and will be tried at an unspecified time in a military court. They are not entitled to legal representation during their trial (which must take place before February 1978).

Up to 8,000 people have been arrested as "Danger to Society" since October 6th, 1976, and probably at least 2,000 are still being held. According to Decree Number 22 of the National Administration Reform Council (NARC) those people can be held for 30 days at a time, renewable, and need never be brought to trial.

In addition to the arrests there have been many other abuses on human rights, namely: Up to 50 intellectuals, writers, journalists, and university professors have had to flee the country and take up residence in various Western countries. Some have had to leave their family and friends behind them.

At least 600 students, workers, and farmer leaders have had to flee to Laos to avoid arrest and detention, whilst a larger number have had to go underground.

Since the coup, Communist insurgency has taken a dramatic upturn with increasing casualties both amongst troops and insurgents as well as amongst innocent villagers. In its effort to deal with the insurgency problem, the government has declared increasing areas of the country out-of-bounds to the general public, has introduced long curfews, and restricted the freedom of villagers to a great extent in other ways.

All political parties have been banned, and labour unions have been made inoperative (meetings and strikes have been banned and those organizing the most legitimate of strikes have been arrested as "dangers to Society"). Many members of socialist parties, leaders of trade unions, and peasant unions are amongst the arrested.

Strict censorship regulations have been imposed on all mass media. Many left wing newspapers have been permanently closed (and the journalists working on them put out of work), and other newspapers have been temporarily closed—thus muzzling criticism of government. In terms of the electronic media, all those high level officials who had opposed the army controlled T.V. and radio stations have been replaced, and only moderate right wing stations allowed to broadcast. Magazines, newspapers, and radio stations on the extreme right have also been closed.

Hundreds of thousands of books have been burnt and banned since October 6, 1976, including books actively promoting socialist or communist ideologies, but also including many less radical books advocating more egalitarian and just development policies. Many of the banned books seemed to have been banned more because of their authors or titles than for their content. At the same time, hundreds of thousands of copies of books written by the Prime Minister have been printed at government expense and distributed to educational, religious, and other institutions all over the country.

All in all it can be seen that the present military backed government has taken action against all normally accepted principles of human rights.

#### ELECTORAL COLLEGE

### HON. MARJORIE S. HOLT

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mrs. HOLT. Mr. Speaker, it is an unfortunate habit of politicians to leap for

almost anything having the name reform, to give the appearance of doing something about real or imagined problems, and to ignore the possible harmful consequences flowing from the proposed solution.

I offer a current example: The proposal to abolish the electoral college and install direct national elections of Presidents. There is a real temptation to endorse such a simple and direct system. It has the virtue of being efficient.

But efficiency is not everything, and in this instance would be downright destructive of the constitutional foundation of our Federal Republic. The National Government is a creation of the States. The Constitution was ratified by the States. The States elect the President after each has determined its choice for President in a popular election. The radical change proposed by the Carter administration would remove the States from this vital process of electing our national Chief Executive.

Mr. Speaker, the fathers of our Republic conceived a "separation of powers" as a system for preventing tyranny from arising in our land. There is more to this concept than the separation of the legislative, judicial, and executive powers at the national level. There is also the principle of federalism. The Constitution reserves powers and responsibilities to the States, which created the Federal Union.

The authors of our Constitution profoundly feared the power that could be exercised by a strong central government. They favored a dispersal of power. They carefully provided for perpetual conflict and friction not only between the branches of the National Government, but also between the States and the National Government.

Under our constitutional system, the President of the United States must be concerned about how Maryland votes, how Massachusetts votes, and how California votes in a Presidential election. He is politically accountable to the States.

If direct national elections of Presidents replace our electoral college system, the candidates would be less concerned about States. They would be concerned about appealing to voters en masse, acquiring power independently of the States, and ultimately using that power without regard to the States.

There are those who advocate the consolidation of power in central authority, but the liberty of the people is safer when power is dispersed among rival authorities. That is the genius of the American system.

It is true that the reservation of powers to the States has become blurred in the passage of time as the National Government has grown to an enormity never envisioned by the Fathers. Congressional enactment of aid programs for an almost limitless list of State and local governmental functions has brought a large degree of control from Washington. Court decisions have permitted Federal

regulation of interstate commerce to stretch to the outer limits. It has been necessary for the National Government to protect the constitutional rights of racial minorities.

But we should not be scrapping all vestiges of States rights. We should not be reducing the political leverage of the States and completely wiping out the small States, which is what the proposed constitutional amendment would do. It would guarantee that the Presidential campaigns would be targeted on the large population centers to the exclusion of other areas.

One further word of caution I would add. The Carter administration proposal would invite creation of multiple political parties, some formed to pursue a single issue. It is likely that a Presidential general election would have several candidates dividing the national vote. It is also likely that such a splintering would leave no candidate with a majority, and possibly not even a respectable plurality. Our political structure could easily become fragmented with several parties struggling to form coalitions.

I shall not pass judgment on the merits of multiparty politics. I note only that the proposed constitutional amendment would probably lead to the end of our traditional two-party structure. Presently, it is very difficult for a minor party to have an impact on Presidential elections because of the winner-take-all character of the electoral contest in each State. The direct national election of the President would probably become a free-for-all.

I submit these reservations, Mr. Speaker, because I believe they deserve profound consideration by every Member of this body.

**PHILADELPHIA'S ECONOMIC DEVELOPMENT CORPORATION ACTIVE IN CREATING JOB OPPORTUNITIES**

**HON. JOSHUA EILBERG**

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. EILBERG. Mr. Speaker, for the past 8 years, the economy of the city of Philadelphia has been in a sharp decline. Some of this economic loss can be traced to the misguided economic policies of the Nixon and Ford administrations, which believed there was a trade-off between inflation and unemployment and found out, to the sorrow of the American people, that they were dead wrong. The rest of the problem stems from the determination of the Nixon and Ford administrations to dismantle the Federal establishment in Philadelphia—efforts which have cost us more than 100,000 direct and indirect jobs.

Philadelphia has not taken this economic setback lying down. The city has pressed forward with efforts to hold present industries and to help them expand, and to attract new industries which could create new employment opportunities for citizens of the Greater Philadelphia area.

I am proud to be able to report that the Philadelphia Industrial Development Corporation has played a major role in this continuing effort toward recovery. But this is not a new role for the PIDC, because in the past 18 years, it has assisted in the financing of over 900 industrial and commercial projects in the city of Philadelphia. The long-term capital investment financing provided through the PIDC now exceeds \$600 million.

While these programs have been quite successful, the PIDC is the first to concede that they did not, of themselves, provide adequate long-term financing for small businesses. With this thought in mind, the PIDC recently took steps to use the SBA 502 program to meet this need.

The SBA 502 program is designed to alleviate the relocation of employment opportunities from the inner city. Working through local development companies, the SBA can guarantee up to 90 percent of a commercial loan for a firm which could not otherwise obtain financing. In addition, the 502 program can make direct loans through a local development company at more favorable terms to act as an incentive for a local firm to remain in the city.

The SBA program working through local development companies is, in the opinion of PIDC Executive Vice President M. Walter D'Alessio, the most powerful tool of economic development for creating and maintaining employment opportunities in small inner-city business. In fact, for the small and intermediate sized business, there is no other assisted program to sustain growth while remaining within the city.

Mr. D'Alessio informs me that now that the PIDC is at the point of maximum use of this program, the SBA district which includes Philadelphia is experiencing a shortage of funds. It has been forced to borrow from other regions and commit funds from its next fiscal allocation to meet commitments made this year.

Meanwhile, of course, the PIDC's program goes on, and it will require more funds to sustain its efforts to assist Philadelphia businesses.

For that reason, Mr. Speaker, it is my earnest hope that the Congress this year will not only continue the SBA 502 program but that it will increase the funding to meet needs in cities such as Philadelphia. I recognize that the competition for Federal dollars is intense, and that we are operating under serious budgetary constraints. But the need is urgent to fund this program properly so that efforts can go forward to put people back to work in the private sector.

**THE SERBSKY TREATMENT AND VLADIMIR BUKOVSKY**

**HON. LARRY McDONALD**

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. McDONALD. Mr. Speaker, nearly everyone is aware that on occasion perfectly sane persons have been committed to mental hospitals for devious reasons, but, the Soviet Union is unique in the world today for making large scale use of special mental hospitals in which to incarcerate great numbers of political dissidents in order to silence them and treat them with drugs in order to render them ineffective upon release. The magazine, *Psychology Today* for June 1977, published an interview with Vladimir Bukovsky on this subject and since he had firsthand experience with this treatment, this article is worthy of our closest attention. Bukovsky estimates that more than 2,000 political dissidents inhabit these hospitals, which are run by the MVD—Ministry of Internal Affairs—at the present time. The article follows:

**THE SERBSKY TREATMENT**

(Vladimir Bukovsky read the wrong books, defended the wrong writers. His government declared him legally insane and committed him to a mental hospital. In this conversation with psychiatrist E. Fuller Torrey, he tells what happened next.)

Vladimir Bukovsky was born 34 years ago in Moscow, the offspring of a professional writer and a journalist. As a first-year biology student at Moscow University he was expelled for becoming involved with a literary journal. In 1963, when he was 20, Bukovsky was first arrested for possessing copies of *The New Class*, a book by dissident Yugoslav Communist Milovan Djilas. After being examined at the notorious Serbsky Institute of Forensic Psychiatry he was declared insane and sent to Leningrad Special Psychiatric Hospital where he spent 15 months. Released, he almost immediately became involved in the defense of writers Andrei Sinavsky and Yuli Daniel who were under arrest, and organized a small demonstration to demand that the freedom guaranteed by the Soviet Constitution be honored. This earned him confinement in three more psychiatric wards, including an eight-month return visit to the Serbsky. Following his release, he continued his fight for civil liberties in the USSR, and in 1967 was arrested again for organizing a demonstration to protest the arrest of four other dissidents. This time Soviet authorities decided to try a new tack, and rather than call him mentally ill, they sentenced him to prison for three years, which he served in a labor camp.

His ensuing freedom lasted just over a year. In 1971 he gathered together case records of six dissidents who had been declared insane and held in mental hospitals, and had these records smuggled out of Russia to the West. Simultaneously he appealed to Western psychiatrists, and especially to the World Psychiatric Association (WPA) who would meet in Mexico City later that year, to examine the records. A group of 44 British psychiatrists eventually did examine them and concluded the six were not mentally ill, but Soviet psychiatrists and the leadership of the WPA prevented the issue from being discussed in Mexico City. These records were the first hard evidence that Soviet author-

ities were systematically abusing mental illness as a label for dissidents, and mental hospitals as prisons with indeterminate sentences. They were also the first hard evidence that some Soviet psychiatrists were allowing themselves to be prostituted by the State. The reaction of Soviet authorities to Bukovsky's act was fast and furious—12 years in prison, labor camps, and internal exile.

By this time Bukovsky had become known in the West, and had been "adopted" as a political prisoner by Amnesty International. Not deterred by his sentence, he began a series of hunger strikes and demands for better prison conditions. In 1974 while in a labor camp with dissident psychiatrist Semyon Gluzman, they collaborated and produced "A Manual on Psychiatry for Dissidents," instructing dissidents how to avoid being labeled insane when they were arrested. A copy of the Manual was subsequently smuggled to the West and joined the growing volume of data on the abuse of psychiatry in the USSR. As Bukovsky's physical condition deteriorated through both punishment and hunger strikes, his mother, as well as Amnesty International and other groups, increased demands for his release. Finally, on December 18, 1976, he was released and exiled in exchange for imprisoned Chilean Communist leader Luis Corvalan. As an exchange of one political prisoner for another, it was the first implicit admission by the Soviet Union that they do indeed hold such prisoners. Two months later Bukovsky addressed a joint Commission of the United States Congress, and the following week he met with both President Carter and Vice-President Mondale. He had become a symbol for human rights.

E. Fuller Torrey: What was it like, being a sane man in an insane asylum?

Vladimir Bukovsky: Well, I found many people in the place who were quite sane.

Torrey: So you were only one of several sane people in the mental hospital?

Bukovsky: Yes, and we formed a sort of group to communicate with each other. With the other patients it was impossible to communicate, for some of them were extremely ill. So those of us who were sane formed a sort of club.

Torrey: A club of sane people in an insane asylum. That must have been a very interesting club. How were you personally treated by the doctors there?

Bukovsky: I was lucky in that hospital I wasn't given any forced medicine.

Torrey: Was that unusual?

Bukovsky: Yes, very. Almost all the other dissidents there were forced to take medicine that made them sleepy and hard for them to think.

Torrey: How did you escape it?

Bukovsky: When I got to the hospital I was assigned to an old Russian psychiatrist. I think he was around 80. After our first interview he told me he thought I was quite sane. He thought I had pretended to be crazy to get into the hospital and escape a prison sentence or something, that I was a malingerer. I tried to explain that he had it wrong but he had made up his mind and fought very hard to get me released. He would go in front of the commission (which determines when a patient may be released) and say I was sane. This made the KGB mad, but they didn't know what to do with this old psychiatrist who didn't understand or wouldn't understand that he was supposed to find me insane. Anyway he didn't give me drugs because he thought I was sane.

Torrey: This was at the Special Psychiatric Hospital in Leningrad?

Bukovsky: Yes, right in downtown Leningrad, near the train station.

Torrey: The Finland Station, where Lenin returned to lead the Revolution?

Bukovsky: Yes, I could hear the trains in the distance, but there was a big factory that cut off the noise of the station.

Torrey: How ironic. I wonder what Lenin would have said if he had known that the Revolution would eventually lead to putting you in a mental hospital so you couldn't be heard by the people. How many special psychiatric hospitals like the one you were in are there?

Bukovsky: There are at least 12. I am not sure how many more there are.

Torrey: And how many sane people were in your insane asylum?

Bukovsky: Out of 1,000 inmates I think about 150 were political prisoners and perfectly sane.

Torrey: That means that there are probably over 2,000 political dissidents in mental hospitals in the Soviet Union?

Bukovsky: Yes, there are probably at least that many. We do not know for sure how many there are.

Torrey: Besides the psychiatrist who was in charge of you, what were the other psychiatrists there like? Did they realize that you weren't mentally ill?

Bukovsky: Yes, of course. They all understood quite well that we were sane people. Many of them were quite cynical. One of them once told me that the hospital we were in was really more like a concentration camp. It is our own little Auschwitz, he said. Yes, they understood how things were very well, but they were not in a position to do anything about it. They had neither the desire nor the power to change things.

Torrey: What kind of psychiatrists are these people who would work in an insane asylum with sane people? Why would they take the job?

Bukovsky: They probably do it because they earn more money than if they work in a regular mental hospital. They get special pay because it is a special hospital.

Torrey: Are they army psychiatrists?

Bukovsky: Not exactly. They are military, but not army. They work for the Ministry of Internal Affairs, which is the Ministry responsible for the special psychiatric hospitals. Regular psychiatric hospitals are under the Ministry of Health. So these psychiatrists in the special hospitals have ranks, like captain, major, and are promoted from rank to rank if they do a good job and don't cause trouble.

Torrey: And doing a good job includes testifying that people like yourself, who wish to protest the lack of civil rights, are insane and should be kept in a mental hospital?

Bukovsky: Exactly.

Torrey: When you first entered the Leningrad Special Psychiatric Hospital, how long did they say they were going to keep you?

Bukovsky: It was quite clear from the beginning that they would keep me as long as they liked. I was told that it all depended on my behavior. If I would recant, if I would be good, how do you say?

Torrey: Tractable?

Bukovsky: Yes, tractable. If I would be tractable then they would let me out.

Torrey: It sounds like what Victor Fainberg (another Soviet dissident) said when he was in the same hospital as you. He said his psychiatrist told him that his disease was dissent, and as soon as he renounced his opinions and adopted the correct ones he'd be free.

Bukovsky: Yes, that is how it is. But of course I would never recant or renounce my opinions.

Torrey: They could have kept you there for 20 or 30 years if they had wanted, and if you hadn't had an older psychiatrist who wouldn't cooperate with them.

Bukovsky: Oh yes. I knew some who had been in for over 10 years. It is an indeterminate sentence.

Torrey: Is that why Soviet officials put you in a psychiatric hospital rather than in prison?

Bukovsky: That is one reason. If they had put me in prison originally I would have had a sentence to serve and then I would be released. There wouldn't be the same pressure on me to recant. Of course sometimes they just sentence you again to a new term when you finish your term, but that's harder to do. It's much easier to put you away in a mental hospital.

Torrey: What are the other reasons they use mental hospitals rather than prison?

Bukovsky: Well, it discredits the person. Especially if the person is prominent and speaking out, that's a big problem for the Soviet leaders. For instance, General Grigorenko, who was a great general, spoke out against the invasion of Czechoslovakia. That made a big problem. It would have been hard to bring him to trial so they called him insane and sent him to a mental hospital. Then people won't pay attention to what he says. And people understand that other people can become mentally ill.

It's easy to explain to common people, the people in the street. Also, sometimes they put people who speak out into mental hospitals when they don't have a very strong case against them, when it would be a difficult trial.

Torrey: Is it true that mental patients have fewer rights than civil prisoners in the Soviet Union?

Bukovsky: Yes, absolutely. As a mental patient you have no rights. Any sort of protests you make they just say is because you are mentally sick. Anything you say or do becomes part of your case record, which can then be used against you to justify keeping you there indefinitely. Anything you write, letters or anything, may turn up in your case folder to be used against you. If you recant they say, see, it proves he was crazy. If you refuse to recant, and protest, they say, see, it proves he is crazy. You take your choice.

Torrey: When they first picked you up in 1963, do you think they intended then to send you to a mental hospital?

Bukovsky: No, I think they wanted me to recant. They wanted to make a traitor out of me and make me inform against my friends. They wanted some information from me, then probably they thought they would put me in prison for a little while. They put me in solitary confinement to change my mind.

Torrey: But you didn't cooperate with them, I guess.

Bukovsky: No, I refused to speak with them at all.

Torrey: That must have made them furious.

Bukovsky: Yes, and after they had tried for a month they gave up and turned me over to psychiatry. That was the end of my case legally. From then on I was just a psychiatric patient.

Torrey: They diagnosed you as a schizophrenic, isn't that correct?

Bukovsky: With schizophrenia of the continuous type. But some of the psychiatrists said that schizophrenia was the wrong diagnosis and that really I had a paranoid development of personality. They couldn't decide between these two diagnoses.

Torrey: I have been to the Soviet Union twice and am familiar with how schizophrenia is classified there. The continuous type of schizophrenia is said to begin very slowly but is progressive. This is especially true of the "sluggish" or "creeping" subtype in which a person is said to only have mild personality changes in its early stages.

Bukovsky: Most of the political prisoners are diagnosed as schizophrenics. Anything they do, any protest they make, even a hunger strike is said to be proof of the diagnosis.

Torrey: G. V. Morozov, the head of the Serbsky Institute, has even written that argumentativeness is an important symptom of schizophrenia.

Bukovsky: Then I guess it's a pretty common disease even in the United States if that is its definition.

Torrey: The man who is responsible for the classification of schizophrenia in the Soviet Union is Professor Snezhnevsky of the Institute of Psychiatry in Moscow. He is the one who has stressed that misbehavior in adolescence or even earlier is often a symptom of early schizophrenia especially if there is any family history of mental illness.

Bukovsky: I have read some of Snezhnevsky's works. He has also been one of the main psychiatrists behind the scenes who sees that dissidents are labeled mentally ill and put away.

Torrey: Do you think his theories of schizophrenia developed to accommodate the needs of the state, or that he was selected out for advancement because his theories were convenient.

Bukovsky: Probably the latter, a kind of selectivity. Survival of the most convenient theory so to speak. In a socialist state that is supposed to be perfect there can, by definition, be no social condition that could create true dissenters. Therefore, the dissenter must be crazy, sick. The logic is very neat.

Torrey: Some people have written that the Soviet Union has a long history of calling dissidents mad, and that this was also used by the czars. For example Czar Nicholas called the philosopher Chaadaev mad over one hundred years ago because Chaadaev had disagreed with him.

Bukovsky: To begin with, Chaadaev was never put into a hospital. It was just a statement that he was insane.

Torrey: When did it begin, then, in a widespread way as it is now found in the Soviet Union?

Bukovsky: It began under Stalin. But at that time there were only two mental hospitals, in Leningrad and Kazan, for dissidents. Stalin didn't need many. He could just destroy people if he wanted. But if they were prominent he might use the mental hospital.

Torrey: And what happened after Stalin?

Bukovsky: It is interesting. There was an old Communist Party member named Sergei Pisarev who was a member of the Party's Central Control Commission. He prepared a report that the cases against the Jewish doctors prepared by an investigating committee in 1952 were concocted and he handed the report over to Stalin. Two weeks later Pisarev found himself in a mental hospital and labeled insane. In 1956, after Stalin's death, he arranged to get rehabilitated. He even made the psychiatrists reconsider their diagnosis and say he was sane. He got to know the chairman of the committee for rehabilitation, and persuaded him that an investigation should be made into the abuse of psychiatry. This was a golden age after Stalin's death when such things were possible. He succeeded in getting such a commission created. They investigated both hospitals and concluded that psychiatry had been abused, and got a lot of people released.

Torrey: So then it got worse again?

Bukovsky: Yes, especially under Khrushchev. Then it became a common practice and new hospitals started to be opened.

Torrey: So that by the time you were arrested in 1963 it was a common practice to label sane people insane and put them away to get them out of sight.

Bukovsky: Yes, I wasn't unique at all. The only way I am unique is that I am here to be able to talk to you about it. There are many hundreds of dissidents in the mental hospitals even today as we talk.

Torrey: When you were at the Perm labor

camp with Semyon Gluzman, the young psychiatrist who had publicly said that General Grigorenko was not mentally ill and was then thrown in jail for saying it, you wrote a manual together, "A Manual on Psychiatry for Dissidents." I read it several months ago and was profoundly impressed by it, impressed that manuals should be needed for people to defend themselves against my chosen profession. It is an excellent document. How did you manage to write it while in a labor camp?

Bukovsky: We put it together in bits and pieces. We had a small symposium that met under the pretense of having tea. We used to sit quietly in a circle, and one of us who had prepared a report would give it and then we would discuss it. We started out to do it because some people in the labor camp needed to know how to defend themselves from psychiatrists. Even though they had been sentenced to prison sometimes when their sentence was up they would be taken to a psychiatrist and declared insane and sent to a mental hospital. So it had a very practical value.

Torrey: Then how did you get it out?

Bukovsky: People started saying that the "Manual" would be useful to others as well. So we tried to smuggle it out. The first time we tried it we failed and the authorities seized it. But the second time it was a lucky case and it made it. Everything had to be done in secrecy.

Torrey: The KGB must have been furious with you.

Bukovsky: Even now they are threatening to start a new criminal case against Gluzman. They are threatening to sentence him to many more years in prison. It is only the agitation of Westerners on his case so far which has stopped that from happening.

Torrey: How can Westerners help dissidents in the Soviet Union? How can we help to bring about basic civil rights there? Should we cut off contact with Russian professionals? Should we not attend meetings attended by them?

Bukovsky: I am opposed to a complete boycott altogether. Rather you should boycott selectively and make contact with the good psychiatrists there. For example, you should have nothing to do with Snezhnevsky; he is a criminal and you should never sit at the same table with him. Your National Institute of Mental Health should not deal with him as they do. They are just supporting a criminal and making him respectable.

What you should do is to make contact with the good psychiatrists in Russia, the ones who will not allow themselves to be prostituted. For example, Professor Melekhov and Professor Lukomsky both sat on the commission in 1971 to determine whether I was sane. Both behaved extremely honestly in the face of obvious pressure on them by Soviet authorities. And there are honest young psychiatrists who too refuse to abuse their profession. For instance, when I was arrested in 1965 I was first taken to the psychiatric ward of Moscow City Hospital Number 13. There I was examined by two young psychiatrists, Drs. Arkus and Dumbrovich, and declared to be sane. The KGB was furious so they took me to another hospital, where I was also declared to be sane. The KGB was even more furious now, so they took me back to Serbsky Institute. It was difficult for them to declare me to be insane when two other sets of psychiatrists had just declared me sane so they just kept me there for eight months.

What you should do is to invite doctors like Melekhov, Lukomsky, Arkus, and Dumbrovich to your professional meetings in the West. Publish their papers. Give them recognition. Visit the psychiatric ward of City Hospital Number 13 when you come to Moscow. But don't cut off all contacts, just cut off selective contacts.

Torrey: It sounds like we should draw up a blacklist of Soviet psychiatrists who have compromised themselves and not attend any meeting with them or invite them.

Bukovsky: Exactly right. And at the top of the blacklist you might put Snezhnevsky, Morozov, and Lunts, but there are many more.

Torrey: And on your visits to the Soviet Union make the effort to contact psychiatrists who are not on the blacklist.

Bukovsky: Yes. You won't get much help from Intourist but it can be done.

Torrey: I know that psychiatrists in England have provided more support for you than psychiatrists in the United States. For example, when you sent the six case histories out in 1971 it was only the English psychiatrists who evaluated them. How did you feel when you heard that the World Psychiatric Association meeting in Mexico City in late 1971 had ignored your plea? Weren't you angry and disappointed?

Bukovsky: We are all human, and we are all subject to pressure on us. In Mexico City there was strong pressure on some psychiatrists to do nothing. And so nothing was done. You were all afraid to offend Snezhnevsky.

It was sad, yes.

Torrey: Some of us, including myself, are afraid that psychiatry could also be abused on a large scale in the United States. How can we prevent it happening here?

Bukovsky: The best way to fight a battle is to fight it on someone else's territory. You can prevent it here by fighting the abuses of psychiatry elsewhere.

Torrey: I suspect that all countries have psychiatrists who will allow themselves and their profession to be prostituted given the right circumstances, and that in every country there is a Lunts or a Morozov waiting to do his job if given the opportunity.

Bukovsky: Most certainly there is. Look at France in 1941. Here was a country that was supposed to love freedom. You know, the French Revolution. And look what happened. Many of the people tripped over each other in their rush to collaborate with the enemy, willing to allow themselves to be used.

Torrey: If we don't fight the abuse of psychiatry in the Soviet Union and elsewhere, what are the consequences?

Bukovsky: If the abuses begin in your country then it will be too late. If you try and fight it once it begins they will probably just call you insane and put you away.

(A note on Vladimir Bukovsky's mental health: Bukovsky had been diagnosed in the Soviet Union as having schizophrenia. Following his release in December 1976 he met with a group of British psychiatrists and was declared to be eminently sane, and with no evidence whatsoever of schizophrenia. The author, a clinical psychiatrist presently responsible for two wards of schizophrenic patients and doing research on this disease, strongly concurs with the opinion of the British psychiatrists after interviewing Bukovsky for over an hour. Bukovsky is a modest and self-effacing man, proud that he never compromised, and for whom principle is a way of life and not just a word. He retains a wry sense of humor, and an unusual ability to step back and look at himself and the world.)—E. FULLER TORREY

#### NOT JUST A SOVIET PROBLEM

The blossoming of psychiatry in the 20th century brought with it some very large thorns. Mental illness could be invoked as an explanation for the ideas and behavior of people, thereby discrediting them and even rationalizing the necessity for involuntary hospitalization. Jesus was one of the first intended victims: between 1905 and 1912 four books were published purporting to prove that He was a paranoid schizophrenic. Albert Schweitzer, an obscure philosopher at the time, responded to the assault with his

Psychiatric Study of Jesus. In the United States the first major case of involuntary psychiatric hospitalization to discredit and punish was that of Ezra Pound, accused of treason in Fascist Italy but declared insane and unfit to stand trial on the charges. Instead he was incarcerated at Saint Elizabeths Hospital from 1945 to 1958. General Edwin Walker was another. As one of the leaders of the segregationist forces resisting the integration of the University of Mississippi in 1962, he was involuntarily hospitalized in a federal hospital for determination of his sanity and thereby effectively discredited and removed from the scene. (Thomas S. Szasz reviews these cases in *Law, Liberty and Psychiatry and Psychiatric Justice*.) And then there are the many more nameless and forgotten, not poets or generals who get newspaper headlines but undereducated stubborn men and women who incurred the wrath of somebody (often a prison warden) and found themselves transferred to a hospital for the criminally insane with an indeterminate sentence. It still occurs in this country. Recently there have been charges that such abuses also are occurring in East Germany, Czechoslovakia, Iran, Brazil, Argentina, and other countries. It is not just a Soviet problem.

#### A TRIBUTE OF RECOGNITION TO ODELL BROADWAY

**HON. DALE E. KILDEE**

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. KILDEE. Mr. Speaker, it is a privilege and an honor for me to place in the CONGRESSIONAL RECORD a tribute to Odell Broadway, a remarkable woman from Flint, Mich. Odell Broadway has won scores of awards from civic, educational, and church organizations in recognition of her outstanding service and dedication to the Flint community. Her most recent award was being named "Woman of the Year" by the Zeta Beta Zeta chapter of Zeta Phi Beta Sorority.

I am proud to bring the story of this remarkable, distinguished woman to the attention of my colleagues, and I am inserting in the RECORD an article on her background that was part of the program printed for the Zeta award:

ODELL BROADWAY

(By Dorothy N. McNeal)

How does a woman become a legend in her own time? How does it happen that the mere mention of a name brings forth not only instant recognition, but all manner of testimonials to her record of solicitude and service?

When columnist Ann Landers neglected to credit Odell Broadway with writing the "Ten Commandments of How To Get Along With People" quoted in her column of January 13, 1977, little did she realize the storm which that oversight would brew. She had, after all, done an injustice to Flint's "First Lady of Community Service"!

"If you have a good attitude, you can do anything" is her watchword and she has woven that theme into nearly a half-century of unique personal involvement in the life of the Flint community. Mrs. Broadway takes great pride in "her children and young people" whose lives she has touched as teacher, counselor, home economist, benefactor, sociologist, psychologist and confidante. Once described as "a kind of mini-social agency," she has inspired, instructed and inspired hundreds of young people

and their parents to maximize their own resources and potentials for full growth and development. Many adults who function effectively in the Flint community and elsewhere, in the professions, education, business and industry, reflect the "Broadway" influence and indoctrination in their enterprise, pride of achievement and sense of personal self-worth. Three generations of Flint citizens have benefitted from her philosophy and her example.

The record of Odell Broadway's activities and contributions sparkles with "firsts" and innovative human services projects in which she perfected the technique of using her own resources as well as those of others, to make things happen. As a homemaking teacher and community counselor at the old Fairview School, she developed the concept which resulted in a new occupation: Home School Counselor. Today, 33 Home School Counselors carry forward the "Broadway" tradition of liaison between the school and the community. As a certified teacher of the Bishop Method of Sewing, she has introduced hundreds of men and women to that skill, encouraging many to continue education and training for successful employment in the garment and millinery trades.

Among other efforts, she has served as Arts and Crafts Instructor, Consumer Education Advisor for mothers in three housing projects, Big Sister, "Tot Lot" Leader, Stepping Stone, Homemaker Club and Girl Scout Leader.

Currently employed by the Mott Foundation as a Consultant, Mrs. Broadway travels throughout the country to participate in training programs for community and consumer education. Between trips, she serves on the Trustee Board of Metropolitan Baptist Church, where she was Sunday School Superintendent for 25 years, on the NAACP Credit Union and RSVP Boards and scores of others. She is a Life Member and Past Vice President of the Flint BPW Club and Past Worthy Matron of Capr Jasmine, Chapter 2, O.E.S.

Marianna, Arkansas may well be proud of Odell Garret, one of two girls raised by their stepmother, a professional dressmaker who inspired Odell's love for sewing and choice of home economics as her major at Rust College in Mississippi. Chicago can take a small bow for encouraging her interest in church work when she lived there as a young bride, but now, she belongs to Flint and much of what is inherent in the "community spirit" of Flint belongs to her.

#### FOREIGN OIL TANKERS WEAKEN OUR NATIONAL DEFENSES

**HON. JOSHUA EILBERG**

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. EILBERG. Mr. Speaker, the tanker cargo preference bills pending in Congress right now would strengthen both our national security and our economy by reducing U.S. dependency on foreign-flag ships to bring imported oil to our ports.

I am deeply concerned about the national defense aspect of the present tanker crisis, Mr. Speaker, and in order to make sure that my colleagues are aware of the seriousness of this situation, I am placing in the RECORD today a fact-sheet prepared by the U.S. Maritime Committee to Turn the Tide.

I am also putting in the RECORD a copy of an executive order issued by the Government of Liberia in 1973 at the height

of the Yom Kippur war, when the Liberians ordered ships flying their flags to refrain from carrying shipments to the Middle East. This executive order is crucial to an understanding of the defense implications. Those who support the runaway-flag vessels—vessels owned by Americans but registered abroad—contend that these vessels remain under "effective American control." The Liberian executive order proves how false that claim is.

Mr. Speaker, the material to which I refer follows:

#### FOREIGN OIL TANKERS WEAKEN OUR NATIONAL DEFENSE

In times of war, the United States merchant fleet has transported 95% of our total military supplies, yet in 1977 our merchant marine ranks 10th in the world. We are effectively at the mercy of foreign shipping. No other major world power allows its trade to be dominated by merchant fleets of foreign nations.

Multi-national companies have long stressed their premise that flags of convenience tankers remain under "effective American control." They indicate these foreign flag vessels would be available to the United States in a national emergency. Such ships would not be under the real control of our nation, since only the state of registry has the right to requisition and control vessels flying its own flag. Thus, the Liberian flag fleet was ordered to boycott Israel in the 1973 Yom Kippur War, contrary to American policy. (See attached Liberian Executive Order No. IV, Nov. 2, 1973.)

The Liberian maritime system is operated by the International Trust Company of Liberia, which is 80% owned by the International Bank of Washington, an international holding company of banking and insurance interests. This company maintains its own office building in Washington, D.C. Among the tenants is the economic section of the Liberian embassy.

How could we count on a vessel owned by a Bahamian corporation, flying a Liberian flag, sailing in the Persian Gulf, with a Chinese crew and Indian officers? This is no substitute for a strong U.S. national merchant marine.

Without cargo assurances, the capability of U.S. shipyards to meet our defense needs will be jeopardized. The cost of outfitting and constructing naval vessels would increase substantially if our private shipyards became idle.

It's time to turn the tide and restore the independent security offered by U.S.-flag tankers.

#### EXECUTIVE ORDER NO. IV

Realizing the continuing desire of the Government of Liberia to ensure the maintenance of peace in all areas of tension in the world in general and the Middle East in particular, and

Considering the allegation that Liberian Flag ships engaged in commercial navigation have been carrying arms, armaments and implements of war to combatants in the Middle East;

Now, therefore, effective immediately, the following shall govern commercial intercourse of Liberian Registered vessels:

1. No vessel with a Liberian Registry shall be permitted to carry any cargo of arms, armaments or implements of war to countries in the Middle East involved in the conflict so long as a state of war exists in that geographical portion of the world.

2. Any Liberian registered vessel found violating the provisions of the Executive Order shall be subject to a fine of Fifty Thousand Dollars (\$50,000.00), and the cancellation of the Certificate of Registry.

3. The Commissioner of Maritime Affairs and all Deputy Commissioners are hereby directed and ordered to ensure the faithful observance and execution of the provisions of this Executive Order.

# DUAL USE ADEQUATE CIVIL DEFENSE CLEARLY NECESSARY

HON. ROBERT L. LEGGETT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. LEGGETT. Mr. Speaker, for the past year and one-half as a result of defense planners' speculation and premonition, there has been a reassessment of American needs in civil defense.

Concern has been expressed as is contained in the article appended hereto by my good friend and civil defense planner, John E. Bex, Regional Director of the Defense Civil Preparedness Agency, Region Two, called "America's Achilles Heel."

Others like T. K. Jones of Boeing in Seattle can unravel a scenario at the drop of a hat showing a diabolic Soviet capability to outstrip U.S. efforts in an all-out confrontation.

Last year I chaired the House civil defense panel and our panel agreed unanimously that the U.S. civil defense slumber should terminate but that we should not attempt to compete—shelter for shelter—with the Soviets.

We raised the budget last year and amended the law giving a strong boost to dual use civil defense which I am pleased to see is fully supported in the materials appended after the Bex article which was just delivered to my office by the new Director of the Defense Civil Preparedness Agency, Bardyl Tirana.

The question now arises, "Is the current House civil defense authorization of \$134 million too much?"

My friend, and former civil defense strategist, Walmer E. Strobe, answers this question clearly "No" with the following analysis:

## MEMO FOR BOB LEGGETT

Attached is a conversion of civil defense appropriations since passage of the Civil Defense Act of 1950 from current (actual) millions of dollars to constant (1972) value using GNP deflators for goods and services procured by the federal government. The conversion was made by Dr. Francis W. Dresch, Senior Mathematical Economist at the Stanford Research Institute.

The lowest actual appropriation (\$31.8M) was for a partial year, 1951. In 1972 dollars, it was worth \$71.8 million in purchasing power. The FY 1977 appropriation was \$2.5 million but there is a supplemental for 0.9M to cover pay raise and another for 4.0 million to expand matching funds; together they make the \$87.4M shown. NOTE THAT, in 1972 dollars, the present appropriation is worth \$63.2M, 12% less than value of 1951 funding. Indeed, past three years have been lowest in history of nuclear age.

For FY 1978, Administration budget figure would set new low in constant dollars. Senate authorization of \$95.5 would leave it like the last three years (\$63.3M in constant dollars), only House authorization breaks the pattern of a new low and equals pre-Kennedy appropriations of FY 1960. There is a "message" here somewhere.

These data may be of interest and use to you in authorization conference and appropriations cycle.

Sincerely,

WALMER E. STROBE.

## AMERICA'S ACHILLES HEEL

(By John E. Bex)

There is no chance of defending and protecting America's cities in the event of a serious nuclear attack by the Soviet Union or anyone else.

Any other conclusion is dangerously deluded wishful thinking. The U.S. has concentrated almost entirely on counter-offense rather than defense, the concept of massive retaliation.

Fred C. Ikle, Arms Control and Disarmament Agency director, said: "The truth is that we are basically defenseless in the United States against threats of nuclear attack that could come from a great many different sources rather than from one or two clearly identifiable potential adversaries."

A few years ago, an anti-ballistic missile system might have made a difference by shooting down some or quite a few—no one would claim all—of the attacking enemy missiles, but it was never built.

The only reliable means of saving lives and preserving American industrial and economic strength are dispersal and shelter. They can be effective against the worst that modern weapons can accomplish. A few hundred feet of rock or the equivalent in earth or concrete can defy atomic bombs.

About half of 1%, or only about \$82.5 million is allocated for civil defense out of a defense budget of \$114 billion.

The result is that the United States has never had a civil defense system worthy of the name. It's a token effort.

The Russians are spending annually about 10 times as much as the U.S. and have been for decades and have important advantages in geography and stage of development. The USSR, a much larger country than the United States, is less urbanized. Its economic system is less vulnerable because it is in an earlier stage of economic development.

The degree to which the offense is now favored in warfare because of the deadly combination of atomic bomb and rocket is probably unprecedented in all human history. The opposite state of affairs would have been much more desirable for world peace. History and technology, then, have given mankind a tough problem to cope with.

The absence of an adequate system of civil defense leaves America's entire defense system unbalanced. Modern warfare depends on advanced technology and a strong economic base. The U.S. civilian population and economic base are unprotected by standard means of passive defense because sole reliance is on the threat of massive retaliation.

In 1958, James Tobin, a Yale economics professor and a member of President Eisenhower's Council of Economic Advisors, wrote: "Casualties could be greatly reduced by shelters, but we have not even made a beginning in building them." Nothing essential has changed since then.

Civil defense requires adequate funding and thinking ahead and planning. For example, the Moscow subway and all the other Soviet subways were built with civil defense needs in mind, with deep tunnels and blast doors. No American subway has been built like this, not even the newest ones currently under construction.

In evaluating the total defense of a nation, the trade-off between money spent on offensive weapons and on civil defense should be considered. In the current unbalanced American system every dollar spent on civil defense would be worth about five of 10 for further offensive weapons in terms of the

contribution to overall defense and national strength.

Former Secretary of Defense James R. Schlesinger, acknowledged the need for adequate civil defense: "The Department of Defense reaffirms the need for a viable and vigorous civil defense program. Over the years, this need has not diminished."

A nuclear attack would threaten the very survival of the United States as a nation, he continued. "Deterrence remains our primary objective, but prudence requires the development and maintenance of a strong national civil defense system should deterrence fail."

Nobel prize winner Eugene P. Wigner, has written: "By not offering the temptation of an unprotected populace, by instituting a vigorous civil defense program, we would be truly serving the interests of a lasting peace."

Soviet Premier Aleksei Kosygin said "defense systems which prevent attack are not the cause of the arms race, but constitute a factor preventing the death of people."

Leon Goure, an expert on Soviet civil defense, summarizes it:

"The Soviet Union has always regarded civil defense as an integral part of its war-fighting capability and its defense posture. It believes civil defense to be a decisive strategic factor which can determine the outcome of a war and the attainment of victory."

Consequently, the Soviets have been spending a great deal of effort over the last 20 years to achieve a major civil defense capability.

In the event of a Soviet attack, the U.S. might lose as many as 100 million people and the greater part of its industry. The Soviet Union, on the other hand, might lose less than it did in World War II—fewer than 20 million people—and assure the survival of most of its industry.

Therefore, the Soviet Union not only has eroded American deterrence posture, but can blackmail the U.S. with nuclear weapons in a crisis situation, survive as a power and win a war with the U.S.

To actually do something about civil defense will require first facing up to the fact that the U.S. is not invulnerable.

History has allowed the Russians no such illusions. In two world wars, they suffered the heaviest losses and learned an important lesson. They have the will to survive and know that it requires effort and foresight.

Other nations and groups, some more fanatical than the Russians, are acquiring atomic capabilities.

The American people are tough and capable of rising to any challenge if the proper information is given to them.

Fortunately, the country is starting to wake up from its long civil defense sleep. The facts and the message of the need for an adequate civil defense system are beginning to get through.

The hard verdict of history has always been that only those with a will to survive, who plan and work for it, deserve to survive.

## CIVIL DEFENSE APPROPRIATIONS IN CURRENT AND CONSTANT (1972) DOLLARS

| Fiscal year: | GNP deflator for goods and services, Federal Government (1972=100) <sup>1</sup> | Civil defense appropriations |                                       |
|--------------|---|------------------------------|---------------------------------------|
|              |   | Millions of current dollars  | Millions of 1972 dollars <sup>1</sup> |
| 1951         | 44.3  | 31.8                         | 71.8                                  |
| 1952         | 46.7  | 77.0                         | 164.9                                 |
| 1953         | 47.3  | 44.3                         | 93.7                                  |
| 1954         | 48.0  | 49.3                         | 102.7                                 |
| 1955         | 49.6  | 50.2                         | 101.2                                 |
| 1956         | 52.0  | 70.9                         | 136.3                                 |

|                    | GNP deflator<br>for goods<br>and services,<br>Federal<br>Government<br>(1972=100) <sup>1</sup> | Civil defense<br>appropriations   |   |
|--------------------|--|-----------------------------------|---|

| 1978B              |  | 134.8                             | 89.4  |

<sup>1</sup> Constant dollar series is expressed in dollars of calendar year 1972 purchasing power but deflators for consecutive calendar years have been averaged to reflect average prices over a fiscal year.

<sup>2</sup> Deflator used applies to July 1-October 1.

<sup>3</sup> Two estimates are shown for fiscal year 1978. The A entry corresponds to the budget figure and the B entry to the House authorization. Deflators for 1977 and 1978 are estimates based on extrapolation from official data, assuming a relevant inflation rate of 6 percent per annum.

#### DEFENSE CIVIL PREPAREDNESS AGENCY, Washington, D.C., May 20, 1977.

HON. ROBERT L. LEGGETT,  
U.S. House of Representatives,  
Washington, D.C.

DEAR MR. LEGGETT: Representatives of the United States Civil Defense Council (local civil defense), the National Association of State Directors for Disaster Preparedness (State civil defense directors) and the Defense Civil Preparedness Agency met at the Pentagon on May 16 to discuss the present National debate and several pending bills which would affect civil defense.

We discussed the civil defense program and it was recognized (1) preparedness for any type of disaster, peacetime or attack, must necessarily be developed jointly at the local, State and Federal level, (2) total preparedness for natural disasters, such as tornadoes, hurricanes, and floods, and man-made disasters, must exist at the local and State level before there can be effective nationwide attack preparedness, (3) there is a wide variance in the needs, abilities, and resources of the 50 States and the more than 4800 local jurisdictions accomplishing preparedness, and (4) the timing for achieving attack preparedness must necessarily vary from locality to locality, and from State to State.

We noted the difference in State and Federal priorities. Local and State governments concentrate on a broad spectrum of potential disasters, many of which occur yearly if not more frequently. The Defense Civil Preparedness Agency, on the other hand, is charged with focusing on attack preparedness. Working cooperatively, we can agree on a common goal and more effectively use whatever level of Federal funding is available for preparedness.

It was recognized that Public Law 94-361 authorized this Agency to support local and State preparedness against risks of tornadoes, hurricanes, floods, chemical spills and the like, provided that the support enhances attack preparedness. This Agency will follow the course suggested by Public Law 94-361. In return, State governments will give this Agency timetables by which progress in achieving attack preparedness can reasonably be assured.

A statement resulting from the discussion is enclosed for your information. We hope by working cooperatively together to be able to achieve the maximum protection of the Nation's citizens against all risks, and also to make the best use of taxpayers' dollars, whether derived from local, State, or Congressional appropriations.

We would appreciate your letting us know if you have any questions or comments.

Sincerely,

BARDYL RIFAT TIRANA,  
Director.

#### STATEMENT ON CIVIL DEFENSE

Representatives for local, State, and Federal civil defense agencies met on May 16, 1977 in Washington to discuss common goals. At least within the Federal Government, there has been a great deal of confusion over civil defense since adoption of the Federal Civil Defense Act of 1950. There has been a conflict of priorities as between local and State governments on the one hand, and the Federal Government on the other. Congressional appropriations could be used more effectively.

Local and State governments have extraordinary needs for total preparedness for the protection of their citizens and property from the consequences of natural and man-made disasters. The Federal Government has an obligation to provide for the common defense of American citizens against the hazards of enemy attack.

Local, State and Federal governments all want to attain the same objective, the protection of people and property within their respective jurisdictions. It was today resolved to work in cooperation toward a common goal. They hope to maximize the benefit from appropriations made by local authorities, State legislatures and the Congress. They agree as follows:

1. Civil defense is government's responsibility for preparedness, response and recovery from any natural or man-made disaster.

2. At the local and State level, civil defense requires protection of people and property against all risks. Local and State governments have established single-agency responsibility for all disaster preparedness. The primary responsibility of the Defense Civil Preparedness Agency is nuclear attack preparedness.

3. Nuclear attack preparedness, as with any other type of preparedness, must exist at local, State and National levels. Thus, one cannot have nuclear attack preparedness unless local and State governments have an adequate base of total preparedness for any risk. The principal difference between the preparedness that must be exercised by local and State governments for major peacetime disasters and nuclear attack is that for the latter, response and recovery operations must take place in a nuclear attack environment.

4. Historically, protection of the lives and property of citizens has been a responsibility of the States and the Federal Government. The Federal Civil Defense Act placed on the Federal Government the obligation of supporting State and local government in protecting lives and property against the consequences of enemy attack. The 1958 amendments to the Act created a joint local, State and Federal partnership. The amendments gave the Federal Government a more direct responsibility to participate with local and State government in attack preparedness and emergency operations, and provided for Federal financial support.

5. DCPA plays a significant role in the overall Federal commitment, and is the primary channel of communications between the Federal Government and local and State preparedness agencies. However, DCPA is only one of more than 30 Federal agencies

presently charged with a preparedness role. DCPA can provide useful assistance in urging other Federal agencies to support local and State preparedness efforts.

6. DCPA acknowledges that it cannot carry out its partnership responsibility to support attack preparedness unless local and State jurisdictions have adequate total disaster preparedness. Local and State governments have the responsibility to provide preparedness for enemy attack as well as peacetime disasters. Therefore, DCPA's financial assistance to local and State governments may in the future be used to achieve total preparedness against any risk. Local government, State government and DCPA will together work out appropriate guidelines so that the citizens of the several States, the President, and the Congress can be assured of progress in achieving attack preparedness on a State-by-State basis.

7. An important role which has been largely overlooked in civil defense planning in recent years has been that of industry and labor. Preparedness cannot be effective at any level of government without their cooperation and assistance. DCPA will undertake a review with industry and labor of the means by which they can effectively participate in total disaster preparedness at the local, State and National level.

8. The effectiveness of taxpayers' funds, whether from local, State, or Federal sources, will be enhanced greatly by a cooperative focus on total preparedness needs at the local and State level. A consistent approach to disaster preparedness for all risks will materially advance the objectives of local and State agencies, and also meet the partnership obligation embodied in the Federal Civil Defense Act to provide for attack preparedness.

Signed at Washington, May 16, 1976.

LEA KUNGLE,

President, U.S. Civil Defense Council.

DAVID L. BRITT,

President-Elect, National Association of State Directors for Disaster Preparedness.

BARDYL R. TIRANA,

Director, Defense Civil Preparedness Agency.

#### MIDDLE-AGED AMERICAN VIEWS UNEMPLOYMENT

#### HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

MR. WEISS. Mr. Speaker, since the very beginning of the 95th Congress, few issues have concerned the Members of this body more than unemployment. Whether we were considering the CETA extension, the local public works bill, or the youth bill, the bottom line of our discussions has been to take action quickly to get people working.

Throughout all of our deliberations we have dealt primarily with figures to portray the unemployment picture; when we were not considering the rate of unemployment in the Nation or in a particular State, we needed to know the number of unemployed persons or vice versa. While I do not dispute the value of data—without question it is necessary to know where the unemployment situation is most aggravated and whom it most affects—it is also helpful for the Members of the House to have insight from unemployed persons, themselves, as to their opinions of their condition

as well as their suggestions for legislative remedies. It was for this reason, the Employment Opportunities Subcommittee of the Educational and Labor Committee began its deliberations on youth employment legislation with field hearings in New York at which young people were principal witnesses. The members learned a great deal from the young men and women who appeared before the subcommittee; the young people articulately expressed their view that "make work" jobs were wasteful and that their real needs centered on learning work habits and job skills which will help them in their future development.

We have not heard, as of yet in this session, the views of middle-aged Americans who are unemployed. For this reason, Mr. Speaker, I would like to share with my colleagues an article which appeared in the May 31, 1977 edition of the New York Times in which an anonymous author tells us of his unemployment experience. The author, a 46-year-old white male with a graduate degree, writes of the despair of his unemployment; he tells us how unemployment has affected his wife and his three children as well as his feelings about himself; he admits that he conceals his lack of employment prospects from his mother, brother, and sister and that because he has told his stories of optimism many times before he now has little to say to his family.

This article does not deal with the impressions of someone who needs to develop positive work attitudes, good work habits, or saleable job skills but rather it is written by someone who by any measure which we could propose could not be denied the opportunity for success.

Mr. Speaker, the time which the Congress has devoted to employment legislation has been well spent, yet, we still have a long way to go. We cannot afford to waste either future talent or talent which must still be developed. Full employment is the most desirable goal. Perhaps this article will help to make this message clear.

#### The article follows:

[From The New York Times, May 31, 1977]  
DARKEN YOUR GRAYING HAIR, AND HIDE YOUR FRIGHT

(This article was written during the 10 months that the author, formerly an executive at an Upstate New York college, was looking for work. He was subsequently employed—"through sheer dumb luck"—at another institution.)

I am male, white, 46. I have undergraduate and graduate degrees from two reasonably well-known Eastern institutions. My first job lasted for four years, my second for ten, my third for seven. I have a wife, three daughters, a mortgaged home and a 1972 "Beetle" for which I paid cash.

Whereas I once earned over \$400 a week, New York State now provides me with \$95 a week in unemployment benefits.

I am smoking almost two packs a day. I try not to drink before 5 o'clock.

The other day I encountered the man who fired me. He is an affable, bright man, and on the eve of retirement. Many months ago he told me I had outlived my usefulness, and he wished me well. The other day he said he knew what I had been going through. When I said he didn't, he looked just a little startled. He does not, never did, like to be

contradicted. But I knew he had never been without work. I told him that physically, fiscally and spiritually I and all members of my family had been wiped out. Then he asked why I was having such trouble finding a new job.

The easiest, possibly even the only truthful answer would have been this: "No one wants me." That is the way I feel, of course. (Paranoia. Depression. I used to think these were modern conveniences that only others could afford.) But I told him what I know: My age, sex, and salary needs work against me. So, of course, does the shortage of jobs. Then he turned to talk with another passer-by; he meant well, though.

I have discovered there is an entire literature on the art of job-hunting. One book—I think it was the same one that said if you are over 35 and out of work, you're in great trouble—offered a few how-to's on rejuvenation:

If you have too much gray hair, darken it. If you look younger than you are, revise your birth date in your resumé. Be relaxed during interviews, avoid personnel managers (go right to the top!).

I have been told I look younger than 46, but if I change the year of my birth from 1931 to, say 1934, then I have to change graduate dates, military-service dates, previous-employment dates. Barring a gin-induced stupor, how can anyone be relaxed during an interview. (And why that noun? Why not "interrogation"?) My hair is too gray now. A dye, I think, would be conspicuous.

Unemployment is a leveler. The lines and the people in them—I report to the New York State Employment Service's local office every Thursday between 3 and 3:30 P.M.—remind me of my basic training at Fort Dix. Then and now there was, and is, little in common except shared misfortune. Just why the lines move so slowly, I don't know. It should be a fairly mechanical, effortless process.

I went to Washington for an interview in early April. It was raining, and Newark, Philadelphia, Wilmington and Baltimore looked uglier than ever. The interview lasted only 15 minutes because the salary was \$10,000 less than what I had been making. In Washington, that salary would translate into about \$95 a week.

The snack car on the Metroliner on the way back to New York was crowded with men in double-knit suits, carefully cut hair. Some held computer sheets. There was talk about budgets and personnel. I hated them.

I used to ridicule lesser beings who drank martinis with their dinners. No longer. In fact, I usually continue after dinner. Vodka martinis. I know what I'm inviting (or may already have), but they do help me sleep. I should say get to sleep. Because it seldom lasts. I have nightmares, and I scream and I awaken others. Usually, I seem to be in pursuit of an object of one kind or another; just as I'm within reach it moves beyond my touch. Then I scream.

Among our neighbors is a young psychiatrist. My wife has suggested that I talk to him, friend-to-friend (we are friends) about my problems, paranoia, depression, nightmares. Perhaps he would know of a pill that would dilute my anxieties, my problems. But I know the bare root of all of them, and unless he can provide me with a job, why bother with a pill? So I drink in lieu of a pill.

One interviewer eventually turned me down because, he said, I lack eyeball contact. When I called him to say I didn't understand, he told me that because of my courage in asking such a question, he would reopen "the discussions." We had dinner at the Yale Club, in New York (he had one beer, I had nothing), and he said we had misread each other's "signals." We would start afresh, and he would be back in touch

with me. A month later, he wrote to tell me that he had decided not to fill the position after all. (I heard shortly afterward that he had lost his job.)

The help-wanted ads are the first things I look at in Sunday's paper. But they're strange. Box numbers and employment agencies. My résumés go out on Monday, but there's seldom an acknowledgment.

The corporate display ads are a little different. Most of the time an answer is forthcoming. The final sentence, often enough, is, "I wish you well in your future endeavors." Earlier in the form letter are references to the numbers of applicants, all good, but a few better suited for "our needs" than others. But the résumés of the rejects, of course, will remain in "our active files."

A vice president of an organization asked me to meet him for breakfast at a Park Avenue hotel. Two days later, I received a note from him saying he was impressed by my credentials, liked my answers to his questions and would probably invite me to his base for additional interviews. I was skeptical—he wasn't the first vice president with whom I had had breakfast in New York—but two days later his assistant ushered me from one vice president to another, and finally to the president.

A week later, I was told that everything had gone well and that I could expect a decision within two weeks. I received the decision—from the assistant—three months later. It was formal, brief and negative. The job went to a young woman. The organization is the defendant in a number of affirmative-action cases in the courts.

A friend of mine, a president, once told me that whenever he advertises a vacancy, it's an easy matter to skim off the four or five most outstanding candidates. After their interviews, he compares not their experience, but their statistics—their total compensation packages, retirement and medical benefits in particular. If you're not young, he said, it sure helps to be single. I, as he knows, am neither.

I'm never sure just how the children are taking it. I think they see it all in very different ways, for they are not at all alike. One is a sphinx, one seems almost (though not intentionally) removed, and one sees it all. But they all know my countenance and can interpret it. They know I spend most of the week in my chair. Only one of them has said that I no longer talk, and I frown when others are talking.

There are times when I wonder not whether I will ever have a job again, but whether if I do, I will be able to function. For almost a year, I have not done what I was trained to do. I have, as they say, vegetated.

The invitations for interviews never come by mail, always by telephone. So I stay home and wait for the phone to ring. It's not that I have nothing else to do, but it is a matter of how I spend that waiting time. After the newspaper there is coffee, and junk mail, and boredom. I eat too much for lunch because there's nothing else to do. Lately a friend has supplied me with Irish novels and short stories, all new and none published in this country. I am Irish and know something of earlier Irish literature, but my friend's books offer little release, less escape.

At dusk, in those unearthly hours between sleep and wakefulness, I have visions. I see pictures of small-bore pistols. Lethal, but, I hope, quick and comparatively painless. Not heroic, certainly, but not cowardly either. But, then, there's my wife and our daughters. Because I love—and I do—all four, I have to ask whether my death is preferable to my (mere) despair. I do not know. Would they be better off without me? I do not know. When I first lost my job, the real pain derived from the (eventual) realization that I had failed not only myself but four others.

I recently read about a White House deputy press secretary. I think he was not quite 30,

whose new salary is \$39,500. No, maybe it was \$49,500. I had never heard of him before, but I hate the son of a b-----.

I knew that life isn't fair long before J.F.K. went on television to tell us as much. But fair isn't the right word. It's not fairness that's lacking; it's balance. Proportion maybe.

When the phone does ring, it's usually someone asking for one of our daughters to babysit. "We have to go out tonight, and I was just wondering if..."

We never go anymore. It's not just the money—our hearts aren't in it. We are obsessed and can talk only to each other. But only about our obsession.

I weep when I write my mother, my brother, my sister. I tell them that we're all well, that the family fabric is intact, that I have a half-dozen irons in the fire. But they've heard all that too many times now, so I seldom write. I have nothing to say.

### CHALLENGE IS TO PRESERVE PEACE, CONGRESSMAN EILBERG SAYS

**HON. MICHAEL O. MYERS**

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. MICHAEL O. MYERS. Mr. Speaker, on Memorial Day, my colleague, the gentleman from Philadelphia, JOSHUA EILBERG, was honored by being asked to serve as keynote speaker at the commemorative service of Rhawnhurst-Castor Memorial Post 754 of the American Legion.

His comments, I believe, were eloquent, timely, and thoughtful. They expressed the hope that we in America can meet the challenge of holding high the memory of those who gave their lives for our country, and that we can restore domestic tranquility as we set about to preserve peace. Mr. Speaker, I insert Mr. EILBERG's remarks in the RECORD, and commend them to the attention of my colleagues:

REMARKS BY U.S. REPRESENTATIVE JOSHUA EILBERG, MEMORIAL DAY SERVICE, PHILADELPHIA, PA.

This is Memorial Day—a solemn and moving occasion in the life of our country, and in the cause of the freedom which we hold so dear.

Once again—as we have for one hundred and nine years—we pause to honor the memories of those fine young Americans who made the ultimate sacrifice in the service of their country.

These are those Americans who, in the words of Abraham Lincoln, "gave their lives that this nation might live."

Memorial Day has its roots in that terrible and tragic national upheaval of our Civil War.

But without regard to the origin of Memorial Day, it can truly be said that on this day we honor all of those who have fallen in all of the wars that have tested our national spirit in the two hundred years that this republic has endured.

From Lexington and Concord—to Laos and Cambodia—the graves of American servicemen circle the globe—silent reminders of their sacrifice, and our enduring indebtedness to them.

I intentionally include the sacrifices of those who fell in Southeast Asia—because in our intense and continuing national debate over this most recent and tragic war, the cause of those who struggle there has been too quickly overlooked.

We have endured a great national trauma over the war in Vietnam—and the wounds of that public debate are far more visible than the graves of the young Americans who died in that war.

I do not want to reopen the wounds of Vietnam—it would serve no useful purpose to do so.

But there is one point I want to make—one point that has been overlooked.

Vietnam, we are told, was not a popular war—and I guess that's right.

Vietnam, after all, divided America.

But so did our own Civil War—which set region against region, brother against brother.

And our own Revolutionary War divided this country too.

It was not a popular war with significant numbers of our countrymen.

There were many in the American colonies who thought it was wrong to wage a war of independence against England—many in the American colonies who simply did not want to obtain their freedom by force of arms.

The national debate two hundred years ago was every bit as strident—every bit as divisive—as was the national debate over Vietnam.

And, like the Vietnam debate, it lasted long after the armed hostilities had drawn to a close.

Over a period of time, we have come to revere those gallant men of the Continental Army who purchased our freedom with their blood.

I trust that the time will come—and I pray that it will come soon—when we will revere the memories of those who died in Vietnam, convinced that they were guardians of the same legacy of American freedom.

America has bled through many a war—here on our own soil and in far away lands—and when each war was over, we set about the task of binding up the wounds of those who bore the battle—the veteran and his loved ones.

We face that task again today, in the aftermath of Vietnam—and I feel confident that we will succeed.

We owe it to these, our honored dead, to restore domestic tranquility.

There is sorrow on each Memorial Day—many of us still weep for our fallen.

But Memorial Day comes in the springtime of the year—in the season of hope—the greening season after the dead hand of winter has been loosed from the land.

It is our challenge to keep—forever green—the memory of those whose sacrifices we honor.

And it is our challenge, too, to preserve the peace which they struggled so valiantly to attain.

America, I believe, is capable of meeting that challenge.

### THIRD WORLD

**HON. EDWARD J. DERWINSKI**

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. DERWINSKI. Mr. Speaker, the nationally syndicated columnist, Patrick Buchanan, is known for his penetrating stories and sharp commentary on domestic and international events.

His column, appearing in the Chicago Tribune of May 31, is devoted to the Law of the Sea Conference which is currently meeting at the United Nations. I found his comments to be quite pertinent, and

insert the article for the attention of the Members:

SOAK YOUR HEAD, THIRD WORLD

(By Patrick J. Buchanan)

WASHINGTON.—If Lady Luck is with us, the Law of the Sea Conference, the fifth session of which has opened at the United Nations will, like its predecessors, collapse in acrimonious name calling.

For last September, Herr Kissinger left tabled a proposal so unnecessary, foolish, and damaging as to make success of the conference an economic disaster for the United States.

Central to the discussion at Turtle Bay is the question: Who has the right to exploit the billions of dollars in nickel, cobalt, copper, and manganese lying on the ocean floor outside the territorial limits of any country?

The Japanese and the Germans, but especially the Americans, have the organization, technology, and capital ready to scoop up these minerals lying about in potato-shaped nodules. Last fall, however, Henry the K offered the Third World the following:

A. The United States will agree to creation of a Third World-dominated International Seabed Authority (ISA), which would be supreme regulator of who mines the oceans, when, and where.

B. Every time a U.S. company discovers and develops a bed of ore, another comparable seabed will be found for the ISA to exploit.

C. The ISA would get a rakeoff of the profits of the American operations.

D. Uncle Sam will help finance an outfit the ISA deep-mining arm to be known as Enterprise.

What the United States was to receive in return for these gratuities has yet to be disclosed.

Instead of leaping at the deal, however, the Third World dismissed it as insufficiently generous. They want the whole hog. Their demand is that Enterprise be given exclusive monopoly rights to mine the seabeds; and the American companies should keep their grubby capitalist hands off.

Kissinger's offer should be withdrawn as the first order of business at the conference. It is a betrayal of the national interest. Chad, Sri Lanka, and Mozambique have no more claim to minerals we pick off the ocean floor than we do to the hauls of fish the Russian trawlers scoop up on the high seas.

What is it in the composition of the American diplomat that he is forever dreaming of ways to ingratiate himself with Third World thugs who do not disguise their contempt for us, our system, our success, our values?

In a thousand attempts we have sought these last 20 years—with soft loans, trade concessions, aid grants—to purchase their friendship and respect. Yet everywhere, the hostility and hatred mount round about us.

American policy will begin to command respect when it is viewed by friend and foe alike as furthering our national interests. Elliott Richardson, U.S. Ambassador to the Law of the Sea Conference, would do well to deliver to the gathering a single valedictory address along the following lines:

"Gentlemen, the U.S. no longer buys the argument that your poverty is our fault. Our wealth was not created by stealing yours, but by the hard work of our own people. If you wish to be friends of the United States, you will find us generous in both counsel and assistance."

"However, as to the minerals on the floor of the ocean, they belong in our judgment to the nations with the ingenuity to recover them. American enterprises are going prospecting for those nodules; you, of course, are free to do the same. But no international authority is going to dictate to the United

States what it may and may not do on the world's oceans. And if there should be physical interference with our mining operations, you will find yourselves arguing the matter not with me, but with the Sixth and Seventh fleets. Have a good conference, and good day."

# STIMULATION PACKAGE: A CONSERVATIVE ALTERNATIVE

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. McDONALD. Mr. Speaker, yesterday I introduced legislation to balance the budget and restore a sound economy by reducing Government spending. This legislation was based, in large part, upon a statement by the distinguished economist, Hans Sennholz, outlining a conservative alternative to liberal economic policies.

Professor Sennholz argues that it is the enormous increase in Government transfer payments that has depleted the economy of the capital necessary to expand production and brought us inflation and recession. Consequently, the stimulus necessary to restore a sound economy is a reduction in Government spending, not a continuation of the inflationary spending policies that produced recession and high unemployment.

Professor Sennholz' statement follows:

## STIMULATION PACKAGES: A CONSERVATIVE ALTERNATIVE

American income and wealth are not produced in Washington; they are merely redistributed there by political force. The steady growth of this redistribution process in recent decades explains the growth of the Federal government. During the last decade Federal spending has increased some 10 percent per year. Over the last three decades, Federal, State, and local government spending has soared from 20 percent of national income to more than 40 percent.

We must view this trend with great alarm. After all, the growth of government in our lives signifies the growth of political coercion and simultaneous loss of individual freedom. As politics is becoming a popular redistribution method, it is gradually gaining in importance until every sphere of economic life is politicized, and political action is more important than economic effort. Economic stagnation must inevitably follow. But, above all, the political redistribution process is breeding antagonism and conflict not only between the beneficiaries, who are profiting from the redistribution, and the victims, from whom the benefits are forcibly taken, but also among the beneficiaries themselves who are at odds about their fair and proper shares. The redistributive society is a conflict society that jeopardizes its individual freedoms and economic well-being.

When the quest for redistribution outpaces the means that are available in tax revenues, budgetary deficits are suffered. Small deficits may be covered by government borrowing of the people's savings. But the huge deficits of recent years can only be financed through some creation of money, which is inflation. Deficit financing thus appropriates the people's monetary savings for government spending, and gradually impoverishes the American middle class. Its impoverishment is aggravating the social conflict.

In the footsteps of his New Deal and New

Republican predecessors President Carter is promoting more redistributive spending. In order to stimulate economic growth and alleviate the high rates of unemployment, he is proposing a stimulation package of \$31 billion over two years. President Ford's Budget Message of January 17, 1977 foresaw a 1977 deficit of \$57.2 billion; President Carter's first year deficit must be expected to exceed this amount.

In the name of social peace and economic prosperity we must reverse this ominous trend. The growth of social strife must be halted, and the economic stagnation with its awful waste of capital and labor must be overcome. This is why the Federal budget must be balanced and, above all, government spending be cut.

In a democratic society, such as ours, a trend in policy can be reversed only with the full support of the majority of the populace. To seek this support is an educational task of gigantic proportion. An open and thorough discussion of government spending in general, and the U.S. budget in particular, is well suited to serve this educational task.

A conservative reform administration would seek to stem the transfer tide and reverse the trend. It knows what has to be done. But it is also aware that every attempt at curbing the redistribution demands will meet with the bluster and rage of many beneficiaries and their spokesmen. Their arguments and doctrines must be thoroughly defeated in the arena of debate and discussion before the reform can be conducted with any degree of success. Only when the objectives of redistribution are completely discredited and its consequences are finally understood by the American public, can a true reversal be effected.

Specific proposals must be defended successfully on the battlefield of ideas. In particular, we are proposing, and are ready to defend, the following first-year program of reform:

1. All redistributive spending by the Federal government will be reduced by 5 percent. That is, in the 1978 Budget of the United States, total outlays are estimated at \$440 billion, of which \$277.1 are transfer payments of one kind or another. A 5 percent reduction of this amount would save \$13.9 billion.

2. To show the way and set an example the expenditures on Federal employees engaged in the redistribution process, including all members and employees of the legislature, will be reduced by 10 percent. We estimate the number of such employees at 840,000. If their compensation averages \$15,000 per year, their expenses amount to \$12.6 billion. A 10 percent reduction would save \$1.2 billion. Of course, the 5 percent curtailment of redistributive function should permit operation with 5 percent fewer civilian employees, or 42,000 less, which would save \$0.6 billion. This reduction could be quickly achieved by a temporary ban on Federal hiring.

3. All Federal agencies and commissions that in any way disrupt economic production, raise consumer prices, cause shortages or surpluses, weaken competition through restrictions and prohibitions of entry, or create cartels and monopolies through franchises and licenses, will be abolished summarily. The budgetary savings of such a measure, which we estimate at some two billion dollars, are insignificant when compared with the release of creative energy and productive effort that would follow. Although some present beneficiaries of the control system, together with the Federal agents and commissioners, could be expected to oppose this economic release, every consumer would benefit greatly from the expansion in production, the surge in supplies, and lower goods prices.

4. As the Federal government reduces its

spending and relaxes its grip on the national economy its demand for resources in general and for loan funds in particular, would fall. Interest would decline immediately. The stabilization of the U.S. dollar would have the same effect. A two percent decline, which would be a realistic expectation, would reduce the interest burden on the Federal debt of almost \$700 billion by \$14 billion.

Altogether, this reform program would save the American taxpayer nearly \$32 billion. It would unshackle the American economy, stabilize the U.S. dollar, and halt the drift toward government omnipotence and social strife. Misled by the apostles of redistribution and spending many Americans may not yet be ready for such a reform. But the growing afflictions of the redistributive society may cause them to re-examine their conduct and give thought to the only alternative.—Hans F. Sennholz.

## A COMMONSENSE LETTER TO THE PRESIDENT

HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. HYDE. Mr. Speaker, I am pleased to share with my colleagues a letter written to President Carter by one of my constituents, Mr. Stephen M. Moser of River Forest, Ill.

Mr. Moser's succinct letter covers a variety of subjects and his thoughts are certainly representative of much of what I have been reading in my mail. No doubt many of my colleagues will recognize his opinions as being very reflective of their own correspondence.

If President Carter intends to stay "close to the people" as he has so often declared, certainly one of the best ways of doing so would be by reading a daily sampling of his mail. I am sure he will find that many Americans concur with the views expressed by Mr. Moser:

MAY 24, 1977.

DEAR PRESIDENT CARTER: The following are some of my views and ideas which I would like to share with you.

### ENERGY

Let's cut down on Domestic Airline Flights, flying empty, or with a partial load on duplicated flights by more than one airline.

School Busing is used for integrating schools but it is costing enormous amounts of money and gas. Let's have the kids go or continue to go to local neighborhood schools.

Our Government regulates the Trucking Industry which forces one way loaded and return trips empty—a complete waste of fuel.

A lot of Commercial Business's are open 24 hours a day, 7 days a week. This is also a drain on the use of energy.

Enforce the 55 m.p.h. speed limit. It will save gas and lives.

If you have to go to rationing, it must be done fairly or it won't work.

### CRIME

What about the victim's rights? Let's get the habitual and mentally insane criminal off the streets so they don't commit additional crimes.

### WELFARE

It is a rip off. Let's have reform. Also the Food Stamp Program is mis-used.

### MILITARY

Let's have a strong but lean Military and eliminate duplication and waste.

## CIA AND FBI

They must have some degree of secrecy but safeguards must be there so they are not mis-used or compromised.

## FOREIGN POLICY

Beware of the Russians and Cubans. I don't trust them.

If we are going to sell wheat to foreign countries, let them pay as we have for oil. Has our wheat price gone up like oil and coffee?

Most aid is needed abroad, but I'm sure we don't get credit from the people for giving it or they don't appreciate it.

Let's take a hard look at all aid. Can we really afford it with a deficit at home?

We must support and continue the support of Israel.

Finally, there are so many Government Agencies to help, but they are given so much power that they are going to destroy what they started to help. With regulations and policies and no control, these agencies are going to undermine our country. Let's have some "Zero" base evaluations.

Our Government must stop spending more money than it takes in. Increase productivity and efficiency and eliminate the "Bureaucracy".

Thanks Sincerely,

STEPHEN MOSER,  
River Forest, Ill.

## MEDICAL FREEDOM OF CHOICE

## HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. CRANE. Mr. Speaker, the May 25 edition of Medical Tribune included an article entitled "Bill To Curb FDA Power Gains in Congress." The article deals with the medical freedom of choice bill, H.R. 54, that my colleague from Idaho (Mr. SYMMS) has introduced and which I, along with 105 other Members of Congress, have cosponsored.

I insert the article in the RECORD at this point and urge my colleagues to review it:

## BILL TO CURB FDA POWER GAINS IN CONGRESS

WASHINGTON, D.C.—The criticism of medical leaders and researchers and the concern of physicians and, more recently, patients with regard to FDA regulatory overkill has given momentum to a House of Representatives bill to restrict FDA powers in respect to drug efficacy, returning it to the practicing physician. The increasing frequency of reports, carried by MEDICAL TRIBUNE, of what scientists and medical leaders consider abuses of regulatory discretion has recently been reinforced by growing sentiment aroused by FDA actions in respect to anticancer therapy and noncaloric sweeteners. The new Symms bill is a terse 300-word amendment to the Food, Drug and Cosmetic Act which will reduce FDA hegemony in the area of drug effectiveness even as it retains FDA powers in respect to drug safety.

As described in MEDICAL TRIBUNE by its author, Rep. Steven Symms (R.-Idaho), the bill is based on the proposition that FDA overregulation has unnecessarily cost American lives, has stifled drug research and development and denied the American consumer vital drugs at an estimated cost of \$250-\$300 million a year, mostly in extended hospital stays.

The bill, express purpose of which is "to expand the medical freedom of choice of

CXXIII—1094—Part 14

consumers," has received its strongest impetus from medical leaders' continuing, outspoken criticism of what they consider to be a virtual blockade on potentially lifesaving drugs.

In a recent address to Congress, Rep. Symms cited, as a prime example "of the urgent need to pass this legislation" an exclusive report by MEDICAL TRIBUNE (April 13) in which, he said, "two of the most prominent physicians in America, Drs. Michael E. DeBakey and Raymond P. Ahlquist, describe the problems that the FDA has created [with respect to] beta blocker drugs." Inserting the article in the Congressional Record, Rep. Symms urged his colleagues to read it "and ask themselves why the United States has chosen to follow the disastrous path of regulatory overkill."

The Idaho Congressman was particularly impressed by Dr. DeBakey's declaration to MEDICAL TRIBUNE that "The prosthetic artery, aneurysmal patches and other prostheses would not be here today if we'd had to comply 25 years ago with current FDA regulations." Said Rep. Symms pointedly during an interview with MEDICAL TRIBUNE: "FDA people tell me that the fact is that if penicillin, or digitalis, or aspirin, were developed today they'd never make it to the market."

## "RIGHT THING TO DO"

Dr. Ahlquist became one of the first prominent medical scientists to offer unequivocal support for the bill, saying: "I'm in favor of any action that will speed up the process of releasing safe new drugs to the medical profession. The history of the FDA since 1962 makes this [the Symms measure] the right thing to do. The general effect of the 1962 legislation has been to slow down accessibility to new drugs. I am sure this was not the intent of Congress, but this has been the unforeseen effect of those regulations."

Encouraged by the scientific support, Rep. Symms noted that "We have already drawn wide bipartisan support in the House, since the bill's introduction January 4, and we have indications that many prominent Senators from both parties are willing to support it. The bill was to be introduced soon in the Senate by Sen. Jesse Helms, a North Carolina Republican and former newspaper editor who has been prominent in environmental and price stabilization affairs."

"Our 92 co-sponsors in the House include 32 Democrats," Rep. Symms emphasized, including such liberals as Rep. Shirley Chisholm of Brooklyn and Rep. Charles Rangel of Manhattan in New York City. Other influential backers are Rep. Bob Wilson (R.-Calif.), a ranking member of the House Armed Services Committee, Rep. Joe D. Waggoner (D.-La.), a leader in the Ways and Means Committee, and Rep. James G. Martin (R.-N.C.), of the Science and Astronautics Committee, who has introduced a bill to reform the Delaney amendment.

Rep. Rangel, who represents a predominantly black constituency in Manhattan's Harlem and Upper West Side, told MEDICAL TRIBUNE he is supporting the bill because it would make more proved antihypertensive drugs available to black patients.

## ANTIHYPERTENSIVES CITED

"Hypertension is one of the commonest medical problems that blacks encounter," he said. "Effective antihypertensive compounds are available in Europe, but not available in the United States because of the FDA regulations. The bill would speed passage of these drugs to the medical consumer. Our position is that if a drug is shown to be safe it should be made available. It is my view that the individual physician who treats the patient is best qualified to determine whether or not a drug is beneficial to that patient."

Rep. Chisholm, in supporting the bill, said, "Naturally everyone would like to see that all drugs on the marketplace are effective. But 15 years of experience and bills of dollars have

shown very clearly that the 1962 Amendments to the Food, Drug and Cosmetics Act have not helped achieve that goal. In fact, they have considerably harmed the American consumer."

"There is overwhelming economic and medical evidence that the American people are being denied access to many drugs now in wide use in other countries for the treatment of serious disease, because of the controversy over the efficacy of the drugs alone. It is our belief that so long as a drug is proven safe and properly labelled as to all possible efficacy, it should be made available to patients and physicians who wish to use it. In addition to the basic question of the right of individuals to exercise freedom of choice of safe medical treatment, there is considerable evidence that internal problems at the FDA and overly stringent proof requirements under the law have made it virtually impossible to meet efficacy standards in timely fashion. Hence, this country suffers from a 'drug lag' as compared to other developed nations."

As rationale for the bill, Rep. Symms cited an evaluative study in which Prof. Sam Peltzman, of the University of Chicago's Graduate School of Business, "has documented the loss of new drugs to medicine and the consumer as a result of FDA holdups for reasons of so-called effectiveness. The drug flow since passage of the Kefauver amendments to the Food, Drug and Cosmetic Act in 1962 has been cut by 60%." (Regulation of Pharmaceutical Innovation, American Enterprise Institute for Public Policy Research, 1974.)

"In his econometric model based on historical pre-1962 cost and benefit averages, Prof. Peltzman estimates that in terms of missed benefits, or lives lost and illnesses lengthened, the cost is between \$300 and \$400 million a year; he pegs the tab for higher prices created by the lack of competition in drug production at another \$50 million a year, and he deducts an estimated \$100 million a year for the projected savings that have accrued to the consumer because ineffective drugs [as well as effective drugs] have been blocked from the market. Hence the final estimated cost to the consumer of \$250 to \$300 million annually."

"But I would emphasize that a 1975 'Economic Report of the President' has concluded that it is not clear whether drugs introduced under the tremendously difficult circumstances that have existed since 1962 are any more effective than those introduced before the Kefauver amendments."

## NO TIME CONSTRAINT NOW

Noting that the thalidomide episode sparked passage of the 1962 amendments, he stressed that "under the original law, a new drug application or NDA received automatic approval if it had not been rejected by the FDA within 180 days; the 1972 amendments removed this time constraint."

Rep. Symms, who has become a consumer relations expert in his four years in Congress, pointed out that only 16 new chemical entities have been introduced annually since 1962, as compared to 43 prior to that time. "The FDA should be encouraged to make greater use of data generated by reputable foreign scientists to reduce duplicative research and avoid the questionable ethics of conducting clinical trials for regulatory purposes only."

"And safety and efficacy are relative, not absolute terms. Consideration should be given to developing an effective post-marketing surveillance (or Phase IV) system to expedite the marketing of new drugs with significant therapeutic potential, while some [other] governmental agency works with clinical pharmacologists and other scientists in industry, government and in the private sector to foster the development of new drugs."

The fate of the Symms bill now lies in the

House Subcommittee on Health and Environment of the House Interstate and Foreign Commerce Committee, and the Senate Health Subcommittee of the Labor and Public Welfare Committee. And there could be some tough sledding ahead, Rep. Symms concedes. Rep. Paul Rogers (D.-Fla.), chairman of the House health panel, voted for the Kefauver amendments, and Sen. Edward Kennedy (D.-Mass.), who heads the Senate health group, is not thought to be favorably inclined toward the bill. But both are consumer advocates, and success or failure of the Symms bill may rest on its appeal to the nation's patients, doctors and their Congressmen.

#### STATE ELECTION OFFICIAL'S REACTION TO VOTER REGISTRATION PROPOSAL

#### HON. EDWIN B. FORSYTHE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. FORSYTHE. Mr. Speaker, on April 4, 1977, I brought to the attention of my colleagues in the House a letter which I had received from the Board of Elections of Burlington County, N.J. That letter discussed in some detail the objections to the voter registration proposal on the part of the local officials who ultimately will have to bear the responsibility for administering any new programs.

Today I would like to bring to the attention of my colleagues another letter on this subject, this one from the New Jersey State Association of Election Officials. The letter encloses a resolution passed during the State convention expressing the opposition of the organization to H.R. 5400, the Universal Voting Registration Act. Note that the association is composed of all election officials from every county of the State of New Jersey and adopted the resolution without dissent. Such a statement coming from such a group, I think, says much more about the true potential for disaster inherent in this voter registration proposal than all of the rhetoric on the floor of the House will be able to say of its potential for good.

I must repeat, Mr. Speaker, my statement of April 4 that we have an obligation as responsible legislators to provide laws which reflect the realities of the world in which we must function. I think this resolution of the Association of Election Officials reflects the reality of the world with which these officials must deal every day.

The material follows:

NEW JERSEY STATE  
ASSOCIATION OF ELECTION OFFICIALS,  
Jersey City, N.J., May 13, 1977.

HON. EDWIN B. FORSYTHE,  
Moorestown, N.J.

DEAR CONGRESSMAN: This Association, composed of all election officials from every county of New Jersey, sitting in convention recently at Atlantic City, N.J., went on record as being strongly opposed to the adoption of H.R. 5400, commonly known as the Universal Voting Registration Act of 1977.

The undersigned, President of the Association, was directed to forward to each member of the New Jersey delegation, a copy of the attached resolution, adopted without dissent, so that our Washington Representatives may

be made aware of the sentiments of the election officials who would have to implement this law if it became a reality.

Very truly yours,

JOSEPH T. BRADY,  
President.

#### RESOLUTION

Whereas there is presently pending, in the United States House of Representatives, an Act designated as H.R. 5400; and

Whereas the stated purpose of said legislation is to provide the manner in which citizens of the various States may register to vote and vote in any federal election, on the day of said election; and

Whereas the said legislation provides for the establishment and administration of said registration program through a Federal Election Commission; and

Whereas the members of this association recognize the inherent privilege of each qualified citizen to vote in the most convenient manner possible; and

Whereas it is also recognized that election day registration will cast the burden and responsibility of determining voter qualification upon the individual district or precinct workers and that undue hardship and reasonable burdens will also be placed upon them if they are required to register voters in addition to fulfilling their usual election day duties; and

Whereas H.R. 5400 provides totally inadequate safeguards in determining constitutional requirements regarding age, residency or citizenship, thus opening wide the door to notorious acts of fraud and misrepresentation; and

Whereas H.R. 5400 will require and compel Election Officials to initiate, maintain and service voter separate registration records for State and Federal Election; and

Whereas such duplication of records imposes severe financial obligation upon the tax payer of the various counties of the State of New Jersey; and

Whereas statistics released by the United States Government indicate less than 2% of persons responding to a post election survey cited voter registration inconvenience as a reason for not registering;

Whereas, H.R. 5400 provides for a large expenditure of federal funds which is a gross injustice to the taxpayers, and

Whereas we believe that a responsible electorate wants, and has a right to expect, proper safeguards in the right to vote.

Now Therefore Be It Resolved by the New Jersey State Association of Election Officials in convention assembled in Atlantic City, New Jersey on this 16th day of April 1977, that the said Association is opposed to the adoption of H.R. 5400 by the United States Senate and the House of Representatives.

#### BAD FOR HEALTH

#### HON. KENNETH L. HOLLAND

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. HOLLAND. Mr. Speaker, the following article appeared in the Wall Street Journal on Wednesday, May 18, and I would like to take this opportunity to share it with the Members of the House.

The article follows:

#### BAD FOR OUR HEALTH

President Carter's proposals for controlling hospital costs probably aren't going far in Congress and that is just as well; they're the wrong medicine.

The President proposes to put an 8.3% limit, of sorts, on the annual rise in revenues of acute care hospitals and also limit capital outlays above \$100,000. In that way he would hope to bring government's sharply rising Medicare and Medicaid costs under better control.

At the present rate of growth, these two programs will cost the federal government \$30 billion in fiscal 1978, a rise of 13% from the current year. Hospital costs, rising at 15% a year, are a major reason. About 45% of all hospital bills are paid by government.

But the Carter proposals fail to address the underlying cause of rising hospital costs—they are rising so rapidly largely because there is insufficient restraint on demand. About 92% of all hospital bills are paid by some third party, either the government or private insurers. The incentive for the patient and his doctor is not to economize on hospital usage but to make the most of the fact that insurance will pick up most of his bill.

No one in particular is to blame for this, although it is not overly harsh to say that past administrations and Congresses should have given more thought to designing health care policies that would have been less inflationary. Not only did the sharp rises in demand under Medicaid and Medicare raise prices but the government also has encouraged, through its tax policies, the present broad coverage of private insurance. Economist Martin Feldstein of Harvard estimates that tax deductions for health insurance premiums lower the cost of such insurance some 30% from what it otherwise would be.

The answer to the cost inflation problem is not as complicated as many people would like to make it sound. Hospitalization is different from other services in that treatment is often a matter of life and death. But it is not radically different in economic terms. Mr. Feldstein, one of the most persuasive experts on the subject, makes a convincing case that with patients paying a substantial portion of their bills out of pocket—up to, say 10% of their annual income—and insurance picking up only the rest, medical costs would soon come under the rigorous control of supply and demand.

Any politician, however, can see political liabilities in this. Politicians have been promising the nation "free" medical care for so long that there is a pervasive belief that such a thing exists—that doctors and nurses presumably can be made to work for nothing and that X-ray machines can be had for a song. Rather than control costs by resort to co-insurance by the patient, government is willing to try almost anything else.

Unfortunately, innovative attempts to avoid reality have come a cropper. President Nixon established federal subsidies to promote Health Maintenance Organizations, which he hoped would hold down health costs by competing with existing forms of health care delivery. But liberals in Congress loaded the HMOs up with so many federal requirements that they have had difficulties achieving their supposedly inherent efficiencies. Congress established Professional Standards Review Organizations, which were supposed to enlist doctors to review the performance of their peers in spending federal money. But doctors don't much like that line of work, so that only about half the proposed number of PSROs have been formed. It is doubtful whether even those exert much effective control on hospital utilization by doctors.

Now Mr. Carter is falling back on that last resort of failing government policies, direct controls. But there are all sorts of flaws, real and potential, in the ceilings. For one thing, they would permit non-supervisory wage increases to be passed through. The idea of controlling capital expenditures already is

being employed by federally sponsored Health Systems Agencies in a number of states; the main effect seems to be to embroil the HSAs in litigation and controversy with hospitals and doctors. And in some states, where the main focus has been to try to control Medicaid costs, arbitrary controls and ceilings have contributed to nursing home bankruptcies, a dubious contribution to the efficacy of American health care.

Direct controls simply will not work. And since they won't work, neither will "national health" in the sense that it has been envisioned by Senator Kennedy and others, as a blank check for unlimited care—that is, unless Congress is willing to face up to a federal budget deficit of \$150 billion or so.

So the choice is open. Congress can go along with something like the Feldstein proposal and bring costs under realistic control at some political price. It can adopt the Carter proposal and plunge deeper into the morass. Or it can continue to let matters drift. We suspect it will choose the latter. It should be obvious that it could do a lot worse.

#### ANOTHER PERSPECTIVE ON MENACHEM BEGIN

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. EILBERG. Mr. Speaker, we have read and seen much in the news media about the victor in Israel's recent election, Menachem Begin. Because his election has created so much discussion, I have noted in the May 25 issue of the Jewish Times of the Greater Northeast, published in my home district, the following excerpts of an interpretive article on Mr. Begin.

This article was written by Albert Liss, executive director of Brith Shalom. I commend it to the attention of my colleagues, because I think it is an interesting and perhaps different analysis of the man and the issues, which are of critical importance:

#### MENACHEM BEGIN—A PROFILE (By Albert Liss)

Now that Menachem Begin, a member of the Knesset since Israel's reestablishment 29 years ago, and former Commander of the underground liberation forces, the Irgun Zvai Leumi, has emerged as fresh copy for today's newspapers, American reporters of the Middle East scene must accept a special responsibility to correct the misconceptions about Mr. Begin which were nurtured in the bitter partisan days of Israel's beginning.

The description of "right-wing" to Mr. Begin, in a political spectrum that includes Communist parties and the Marxist Mapam, may be useful, but it regrettably conjures up a distorted vision to Americans who generally apply the term to anti-Democratic elements who oppose a free Democratic society.

Mr. Begin believes passionately in the free society that can provide social justice for the individual and is one of the staunchest adherents of the parliamentary system which he served not only as a member of the Knesset but also as a former member of Golda Meir's cabinet.

Although a champion of the free enterprise system, Mr. Begin has advanced ideas for the socialization of Israeli society far more radical than any proposed by the Labor Party which, incidentally, also has encouraged a free enterprise economy, despite the

anomalous Histadruth. Mr. Begin, for example, urged the nationalization of all public utilities and has called for public referendum on vital issues facing the Israeli electorate. He was one of the first who argued for the termination of military rule over Arab civilians in Israel proper and advocated full political, social and economic equality for all citizens of Israel, Jew and Arab. He has even espoused the right of loyal Israeli Arab citizens to serve in Israel's military forces, and opposes the death penalty.

Mr. Begin may with accuracy be described as a radical only in his territorial views. Jewish traditionalist, he sanctions the concept of Eretz Israel, a view shared by many in Israel. It would not be surprising, however, that given evidence of Arab reconciliation, he would find a way to take the necessary reciprocal steps to secure their friendship and attain a durable peace.

Besides the deep influence of Hebrew traditions and Jewish history, the French Revolution and European revolutionary nationalists, such as Mazzini and Garibaldi, seem to have exerted profound influence on Mr. Begin's political outlook.

His vision of Israeli society was eloquently stated in the first public address he made in Tel Aviv on May 15, 1948 after emerging from the underground:

"Let the government be the guardian of the right of man and citizens, without discrimination and without (special) privileges.

"Within our house justice will reign supreme. Justice will rule even its rulers. Those in high office will be the people's servants, and not its rulers. There will be no parasitism. There will be no exploitation. In our house, there will not be a man—citizen or alien—hungry for bread, without a roof over his head, without clothes or without an opportunity for education."

Attention has been focused by Mr. Begin's adversaries on his alleged preoccupation with Israel's military posture. Mr. Begin's reliance on strong military defense forces to protect Israel is a result of his knowledge of the Jewish people's historic vulnerability as unarmed, defenseless victims, and his pragmatic conviction that at this juncture in history, the Arab nations have not yet demonstrated their willingness to accept Israel's legal right to exist as a permanent sovereign Jewish nation-state in the Middle East.

Finally, a word about the man who unfurled the banner of revolt against the foreign occupiers of the Jewish homeland. An appreciation for truth calls for a more edifying description of Mr. Begin and his underground activities than the inflammable ad hominem "terrorist."

Mr. Begin's underground exploits were carried out against powerful foreign military forces which were brutally engaged not only in preventing the establishment of the Jewish state on land held in trust for the Jewish people, but which callously were thwarting the rescue and repatriation of survivors of the holocaust who had no other place to go.

Any comparison of the acts committed by the Irgun (even those in which, unhappily, innocent persons by error and not by design may have been victims) with the cold-blooded murders perpetrated by Arab fanatics at Munich, at Maalot, or at the former Lod Airport, against civilians having no connection with the Middle East conflict, is a palpable absurdity.

No other people in history have succeeded in reconstituting themselves as a nation against greater odds than the people who made the ascent to Zion. There are countless heroes among them, not the least Menachem Begin, the leader of the first successful rebellion for Jewish freedom since the Maccabees.

(NOTE.—The author who is Brith Shalom's National Executive Director, served as Regional

Director of the American League for Free Palestine, an American organization composed of Jews and non-Jews, which supported the fight for the liberation of Palestine waged by the underground forces of the Irgun Zvai Leumi, led by Mr. Begin.)

#### THE C-130 AIRCRAFT AND ARMS POLICY

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. McDONALD. Mr. Speaker, in the apparent frantic rush of the present administration to control and further restrict arms sales abroad, there is a clear-cut danger of not only further erosion of our industrial base that used to be called the "arsenal of democracy," but also a further worsening of our balance of payments due to our reduced arms sales, to say nothing of our allies having nowhere to turn for equipment with which to defend themselves. A case in point is the C-130 aircraft which has been accorded the status of a major weapon at the Department of State. Some of us feel this policy is wrong for the reasons set forth in the letter below which was sent to Secretary of State Vance.

The letter follows:

HOUSE OF REPRESENTATIVES,  
Washington, D.C., May 26, 1977.

HON. CYRUS VANCE,  
Department of State,  
Washington, D.C.

DEAR MR. SECRETARY: A number of us here in the Congress are becoming increasingly concerned over the problem of maintaining our position as the "arsenal of democracy". In this day and age, a key foundation of this arsenal has to be the aerospace industry of the United States. Our aerospace industry, as you are aware, is also a leading factor in our exports. Given the fact that both defense spending and our space program have declined in recent years, this matter has become more urgent. Therefore, we are writing to take up the case of one of the giants of the aerospace industry—Lockheed Aircraft Corporation, and specifically the case of the C-130 cargo plane manufactured by that corporation.

It is our feeling that the sale of such planes should be encouraged to all non-Communist countries and not discouraged. Since this is not a strategic weapon, and even in many parts of the world has come to be associated with American humanitarian and rescue efforts, it would appear that it is erroneously classified as a major item of defense equipment and, therefore, cannot be commercially sold in amounts in excess of \$25 million in accordance with the Arms Control Export Act of 1976.

Our allies around the world continue to need to be able to buy needed equipment from us. We can ill afford to have countries traditionally friendly with the United States turning to the Soviet Union for equipment and becoming dependent upon it for supplies, spare parts, and the necessary training. The spectacle of Kuwait buying Soviet SAM missiles is particularly instructive in this regard, we feel.

Therefore, Mr. Secretary, we respectfully suggest you reconsider your policy on the C-130 aircraft and recommend that it be reclassified as a defense article.

Your prompt consideration of this matter

will be greatly appreciated by the undersigned.

#### SAVE THE HATCH ACT

### HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. LAGOMARSINO. Mr. Speaker, this body has before it controversial legislation to, in effect, repeal the Hatch Act.

I disagree with the proponents who argue that Hatch Act reform is needed to grant full political participation to the Nation's civil servants and that such reform can be accomplished without the potential danger of turning the civil service into a political pawn.

I feel that there are very real dangers associated with Hatch Act "reform" and was naturally very pleased to see a most perceptive editorial on this matter appear in the Goleta Today newspaper. I would like to share the wisdom contained in this editorial with my colleagues and insert it in the Record at this point:

#### SAVE THE HATCH ACT

Since 1939, federal civil servants have been "Hatched" and it's a system which has worked well.

The Hatch Act forbids federal and postal employees to take active roles in partisan politics; they can't be hassled for political contributions; they can't be press-ganged as doorknockers, literature distributors, campaign office "volunteers", money-raisers.

They may not serve as officers of a political party, solicit contributions, serve as convention delegates, circulate partisan petitions, or run as partisan candidates for public office.

They may, of course, make campaign contributions if they choose and be members of a political party. They may even engage in non-partisan campaigns.

The Hatch Act is under attack. There's a bill in the House of Representatives which would "revise" the act. Revisionists claim the present law disenfranchises federal workers and restricts rights of free speech and association. That's the claim, although the Supreme Court has held otherwise.

Proponents of Hatch Act revision include

the American Postal Workers Union (AFL-CIO) and the American Federation of Government Employees (AFL-CIO) plus the National Federation of Federal Employees. The suspicion arises that these groups are not so much interested in First Amendment rights of the rank and file membership as they are in the increased political clout they can acquire if Hatch Act protection from arm-twisting is removed.

The rank and file should be aware of what is going on.

Will political loyalty and activity become the basis for promotion within the Civil Service system, a system which was developed to erase that evil?

Will campaign contributions be the price of a better job, perhaps even keeping a job at all?

Will the federal bureaucracy be used to build a political machine?

Should the friendly letter carrier be hired on the whim of a political boss rather than by competitive exam? Should he be promoted the same way?

Common Cause President David Cohen, in a letter to the House Post Office and Civil Service committee, said the nation "cannot afford a politicized civil service. Our civil service must be respected, and that requires that federal personnel be impartial in the administration of our federal laws and policies."

This isn't the first time revision of the Hatch Act has been tried. In fact, Congress passed such a bill in 1976 but President Ford wisely vetoed it and the veto was upheld.

The new attempt (H.R. 10) would remove existing restrictions on partisan political activities for most federal employees. They would be permitted to run as partisan candidates for elected office, campaign for partisan candidates, raise funds for candidates and parties and serve as officers of political parties.

The spoils system is not dead.

The federal employees better know what is in store for them. And we better know what is in store for us.

#### ELIMINATE CAUSES OF POVERTY

### HON. IKE F. ANDREWS

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. ANDREWS of North Carolina. Mr. Speaker, in 1964, this Nation made a major commitment to eliminate the causes of poverty in the United States. The Economic Opportunity Act represented a concerted effort by thousands of concerned individuals to openly confront a national disgrace which this country had ignored for decades. That landmark legislation established the Office of Economic Opportunity to assist programs at the local level to address the problems of the poor and the causes of poverty.

While this commitment initially produced remarkable results, the fact is that large-scale poverty still exists in the United States. The Bureau of Labor statistics reports that its latest figures show a total of 26 million poor people in this country, an increase of 3 million over the 23 million reported in 1973, and an increase of nearly 2.5 million from 1974. This represents the largest single-year increase since 1959, the first year for which poverty data were available.

This Nation's commitment to eliminate the causes of poverty must be con-

tinued and strengthened. Toward this goal, I am today introducing the Economic Opportunity and Community Services Amendments of 1977. Basically, this bill extends the major provisions of the Economic Opportunity Act, as amended by the Community Partnership Act of 1974, through fiscal year 1981.

This legislation would increase to 75 percent the Federal share requirement and relieve the financial burden faced by many local communities which have been unable to provide the funds necessary to compensate for the reduction of Federal funding imposed by Congress in 1974. For the first time, specific funding is authorized for research and evaluation so that the coordination of Federal efforts to alleviate poverty can be strengthened. This bill recommends a reduction in the amount of time nonpublic members of community action boards may serve to help generate greater community participation.

The organization of the Community Services Administration is streamlined by abolishing the nonfunctional Inter-governmental Advisory Council on Community Services, by deleting the section of the act which authorizes a transfer of CSA to HEW, and by extending for 1 year the National Advisory Council on Economic Opportunity. Furthermore, this bill encourages the Director of CSA to revise and update regulations which have become burdensome and dated. The Director is authorized to promulgate regulations on the issue of employee compensation, and is directed to consult with community action agencies and regional offices prior to proposing regulations. Finally, this bill places new responsibility in regional offices by providing them with authority to process and finalize grants and to provide technical assistance to local community action agencies.

I urge my colleagues to support this bill so that this country's commitment to reduce poverty can be continued with speed and enthusiasm.

#### THE HELSINKI WATCH IN MOSCOW

### HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. SIMON. Mr. Speaker, a year ago a small group of people who dare "to think differently"—the literal translation of the Russian word we usually render as "dissenter" or "dissident"—formed a remarkable organization in Moscow. It was called the Public Group to Promote Observance of the Helsinki Agreements in the U.S.S.R., and its constituted the first signal to the West that the Helsinki Accords instead of being a triumph for Soviet diplomacy, were becoming an embarrassment to the Kremlin. The evidence of that embarrassment is now painfully obvious to the courageous men and women who formed the Public Group. Three of its Moscow leaders—Prof. Yuri Orlov, Aleksandr Ginsburg, and Anatoly Shcharansky—and two of the founders of a similar group in the Ukraine—Mikola Rudenko and

Oleksy Tykhy—were arrested and imprisoned last February and March, because they dared to try to hold Soviet authorities to the pledges given at Helsinki.

Despite such harassment and repression, however, the Soviet Helsinki watchers have continued the task they set themselves: Monitoring Soviet compliance with the accords, pinpointing the people and the issues involved in the long and agonizing effort to establish, in the U.S.S.R. standards of conduct which would make the Soviet reliable participants in the world's search for peace and stability. Already, the Public Group has issued 20 detailed and documented reports on compliance with the humanitarian provisions of the Helsinki Agreements. They make grim reading. Most are case studies of the ways in which an authoritarian state denies its citizens the rights Helsinki was meant to reinforce: The rights of free movement, free expression and conscience.

But the Public Group has not despaired of change, and neither should we. After the arrest of Professor Orlov, a new activist, Yuri Mnyukh, appeared as spokesman for the Helsinki watchers. And a document the group issued at the end of February—only recently received by the Commission on Security and Cooperation in Europe of which I am a member—echoes the stubborn faith of the unofficial monitors that their work of reporting is not in vain.

They write in assessing the human rights situation 3 months before the 35 signatories were to begin their own review of Helsinki implementation:

In the world today, one can never be certain that facts on the unending suppression of elementary liberties in the USSR will not become public.

It is thanks to their efforts that those facts are known and that they will be a part of the diplomatic assessment this year of the progress that has been made and must be made in giving the Helsinki Agreements life and meaning. The Public Group Professor Orlov has founded has done and is doing a great service. Its assessment of the situation in the Soviet Union, "Three Months before Belgrade," is depressing but important reading.

A translation of that report, prepared by the Khronika Press in New York, follows:

### THREE MONTHS BEFORE BELGRADE

#### 1. A GENERAL ASSESSMENT

The course of events since August 1976 when the Helsinki Watch group published its review "A Year After Helsinki" has shown the justice of our appraisal of the human rights problem in the USSR. Our statement that "the Soviet Government does not intend to fulfill its international human rights obligations" has been confirmed as well as our August 1976 prediction that the Final Act of the European Conference would be accepted by more and more people as a juridical basis for the fight for human rights.

Citing provisions of the Final Act, participants in the human rights movement in the USSR and other East European countries have spoken out energetically, demanding that the agreements signed at Helsinki be observed. In Poland, human rights advocates are championing, with apparent success, the rights of the workers who protested against increased food prices. In the German Demo-

cratic Republic, a protest citing provisions of the Final Act has been mounted against the deprivation of citizenship of balladeer and poet Wolf Biermann. In Czechoslovakia, human rights advocates have used the same juridical basis in drafting that exceptionally valuable document, Charter 77. And the number of signatures on Charter 77 continues to grow despite the regime's reprisals. In Romania, eight persons have issued a statement on human rights violations in their country. The distinguished Yugoslav author and public figure, Milovan Djilas, has spoken out against the violation of civil rights mentioned in the Final Act. Every day witnesses new examples of the importance attached by the public of the East European countries to the obligations assumed by the governments of the states participating in the Helsinki Conference.

In the USSR individuals and groups basing their struggle for civil rights on the Final Act have also stepped up their activity. Soviet citizens are addressing a swelling stream of letters to different Soviet organs, to the Helsinki Watch Group, and to the international organizations about the situation of prisoners, about psychiatric persecution, and about violations involving freedom of conscience, religious liberty, the free exchange of information, and the right to emigrate.

More and more prisoners of conscience are declaring that their sentences constitute a gross violation of the Helsinki agreements as do the brutal, inhuman conditions in penal institutions: punishment by hunger and cold, forced labor, insurmountable obstacles to correspondence, confiscation of complaints and statements, etc. Letters and statements have also been received from political exiles and former prisoners of conscience who are suffering from serious discrimination with respect to their choice of domicile, their freedom of movement, and their choice of jobs.

Participants in the Jewish movement for emigration have significantly expanded their activity. More attempts have been made to secure a revival of Jewish national culture in the USSR. Germans seeking the right to leave for the Federal Republic of Germany form a growing movement.

An increasing number of people are demanding implementation of their right to emigrate for religious, socio-economic or other reasons. The attempt of large groups to emigrate without receiving individual invitations from abroad is a distinctive, new phenomenon. (One example is the recent application made by more than 500 Pentalists.)

The Helsinki Watch Group has passed on to the court of world opinion and to the states signing the Final Act of the Helsinki Conference a series of documents with facts on many violations of fundamental human rights in the USSR. The events of recent months have demonstrated once again the Soviet government's extreme intolerance toward any information which reveals the true situation with respect to human rights and which is not subject to the control of official Soviet organs.

#### 2. THE REGIME'S BATTLE AGAINST THE DISCLOSURE OF UNDESIRABLE INFORMATION

Since late 1976 the Soviet authorities have engaged in a new offensive against those persons who collect news and inform world public opinion about human rights violations in the USSR.

The USSR Procurator's Office delivered an official warning to Academician Andrei Sakharov, Nobel Peace Laureate. Soon thereafter the organs of state security arrested four members of the Helsinki Watch Group: Alexander Ginzburg, representative of the Fund to Assist Political Prisoners in the USSR; physicist Yuri Orlov, founder and leader of the Moscow Helsinki Watch Group and a corresponding member of the American Academy of Sciences; writer Mikola Rudenko, leader of the Ukrainian Helsinki Watch

Group; and teacher Oleksy Tikhy, another member of the Ukrainian Group. Before and after these arrests, searches were conducted at the homes of several Group members, and in some instances, evidence of crimes was planted in their homes and "discovered" during the searches.

The arrests and searches were accompanied by an unpardonable campaign of slander against Soviet human rights activists in *Pravda*, in *Literaturnaya Gazeta*, in *Golos roding*, in TASS bulletins for Western consumption, in special lectures and conversations and in other media.

No doubt, the slander disseminated through the mass media has one aim only—to prepare public opinion inside our country for political trials of human rights advocates in the Soviet Union. They will all be charged, to judge from the propaganda, with slandering the USSR or with non-political crimes such as illegal currency operations or keeping weapons (which KGB agents planted themselves during the searches). The true reason for the arrest of four Helsinki Watch Group members and for the threat against other Soviet human rights advocates—for example, the warning addressed to Valentin Turchin, chairman of the Amnesty International Soviet group—is the authorities' desire to intimidate all the civil rights activists inside the country and to cut off the daily increasing stream of information about violations of the Helsinki agreements.

The pressure and repressions directed against the human rights advocates by the authorities will apparently be intensified. But another aspect of the current campaign of repressions should be kept in mind: the Soviet government intends to make evident to the whole world its disdain for the voices raised in the West criticizing its actions, to demonstrate its toughness, and to discourage world public opinion from responding to appeals for support issued in the USSR. Such actions are, however, incompatible with that climate of trust which was, one would think, a goal of the states participating in the Helsinki Conference.

We are convinced that only one course of action can in fact establish confidence in the Soviet government: putting an end to the systematic and ruthless suppression of civil liberties and fundamental human rights in the USSR. Nothing else—neither repressions directed against Helsinki Group members, nor diplomatic evasions, nor the concentrated campaign slandering the dissidents—can help the Soviet authorities conceal the truth about their violations of the U.N. Universal Declaration of Human Rights, the International Covenant on Civil and Political Rights, and the Final Act of the European Conference. In the world today, one can never be certain that facts on the unending suppression of elementary liberties in the USSR will not become public.

#### 3. FUTURE ACTIVITY OF THE HELSINKI WATCH GROUP

The members of the Moscow Group, in spite of the repressions, will continue to inform world public opinion of all violations of international human rights obligations entered into by the Soviet government. Many events, including the organization of similar groups in the Ukraine, in Lithuania and in Georgia have confirmed the significance of Yuri Orlov's initiative in creating the Moscow Helsinki Watch Group. In reply to the authorities' pressure and their arrest of two of the Group's key workers, we announce the election of two new members: Yuri Mnyukh, a Candidate of physical and mathematical sciences, and Prof. Naum Meiman, a Director of physical and mathematical sciences. Ludmilla Alexeyeva, a Group member who has left the USSR, will act as the Group's representative abroad. The Group will in this fashion continue its work despite the repressions of recent months.

The Group believes that one reason for the repressions directed against its members is the Soviet leadership's fear that people in the USSR and other East European countries who are concerned about fulfillment of the human rights obligations assumed by their governments are linking up on the basis of the Helsinki Conference's Third Basket. The desire to disrupt the developing unity among human rights activists is transparent in the mass media's propaganda on this topic. The support received from several West European Communist parties for the struggle on behalf of human rights has served to sharpen the authorities' fear of the burgeoning human rights movement in the USSR. The Soviet government has taken the risk of losing the trust of their ideological confederates and of their partners in the Helsinki Conference just for the sake of preserving its freedom of action to persecute Soviet citizens for any attempts to assert cultural or social values unpalatable to the authorities.

With respect to the danger now threatening the arrested members of our Group and the mass media's campaign of slander, the Helsinki Watch Group has asked Ludmilla Alexeyeva, Andreo Amalrik, Vladimir Bukovsky, Valery Chalidze, Lev Kvashevsky, and Leonid Plyushch to explain the true aims and character of our Group's work when they meet with official representatives of the countries signatory to the Final Act, with leaders of Western public opinion and with representatives of political parties.

Serious disagreements between the leaders of the Western and the Eastern countries have now become apparent on the issue of the proper criteria to be used in monitoring the provisions on human rights. (This is evident, for example, from President Carter's letter to Academician Sakharov and Ambassador Dobrynin's statement made in response to that letter.) In the present circumstances, discussion and elaboration of such criteria by representatives of public opinion in countries of the West and of the East are particularly important and could play a major role in the preparation and conduct of the Belgrade Conference.

#### HOW SOON WE FORGET

#### HON. J. HERBERT BURKE

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. BURKE of Florida. Mr. Speaker, because Vietnam was a dirty, unpopular war there are many people who feel that we should not talk about it except to make martyrs of those who dodged the draft, deserted, or were discharged other than honorably. But we cannot hide the fact that our involvement in Vietnam spanned almost 10 years and that 55,000 American lives were lost in that war. In addition, the peacetime expectations of young men, their wives, their parents, and those of their children were interrupted by their service in the service of their country in the Vietnam war. For those who do not like to think, or talk about our involvement in Vietnam, and who want to forget, let me remind them that there are scars that never can be healed. There are lives that will never be mended. There were too many sacrifices, not only by the young men who fought the battles but by their families and friends. It is strange that most of the media stories today are devoted to draft dodgers, the dishonorably discharged,

and the deserters at the expense of the more than 55,000 dead, and the many other Americans who bravely served in Vietnam.

And what about the other casualties, those who suffered wounds from which they will never recover? For those whose heart goes out to the deserter and draft dodger, which mine does not, although I do feel for the parents and families, let me state that the obvious difference is that the families of the war dead have a vacuum in their lives, while the families of the deserters, draft dodgers, and dishonorably discharged still have a son. Death is very final.

I was touched by the article which appeared in the Washington Post on the day after Memorial Day entitled "Family Shares 9 Years of Grief, Memories of War Victim."

We should be ashamed if we forget the fine young men who lost their lives, or those who served honorably in the Vietnam war. For those who did not have the chance to read the article which appeared in the May 31, 1977, issue of the Washington Post, I offer the same to you with the hope that we will never forget Peter Jason Angle—a man—and a true American, may God bless him and all his comrades.

The article follows:

#### FAMILY SHARES 9 YEARS OF GRIEF, MEMORIES OF WAR VICTIM

(By B. D. Colen)

The words and abbreviations on marker 55-327 in Arlington National Cemetery are at once terse and all inclusive, summing up everything the United States Army needed to know or say about: Peter Jason Angle, Virginia, Cpl., Co. B, 2Bn, 1 Air Cav Div, Vietnam, Jan 20, 1949, July 1, 1968, BSM, AM, PH.

Peter Jason Angle, resident of Virginia, corporal in Company B of the Second Battalion of the 1st Air Cavalry, died in Vietnam on the 163d day of his 20th year. He was the recipient of the Bronze Star Medal, Air Medal and Purple Heart.

He was also the first born and only son of Luther E. and Louise Angle. And they have suffered his loss these past nine years.

When the chaplain and the sergeant first visited the Angles' neat clapboard Dutch Colonial in Arlington they found the house empty. Luther and Louise Angle were out to dinner.

But at 8 the next morning, July 2, 1968, "I heard them. Louise was still asleep," Peter's father recalled yesterday, just before a holiday visit to the grave.

Angle said the sergeant asked, "Are you Luther Angle?"

"Yes."

"Is your son Peter Angle?"

"I said 'yes' and gave him the serial number," Angle continued. "I knew what it was as soon as I saw them. I remembered from World War II."

Peter Angle lies dead in Arlington Cemetery, but he is still very much alive inside the house in which he grew up.

The sheet music to "The Little Drummer Boy" still sits on the piano in the living room, just as it did that last Christmas before Peter shipped out for Southeast Asia.

The yellow 1st Air Cavalry patch hangs framed on the living room wall. Beneath it, in Latin, the words: "Dulce et decorum est pro patria mori"—How sweet and becoming it is to die for your country.

There are pictures of Peter. Peter in uniform with a girl friend. Peter as a crew-cut child. Peter with his sister.

And in the basement there is the collection of Peter's effects and letters, many

items still sitting on the desk drawers where he left them before shipping out.

"I still can't bring myself to touch his things," his mother said yesterday. "It would be like invading his privacy." It was only last year that Louise Angle stopped visiting the white stone marker several times a week, taking fresh flowers to Peter and watering the flowers on nearby graves.

Louise Angle said it "made me feel better to go" to the cemetery. "When your child dies, a part of you dies with him."

To the Army, Peter Jason Angle was a soldier. To his mother, he will always be a child.

"It's lonely without him," she said. "Couples today should have three or more children. Then if one dies it's not so hard."

It took the Angles all these years to accept the finality of Peter's death.

An insurance check arrived an unseemly two days after the notification of his death, and Louise Angle "just stuck it away. I kept thinking they must have made a mistake. I couldn't believe it. I couldn't believe he wasn't coming home. We didn't have the casket open or anything."

"At first I didn't touch it (the check) because it (his death) wasn't true. But then I didn't because..." Her voice thickened, but didn't crack. "It's sort of a nest egg."

Peter Angle was not a victim of the draft. He was a volunteer from a family of volunteers whose roots go back on both sides to the American Revolution.

"He enjoyed the Army, as such," his father recalled. "He was really gung ho."

"He was upset because he hadn't done well in college," she said of her son. "He said, 'This time you're going to be proud of me, Ma.' It is hard to believe Louise Angle was ever not proud of Peter."

His parents remember the little things, the happy moments that make a collection of biologically connected individuals a family. The week Peter spent in New York with his sister during the 1968 Christmas season. "He had a wonderful, wonderful time."

Or the evening after his graduation from basic training at Ft. Jackson, S.C., when Peter "was so proud he insisted on paying for the meal. He insisted that the treat had to be on him," his father recalled yesterday.

And the afternoon when his mother found him out taking photographs of the neighborhood. "He wanted to take them with him" to Vietnam, she said.

Then there were the letters home. "He was always so happy, so up. He was a happy boy. It was a terrific shock because I had no idea" of the danger Peter was in every day in Quang Tri Province.

The first hint of that danger came one week before the visit of the sergeant and chaplain. "The last letter we got he said his best friend had been killed. He sent us a picture. They have a little service and put the rifle in the ground and put his hat on top of it," said Louise.

"Helmet," corrected Luther, who saw action in the Pacific as a staff sergeant during World War II.

There was one final letter. It arrived a week after Peter's death. "He was going on R&R and he was going to Hawaii. It was his turn because he was the oldest in his platoon. He wanted us to meet him there and he signed the letter, Aloha."

Yesterday, at the graveside, Louise Angle looked at the two roses, picked beside the white clapboard house and brought to Peter, and at plastic flowers on a nearby grave.

"That's not right," she said. "A young person shouldn't have anything artificial. He was so young. He was just coming into his own."

"You think about him being so young," said Luther Angle, "but there's nothing you can do..."

THE LEGISLATIVE PRIORITIES OF  
NEW YORK'S PUERTO RICAN AND  
HISPANIC COMMUNITY: VII

**HON. HERMAN BADILLO**

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. BADILLO. Mr. Speaker, I am pleased today to insert in the RECORD the recommendations of the panel on criminal justice of the first Conference on the Problems of the Puerto Rican and Hispanic Community in the Metropolitan New York area. As you will read, the panel concludes that the problems for Hispanics in the criminal justice system begin with the lack of Puerto Rican professionals in decisionmaking positions within that system, and go all the way to building more community-based correctional facilities in large urban areas. I hope that all my colleagues concerned with improving the criminal justice system will carefully read these proposals:

**CRIMINAL JUSTICE RESOLUTIONS**

(1) That Puerto Rican professionals be considered for top decision making positions with all the principal Federal Agencies in the Criminal Justice field, namely:

The Law Enforcement Assistance Administration.

The Drug Enforcement Administration.

The Federal Board of Parole.

The Federal Judiciary.

The Federal Bureau of Investigation.

The Federal Bureau of Prisons.

The U.S. Department of Justice.

The Office of the U.S. Attorney General.

And . . . the subdivisions of Federal agencies, Departments and Commissions with a policing or law enforcement component.

(2) That the Federal Civil Rights Commission more actively pursue cases in which Puerto Ricans are being deprived of Due Process in Criminal Justice proceedings, incarceration or denial of probation and parole.

(3) That the Federal District Courts accelerate the handling of Civil Rights (class suits) in which Puerto Ricans are alleged to be victimized by the inadequacies of the Criminal Justice system at the local or state level.

(4) That the Federal government appropriate more money for juvenile and youth programs with special emphasis on:

(a) Anti-Crime prevention programs—youth clubs, houses, etc.

(b) Programs to humanize the process by which juvenile or youthful offenders are prosecuted or sentenced by the Family Court.

(5) That LEAA should enforce Federal Equal Employment Opportunity statutes in state, city or private agencies receiving Federal funds for crime prevention, crime control, corrections and law enforcement programs.

(6) That the LEAA review carefully all programs which receive Federal funds to insure that the interest of the Puerto Rican community is taken into account.

(7) That the LEAA review all funds drawn from block grants to insure that Puerto Rican organizations get their fair share.

(8) That the Federal government must insist that State Crime Planning Agencies, or similar boards at the municipal level, are adequately represented by Puerto Ricans especially if there is a high Puerto Rican population density in the state or municipality concerned.

(9) That the Federal courts and U.S. Attorney General's offices, and regional offices,

have more Spanish-speaking, and preferably Hispanic or Puerto Rican personnel, who can service the needs of the large number of Hispanics now being prosecuted in Federal courts.

(10) That the Federal Government must provide funds to train Hispanic criminal justice professionals—either by setting up its own school—or through grants to private institutions. These Hispanic employees will help provide a more equitable handling of the cases involving Hispanic defendants (or Hispanic victims) in all courts.

(11) That the LEAA should carefully monitor programs to insure that anti-crime community based programs which serve to protect the interests of the Puerto Rican community are not prematurely cut off when their effectiveness is still being evaluated.

(12) That the President—along with all Federal agencies and their department heads—should stop going to Puerto Rico for program input or prospective candidates for posts with Federal agencies when a valid resource of information and qualified professionals who can meet these requirements is now available on the mainland.

(13) That the Federal Government must remove its own prejudices against ex-offenders by eliminating whatever present Federal restrictions now exist (either in the law or in the operational philosophy of its agencies) which restricts the licensing or hiring of qualified ex-offenders.

(14) That the Federal Government pass legislation protecting the rights of ex-offenders, which would supersede state laws if it is proven that the civil rights and constitutional rights of ex-offenders are being denied by government.

(15) That the Federal Government remove restrictions in Civil Service regulations (at the Federal level) which tend to restrict Puerto Ricans from working in Criminal Justice agencies in specific job categories. This is especially true in cases where arbitrary and non-relevant job specifications now exist which have no relation to the actual performance of the job itself.

(16) That the Federal judiciary implement a viable bilingual court program which can be used as a model for other state supreme and criminal courts.

(17) That the Federal Courts speed up the handling of its own criminal case backlog affecting Puerto Rican and other Hispanic defendants throughout the country.

(18) That the Federal Government relocate Puerto Rican inmates to facilities closer to their homes, and that consideration be made regarding the construction of more community-based correctional facilities in large urban areas where Hispanics constitute a large population factor.

(19) That the LEAA insure that funds given to cities for crime prevention or law enforcement programs, or programs dealing with ex-offender rehabilitation, be not used if such programs would normally be financed by local tax levied funds.

**JUNE 2, 1946, A GREAT DAY IN  
ITALIAN HISTORY**

**HON. FRANK ANNUNZIO**

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. ANNUNZIO. Mr. Speaker, June 2 marks a stirring event in the rich history of Italy. For on that day in 1946, the great Italian people gave a resound-

ing vote of confidence for political democracy.

The beautiful land of Italy, washed by the blue waves of the Mediterranean and cradled within the Alps, has boasted of an advanced civilization for thousands upon thousands of years. It may be truly said that Italy constitutes a mosaic of human history. She is a major source of Western culture—her legal system is a model for the West, her language is the tongue of music, and her Renaissance stands as one of man's greatest achievements. Yet throughout her glorious history, few more stirring events have occurred than the day, 31 years ago, when the Italian people chose a republican form of government.

Let us recall those early postwar years. In the devastation and destruction of World War II, Italy had suffered more heavily than most other Western nations. During the war, her civilian population had endured privations and suffering even more severe than the German citizens, and in addition, they had suffered more than two decades of oppressive Fascist rule.

In the immediate aftermath of war, the most urgent political problem facing Italy was the need to establish a framework for effective democratic government. The task was a difficult one because of the multiplicity of political parties and because of disagreement over whether the monarchy would be abandoned or retained.

In a nationwide referendum, held on June 2, 1946, the Italian people elected delegates to a constituent assembly to draw up a new constitution. In the same referendum the Italians were called upon to decide whether to keep the monarchy or turn to a republic with a president. By a margin of 2 million votes the Italian people voted for a republican form of government, which was an outstanding victory for political democracy.

Eleven days after the referendum, King Umberto II left Italy. With the aid of the Marshall plan, the determined and ingenious Italian people launched upon a great period of economic, political, and social progress. In addition to outstanding postwar achievements on the domestic scene, Italy also placed herself in the vanguard of European integration. Moreover, in the North Atlantic Treaty Organization, Italy has been and continues to be a stalwart and loyal Western ally.

Thus, Mr. Speaker, we commemorate June 2, 1946, a proud day in Italian history, and, indeed, in the entire history of man's eternal striving for freedom. On this glad occasion, may I extend warmest best wishes to the people of that great Republic, and to our many friends of Italian descent in my own 11th District of Illinois, throughout the United States, and all over the world. May the people of Italy continue their important contributions to the culture of the West, to the vitality of democracy, and to democracy's precious ideals.

# AMBASSADOR YOUNG AND THE WESTERN POSITION IN AFRICA

## HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. McDONALD. Mr. Speaker, there is an increasing amount of queasiness being expressed in the media about the performance of our Ambassador to the United Nations, Mr. Andrew Young. Today, Washington Post editorialists attribute President Carter's unflinching support for Mr. Young to a presumed guilt complex.

Earlier this year, I presented to the Senate confirmation committee a network news clip in which Mr. Young was seen to state that he would probably favor the destruction of Western civilization, if he thought it would help the Third World. Since then, Mr. Young's behavior has made it clear that the attitude expressed then was highly relevant as a key to his motivations. However, the Young statement was totally ignored by the Senate committee and the media. Mr. Young was confirmed by a lopsided vote which does it little credit as a deliberative body.

The consequences of this particular folly are just beginning to descend upon us. I commend for consideration the columns of Patrick Buchanan of the Richmond Times-Dispatch, June 1, and Evans and Novak of the Washington Post, June 2, as they demonstrate the devastation wrought upon the Western position in Africa by the Communists and Ambassador Young.

### "STABILITY AND ORDER" COMING TO ETHIOPIA (By Patrick J. Buchanan)

WASHINGTON.—At Notre Dame University on Sunday, May 22, President Carter outlined a "new American foreign policy" to fit the "new world" in which we live.

"... [W]e are now free of that inordinate fear of communism which once led us to embrace any dictator who joined in our fear," the President declared. The applause was thunderous.

On Wednesday of that same week, State Department spokesman Hodding Carter III warned that if the 50 Cuban advisers arriving in Ethiopia were the vanguard of several hundred troops, this could be a "serious development." Further, the U.S. was prepared to give "careful consideration" to the request of Sudanese dictator Gaafar al-Nimri for military assistance.

The "new American foreign policy" thus lasted about 72 hours. Our "fear of communism" had convinced State that we had to snuggle closer to a Sudanese dictator who "joined in our fear."

U.N. Ambassador Andrew Young, of course, quickly exercised his perennial option to contradict publicly stated U.S. policy. In London, where he had just insulted the British for their "colonial mentality," the Russians for being "the worst racists in the world" and the Swedes as "terrible racists" who treat blacks almost as badly as the folks in Queens County, N.Y., Andy was asked if he shared State's "grave concern." No, he said, "I really don't because they're killing people right and left [in Ethiopia] and ... maybe the Cubans might be a little more rational than Ethiopians at this point."

The long-suffering Hodding Carter de-

clared, for the 32nd time, that he saw no difference between what he said and what Young had said.

Well, at least Andy is consistent. Repeatedly, he has cautioned us not to get "paranoid" like, say, Kerensky did, over a "few thousand Communists." So why should he be worried about a few dozen or a few hundred Cuban Communists in Ethiopia? Perhaps the Cuban troops can bring to that embattled country some of the same "stability and order" Andy says they brought to Angola.

Seriously, the arrival of Cuban military advisers in Ethiopia—to train the locals in the use of their new Russian armor—is a refreshing, healthy development. Like a summer breeze, it has swept away much of the rhetorical smog hovering over this capital city about the moderation of the middle-aged "new Fidel."

The royalty of U.S. journalism and the big-name politicians, wine and dined in Havana, who came home with the inside scoop about Castro's impending withdrawal from Africa, have been snookered and humiliated. The congressmen pushing for trade concessions to wean that lifelong Yankee-hater away from his alliance with the Soviets are now left with large deposits of egg on their faces. Among the happiest of moments in politics is the sound of chickens coming home to roost.

The real danger to peace and security, however, does not come from a few hundred Cubans in Addis Ababa—or the asinities of Andy Young. It is, candidly, that Brezhnev will reread President Carter's Notre Dame speech and come to the not altogether illogical conclusion that Jimmy Carter is as woolly headed on world affairs as his vice president and U.N. ambassador. That could be as dangerous as Nikita Khrushchev's assessment—based on JFK's vacillating performance during the Bay of Pigs, the Vienna summit and the Berlin crisis—that the time has arrived for a direct challenge to the United States to show the world the wave of the future.

The drivel the President uttered at Notre Dame notwithstanding, we do not live in any "new world," but the same old world of the postwar struggle between East and West. That is what Angola and Ethiopia are all about.

Having watched the U.S. abandon, in humiliating fashion, allies in Cambodia and Vietnam, the Soviets put us to the test in Angola, using Cuban proxies. The United States backed away from that challenge.

At that point, even the most timid of Soviet strategists must have argued for the military probe into Zaire, for Soviet support for the guerrillas operating out of Angola and Mozambique, for Soviet-Cuban bolstering of client states on the African continent.

If the United States is indeed careening toward a future collision with the Russians, much of the blame must rest upon President Carter for misleading the Soviets with nonsense such as that uttered at South Bend.

### COURTING AFRICA'S BLACKS

(By Rowland Evans and Robert Novak)

New evidence of how far and quickly U.S. policy in southern Africa has changed came in Vienna last month when Prime Minister John Vorster of South Africa got nowhere in an unpublicized request that Washington discourage black guerrilla activity in white-ruled Rhodesia.

According to authoritative U.S. sources, Vorster asked Vice President Mondale if the United States would "lean toward restraining" Zambia in sponsoring guerrilla raids into Rhodesia. He was turned down. Yet the United States has raised the devil with Rhodesia for launching cross-border raids.

This ought to shatter any illusions remaining in Pretoria or Washington that the Carter administration intends to take an even-handed position on racial conflict in southern Africa. The new position adamantly favors strict black-majority rule everywhere on the continent, by peaceful means if possible but through violence if necessary.

This entails moral support by the U.S. government for black guerrillas in Rhodesia, the most effective of them avowing Marxism and using an increasing supply of Soviet arms. The theory is that pro-Moscow Marxists can be won over to friendship with the United States. So, while Washington is even less color-blind than it used to be, it is now blind to ideology.

All this demolishes talk that the selection of Mondale to conduct the Vienna talks meant defeat for U.N. Ambassador Andrew Young and his policies. In truth, Mondale went to Vienna relying on Young's aides and like-minded National Security Council staffers rather than old-line Foreign Service officers. The State Department's African affairs bureau and Assistant Secretary William E. Schauffele have not really been in the policy-making picture since January.

While the South African government may not have thought Mondale any more friendly than Young, it did envision the Vice President as prepared to negotiate with Vorster. But Mondale did not deviate an inch from prepared positions; he carefully checked with his staff, or back to Washington if necessary, before responding to Vorster.

Consequently, there was never any chance for Vorster's appeal that the U.S. attempt to restrain Zambia's support for Rhodesian guerrillas. Some U.S. officials think Vorster was asking that as a condition for applying South African pressure on Rhodesia. But senior U.S. officials believe the South African was not bargaining and would not pressure the Rhodesians.

In any event, Mondale made no promise of restraint on Zambia. "We can't do it," a U.S. official explained. "It is not U.S. policy to turn off the armed struggle." One policymaker put it this way: "We recognize it is very difficult to tell these people to stop fighting."

But "these people" do not include the white Rhodesians. Although Washington does not maintain diplomatic relations with Salisbury, it has issued vigorous protests to Rhodesian officials in South Africa about raids aimed at black guerrilla bases across the border.

While clearly taking sides in Rhodesia, the United States keeps hand off the continuing civil war in Angola between the Marxist government (not even recognized by Washington) and anti-government guerrillas. The fact that Congress prevented significant U.S. help for the government in neighboring Zaire against insurgents invading from Angola is now considered providential by the administration.

The new policy thus becomes clear: support for black armed efforts to dislodge the last white minority footholds in southern Africa, and non-involvement in battles between blacks anywhere on the continent. This results in U.S. support for black Communists against white non-Communists (as in Rhodesia) instead of insistence on peaceful settlement, and neutrality in struggles between black Communists and black non-Communists (as in Angola).

The doctrinal authority cited for this policy is President Carter's declaration at Notre Dame May 23 that "we are now free of that inordinate fear of communism which once led us to embrace any dictator who joined us in our fear." Therefore, in the case of Angola, this means the enemy of our enemy is no longer our friend. But this also entails

hope that victorious armed Marxists in Africa can be induced to turn away from Moscow, as revisionists have always claimed that Ho Chi Minh and Fidel Castro would have done had they been given half a chance.

This portentous shift in policy deserves more public debate than it has been given. Certainly Young is not a loose cannon, as was widely thought a few weeks ago. Rather, his January statement over television that he feared racism much more than communism has been elevated into U.S. strategy.

## NO SINGLE MEASURE CAN MEET ALL REQUIREMENTS

**HON. MICHAEL HARRINGTON**

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. HARRINGTON. Mr. Speaker, for some time now I have been concerned with the inaccuracies of the unemployment statistics announced each month.

Recent studies have shown that these unemployment statistics are not fully accurate, and may have caused many communities with chronic high unemployment and underemployment to be shortchanged of the greater than \$30 billion in Federal formulas allocated each year on the basis of unemployment statistics.

I would like to insert an article which appeared in the Washington Star on May 25, by Lee M. Cohn, which does an excellent job of discussing these problems with Bureau of Labor Statistics Commissioner, Julius Shiskin. I hope all of my colleagues will take the time to read this illuminating piece.

The text of the article follows:

**COUNTING THE JOBLESS: EVERYBODY'S GOT A SYSTEM**

(By Lee M. Cohn)

People expect Julius Shiskin, commissioner of labor statistics, to tell them how many Americans are employed and how many are unemployed. When he tries his best to respond, they argue with him.

There are no simple answers, and no formula can precisely fit everyone's ideas about how to define and measure employment and unemployment, Shiskin says in self-defense. Consider these cases:

Bill Jones works 40 hours a week and earns \$240. Jack Smith averages only five hours weekly at odd jobs paying about \$2 an hour, and his family barely scrapes by on welfare.

The computers at Shiskin's Bureau of Labor Statistics see no difference. Jones and Smith count equally in the official estimate of 90 million employed Americans in April.

Mary Jackson, a widow supporting three children, was laid off three months ago and still is job hunting. Susan Whitaker, wife of a \$50,000-a-year executive, is bored with civic committees and wants to feel independent, so she is looking for paid work. Her son, Tim, has registered with his college employment bureau for a Saturday job to earn money to buy gas for his car.

BLS includes all three among the 6.7 million unemployed, without distinction.

Jim Dawson, a bachelor with simple needs, applied for an assembly-line job at a local factory four weeks ago and was offered a job as janitor, which he turned down. He has been taking life easy since then. Joe Jenkins

looked for work unsuccessfully for more than two months and still would like a job, but he is so discouraged that he has quit looking.

Dawson is listed as unemployed. Jenkins, by dropping out, has reduced total unemployment by one. He is classified as neither employed nor unemployed.

No one is satisfied with these results, which in some cases seem to defy common sense. Policy-makers depend on BLS figures for guidance, and fluctuations of the statistics can decide elections. If the numbers are wrong, economic policies can go astray and voters can be misled.

Conservatives object that the official statistics exaggerate the severity of joblessness and lead the government to spend too much money to boost the economy, while liberals contend that unemployment is even worse than the figures show, so the government should do more to create jobs.

Grilling Shiskin at a House Budget Committee hearing, Rep. Delbert L. Latta, R-Ohio, demanded that BLS shine a stronger spotlight on rising employment than on unemployment. "Emphasize the positive," Latta urged. "I mean in the first part, have that catch the reporter's eye. They don't like to read more than that first paragraph sometimes, they are in such a hurry."

Latta also objected to counting auto workers who receive generous unemployment benefits as jobless. Some of them in Ohio "were getting about — percent of their pay for going to Florida and they weren't in too much of a hurry to get back in the winter time to go to work," he said.

Congress has ordered the establishment of a National Commission on Employment and Unemployment Statistics to conduct an 18-month study of how to improve the data. Shiskin pushed for creation of the commission, but he wonders whether it will recommend big changes after considering the complications and pitfalls.

A similar blue-ribbon committee in 1962 ratified the basic ground rules in use then and now. Indeed, the fundamental concepts have not changed much since systematic measurement of employment and unemployment was started by the Works Progress Administration in 1940, near the end of the Great Depression.

"The subject is so complex that no single measure can meet all requirements," Shiskin says. "Maybe we need three to provide a reasonably complete picture. But try putting that in a headline. Everybody wants a single number to represent the unemployment rate."

BLS monthly and quarterly reports provide considerable detail in addition to the aggregate figures. The tables break out data according to sex, age, race, occupation and marital status, for example. There also are breakdowns between full-time and part-time employment. But the single figure on the national unemployment rate still attracts most of the attention and criticism.

Offering the critics a wide selection to satisfy their divergent needs, Shiskin now regularly publishes seven distinct unemployment rates reflecting different concepts of joblessness. He calls them U1 through U7.

In April, the official unemployment rate (U3) was 7 percent. U1 was only 1.9 percent, and the other rates ranged up to 8.6 percent for U6. U7 is available only quarterly. It was 9.9 percent in the January-March quarter, when the official rate averaged 7.4 percent.

U5 is designed to measure the tightness or looseness of the labor market as objectively as possible. It classifies all civilians outside institutions who are 16 or older in one of three slots—employed, unemployed or outside the labor force.

The Census Bureau, under contract to the BLS, obtains the data through a monthly survey of a 55,000-household sample. The

survey is conducted during the week including the 19th of the month, and the questions pertain to what members of the households were doing during the week including the 12th.

Any civilian who worked for pay, even for one hour in the week, or who was self-employed, is counted as employed. Also counted as employed are those who worked 15 hours or more in the week without pay in a business or on a farm operated by family members. Those who have jobs but are temporarily absent because of illness, vacations, bad weather or strikes also are considered employed.

Housework, painting and repair work around one's own home do not count as employment, and neither does unpaid volunteer work for religious and charitable organizations.

Persons without jobs during the survey week may or may not count as unemployed. They are officially unemployed only if they are available for work and have engaged in specific job-seeking activity some time during the preceding four weeks. Qualifying kinds of activity include registering at employment offices, placing or answering advertisements, meeting with prospective employers, sending application letters and checking with friends or relatives.

Even without job-hunting activity, a person is considered unemployed while waiting to start a new job within 30 days, or while waiting to be recalled from temporary layoff.

The civilian labor force is the total of employed and unemployed workers. The unemployment rate is the percentage of the labor force classified as unemployed.

Everyone else 16 or older is outside the labor force. That includes those who do not want jobs, and those who say they would like to work but are not looking for personal reasons or because they do not believe they could get jobs.

These definitions are attacked from the right and the left.

Many conservatives contend that it makes no sense to count among the unemployed those who quit jobs, refuse job offers, never worked before, attend school full-time, or have spouses who earn good wages. They also demand more than a perfunctory job-seeking effort once in four weeks as evidence of a real desire to work.

Whether they realize it or not, those who make this argument want to measure unemployment in terms of hardship. Shiskin offers them U1, the unemployment rate as the percentage of the labor force that has been jobless 15 weeks or longer, which is hardship by any standard. U1 was 1.9 percent last month.

U2, a somewhat broader measure of hardship, is the percentage of the labor force that has lost jobs through layoffs, firings or plant closings. It excludes those who quit jobs voluntarily, and those who are looking for jobs for the first time or are returning to the labor force after dropping out. U2 was 3.1 percent in April.

U3, which registered 4.4 percent last month, is the percentage of heads of households who are unemployed. The presumption is that unemployment is most serious when it hits breadwinners, and less of a hardship for dependents of workers who have jobs.

U4, at 6.5 percent in April, is the unemployment rate of those who want full-time jobs. Full-time workers are the core of the labor force and lose the most income when unemployed, while part-time workers usually are marginal, according to this reasoning.

The conservative emphasis on hardship aims at reducing the size of the unemployment problem. By contrast, labor leaders and many liberals contend that the official figures understate joblessness. They argue that part-time jobs should not count as much as full-time jobs in the employment

figures, and that workers who want jobs but quit looking because they believe no work is available should count as unemployed.

U6 makes adjustments for part-time work, producing an 8.6 percent unemployment rate in April, U7, which takes account of both part-time jobs and "discouraged" workers, is calculated only quarterly by BLS. It registered 9.9 percent in the January-March quarter.

The AFL-CIO issues its adaptation of U7 every month, within hours after BLS announces the official figures, and contends it is the "true" measure of unemployment. It was 9.6 percent in April.

Shisken and other experts see legitimate uses for all these unemployment barometers, if users are aware of what they are measuring.

U5 gives the clearest reading of the labor market, indicating how easy or difficult it is for workers to find jobs and for employers to hire workers. This information is essential in assessing potential inflationary pressures and judging the need for broad fiscal and monetary actions to stimulate or restrain the economy.

It is relatively objective, minimizing value judgments on hardships and relying on what people do to find jobs instead of trying to probe their attitudes.

U1 through U4 attempt to measure hardship, which is an important element of unemployment. But hardship does not necessarily indicate whether credit should be eased or tightened, or whether federal budget policy should aim for a deficit or a surplus.

If a lot of jobs are available, workers will apply for them and production will increase whether or not the workers are needy. If a worker is laid off, production will drop, even if the worker has ample savings and his wife continues to bring home pay checks.

U6 and U7 look beyond existing conditions in the labor market and try to measure the potential labor supply—how many additional workers could be hired if demand grew strongly. This can help measure the gap between actual and potential production.

But it is difficult to measure a jobless worker's desire for a job if he does not take overt action to find one. He may be willing to work only in a glamorous job, or at double the wage employers think he is worth.

Informed sources report that President Carter soon will nominate Sar A. Levitan, a leading manpower and welfare expert, as chairman of the new commission to study employment and unemployment statistics. Among other expected nominees for membership are Rudy Oswald, research director of the AFL-CIO, Jack Carlson, chief economist of the U.S. Chamber of Commerce, and Michael H. Moskow, undersecretary of labor in the Ford administration.

Levitan, director of the Center for Social Policy Studies at George Washington University, can be counted on to stir up controversy in pushing for changes in the statistics.

He says the current formulas were adequate in the depression, "when you worked or you starved," so the unemployment rate was a good measure of hardship. But now, he says, much more "sophisticated" barometers are needed to measure hardship and "underemployment."

For example, he says, an unemployed wife whose husband still has a job is a lot better off than a full-time laborer struggling to support his family on earnings below the poverty line.

Despite the highest unemployment rates since the depression in the 1974-75 recession, "there was surprisingly little public clamor over this slump—no riots, no large-scale marches on Washington, not even much rhetoric," Levitan observes.

One explanation is that unemployment compensation benefits and other government programs helped to cushion the loss of in-

come, and many laid-off workers were secondary earners in families with breadwinners who continued working, he says.

"While headlines focused on the rise in unemployment, the increase in deprivation due to low earnings was much less and this may explain the limited social unrest generated by the economic downturn," he says. "The corollary, of course, is that when unemployment recedes it should not be assumed that the real problems have been eliminated."

Since the conventional unemployment statistics "are no longer valid measures of economic and social health," Levitan has devised an experimental "Employment and Earning Inadequacy" index. This EEI index comes closer to measuring the real effects of unemployment because it takes account of family earnings and income as well as jobs, he says.

Levitan's complex formula adds "discouraged" workers and workers with earnings below the poverty level to the official total of unemployed, and subtracts full time students between the ages of 16 and 21 and persons over the age of 65. \* \* \*

#### INDIANA SADDENED BY DEATH OF "ELDY" LUNDQUIST

HON. ADAM BENJAMIN, JR.

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. BENJAMIN. Mr. Speaker, the residents of the State of Indiana, particularly those of Elkhart County, have been personally saddened by the untimely passing of Eldon F. "Eldy" Lundquist, one of our State's most selfless, effective, and personable civic and public servants for the past four decades.

His long list of achievements, dedication to his fellowman, and concern for the betterment and improvement of mankind and community will long be remembered by the Hoosiers of Indiana and his many friends across the breadth of this Nation.

Eldon F. Lundquist was born on July 16, 1915, in Elkhart County where he remained a life resident. A basketball stalwart at Elkhart High School, he later graduated from Goshen College.

In spite of his many accomplishments and talents, Eldon was best known in Elkhart County for his football and basketball play-by-play coverage on radio station WTRC from 1939 to 1968. He became the personal friend and voice for the young athletes and their parents.

In addition to broadcasting, Eldon pursued careers in the fields of banking, advertising, and health care.

Eldon was noted for his dedication to the field of education where his achievements were innumerable. In 1955, he was elected to the Elkhart School board. Following his election to the Indiana House of Representatives in 1961, he was appointed chairman of its Education Committee. In 1961, he was also appointed secretary of the Post Secondary School Education Study Committee. In 1963, Gov. Matthew E. Welsh appointed Eldon to the board of trustees of the Indiana Vocational Technical College where he later was offered the opportunity to become that institution's first president. He

refused that opportunity, as he did many later opportunities to become the president of various educational institutions, in order that he could remain with his first love beyond his family—Elkhart County. Education was obviously a close second—but always second.

After his election to the Indiana State Senate in 1964, Eldon was appointed chairman of the Senate Education Committee. He was also the chairman of the Subcommittee on Vocational Education. In 1975, he steered landmark vocational education legislation through the Indiana General Assembly.

A complete legislator in all fields, Eldon was appointed chairman of the Constitutional Revision Committee in 1968. In addition, his fellow legislators elected him to the position of assistant majority floor leader in 1969.

Eldon Lundquist's career as a State legislator covered 16 years. In February 1976, to the disappointment of his constituents and all of Indiana, Eldon announced his retirement from public office. He announced that:

The people of Elkhart County have been wonderful in their support of me over the years. I realize I cannot totally repay their generous acceptance of me, but I hope that in some small way, my efforts to serve them have indicated my great regard for them and my gratitude to them.

Yes, Eldon F. Lundquist was a civic-minded Elkhart citizen and a no-nonsense legislator. His honesty and integrity were beyond reproach. Eldon was respected by Democrats and Republicans alike. Eldon did not like long, pompous speeches, but he loved people and people loved him.

Besides his illustrious career as a broadcaster, State legislator and educator, Eldon was a member of the Elkhart Park and Recreation Board, Chamber of Commerce, Industrial Development Commission, Elks Club, Moose Club, Rotary Club, Elcona Club, and the Trinity United Methodist Church.

The late Eldon F. Lundquist, who lived to be 61 years of age, is survived by Helen, his wife of 38 years, who resides at 227 Marine Avenue in Elkhart; his mother, Nellie; his son, John; and his daughter, Jean.

Mr. Speaker, while Eldon and I were not of the same political persuasion, I deeply respected and admired his rational, acute, and sensitive approach to the solution of problems of our times. While Eldon dissuaded long and tedious oratory, he was undoubtedly the most effective and articulate speaker I have ever known. He was a "healer," and a "doer," and a man of great charm, love, and wit. More important to me, he was my friend.

I, like all Hoosiers, regret the untimely loss of Eldon who was serving as assistant president of Indiana University at the time of his passing. Eldon was an inspiration, a fighter, and a man who many of us attempted to emulate but could never equal.

It was my honor to share many legislative battles with him, as supporter at times, opponent on occasions. Besides his many legislative accomplishments in education and government reform, he will also be remembered for his

outstanding contribution to the adoption of the first omnibus medical malpractice act in the Nation. While we now mourn his passing, he passed through this life leaving all of us better persons for having been able to share some of his life. I know that our mutual friend, Congressman JOHN BRADEM, and all of our colleagues join together to extend our sympathies to Eldon's family and the State of Indiana on their loss of a truly remarkable and great American who gave much more to the dynamics of civilization than he ever received in distinction or achievement in spite of his numerous honors. Eldon F. Lundquist will never be forgotten and his deeds will live on to improve and ameliorate the conditions of future generations as they have for this one.

#### PROPOSED AGENCY NOT NEEDED

### HON. DEL CLAWSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. DEL CLAWSON. Mr. Speaker, a column in the Wall Street Journal of Thursday, May 26, calls attention to what might be termed the perpetuation of compounded failure of government which would occur if Congress approves the proposed Consumer Protection Agency. The author's logic speaks for itself and therefore the column by Mr. James G. Reynolds is inserted at this point in the RECORD for the information of my colleagues:

[From the Wall Street Journal, May 26, 1977]

#### PROPOSED AGENCY NOT NEEDED TO PROTECT CONSUMERS

(By James G. Reynolds)

Arguments against a Consumer Protection Agency have largely centered on the practical problems of implementation, i.e., how the agency would determine who is the consumer and how is he to be protected. These arguments are all well and good, but they miss the larger and more fundamental reason why Americans should oppose creation of this agency.

The express purpose of the proposed law, as announced by its sponsors, is to establish a federal agency to represent the interests of the consumer in federal agency proceedings. If the purpose is sound (it rings bells of Catch-22 to me), then the malaise is the failure of federal agencies to perform their legal and constitutional mandates.

In general, each federal agency was created for the express purpose of assuring that transactions which were to be the subject of such agency's power be conducted in the public interest to promote the greatest public justice in an area that might otherwise be subject to abuse if left in unfettered private hands.

This purpose is necessary to justify the birth of a government agency and to support its continued existence at the taxpayers' expense.

Taxpayers and consumers are identical. Tax-paying citizens are the same people who buy goods from businesses regulated by the FTC. What purchaser of securities is not already supposed to be represented by the mandate of the SEC? Is there a consumer of foods and drugs who is not now paying taxes to support a huge FDA staff whose legal duty is to regulate foods and drugs in his interest?

The FPC and the FCC are there to assure that utilities and broadcasters provide full, fair and efficient service under monopolistic conditions. For whose benefit? Consumers. Taxpayers. You and me.

From a tactical point of view it may seem logical to establish a federal agency to represent the consumer in federal agency proceedings. But philosophically, it's wrong. Maybe the agencies aren't doing their jobs. Perhaps they are influenced too much by special interests, and another system is required to channel the special interest of the consumer.

But why are taxpayers being told they need to pay for another agency just because the ones they are already paying for are not fulfilling their legal mandates, their constitutional purposes?

I suggest the people be told that another layer of government is required because the bureaucratic layer is out of control. The people should be told that our administration and our Congress do not know how to solve this problem from within the agencies. We don't know how to constitute our agencies so that they will perform their legal mandates.

The people should be advised that the purpose of this proposed agency is conceptually different from the normal management control functions of auditing and review necessary to assure continued performance by people we believe to be doing a good job right along. The purpose of the new agency is to cause (force) the responsible agency officials to do the job they are already supposed to be doing. The bill approved by the House Government Operations Committee would permit this proposed agency to sue other federal agencies.

It is inconceivable that a private organization would seek to solve a problem in one department by hiring a separate staff to force that department's employees to do their jobs properly. If a breakdown in performance were perceived to be complex or widespread, management might commission an outside group to study the situation.

And suppose this hypothetical outside group were to report that the purchasing department was overly influenced by suppliers bearing Super Bowl tickets, that the finance department was being swayed by bankers bearing low-interest personal loans, that production and engineering staffs were beset by equipment dealers offering free color TVs on the side?

No organization in possession of even half its senses would conceive of solving such a problem by hiring another permanent staff with authority to advocate the interests of the organization and force the responsible employees to do their jobs properly.

The responsible employees in purchasing, for example, know their job is to obtain high quality goods and services at the lowest cost, and to ignore suppliers bearing gifts. If a private organization were to pay people for not performing their jobs and also pay another group to force them to do their jobs, the inevitable result would be the deterioration and eventual ruin of the organization. Maintaining the organization would become too costly, and maintaining employee attitudes and spirit so necessary to continuing vitality would be impossible in light of management's acquiescence to large-scale non-performance.

Federal agencies are no different. Responsible agency employees know their jobs and their duties. The administration and the Congress, through existing offices and monitoring committees, should force the agencies to perform their duties in the first instance through proper budgeting, auditing, performance standards review and by firing people who are not doing their jobs properly.

Or have the federal agencies become so large, cumbersome and otherwise entrenched that we have several very expensive, uncontrollable monsters on our hands? Are matters so irreversible that what we really need for

effective control is a regulatory advocacy agency to regulate the regulators? And in due time, who regulates the regulatory advocacy agency?

The Consumer Protection Agency is wrong, not so much for what it would try to do, but because it admits to an incurable state of affairs within our government. We cannot as a nation afford to support a government that cannot control itself.

#### "INSTANT" VOTER REGISTRATION

### HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. LAGOMARSINO, Mr. Speaker, the President's proposal for "instant" voter registration is now working its way through the House and, I understand, is scheduled to come to the floor sometime later in June. I strongly oppose this ill-conceived and politically motivated legislation, as you well know.

At this point I would like to bring to the attention of my colleagues an excellent article which appeared in the Ventura County Star Free Press, which expresses the apprehension of the Ventura County Clerk-Recorder Robert L. Hamm concerning the "instant" voter registration bill and its probable impact on the county. I insert the article at this point: [From the Ventura County (Calif.) Star Free Press, May 22, 1977]

#### HAMM WARNS OF HIGH COST OF CARTER REGISTRATION PLAN

By Carol Bidwell

President Jimmy Carter's proposal to let voters register through election day may increase the turnout 10 to 20 per cent, but it would be sure to cost local government a lot of extra money, says Ventura County Clerk-Recorder Robert L. Hamm.

He is clearly skeptical that the extra turnout would be worth the trouble.

These days Hamm is trying to estimate exactly how much the proposed change in voter registration could cost the county so county supervisors and budgeters will know how much to set aside for future elections if Congress approves Carter's proposal.

Hamm said he will go before supervisors with a detailed report within two weeks. That report, he said, will include "a recommendation that the board take some strong action" to press Congress to finance 100 per cent of the costs of the new system, rather than shoving the costs off onto local agencies.

The future of the election-day registration proposal is somewhat in doubt, with different versions slowly progressing through the Senate and the House of Representatives, but Democrats—who claim a historical advantage when more people go to the polls—seem bent on pushing some form of the legislation through in the current session of Congress, say political observers.

Thursday, however, the House postponed action on Carter's bill until June. Some Democratic congressmen told Carter the measure faces stiff opposition.

How well such a new system would work—and how much it would cost—would depend largely not on voters or election officials, but on lawyers and state and federal government officials who would interpret the new law and set up guidelines for local agencies and election officials to follow.

Hamm and some congressional leaders have forecast "a great potential for fraud" unless strict controls were laid down for election-

day registrants to identify themselves, making sure a person didn't vote more than once simply by visiting another polling place and giving a name and address different from his own.

Carter's proposal doesn't specify what sort of identification would be required at the polls, but Hamm said two forms of identification should be required: Personal identification with a physical description and a photo on it, such as a driver's license, and residence identification, such as a recent rent or utility bill receipt.

Hamm wants it made clear that the proposed new system would not do away with pre-registration, which would still be encouraged. And, he said, special care would have to be taken so a long line of people waiting at the polls to register on election day didn't discourage a pre-registered voter who didn't want to wait in line behind "a lot of jugheads" who waited until the last minute.

On election day, Hamm said, election workers would have to provide two lines, one for pre-registered voters and one for election-day registrants, for whom the process would take longer.

"The purpose of this legislation is to turn people on to voting," Hamm said. "We don't want to do anything on election day to turn them off."

There's a potential for local agencies to receive as much as 60 cents from the federal government or each voter who casts ballots at the last state, local and federal elections to go toward defraying the cost of the new system.

By its voting history, Ventura County could receive as much as \$102,000 to help pay for the changeover. But Hamm said that's only a drop in the bucket compared to what he expects it to cost the county.

What would boost those costs?

Provisions in the two versions of the new legislation and in proposed follow-up legislation, he said, would require that sample ballot materials, candidates' statements and other voter information be mailed to every home in the county. Later, each resident would receive a notice of the location of his polling place—in case the person decided to vote.

Each polling place would have to be provided with not only its own precinct list, but with the lists of voters in five surrounding precincts so election workers could tell somebody who showed up at the wrong place where the right place is for them to vote, Hamm said.

Carter's proposal does not apply to party primaries, but a law bringing primaries under the same election-day registration blanket has already been proposed. If that happens, Hamm predicted it would be nearly impossible to know how many ballots the county would have to print for Democrats, Republicans, Peace and Freedom and American Independent parties' voters.

He predicted that besides being expensive, the change would be "bad for the parties," who rely on knowing well in advance how many voters they can count on on election day.

There are many more questions and problems involving who's qualified to vote and who's not, so more "roving" elections inspectors would have to be hired to smooth out these situations, he said.

"We're talking about nothing but money," Hamm said.

Does he think the aim of the new system—to bring many more indifferent voters out of their homes on election day—would be met?

"It's not likely"

Few voters bother to cast ballots now—only 53.3 per cent of those registered in the county voted in the 1976 presidential election—"because those of us in government

have made them mad. It's my sincere belief that government has lost rapport with the taxpaying voters," Hamm says.

He blamed increasing government costs, increasing taxes and generally unresponsive government for the turnout.

"When was the last time we asked the electorate what we could do for them?" Hamm asked. "We say, 'The public is demanding more service.' I don't see the public demanding anything, except lower taxes . . . Some have said this (change in voter registration) is because the public is demanding it. The public didn't demand it. It's Jimmy Carter's idea."

How many more voters are likely to show up at the polls on election day, knowing that they can register and vote at the same time?

"At best, a 20 per cent increase . . . probably closer to 10 per cent," Hamm said. "It appears to me that we will pay half as much again per voter for a 10 to 20 per cent increase in voters on election day . . . We have to ask, how much is this going to cost us and how much are we going to get from it—and is it worth it?"

## PROPOSED NATURAL GAS LEGISLATION QUESTIONED

HON. JOHN E. MOSS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 2, 1977

Mr. MOSS. Mr. Speaker, President Carter's proposed energy plan appropriately takes full cognizance of the need to make a major reappraisal of our Nation's energy needs. The President correctly says Americans waste too much fuel and must conserve.

There are, however, serious questions which should be raised about several provisions in the proposed legislation, especially those related to natural gas pricing. A very astute analysis of those pricing measures were recently provided in testimony from the director of the Energy Action Committee before the House Commerce Subcommittee on Energy and Power, chaired by my friend and colleague, JOHN D. DINGELL.

I believe the comments of Mr. James F. Flug deserve the close attention of all my colleagues in Congress. Therefore the testimony about the natural gas pricing measures follow:

TESTIMONY OF JAMES F. FLUG, DIRECTOR AND COUNSEL, ENERGY ACTION COMMITTEE, ON THE NATURAL GAS PRICING PROVISIONS OF THE NATIONAL ENERGY ACT

Mr. Chairman: Deregulation by any other name smells just as bad, and I submit that the natural gas pricing provisions of the "National Energy Act" are the moral equivalent of deregulation.

From his January, 1976 statement in support of "legal restrictions to allow a 'reasonable profit' on oil and natural gas", to his January, 1977 assurance of a "prohibition against excessive or windfall profits from energy costs at the expense of the consumer", to his April 18 promise that "no one will gain an unfair advantage" or "profiteer" from his Energy Plan, and right up to his April 20 admission that fuel price decontrol "would be disastrous for our economy and for working Americans, and would not solve long range problems of dwindling supplies", Jimmy Carter gave the American people hope that whatever he did on natural gas prices,

the result would be fair and equitable, spreading burdens and sacrifices evenly throughout society.

Unfortunately the reality has not matched the rhetoric. The proposal to set the price of natural gas at the "equivalent energy value" of U.S. crude oil, beginning at \$1.75 per thousand cubic feet, is a betrayal of the public interest and a multi-billion dollar boon to the oil and gas industry. It is precisely what President Carter's "Energy Plan" said he wanted to avoid: "an inequitable transfer of income from the American people to the producers, whose profits would be excessive and would bear little relation to actual economic conditions".

Perhaps we have become so numb that \$1.75 for a thousand or anything doesn't sound like much. But \$1.75 for a thousand cubic feet of gas is a huge amount. It is:

Ten times what producers were getting for gas a decade ago; 6½ times the 26¢ price agreed to by producers in 1970 as an "incentive" price to bring forth "additional supplies" and "meet the demands" of consumers; almost 3½ times the last court-approved "just and reasonable" rate of 52¢; almost 3 times the 60¢ range which the FPC staff has said would produce ample returns and incentives; well above the levels in recent years of the uncontrolled (President Carter properly called them "exorbitant") intrastate gas prices; and about 25% over the \$1.42 price through which the Nixon-Ford FPC attempted to deregulate administratively, a price which the courts are likely to overturn as unsupported under the "just and reasonable" standard.

Let me focus for a minute on the \$1.42 price, because the "Energy Plan," and most of the media, treats it as some sort of credible base case against which future developments can be measured. In fact, however, that price merely represents the personal opinion of three men:

Appointed by Presidents committed to giving the industry unlimited profits;

Themselves opposed to the process of price controls they were responsible for enforcing; and

With backgrounds and political sponsorship reflective of the oil and gas producers' viewpoint.

For policy purposes, you and we are just as entitled to accept as a base case, the opinion of the experts in the FPC Office of Economics which recommended a 56¢ price, or the 61¢ price found adequate by the FPC Bureau of Natural Gas, or the view of the dissenting Commissioner, who found the \$1.42 price "excessive" and unsupported:

We are certainly entitled to exclude from our own calculations the 40¢ of income tax, calculated at the highest rates which the FPC assumed—without evidence and despite history to the contrary—that the producers would pay.

We are certainly entitled not to accept calculations based on industry production, cost, and reserves figures that have repeatedly proved unreliable and that appear on their face to reflect political and legal circumstances rather than physical facts.

And we are certainly entitled to look at cost figures developed by other impartial observers, like the recent Oklahoma study which spoke of actual costs of producing gas in 1976 in the range of 35¢, 44½¢, and 60¢ (the latter allegedly up from 17¢ in 1973).

The fact is that the nation has been operating under an irrational regulatory scheme for natural gas, with two fatal flaws:

1. The combination of an uncontrolled intrastate market and a controlled national market for the same product has unavoidably led to minimal production for the controlled market and maximum production for the uncontrolled market. This factor alone is responsible for a major portion of the sup-

ply problems in non-producing states, as this committee is well aware;

2. The expectation—and fact—of continued sharp rises in regulated price, and the expectation—and hope—of eventual deregulation, has made withholding gas more profitable than selling gas.

To remedy the first flaw we have to bring the interstate and intrastate prices together. We can do so either by bringing the national prices up to the uncontrolled levels of the intrastate market, giving all production the benefit of the fantastic windfalls which intrastate producers have been receiving for the past few years, or we can bring the "exorbitant" intrastate price down to a "just and reasonable" national level.

The proposal before you clearly reflects the industry's approach of raising the regulated interstate price to the unregulated intrastate levels, something this Committee and this House have protected the American people from in the past. Anyone who has any doubt that this proposal takes the deregulation route need only look at the FPC's own statistics on intrastate prices. The weighted average of new intrastate contract sales of producers reporting to the FPC has never reached the \$1.75 level until the crisis winter of '76-'77, and even then many sales and contract renegotiations, in many places, were at much lower prices, including prices under \$1.

The fact that the highest price for intrastate gas sales in Oklahoma as of January was \$1.68, and the fact that New Mexico recently set \$1.44 as the state-imposed cap on its local sales of local gas gives additional evidence that the \$1.75 price is truly a deregulated price.

Moreover, as this Committee well knows, the reported intrastate prices are themselves artificially inflated not only by the aberrational spot-type emergency sales, but also by what the FPC euphemistically calls "sales between affiliated companies," or what most of us would call phony pricing or price fixing. You have had evidence of this phenomenon in the past, and now there is a brand new, startling set of disclosures in the Oklahoma legislative investigation of gas pricing in that state. I hope each of you will read it so that you can judge for yourself its objectivity and dispassionate approach. But I will say that if a \$1.68 price can only be reached by that kind of self-dealing, connivance, and flim-flam, then the nation has no business whatsoever one-upping the price fixers by imposing a national price level of \$1.75.

It's hard to think of anything worse than the \$1.75 price itself, but the means of calculating that price, and determining its future course is worse. Tying the gas price to the price of U.S. crude oil immediately, of course, builds into the gas price a heavy dose of the OPEC oil windfall which is already well reflected in the price of U.S. crude. But if the oil pricing system suggested by President Carter is adopted, then the oil price on which the gas is based must move upward much faster than inflation, and thus so will the price of natural gas. That is, while each of the three tiers of oil will ultimately be limited to price rises equal to the annual inflation rate, in the next three years "new" oil will move up faster than that as it rises to world price levels, and the proportion of "new" oil in the U.S. mix will also rise each year, so that the overall U.S. crude price, and

with it the gas price, will keep rising sharply, and much faster than the general inflation rate.

Thus instead of removing the second major flaw in the current system, the incentive to withhold in anticipation of rapidly rising future prices, the current proposal would build in that expectation and thus assure future withholding and continuing supply problems. In other words, while the price level in any one year would be wildly beyond the most generous notions of "incentive" prices, the predictability of even higher prices in coming years would provide a disincentive to current production and a strong economic justification for placing available reserves in inventory.

Of course the whole notion that the oil and gas industry needs additional "incentives" to produce is a joke. We know that we don't know the whole story about oil and gas costs and profits, because the industry has been notoriously unwilling to share its data with either the government or the public, despite its continuous pleas for every kind of help based on assertions about that data. But we know enough to know that the industry has done very well under the recent pricing arrangements.

The top oil and gas companies increased their profits by over 100% from 1972, the last pre-embargo year to 1975.

Mobil alone increased its profits on U.S. energy operations from \$171 million in 1975, to \$430 million in 1976, and after spending about a billion dollars on Montgomery Ward and Container Corp., is now offering a third of a billion for the Irvine Ranch.

Standard Oil of California increased U.S. earnings from \$240 million in 1975 to \$461 million in 1976.

Exxon admits to a 25% return on capital in 1975 and a 20% return in 1976 for U.S. exploration and production operations, and showed an increase in U.S. oil and gas earnings of \$38 million despite a decrease in production of both gas and oil.

Similarly, Phillips Petroleum showed a \$350 million increase in revenues, and a \$60 million rise in earnings on U.S. oil and gas operations despite a reduction in U.S. oil and gas production.

And I submit for your enjoyment and the record the cover of this year's Tenneco Offshore Company Inc. Annual Report which can only be described as an open celebration of the FPC's recent gift to the industry.

In fact what Mobil's Annual Report describes modestly as "some improvement in natural gas prices", has already produced such a windfall to the companies that it is entirely likely that their cutbacks in production reflect a fear that level or rising production rates at the rapidly increasing prices of the last 10 years would have shown such a gross excess of profits, even by oil industry standards, as to bring not only horizontal and vertical divestiture, but also a sharp rise in the already strong public sentiment in favor of still more severe government action.

Because we know that we do not know all the facts, we cannot accept industry claims about "hardships", "insufficient capital", and "inadequate incentives", especially when the known facts are to the contrary. President Carter has called for a detailed Petroleum Industry Reporting System, and once we see the detailed facts which that system will presumably generate, then

we can decide whether the "just and reasonable" rate system is really inadequate—or perhaps over-adequate—to produce the cash flow legitimately required for continued investment in gas production. In the meanwhile we should consider the revenue and profit implications of the plan which the White House has put forth.

Any projections are necessarily speculative, but the attached computations are a first attempt at calculating the windfall inherent in the \$1.75 "new gas" price, the allowances of interstate rollovers at \$1.42 and intrastate rollovers at a \$1.75, and the locking in of the FPC Opinion 770 rates on the last two biennia. The projection is extremely conservative in that it calculates the rollover windfalls from the respective average prices rather than the actual prices of the rollover production, which would be a significantly lower base. It also assumes that the windfall factor would be constant over time, when in fact the windfall will accelerate as the gas price moves upward ahead of the inflation rate because of the oil equivalency factor discussed above. The two assumptions for "new gas" volumes are based (I) on President Carter's past assertions of a 5% rate, and (II) on projections based on the AGA estimate to Mr. Schlesinger of 5.5 trillion cubic feet of new gas by 1980. Obviously the assumptions of these figures differ substantially from those of the proposed system, but since there is no limit on the amount of "new gas," and since the aim of the program is to stimulate as much "new gas" production as possible, these figures, too, are likely to be conservative. The detailed bases of the calculations as well as further revisions as we refine the projections will be submitted to the committee.

Based on these preliminary calculations, however, it appears that the windfall factor, that is, excess profits generated by the pricing system, without any basis in increased cost or risk, will amount to:

*Preliminary estimate of total producer windfalls under natural gas provisions of energy plan*

| [In billions of dollars] |       |       |  |
|--------------------------|-------|-------|--|
|                          | Low   | High  |  |
| 1978                     | \$4.5 | \$4.9 |  |
| 1979                     | 7.5   | 8.3   |  |
| 1980                     | 10.2  | 11.4  |  |
| 1981                     | 12.6  | 14.1  |  |
| 1982                     | 14.7  | 16.5  |  |
| 1983                     | 16.5  | 18.6  |  |
| 1984                     | 18.0  | 20.4  |  |
| 1985                     | 19.2  | 21.9  |  |
| 1986                     | 20.2  | 23.2  |  |
| 1987                     | 21.1  | 24.4  |  |
| Total                    | 144.5 | 163.7 |  |

I want to emphasize that these are very rough estimates. I welcome and encourage the committee, the industry, and especially the administration to set forth different assumptions and derive different totals. But I assure you of one fact: As long as the base case is some realistic notion of actual current and prospective cost plus a reasonable return, the windfalls under the proposed pricing system will be in the tens of billions of dollars over the period of the plan.

The American people cannot be asked to sacrifice when the oil and gas industry is going to be given that kind of unearned bonus.

## HOUSE OF REPRESENTATIVES—Friday, June 3, 1977

The House met at 10 o'clock a.m.

Reverend Mr. Charles A. Mallon, permanent deacon, St. Matthias Church, Lanham, Md., offered the following prayer:

*And if My people, upon whom My name has been pronounced, humble themselves and pray, and seek My presence and turn from their evil ways, I will hear them from heaven and pardon*

*their sins and revive their land.—II Chronicles 7: 14.*

Father, we Your people, come before You with proud hearts yet seeking Your presence. Give us the grace to humble

ourselves. We are a nation in pursuit of happiness. We have been weakened by the allurements of world, flesh, and devil. Father help us to turn from our evil that we might find strength in doing Your will.

Hear our prayer and heal our land. Allow no abuse of freedom or liberty to prevail. Allow justice to rule our land, and allow faith, hope, and love to deliver us into Your hands. We ask this through Christ our Lord. Amen.

#### THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

#### THE \$16 MILLION REMODELING PROJECT OF OLD POST OFFICE BUILDING A GRANDIOSE SCHEME

(Mr. HIGHTOWER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HIGHTOWER. Mr. Speaker, I was astounded to read in this morning's Washington Post that the recently authorized Pennsylvania Avenue redevelopment, which was approved by Congress, is going to be kicked off with a \$16 million remodeling project to convert the beautiful Old Post Office Building into a "bridge between the local city and the Federal Capitol." The grandiose scheme, according to the news story, provides for a glassed-over courtyard with shops and restaurant in the basement, first, and mezzanine floors. There would be an "arched corridor/balconies serving as streets in the sky." The beautiful old landmark clock tower would become an observation platform, complete with a glass elevator. This is not all. There are other "innovative ideas." They even plan to cut a 100- by 150-foot hole in the main floor and install a baroque staircase—and perhaps an escalator—into the basement floor. It appears that there will be no end of grand and expensive ideas for gilding this lily.

Mr. Speaker, if this is a good example of what we can expect from the Pennsylvania Avenue Development Corporation, I hope that the Appropriations Committee will take a real hard look at spending any more money on this project. I hope these same imaginative innovators are not turned loose on the old Smithsonian Buildings or the Washington Monument. If the plans are to spend \$16 million redoing the Old Post Office Building the Secretary of Treasury is not going to be able to float enough bonds to do the whole job on the avenue.

I hope that the architects will go back to the drawing board and come up with a plan for Pennsylvania Avenue that can make it the grand boulevard envisioned by President Kennedy, by preserving the best of the old and building new buildings that will meet the realistic needs of the people that they will be planned to serve.

#### COMPREHENSIVE EMPLOYMENT AND TRAINING ACT AMENDMENTS OF 1977

Mr. HAWKINS. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H.R. 2992) to authorize appropriations for fiscal year 1978 for carrying out the Comprehensive Employment and Training Act of 1973, as amended, with a Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Strike out all after the enacting clause and insert:

#### SHORT TITLE

SECTION 1. This Act may be cited as the "Comprehensive Employment and Training Act Amendments of 1977".

#### AUTHORIZATION FOR FISCAL YEAR 1978

SEC. 2. (a) Section 4(a) of the Comprehensive Employment and Training Act of 1973, as amended, is amended by striking out "three succeeding fiscal years" and inserting in lieu thereof "four succeeding fiscal years".

(b) Section 601 of such Act is amended by inserting after "fiscal year 1977" the words "and for fiscal year 1978".

(c) Section 607(a) of such Act is amended by inserting after "fiscal year 1977" the words "and fiscal year 1978", and by inserting the word "each" before "such fiscal year" both places such language appears therein.

The SPEAKER. Is there objection to the request of the gentleman from California?

Mr. BAUMAN. Mr. Speaker, reserving the right to object, I wonder if the gentleman from California (Mr. HAWKINS) would give us an explanation of the Senate amendment and his reason for making this request.

Mr. HAWKINS. Mr. Speaker, on March 29 the House passed this bill, which is a simple extension of the Comprehensive Employment and Training Act of 1977 for 1 year, the idea being that the House felt, upon a recommendation of the Committee on Education and Labor, that we should not enact any amendments until we had a chance to review the program.

The other body, in acting on it, did make some recommendations. The committee made recommendations, but the Senate itself as a body concurred in the position taken by the House, that there should be no further amendments, with one exception: A very technical amendment which was to maintain the status quo with respect to eligibility of those who would fill positions by attrition. This was exactly the position of the House. It is a very technical amendment.

Mr. Speaker, other than that, this is a simple extension.

Mr. BAUMAN. For 1 year only?

Mr. HAWKINS. For 1 year only.

Mr. Speaker, on March 29, the House passed H.R. 2992 authorizing appropriations for CETA for fiscal year 1978. It was the judgment of the Education and Labor Committee and the House that substantive amendments to CETA should be deferred until the committee had the opportunity to review in detail the administration of the current law and make

recommendations for extensive revisions of this act.

I am pleased to note that the Senate-passed extension of CETA follows this approach as well. The Senate deferred consideration of several amendments to the CETA extension adopted in committee by adopting these amendments as modifications of the youth employment bill. In this manner, it is possible to separate the simple extension of CETA programs from the more substantive differences between the House and Senate versions of the youth employment bill.

The Senate passed the simple CETA extension bill on May 25, 1977, with one technical amendment. The majority and minority sides and the administration have no difficulty with this amendment.

The Senate amendment extends for an additional fiscal year the provisions of section 607(a) which provides for sustaining the number of public service job slots in existence on June 30, 1976. This "holdharmless" provision mandates that prime sponsors must maintain the 310,000 public service job slots in existence since that date.

Other sections of title VI explain the manner in which new and additional job slots will be filled and the manner in which vacancies resulting from attrition will be filled.

At present, section 607(a) refers only to fiscal year 1977. The Senate amendment is required to extend these provisions through fiscal year 1978 thus protecting the present number of job slots and extending the prime sponsors' present options as to what criteria are followed to fill the slots.

I am aware of no opposition to the Senate amendment and urge that we concur.

Mr. Speaker, I include a letter from the Department of Labor, as follows:

U.S. DEPARTMENT OF LABOR,  
Washington, June 2, 1977.

HON. AUGUSTUS F. HAWKINS,  
Chairman, Subcommittee on Employment Opportunities, Committee on Education and Labor, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: This letter is in response to your request for the Department of Labor's views on amendments made by the Senate Human Resources Committee to H.R. 2992, the "Comprehensive Employment and Training Act of 1977." With one exception these provisions passed the Senate as part of S. 1242, the "Youth Employment and Training Act of 1977", rather than as part H.R. 2992.

In passing H.R. 2992, the Senate included, in addition to the one year extension of CETA, a provision to extend for one year the requirement that the number of title II and title VI job holders who do not have to meet the priority eligibility standards remain sustained at the current level. The Department supports such a provision; it will prevent individuals already in CETA jobs from becoming ineligible at the start of fiscal year 1978.

The other three amendments which the Senate Human Resources Committee had originally attached to H.R. 2992, were passed by the Senate as part of S. 1242. These are: (1) a waiver of section 4(e) of CETA (which limits the percentage of CETA appropriations that can be spent for titles III and IV to 20 percent) for fiscal years 1977 and 1978; (2) a provision aimed at increasing the participation in CETA of disabled veterans and Vietnam-era veterans under 27 years of

age; and (3) a provision requiring applicants to give special consideration to unemployed persons with prior teaching experience in filling teaching positions funded under titles II and VI of CETA in elementary and secondary schools.

The waiver of section 4(e) is a necessary part of the President's program to aid youth and provide for other needed employment programs in his economic stimulus plan. Despite the creation of a new title VIII for youth in S. 1242, the President's program for youth, which includes expansion of the Job Corps under title IV, will violate section 4(e) in fiscal years 1977 and 1978 unless the waiver is adopted. We believe that it is essential to provide this additional employment and training in 1977 and 1978. Thus it is imperative that the House-Senate conference adopt this waiver.

Both the Department and the Administration have been greatly concerned about the problems veterans have faced in obtaining employment. We feel these men and women, who have contributed so much to this nation, should not have to experience continuing unemployment. We are taking extensive steps to remedy the current situation. A key part of this program is the increased participation of veterans in public service employment programs and job training under CETA. We feel such an amendment is essential and urge its adoption in the House-Senate conference.

With respect to the provision on teachers, we do not believe the provision is necessary. The Office of Management and Budget advises that there is no objection to the submission of this report from the standpoint of the Administration's program.

Sincerely,

RAY MARSHALL,  
Secretary of Labor.

Mr. BAUMAN. Mr. Speaker, I thank the gentleman from California for his explanation, and I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from California?

Mr. QUIE. Mr. Speaker, reserving the right to object, I wish to engage in a colloquy with the gentleman from California (Mr. HAWKINS).

The Senate amendment, as I understand it, simply extends for 1978 the same provisions that existed in 1977; is that correct?

Mr. HAWKINS. Mr. Speaker, if the gentleman will yield, that is correct, with the exception of the addition of one technical amendment which I have already discussed.

Mr. QUIE. Yes.

Mr. HAWKINS. I think the gentleman is familiar with that amendment.

Mr. QUIE. Yes. But that technical amendment also continues for 1978 what exists in 1977; is that correct?

Mr. HAWKINS. It will extend for 1 year only the present eligibility requirement which we had agreed to last year in conference.

Mr. QUIE. And under that provision the prime sponsor will continue the number of slots? The prime sponsors must continue the number of slots for public service employment that they had as of June 30, 1976?

Mr. HAWKINS. The gentleman is correct.

Mr. QUIE. But prime sponsors do not have to keep those individuals who are

presently on public service employment, just the number of slots.

Mr. HAWKINS. That is right, except that this protects those who are now filling positions. Those who are now filling positions will not have to meet the new requirements.

Mr. QUIE. Presently employed individuals will not have to meet the new requirements, but the prime sponsor does not have to keep them either, does he?

Mr. HAWKINS. That is correct.

Mr. QUIE. And prime sponsors are mandated that any new positions be under the new regulations we adopted last year, and 50 percent of the attrition is under the regulations that we adopted last year, and that will continue; is that correct?

Mr. HAWKINS. That is right.

Mr. Speaker, in further elaboration, may I read again a paragraph from a letter from the Department of Labor over the signature of the Secretary of Labor, because I believe that it would be relevant to this discussion to quote from his letter.

He says the following:

In passing H.R. 2992, the Senate included, in addition to the one year extension of CETA, a provision to extend for one year the requirement that the number of title II and title VI job holders who do not have to meet the priority eligibility standards remain sustained at the current level. The Department supports such a provision; it will prevent individuals already in CETA jobs from becoming ineligible at the start of fiscal year 1978.

Mr. QUIE. And for the other 50-percent attrition, the prime sponsor may use the old regulation, meaning 15 days; is that correct?

Mr. HAWKINS. That is correct, and that was the original House position.

Mr. QUIE. However, if he does desire to do so, he can go to the new regulations with respect to that 50 percent?

Mr. HAWKINS. That is my understanding.

Mr. QUIE. Mr. Speaker, before this House agrees to accepting the Senate language on H.R. 2992, the CETA extension, it is important that the House clarify precisely what this language means, and place it in historical perspective.

The only requirement for eligibility for a public service job under the original title VI program, passed in 1974, was that a person be unemployed 15 days or more. Unfortunately, under this provision localities were able to liberally substitute Federal for local dollars and failed to hire those most in need. Accordingly, last session we enacted Public Law 94-444 which required prime sponsors to hire the long-term unemployed. These changes strictly limited the new title VI jobs to those most in need. Specifically, these included those who are unemployed 15 weeks or more, and are not eligible for unemployment insurance; who are receiving unemployment assistance for at least 15 weeks; are welfare recipients and, in all cases, are not from a family whose income exceeds 70 percent of the low-income standard.

Despite these changes, the Congress did

not want to force prime sponsors to fire all those who had been hired under the old criteria and were still employed. Therefore, section 607(a) of Public Law 94-444 allowed prime sponsors to continue the number of jobholders which were employed as of June 30, 1976, except that when any attrition occurred prime sponsors were required to hire no less than 50 percent under the new criteria and no more than 50 percent under the old. Prime sponsors have always had the option to hire all replacements using the new criteria, and, further, to replace any existing jobholder with an individual meeting the new requirements if they so desired. Only the job slots are protected. There is nothing in the law that requires prime sponsors to continue those very individuals who were on board as of June 30, 1976, and there is nothing in the law that prohibits prime sponsors from replacing these individuals with new eligibles.

Thus, existing law provides prime sponsors with the following options:

First. It allows prime sponsors to sustain the number of existing job slots as of June 30, 1976, using the old criteria, provided that no attrition has occurred;

Second. If there has been attrition, prime sponsors may rehire up to half the replacements using the old criteria. However, they have the option of rehiring all new replacements using the new criteria;

Third. Prime sponsors may replace all those hired on June 30, 1976, with those meeting the new criteria, and

Fourth. The Senate language does nothing to alter the prime sponsors' options. All it does is allow prime sponsors to continue to exercise these options through fiscal year 1978.

It is with this understanding that I support H.R. 2992 as amended by the Senate.

Mr. HAWKINS. Mr. Speaker, the colloquy we just had I think explains the bill unless there are further inquiries.

Mr. QUIE. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

A motion to reconsider was laid on the table.

#### DEPARTMENT OF ENERGY ORGANIZATION ACT

Mr. BROOKS. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 6804) to establish a Department of Energy in the executive branch by the reorganization of energy functions within the Federal Government in order to secure effective management to assure a coordinated national energy policy, and for other purposes.

The SPEAKER. The question is on the motion offered by the gentleman from Texas (Mr. Brooks).

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. MONTGOMERY. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 313, nays 0, not voting 120, as follows:

## IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill H.R. 6804, with Mr. NEDZI in the chair.

The CHAIRMAN. When the Committee rose on Thursday, June 2, 1977, title V had been considered as having been read and open to amendment at any point.

Are there further amendments to title V?

## AMENDMENT OFFERED BY MR. ECKHARDT

Mr. ECKHARDT. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ECKHARDT: Insert the following new section to Title V:

SEC. 504(a) If upon investigation, the Secretary or his authorized representative believes that a person has violated any regulation, rule, or order promulgated pursuant to the Emergency Petroleum Allocation Act, he may issue a remedial order to the person.

Each remedial order shall be in writing and shall describe with particularity the nature of the violation, including a reference to the provision of the rule, regulation, or order alleged to have been violated. For purposes of this section "person" includes any individual, association, company, corporation, partnership, or other entity however organized.

(b) If within thirty days from the receipt of the remedial order issued by the Secretary, the person fails to notify the Secretary that he intends to contest the remedial order, the remedial order shall become effective and shall be deemed a final order of the Secretary and not subject to review by any court or agency.

(c) If within thirty days from the receipt of the remedial order issued by the Secretary, the person notifies the Secretary that he intends to contest a remedial order issued under subsection (a) of this section, the Secretary shall immediately advise the Economic Regulatory Administration of such notification. Upon such notice, the Administrator shall stay the effect of the remedial order except where he finds the public interest requires immediate compliance with such remedial order. The Administrator shall, upon request, afford an opportunity for a hearing, including the submission of briefs, evidence (oral or documentary) and oral arguments. To the extent that the Administrator in his discretion determines such is required for a full and true disclosure of the facts, he shall afford the right of cross examination. The Administrator shall thereafter issue an order, based on findings of fact, affirming, modifying, or vacating the Secretary's remedial order, or directing other appropriate relief, and such order shall, for the purpose of judicial review, constitute final agency action.

(d) The Secretary may set reasonable time limits for the Administration to complete action on a proceeding referred to it pursuant to this section.

(e) Nothing in this section shall be construed to affect any procedural action taken by the Secretary prior to or incident to initial issuance of a remedial order which is the subject of the hearing provided herein, but such procedures shall be reviewable in the hearing.

Mr. ECKHARDT (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. ECKHARDT. Mr. Chairman, when the Congress passed the bill establishing the program that we are dealing with here, it adopted the procedural provisions of the Economic Stabilization Act, which had been adopted in 1970 and which was thought at that time to require rather preemptory procedures respecting agency action. Of course, a great deal of time has passed since then; yet there is no procedure by which a person ordered to comply with a rule or regulation by a remedial order can get a hearing before the agency. It cannot get a hearing now before the FEA and under this bill there is no procedure for a hearing before the Department.

What this would do is give a person against whom remedial order is issued a right to a hearing before the agency.

I think it merely affords minimal due process. It affords a little bit less opportunity for a full adjudicatory type hearing than is afforded by the Administra-

tive Procedure Act; but it gives the right to a person to be confronted by the agency's evidence on the other side.

Mr. CHARLES WILSON of Texas. Mr. Chairman, will the gentleman yield?

Mr. ECKHARDT. I yield to the gentleman from Texas.

Mr. CHARLES WILSON of Texas. Mr. Chairman, would this amendment not provide the same procedural recourse we have in all the other regulatory agencies?

Mr. ECKHARDT. Yes, generally so. We do not grant quite as many procedural safeguards to the person subjected to agency action as does sections 554 and 556 of the Administrative Procedure Act; but it does give the right to a person to have an oral hearing, gives him an opportunity to contest the agency position and gives him a record on which a court may ultimately determine whether the agency decision was based substantially on the record as a whole. No such procedures are now provided.

Mr. HORTON. Mr. Chairman, will the gentleman yield?

Mr. ECKHARDT. I yield to the gentleman from New York.

Mr. HORTON. Mr. Chairman, we have gone over the amendment. It is acceptable and we will accept the amendment.

Mr. BROWN of Ohio. Mr. Chairman, will the gentleman yield?

Mr. ECKHARDT. I yield to the gentleman from Ohio.

Mr. BROWN of Ohio. Mr. Chairman, I wish to congratulate the gentleman from Texas for offering this amendment, because it resolves a problem of FEA procedures, which were originally established at the time of the oil embargo and which will not, as originally established, protect the interested persons as they should be. It may have been entered at the time of the embargo, but now we are moving along rapidly.

Now, we are setting up a time on a permanent basis. It seems to me that it is very important to have a sound, prudent, regular administrative procedure. The gentleman's amendment ideally does that. One of the things we have been observing over the last few months is that small independent producers who are challenged by the FEA just simply have to abandon their cases and accept the FEA ruling because they do not have the wherewithal to fight the FEA's decision. This will help assure that they will have the same kinds of rights that bigger outfits with stronger resources have in trying to respond to the bureaucracy.

Mr. ECKHARDT. The gentleman has stated the situation accurately.

Mr. BROOKS. Mr. Chairman, will the gentleman yield?

Mr. ECKHARDT. I yield to the chairman of the committee.

Mr. BROOKS. Mr. Chairman, I say to my friend that this appears to be an equitable amendment, and will add to the due process section of the legislation. I understand, as the gentleman from Ohio (Mr. BROWN) has pointed out, that he and the members of the Committee on Interstate and Foreign Commerce have no objection to this cleaning up of our legislative record. I have no objection to it either.

Mr. ECKHARDT. I thank the gentleman.

Mr. CONTE. Mr. Chairman, will the gentleman yield?

Mr. ECKHARDT. I yield to the gentleman from Massachusetts.

Mr. CONTE. Mr. Chairman, I rise today to support the gentleman from Texas in his amendment to this proposal. The amendment will provide the badly needed protection of the rights of small business subject to regulation under the Emergency Petroleum Allocation Act. I commend the gentleman for recognizing the needs of this vital sector of our energy industry. As he well knows, the interests of these small businesses have been long overlooked as we aggressively pushed for increased energy supplies and at the same time, strived to protect the interests of the consuming public. With the establishment of this Cabinet-level Department, we must assure the small business sector the rights we denied them when establishing the Federal Energy Administration, that being the basic procedural due process rights in agency adjudicatory proceedings. Without this safeguard, this proposed Department would be the only permanent Cabinet-level entity with the right to adjudicate the rights of regulated persons without adhering to the basic due process provisions. It is essential that there be a normalization of the administrative process, so that independent marketers receive the same evenhanded treatment as regulated parties before other Cabinet-level Departments. This is a matter of policy and equity we should not ignore. Mr. Chairman, in our hastened efforts to deal with the energy situation and all of its ramifications, it was easy to unintentionally forget the small business, which as a whole, provided a substantial amount of our energy supplies and marketing needs. This unintentional act has been the past record of our energy-related agencies and is something we cannot allow to continue if we are serious about addressing the energy issue. I urge my colleagues to vote in favor of this amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas (Mr. ECKHARDT).

The amendment was agreed to.

The CHAIRMAN. Are there further amendments to title V?

If not, the Clerk will read.

The Clerk read as follows:

#### TITLE VI—ADMINISTRATIVE PROVISIONS

Sec. 601. (a) For purposes of this section—

(1) the term "Department" includes any agency, administration, commission, or other component thereof;

(2) the term "Department proceeding" includes any Department hearing, application, rulemaking or other determination, contract, grant, reward, fund transfer, claim, controversy, charge, accusation, or arrest;

(3) the term "employee" means any person holding a position in the Department;

(4) the term "employment" means employment with an energy concern and includes employment as a consultant, agent, attorney, or otherwise and includes voluntary employment;

(5) the term "energy concern" means any person significantly engaged in the production, generation, transmission, distribution, or sale of electric power, petroleum or petro-

leum products, synthetic fuels, energy from renewable resources, wastes, or geothermal steam, nuclear energy, natural gas, coal, solar energy, or other energy-related source or resource, or in any research or development significantly related to such production, generation, transmission, distribution, or sale;

(6) the term "participate" includes participation by way of decision, approval, disapproval, recommendation, the rendering of advice, or investigation; and

(7) the term "supervisory employee" means any of the following officers or employees of the Department—

(A) an individual compensated at the rate provided for grade of GS-16 or above under section 5332 of title 5, United States Code;

(B) any other individual who, in the judgment of the Secretary, exercises sufficient decisionmaking authority so that the provisions of this section should apply to such individual;

(C) the Director or Deputy Director of any State, regional, district, local, or other field office; or

(D) an employee or officer who has responsibility with respect to the award, review, modification, or termination of any grant, contract, reward, or fund transfer within the authority of the Secretary.

(b)(1) No supervisory employee shall knowingly receive compensation from, or hold any official relation to, any energy concern, or own stocks or bonds thereof, or have any pecuniary interest therein.

(2) Personnel transferred to the Department pursuant to section 701 of this Act shall have six months to comply with the provisions of paragraph (1) of this subsection with respect to prohibited property holdings. Any person transferred pursuant to section 701 shall notify the Secretary of all circumstances which would be violative of the restrictions described in subsection (b)(1) not later than fifteen days after the date of such transfer as determined by the United States Civil Service Commission.

(3) Where exceptional hardship would result, or where the interest is vested, the Secretary is authorized to waive the requirements of this subsection with respect to any person covered. Such waiver shall:

(A) be published in the Federal Register;

(B) contain a finding by the Secretary that exceptional hardship would result; and

(C) indicate the steps taken by the Secretary to minimize conflict of interest and the appearance of conflict of interest.

Such waiver shall in no instance constitute a waiver of the requirements of section 208 of title 18, United States Code.

(c)(1) Each supervisory employee shall file with the Secretary, in such form and manner as the Secretary shall prescribe, a report describing all previous employment with any energy concern.

(2) Each former supervisory employee of the Department shall file with the Secretary, in such form and manner as the Secretary shall prescribe, not later than the November 15 of—

(A) the fiscal year following the fiscal year in which such person ceased to be an employee of the Department, and

(B) each of the succeeding two fiscal years, a report describing any employment with any energy concern during the fiscal year to which such report relates.

(3) Each report filed pursuant to paragraphs (1) and (2) shall contain the name and address of the person filing the report, the name and address of the energy concern with which he held employment, a brief description of his duties and work for the energy concern, the dates of his employment, and such other pertinent information as the Secretary may require.

(4) The Secretary shall maintain a file containing the reports filed with him pursuant to paragraphs (1) and (2). All such reports

shall be available for public inspection and copying at all times during regular working hours.

(d) (1) (A) For a period of two years after terminating any employment with any energy concern, no supervisory employee shall knowingly participate in any Department proceeding in which his former employer is substantially, directly, or materially involved, other than in a rulemaking proceeding which has a substantial effect on numerous energy concerns.

(B) While an employee of the Department, no supervisory employee shall knowingly participate in any Department proceeding for which he had direct responsibility, or in which he participated substantially or personally, while in the employment of any energy concern.

(C) No supervisory employee who solicits, negotiates, or arranges for employment with any energy concern shall participate in any Department proceeding in which such energy concern is substantially, directly, or materially involved.

(2) (A) For a period of two years after ceasing to be an employee of the Department, no supervisory employee shall, in any professional capacity for anyone other than the United States, appear or attend before, or make any oral or written communication or submission to, or filing with, the Department or any officer or employee of the Department in connection with any Department proceeding which was directly or indirectly under his official responsibility while a supervisory employee.

(B) For a period of five years after ceasing to be an employee of the Department, no supervisory employee shall, in any professional capacity for anyone other than the United States, appear or attend before, or make any oral or written communication to, or filing with, the Department, or any officer or employee of the Department in connection with any Department proceeding in which he participated substantially or personally, while a supervisory employee.

(3) Notwithstanding any penalty imposed under subsection (e), any violation of this subsection shall be taken into consideration in deciding the outcome of any Department proceeding in connection with which the prohibited appearance, attendance, communication, or submission was made.

(4) Whenever the Secretary makes a written finding as to a particular supervisory employee that the application of a particular restriction or requirement imposed by paragraph (1) or (2) of this subsection in a particular circumstance would work an exceptional hardship upon such supervisory employee or would be contrary to the national interest, the Secretary may waive in writing such restriction or requirement as to such supervisory employee. The Secretary shall maintain a file containing all findings and waivers made by him pursuant to this paragraph, and all such findings and waivers shall be available for public inspection and copying at all times during regular working hours. Any waiver made by the Secretary of a restriction imposed under paragraph (2) of this subsection shall also be filed with any record of the Department proceeding as to which the waiver for purposes of participation is granted. No such waiver shall in any instance constitute a waiver of the requirements of section 207 of title 18, United States Code.

(e) Any person who violates subsections (b), (c), or (d), taking into account any waiver under subsection (b)(3) or (d)(4), shall be subject to a civil penalty, assessed by the Secretary, not to exceed \$10,000 for each violation.

(f) Nothing in this section shall be deemed to limit the operation of section 207 or section 208 of title 18, United States Code.

SEC. 602. (a) Each officer or employee of the

Department, including the Federal Energy Regulatory Commission, who has any known financial interest—

(1) in any person engaged in the business, other than at the retail level, of developing, producing, refining, transporting by pipeline, or converting into synthetic fuel, minerals, wastes, or renewable resources, or in the generation of energy from such minerals, wastes, or renewable resources, or in conducting research, development, and demonstration with financial assistance under this Act or any Act, the administration of which is transferred pursuant to this Act;

(2) in property from which coal, natural gas, crude oil, or nuclear material is commercially produced;

(3) in any person engaged in the production, generation, transmission, distribution, or sale of electric power; or

(4) in any person engaged in production, sale, or distribution of nuclear materials;

shall, beginning on February 1, 1978, annually file with the Secretary a written statement disclosing all such interests held by such officer or employee during the preceding calendar year. Such statement shall be subject to examination, and available for copying, by the public upon request.

(b) The Secretary shall—

(1) act, within ninety days after the effective date of this Act, by rule—

(A) to define the term "known financial interest" for purposes of subsection (a); and

(B) to establish the methods by which the requirement to file written statements specified in subsection (a) will be monitored and enforced, including appropriate provisions for the filing by such officers and employees of such statements and the review by the Secretary of such statements; and

(2) include, as part of the report made pursuant to section 621, a report with respect to such disclosures and the actions taken in regard thereto during the preceding calendar year.

(c) In the rules prescribed in subsection (b), the Secretary may identify specific positions, or classes thereof, within the Department and the Commission which are of a nonregulatory or nonpolicy-making nature and provide that officers or employees occupying such positions shall be exempt from the requirements of this section.

(d) Any officer or employee who is subject to, and knowingly violates, subsection (a) shall be fined not more than \$2,500 or imprisoned not more than one year, or both.

SEC. 603. The Secretary is authorized to prescribe such policies, standards, criteria, procedures, rules, and regulations as he may deem to be necessary or appropriate to carry out functions now or hereafter vested in him.

SEC. 604. Except as otherwise expressly prohibited by law, the Secretary may delegate any of his functions to such officers and employees of the Department as he may designate, and may authorize such successive redelegations of such functions as he may deem to be necessary or appropriate.

SEC. 605. The Secretary is authorized to establish, alter, consolidate, or discontinue and to maintain such State, regional, district, local, or other field offices as he may deem to be necessary to carry out functions now or hereafter vested in him.

SEC. 606. The Secretary may, from time to time, establish, alter, consolidate or discontinue such organizational units or components within the Department as he may deem to be necessary or appropriate, except that such authority shall not extend to the abolition of organizational units or components established by this Act.

SEC. 607. In the performance of functions transferred to, and vested in, the Secretary or any officer or component of the Department, other than the Commission, the Secretary is authorized to appoint and fix the

compensation of such officers and employees as may be necessary to carry out such functions. Such officers and employees shall be appointed in accordance with the civil service laws and their compensation fixed in accordance with title 5, United States Code, except that to the extent the Secretary deems such action necessary to the discharge of his functions, he may establish scientific or professional positions within the Department as provided in section 3104 of title 5, United States Code.

SEC. 608. (a) There shall be within the Department not more than fourteen additional officers in positions authorized by sections 5315 and 5316 of title 5, United States Code, who shall be appointed by the Secretary and who shall perform such functions as the Secretary shall prescribe from time to time.

(b) (1) Subject to the provisions of chapter 51 of title 5, United States Code, but notwithstanding the last two sentences of section 5108(a) of such title, the Secretary may place at GS-16, GS-17, and GS-18, not to exceed 350 positions of the positions subject to the limitation of the first sentence of section 5108(a) of such title.

(2) Any position placed at GS-16, GS-17, or GS-18 under the authority of paragraph (1) may be filled only by a person who is transferred in connection with a transfer of function under this Act and who, immediately before the effective date of this Act, held a position having duties comparable to those of such position. Appointments under this paragraph may be made without regard to the provisions of section 3324 of title 5, United States Code, relating to the approval by the Civil Service Commission of appointments to GS-16, GS-17, and GS-18.

(3) The Secretary's authority under this subsection with respect to any position shall cease when the person appointed to fill such position under paragraph (2) leaves such position.

SEC. 609. The Secretary may obtain services as authorized by section 3109 of title 5, United States Code, at rates not to exceed the daily rate prescribed for grade GS-18 of the General Schedule by section 5332 of title 5, United States Code, for persons in Government service employed intermittently.

SEC. 610. Section 17 of the Federal Energy Administration Act of 1974 shall be applicable to advisory committees chartered by the Department.

SEC. 611. (a) The Secretary is authorized to provide for participation of Armed Forces personnel in carrying out functions performed, on the date of enactment of this Act, in the Energy Research and Development Administration and under chapter 641 of title 10, United States Code. Members of the Armed Forces may be detailed for service in the Department by the Secretary concerned (as said term is defined in section 101 of such title) pursuant to cooperative agreements with the Secretary.

(b) The detail of any personnel to the Department under this section shall in no way affect status, office, rank, or grade which officers or enlisted men may occupy or hold or any emolument, perquisite, right, privilege, or benefit incident to, or arising out of, such status, office, rank, or grade, nor shall any member so detailed be charged against any statutory or other limitation on strengths applicable to the Armed Forces or the Department. A member so detailed shall not be subject to direction or control by his armed force, or any officer thereof, directly or indirectly, with respect to the responsibilities exercised in the position to which detailed.

SEC. 612. (a) With their consent, the Secretary and the Federal Energy Regulatory Commission may, with or without reimbursement, use the research, equipment, and facilities of any agency or instrumentality of the

United States or of any State, the District of Columbia, the Commonwealth of Puerto Rico, or any territory or possession of the United States, or of any political subdivision thereof, or of any foreign government, in carrying out any function now or hereafter vested in the Secretary or the Commission.

(b) The Secretary may, with or without reimbursement, provide research, equipment, and facilities to any agency or instrumentality of the United States or any State, territory, the Commonwealth of Puerto Rico, the District of Columbia, or any political subdivision thereof, or to any foreign government, whenever he deems such action to be necessary and appropriate to the performance of functions now or hereafter vested in him.

(c) Proceeds from reimbursements under this section shall be deposited in the Treasury and may be withdrawn by the Secretary or the head of the agency or instrumentality of the United States involved, as the case may be, to pay directly the costs of the equipment, or facilities provided, to repay or make advances to appropriations or funds which do or will initially bear all or a part of such costs or to refund excess sums when necessary, except that such proceeds may be credited to a working capital fund otherwise established by law, including the fund established pursuant to section 619 of this Act, and used under the law governing such fund, if the fund is available for use for providing the equipment, or facilities involved.

Sec. 613. The Secretary is authorized to enter into and perform such contracts, leases, cooperative agreements, or other similar transactions with public agencies and private organizations and persons, and to make such payments (in lump sum or installments, and by way of advance or reimbursement) as he may deem to be necessary or appropriate to carry out functions now or hereafter vested in the Secretary.

Sec. 614. The Secretary is authorized to acquire (by purchase, lease, condemnation, or otherwise), construct, improve, repair, operate, and maintain laboratories, research and testing sites and facilities, quarters and related accommodations for employees and dependents of employees of the Department, such personal property (including patents), or any interest therein, as the Secretary deems necessary; and to provide by contract or otherwise for eating facilities and other necessary facilities for the health and welfare of employees of the Department at its installations and purchase and maintain equipment therefor.

Sec. 615. (a) As necessary and when not otherwise available, the Secretary is authorized to provide for, construct, or maintain the following for employees and their dependents stationed at remote locations:

- (1) emergency medical services and supplies;
- (2) food and other subsistence supplies;
- (3) messing facilities;
- (4) audiovisual equipment, accessories, and supplies for recreation and training;
- (5) reimbursement for food, clothing, medicine, and other supplies furnished by such employees in emergencies for the temporary relief of distressed persons;
- (6) living and working quarters and facilities; and
- (7) transportation of school age dependents of employees to the nearest appropriate educational facilities.

(b) The furnishing of medical treatment under paragraph (1) of subsection (a) and the furnishing of services and supplies under paragraphs (2) and (3) of subsection (a) shall be at prices reflecting reasonable value as determined by the Secretary.

(c) Proceeds from reimbursements under this section shall be deposited in the Treasury and may be withdrawn by the Secretary

to pay directly the cost of such work or services, to repay or make advances to appropriations of funds which will initially bear all or a part of such cost, or to refund excess sums when necessary: *Provided*, That such payments may be credited to a working capital fund otherwise established by law, including the fund established pursuant to section 619 of this Act, and used under the law governing such fund, if the fund is available for use by the Department for performing the work or services for which payment is received.

Sec. 616. The Secretary is authorized to acquire any of the following described rights if the property acquired thereby is for use by or for, or useful to, the Department:

(1) copyrights, patents, and applications for patents, designs, processes, and manufacturing data;

(2) licenses under copyrights, patents, and applications for patents; and

(3) releases, before suit is brought, for past infringement of patents or copyrights.

Sec. 617. The Secretary is authorized to accept, hold, administer, and utilize gifts, bequests, and devices of property, both real and personal, for the purpose of aiding or facilitating the work of the Department. Gifts, bequests, and devices of money and proceeds from sales of other property received as gifts, bequests, or devices shall be deposited in the Treasury and shall be disbursed upon the order of the Secretary. Property accepted pursuant to this section, and the proceeds thereof, shall be used as nearly as possible in accordance with the terms of the gift, bequest, or devise. For the purposes of Federal income, estate, and gift taxes, property accepted under this section shall be considered as a gift, bequest, or devise to the United States.

Sec. 618. The Secretary shall cause a seal of office to be made for the Department of such design as he shall approve and judicial notice shall be taken of such seal.

Sec. 619. The Secretary is authorized to establish a working capital fund, to be available without fiscal-year limitation, for expenses necessary for the maintenance and operation of such common administrative services as he shall find to be desirable in the interests of economy and efficiency. There shall be transferred to the fund the stocks of supplies, equipment, other assets, liabilities, and unpaid obligations relating to the services which he determines will be performed through the fund. Appropriations to the fund in such amounts as may be necessary to provide additional working capital are authorized. The working capital fund shall recover from the appropriations and funds for which services are performed, either in advance or by way of reimbursement, amounts which will approximate the costs incurred, including the accrual of annual leave and the depreciation of equipment. The fund shall also be credited with receipts from the sale or exchange of its property, and receipts in payment for loss or damage to property owned by the fund.

Sec. 620. To the extent necessary or appropriate to perform any function transferred by this Act, the Secretary may exercise, in carrying out the function so transferred, any authority or part thereof available by law, including appropriation Acts, to the official or agency from which such function was transferred.

Sec. 621. The Secretary shall, as soon as practicable after the end of each fiscal year, commencing with the first complete fiscal year following the effective date of this Act, make a report to the President for submission to the Congress on the activities of the Department during the preceding fiscal year. Such report shall include a statement of the Secretary's goals, priorities, and plans for the Department, together with an assessment of the progress made toward the at-

tainment of those goals, the effective and efficient management of the Department, and progress made in coordination of its functions with other departments and agencies of the Federal Government. In addition, such report shall include the information required by section 15 of the Federal Energy Administration Act of 1974, section 307 of the Energy Reorganization Act of 1974, and section 15 of the Federal Nonnuclear Energy Research and Development Act of 1974, and shall include:

(1) projected energy needs of the United States to meet the requirements of the general welfare of the people of the United States and the commercial and industrial life of the Nation;

(2) an estimate of (A) the domestic and foreign energy supply on which the United States will be expected to rely to meet such needs in an economic manner with due regard for the protection of the environment, the conservation of natural resources, and the implementation of foreign policy objectives, and (B) the quantities of energy expected to be provided by different sources (including petroleum, natural and synthetic gases, coal, uranium, hydroelectric, solar, and other means) and the expected means of obtaining such quantities;

(3) current foreseeable trends in the price, quality, management, and utilization of energy resources and the effects of those trends on the social, environmental, economic, and other requirements of the Nation;

(4) a summary of research and development efforts funded by the Federal Government to develop new technologies, to forestall energy shortages, to reduce waste, to foster recycling, and to encourage conservation practices, and shall include recommendations for developing technologies capable of improving the quality of the environment and increasing efficiency;

(5) a review and appraisal of the adequacy and appropriateness of technologies, procedures, and practices (including competitive and regulatory practices) employed by Federal, State, and local governments and non-governmental entities to achieve the purposes of this Act.

Sec. 622. The Secretary, when authorized in an appropriation act, in any fiscal year, may transfer funds from one appropriation to another within the Department, except that no appropriation shall be either increased or decreased pursuant to this section more than 5 per centum of the appropriation for such fiscal year.

Sec. 623. Appropriations to carry out the provisions of this Act shall be subject to annual authorization.

Mr. BROOKS (during the reading). Mr. Chairman, I ask unanimous consent that title VI be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

AMENDMENT OFFERED BY MR. BROOKS

Mr. BROOKS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. Brooks: On page 116, after line 2, add the following:

Sec. 624. Notwithstanding any other provision of this Title, no authority to enter into contracts or to make payments under this Title shall be effective except to such extent or in such amounts as are provided in advance in appropriations Acts.

Mr. BROOKS. Mr. Chairman, I offer this amendment on behalf of the chairman of the Appropriations Committee.

This is a procedural amendment and would improve the manner in which the operating funds of the new Department of Energy are used.

Under the present language of the bill, according to the chairman of the Appropriations Committee, the Department would technically be able to accept gifts, sell services and other things and use these funds without congressional approval. Further, it would be able to charge fees and likewise use these funds without congressional approval.

In acting on this legislation, the Government Operations Committee did not intend to create new substantive law or any vast new spending authority. Our purpose was to pull together programs and appropriations that already exist. We were especially concerned that no action be taken to abrogate appropriation ceilings that have previously been enacted for particular programs.

Any enactment of new spending authority outside of appropriations acts was not intended. I urge acceptance of the amendment.

Mr. HORTON. Mr. Chairman, will the gentleman yield?

Mr. BROOKS. I yield to the gentleman from New York.

Mr. HORTON. Mr. Chairman, I will be very happy to accept the amendment. I think it is a very good amendment, and should be adopted.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas (Mr. Brooks).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. THONE

Mr. THONE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. THONE: On page 115, strike out line 19 and insert in its place: "(6); and

"(6) a summary of cooperative and voluntary efforts that have been mobilized to promote conservation and recycling, together with plans for such efforts in the succeeding fiscal year, and recommendations for changes in laws and regulations needed to encourage more conservation and recycling by all segments of the Nation's populace."

Mr. THONE. Mr. Chairman, we are all concerned about the topic of energy, and there are many aspects of the subject being discussed, whether it be alternative sources, new forms of energy, conversion, or what have you.

During markup of the bill in the House Government Operations Committee I noticed, however, that one important aspect of energy-saving was lacking; recycling and its resulting effect on conservation of our natural resources. Therefore, I successfully included by the amendment the word "recycling" in section 101 of the bill as one of the areas of major emphasis on the part of the proposed Department of Energy, along with solar, thermal, and other technologies. My esteemed colleague from California (Mr. RYAN) had the same thought, and as he then amended a section of the bill specifically to include recycling in the responsibilities of the assistant secretary for solar, geothermal, and other energy technologies.

It is no novel observation that ours is the most wasteful Nation on Earth. The traditional approach to management of materials, with primary emphasis upon production, use and disposal, has led to the dual problems of a lack of adequate resources to meet increasing demand and an inability to cope with the huge quantities of waste materials. While not the ultimate solution to these problems, recycling has certainly been useful in easing them.

For several years I have felt that a much stronger emphasis on recycling should be an important part of the Nation's energy program, and have sought the same tax writeoffs for those industries installing recycling equipment as those given for antipollution equipment.

The creation of a Department of Energy would seem an appropriate opportunity to reaffirm a national commitment to reusing waste, thereby conserving our precious natural resources as well as the energy expended to extract them.

Therefore, I am submitting the following amendment which would require a summary of continuing cooperative and voluntary efforts that have been mobilized to promote conservation and recycling, as well as future plans and recommendations to encourage additional efforts.

The House version of the bill calls for a summary of research and development efforts of those conservation and recycling activities funded by the Federal Government. I believe it would serve an additional purpose for the proposed Department of Energy to provide a summary of cooperative and voluntary efforts as well.

Mr. HORTON. Mr. Chairman, will the gentleman yield?

Mr. THONE. I yield to the gentleman from New York (Mr. HORTON).

Mr. HORTON. I thank the gentleman for yielding.

Mr. Chairman, I personally feel that this is a very good amendment. We should put emphasis on conservation and recycling. I will accept the amendment.

Mr. BROOKS. Mr. Chairman, will the gentleman yield?

Mr. THONE. I yield to the gentleman from Texas (Mr. Brooks).

Mr. BROOKS. I thank the gentleman for yielding.

Mr. Chairman, I have no objection to the amendment, and I ask for its acceptance.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Nebraska (Mr. Thone).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. FUQUA

Mr. FUQUA. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FUQUA: Delete the period at the end of section 610 and insert the following: "to provide advice relating to the regulatory activities of the Department."

Mr. FUQUA. Mr. Chairman, section 610 of the bill incorporates the advisory committee provisions of section 17 of the Federal Energy Administration Act. Section 17 includes provisions pertaining to

representation on the committee of various public groups including representatives of State regulatory utility commission. Section 17 also includes provisions pertaining to attendance of interested persons and the filing of statements except where the meeting should be closed for national security reasons. Although section 17 is clearly designed to apply to regulatory-type activities, it is made applicable to all of the activities of the Department of Energy by section 610 of the bill.

The amendment would limit application of section 17 of the FEA Act to regulatory activities of the department leaving the operational activities of the department, including its research and development activities, subject to the Federal Advisory Committee Act. That act, like section 17 of the FEA Act, contains provisions on membership and requires open meetings. However, that act also recognizes that there are other operational needs to close advisory committee meetings such as when trade secrets or other private business, confidential information, or other privileged information of a personal and private nature will have to be discussed. As an operational as well as regulatory agency, the Department of Energy will be involved in matters requiring the protection afforded by the Federal Advisory Committee Act. The amendment would provide that protection. It does not grant the Department any authority beyond that available to other agencies under the Federal Advisory Committee Act.

Mr. HORTON. Mr. Chairman, will the gentleman yield?

Mr. FUQUA. I yield to the gentleman from New York (Mr. HORTON).

Mr. HORTON. I thank the gentleman for yielding.

Mr. Chairman, the amendment is acceptable on this side.

Mr. BROOKS. Mr. Chairman, will the gentleman yield?

Mr. FUQUA. I yield to the gentleman from Texas (Mr. Brooks).

Mr. BROOKS. I thank the gentleman for yielding.

Mr. Chairman, I have no objection to the amendment, and I ask for its acceptance.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Florida (Mr. Fuqua).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. McCLOSKEY

Mr. McCLOSKEY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. McCLOSKEY: On page 116, after line 2, insert the following:

"SEC. 624. The Secretary of Defense, the Secretary of Commerce, the Secretary of Housing and Urban Development, the Secretary of Agriculture, the Secretary of Transportation, the Secretary of Interior, the United States Postal Service, and the Administrator of General Services shall each designate one Assistant Secretary or Assistant Administrator, as the case may be, as the principal energy conservation officer of such Department or of the Administration. Such designated principal energy conservation officer shall be responsible for coordination with the Department with respect to energy matters."

Mr. McCLOSKEY (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

Mr. ECKHARDT. Mr. Chairman, reserving the right to object, I should like to reserve a point of order against the amendment.

The CHAIRMAN. The gentleman from Texas (Mr. ECKHARDT) reserves a point of order.

Mr. ECKHARDT. Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. McCLOSKEY. Mr. Chairman, the amendment is very simple. It requires that in 8 other Cabinet offices and the Post Office Department there be designated an assistant secretary or assistant administrator as the principal energy conservation officer and directed to cooperate with the Department of Energy in the energy conservation effort. It is merely in furtherance of the desire to save energy. It parallels a similar amendment adopted by the Senate.

Mr. BROOKS. Mr. Chairman, will the gentleman yield?

Mr. McCLOSKEY. I yield to the gentleman from Texas (Mr. BROOKS).

Mr. BROOKS. I thank the gentleman for yielding.

Mr. Chairman, the amendment looks worthwhile, to me, and would not do other than create a little more interest in energy conservation in the various departments. I have no objection to it.

Mr. HORTON. Mr. Chairman, will the gentleman yield?

Mr. McCLOSKEY. I yield to the gentleman from New York (Mr. HORTON).

Mr. HORTON. I thank the gentleman for yielding.

Mr. Chairman, I have a question.

The gentleman is not suggesting by this amendment that each of these departments create a new office of assistant secretary or assistant administrator for this purpose?

Mr. McCLOSKEY. No. There are no new offices created. It merely requires that one of the assistant secretaries or one of the principal officers of the department be designated as the principal energy conservation officer of that department and directed to cooperate with the department.

Mr. HORTON. Mr. Chairman, with that understanding, I will accept the amendment.

The CHAIRMAN. Does the gentleman from Texas (Mr. ECKHARDT) insist on his point of order?

Mr. ECKHARDT. No, Mr. Chairman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. McCLOSKEY).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. ROSE

Mr. ROSE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ROSE: Page 114, strike out line 17 and insert in lieu thereof the following:

Life of the Nation, including a comprehensive summary of data pertaining to all fuel and energy needs of residents of the United States residing in—

(A) areas outside standard metropolitan statistical areas; and

(B) areas within such areas which are unincorporated or are specified by the Bureau of the Census, Department of Commerce, as rural areas;

Mr. ROSE (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

Mr. ROSE. Mr. Chairman, during the last session of Congress, I introduced legislation to establish within the Department of Agriculture, a Rural Energy Office charged with the responsibility of assessing and monitoring the fuel and energy needs of rural America and the agricultural sector. At that time I spoke to Members of the growing and urgent need to provide the farm and rural communities with comprehensive information on energy.

The fact that rural Americans have very different energy needs and problems than those residing in metropolitan areas, is obvious. This situation has become more critical in recent years because of the rising cost of energy and its historically high rate of consumption in rural areas.

Because of the greater distance which rural Americans have to travel to their employment and to obtain basic social services, they consume a higher per capita amount of gasoline than the national average. Also, because the predominant housing pattern in rural areas consists of single-family dwellings, rural citizens consume more heating fuel as well. This is compounded by the fact that 60 percent of the Nation's substandard housing exists in rural areas. Rural people also have higher per capita consumption rates of liquified petroleum gases (LPG) because of the use made of these gases in crop drying and other agricultural purposes.

Such examples could go on and on, but the real consequence is that although rural areas have been pinpointed as being especially hard hit by the energy crisis, no attempt has been made thus far to take these special needs into account in formulating the Nation's energy policy.

Mr. Chairman, my amendment will insure that these needs are taken into account in the formulation and implementation of national energy policy. The amendment provides for an assessment of rural energy needs as they pertain to home heating and cooling, transportation, crop production, electrical generation, conservation, and research and development of fossil fuel substitutes; an integral part of national energy policy planning.

Senator LEAHY recently offered a very similar amendment to S. 826, which was

unanimously adopted by the other body. Senator LEAHY and I have spoken to the President's energy advisor, Mr. Schlesinger, about rural energy needs, and the administration has no objection to the amendment.

Mr. Chairman, this amendment will make it possible to detect important demographic and economic conditions which will impact directly upon rural areas, and in turn, on their energy needs. It also provides an additional data base that will be helpful in policymaking. Finally, it will also insure that the impact of any Federal rules, regulations, or legislation on rural energy needs is taken into account in national energy policymaking.

Mr. Chairman, the successful production of food and fiber is basic to the energy requirements of agriculture. We render the farm community and rural citizens powerless when we fail to meet their energy needs. It is time we provide the information and planning, unique to rural life, that is necessary to sustain our agricultural progress. I strongly urge my colleagues to support this amendment.

Mr. HORTON. Mr. Chairman, will the gentleman yield?

Mr. ROSE. I am happy to yield to the gentleman from New York.

Mr. HORTON. Mr. Chairman, this is in line with the amendment the gentleman offered yesterday, as I recall, and what the gentleman is trying to do is to require the Secretary to include in his report energy information concerning rural areas of this country.

Mr. ROSE. Mr. Chairman, what the gentleman says is correct. What we accomplish by this amendment is to ask the Secretary in his annual report to the Congress to supply us with information on the energy needs of rural America.

Mr. HORTON. Mr. Chairman, I want to commend the gentleman from North Carolina (Mr. ROSE). I think this is a very good amendment, and I am willing to accept it.

Mr. ROSE. Mr. Chairman, I deeply appreciate the gentleman's comments.

Mr. BROOKS. Mr. Chairman, will the gentleman yield?

Mr. ROSE. I yield to the gentleman from Texas.

Mr. BROOKS. Mr. Chairman, let me say to my distinguished friend, the gentleman from North Carolina (Mr. ROSE), that I have no objection to this amendment. It is in line with the gentleman's earlier statement, and I certainly welcome the gentleman's contribution to the legislation.

Mr. ROSE. Mr. Chairman, I thank the gentleman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from North Carolina (Mr. ROSE).

The amendment was agreed to.

Mr. FUQUA. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I would like to clarify an important issue. While section 616 relates to the authority of the Department of Energy to purchase patent rights and copyrights owned by other parties, it has no section involving the allocation of

rights to inventions created under the Department's research, development, and demonstration efforts.

As some of you will recall, the issue of Government patent policy played an important and sometimes crucial role in the development of energy research and development legislation in 1974. This patent policy was much debated, and contributed to delays in that legislative process, before an acceptable compromise was reached between the view of those that believe Government contractors should acquire title to inventions made under contracts and the view that the Government should obtain such rights. The finally agreed to provisions are contained in section 9 of the Federal Non-nuclear Energy Research and Development Act of 1974 (P.L. 93-577). Section 9 was derived from the Space Act of 1958 with some modifications taken from the Atomic Energy Act of 1954 as well as from regulations of NASA, AEC and the principles found in the Presidential Patent Policy Statement. The purpose of my question is to clarify whether this much debated, carefully considered compromise patent policy is to be retained as the patent policy for the new Department.

Mr. Chairman, my question is this: Does this really change any of the present law as it applies at this time?

Mr. BROOKS. No. Mr. Chairman, the gentleman is basically correct in his statement. It is not our intent whatsoever to enact any new Government patent policy provisions.

Mr. FUQUA. Mr. Chairman, I thank the gentleman from Texas (Mr. Brooks).

I just want to say that I make these remarks only to insure that the record is clear that nothing in this bill is intended to disturb the patent policy previously enacted by Congress for energy research and development activities. If an invention is made under an R. & D. contract of the Department either section 9 of Public Law 93-577 or section 152 of the Atomic Energy Act will apply and that no other patent policy shall apply. This is important since the new Department may well perform energy research and development through a non-ERDA organization transferred into the Department by this bill. Uniformity can only be achieved if the patent policy requirement is clearly understood.

Mr. BAUMAN. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I would like to ask the chairman of the committee a question regarding section 614 of the bill.

In reading the report and this section of the bill, it is not quite clear to the gentleman from Maryland whether or not this particular section is so broad in the authority granted to the Secretary that it might be used for the purposes of allowing the Secretary to get the Department of Energy into the actual production of oil, natural gas, or other resources. The section seems to address itself only to research, but it also speaks of testing sites and facilities, and it then goes on to give the Secretary the power to pay for private homes for employees and their dependents, and so on.

I am a little bit puzzled as to why the Department ought to be setting up

this kind of an extensive facility if the idea is only to support research.

So the question I have is this: Does this section in fact look toward the Department of Energy's getting into the production of energy rather than only research and testing regarding energy resources?

Mr. BROOKS. Mr. Chairman, will the gentleman yield?

Mr. BAUMAN. I yield to the gentleman from Texas.

Mr. BROOKS. Mr. Chairman, in the committee the authority they had requested was to buy and sell real property, and we have limited this authority to some extent. Basically, this provision provides for testing facilities.

To further clarify that particular activity, I would ask the gentleman from Florida (Mr. Fuqua), who worked in this area, to give us a further explanation.

Mr. FUQUA. Mr. Chairman, will the gentleman from Maryland yield?

Mr. BAUMAN. I yield to the gentleman from Florida.

Mr. FUQUA. Mr. Chairman, I would say to the gentleman from Maryland that in many cases some of these testing facilities are in remote areas, areas where there are no homes, no schools, or facilities of that type. Therefore, in some cases they have to provide some type of living accommodations, similar to the type of accommodations the military provides, for the dependents and people working on these projects.

Mr. BAUMAN. But the gentleman does not see any authority in this particular section for the Department to go into the business of producing oil or gas or any form of energy? This is only insofar as it pertains to research and testing?

Mr. FUQUA. The gentleman is correct.

Mr. BAUMAN. Mr. Chairman, I thank the gentleman for his explanation.

AMENDMENT OFFERED BY MR. HUGHES

Mr. HUGHES. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HUGHES: Page 96, after line 23, insert the following:

"(B) an individual compensated under the Executive Schedule, as provided in subchapter II of chapter 53 of title 5 of the U.S. Code;"

Redesignate subparagraphs (B) through (D) as (C) through (E), respectively.

Mr. HUGHES (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. HUGHES. Mr. Chairman, I wish to commend the committee for the excellent job they did in addressing the problem of conflict of interest within the Nation's regulatory agencies. The committee has recognized that outside financial holdings and past and future employment by regulated industries can seriously influence the judgment of a Federal official in matters affecting the public interest.

Mr. Chairman, with this amendment I would like to strengthen just somewhat the conflict-of-interest provisions; and

the amendment I offer is intended to bring employees compensated under the executive schedule within the scope of the conflict-of-interest provisions contained in the bill.

As presently written, the bill covers only the general schedule supergrades of GS 16 or higher.

Since many of the important decisions will continually be made by persons compensated under the executive schedule, I feel it is important for us to include them as well.

Mr. HORTON. Mr. Chairman, will the gentleman yield?

Mr. HUGHES. I yield to the gentleman from New York.

Mr. HORTON. Mr. Chairman, I would agree with the gentleman that these employees should be covered, and I would be willing to accept the amendment.

Mr. VOLKMER. Mr. Chairman, will the gentleman yield?

Mr. HUGHES. I yield to the gentleman from Missouri.

Mr. VOLKMER. Mr. Chairman, I first want to clarify that the gentleman's amendment would mean that the members of the regulatory commission, the Secretary, all Assistant Secretaries, the General Counsel, the Inspector General, the administrators, everyone would then be covered under the definition of the "supervisory employee"; is that correct?

Mr. HUGHES. They would all be covered. That is correct.

Mr. VOLKMER. Mr. Chairman, I am sure that the legislation as it came out of the committee was intended to do this; but it did not do it; is that correct?

Mr. HUGHES. I do not think the legislation covers the issue adequately, and I think that this amendment clarifies that.

Mr. VOLKMER. Right, so there is no misunderstanding about it; is that correct?

Mr. HUGHES. There can be no misunderstanding that general schedule employees are intended to be covered by the legislation.

Mr. VOLKMER. This amendment is to insure that they are covered under the conflict-of-interest provisions that are incorporated under this title; is that correct?

Mr. HUGHES. That is correct.

Mr. VOLKMER. Mr. Chairman, I believe the gentleman in the well also has an amendment which he will offer later on to strengthen those conflict-of-interest provisions. Is that correct?

Mr. HUGHES. I have an amendment I will offer later, when I am recognized, to this title also, which will prohibit, for a period of 2 years, supervisory employees who are significantly participating in the regulatory process from going back into the industry that they have regulated for a period of 2 years.

Mr. VOLKMER. Mr. Chairman, as the gentleman knows, I support this amendment and will also support his later amendment.

Mr. Chairman, I think the gentleman from New Jersey (Mr. Hughes) has done an excellent job.

Mr. HUGHES. Mr. Chairman, I thank my colleague for his contribution.

Mr. BROOKS. Mr. Chairman, will the gentleman yield?

Mr. HUGHES. I yield to the gentleman from Texas.

Mr. BROOKS. Mr. Chairman, I would say that it is my feeling that the subject matter of this amendment was fully covered in the committee bill. There was no intention whatsoever to exclude these people. I think the subject matter is in there clearly, but this amendment just restates it.

Mr. Chairman, we have no objection to the amendment, and I will accept the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Jersey (Mr. HUGHES).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. HUGHES

Mr. HUGHES. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HUGHES: Page 100, after line 21, insert the following:

"(C) For a period of two years after ceasing to be an employee of the Department, no supervisory employee who participated personally and substantially, through decision, recommendation, investigation, or otherwise, in the exercise of regulatory functions under this Act shall accept employment or compensation, directly or indirectly, from any person subject to such regulation by the Department."

Mr. HUGHES. Mr. Chairman, I wish to commend the committee for the excellent job they did in addressing the problem of conflicts of interest within the Nation's regulatory agencies. The committee has recognized that outside financial holdings, and past or future employment by regulated industries can seriously color the judgment of a Federal official on matters affecting the public interest.

The amendment I am offering is designed to strengthen the recommendations of the committee and is in line with the overall intent and spirit of their proposals. Specifically, my amendment would prohibit regulatory officials of the Department of Energy from accepting employment with any regulated industry for a period of 2 years after leaving Government.

It is similar to amendments I have offered on four past occasions relating to government regulatory or purchasing officials, and which were approved by the House on each occasion.

The more study I have given to this subject, the more I have become convinced that the prospect of a high-paying job with a regulated industry can materially influence the judgment of public officials with regulatory responsibilities.

In terms of sheer numbers of individuals moving in and out of Government regulatory agencies from and to regulated industries, there is cause for concern. Between 1971 and 1975, 52 percent of the 42 regulatory commissioners appointed came from a regulated industry. During that same time, 48 percent of the 35 commissioners who left went to work for regulated industries.

Although this problem exists throughout all Government regulatory agencies, those that deal with energy questions

must be of greatest concern to us. There are tremendous stakes riding on the outcome of many Government regulatory decisions in the area of energy, and we must take every precaution to assure that the integrity of the process is above reproach.

We must be certain that, when our regulatory officials make decisions, they have the public interest in mind, and not the prospect of some high-paying job with industry later on.

I urge my colleagues to support this amendment.

Mr. BROOKS. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I wish to say that this amendment that is offered by the gentleman from New Jersey (Mr. HUGHES), who is a very distinguished and able Member, and dedicated, would prohibit any supervisory employee who exercised regulatory responsibility in the Department of Energy from working for a regulated industry for a period of 2 years after leaving the Department. The amendment is designed to prevent former employees who have anything to do with the decisionmaking efforts of the Department and present employees from taking future employment possibilities with the energy companies into account while making decisions within the Department.

The Committee on Government Operations considered these matters and we came up with some language which I believe, if the Members will think about it a little bit, will really and adequately meet the legitimate concerns expressed by the gentleman from New Jersey (Mr. HUGHES). In section 601(d) of the bill, a former supervisory employee is prohibited from making any contact with the Department on a matter in which he was directly or indirectly involved, for a period of 2 years.

That does not mean he cannot work for these people, but he cannot contact the Department for that 2-year period of time. The provision against contacting is extended to 5 years for any matter in which the former supervisory employee participated substantially or personally while in the Department.

These two provisions, it would seem to me, are certainly adequate to prevent undue influence in the Department and will in themselves, I am sure, discourage energy companies from hiring such individuals if they are going to use them in trying to obtain undue influence within the Department.

The proposed amendment appears to be overly burdensome to me, because the supervisory employees would be prohibited from working for energy companies, even in a completely separate type of employment. For example, if one worked in the Department of Energy and then cracked up, and all he could do was pump gasoline somewhere, he would not be able to do that for a period of 2 years under this amendment.

I think the amendment is a bit unreasonable and a little too strong.

Mr. HUGHES. Mr. Chairman, will the gentleman yield?

Mr. BROOKS. Of course I yield to the gentleman from New Jersey.

Mr. HUGHES. Mr. Chairman, I can

understand the concern of the chairman of the committee, and his concern did trouble me also when I introduced the very first conflict-of-interest amendment. But I have come to realize, as I am sure the chairman has, that the language he refers to has been in our legislation and on the books for many years and it has been ineffective. It has not worked to shut the revolving door in Government. I believe that the Department of Energy that we are creating will be one of the most important and powerful bodies that we will probably create in our lifetimes. I believe it is very important that we make sure we get this Department off on a right footing. The language of my amendment is very delimiting. It only refers to those supervisory employees who participated personally and substantially in the decisionmaking process.

Mr. BROOKS. Mr. Chairman, let me thank my friend, the gentleman from New Jersey (Mr. HUGHES) and say that the language in the committee bill is much stronger than that in previous legislation. We require people not to contact the Government for 2 years, and if they were personally or substantially involved, they cannot contact the Department for 5 years. I think that is a pretty good, adequate safeguard. If that does not work, then I think we ought to change it. But I believe we ought to try this before we just chop them off and say that if you have worked for the Department of Energy and had a pretty good job down there, you cannot work for the energy companies for 2 years.

What if there is nothing else which one can do? What if one were a processor in some category and worked on oil and gas, their numbers and data, and the transportation of energy products. He would be, I think, severely limited. I think the gentleman may be raising some possible constitutional questions on freedom of operations. I do not know whether we can limit people from working. The language of the amendment is pretty strong to me.

Mr. HUGHES. Mr. Chairman, will the gentleman yield?

Mr. BROOKS. I yield to the gentleman from New Jersey.

Mr. HUGHES. I thank the gentleman for yielding.

It only limits employment for a period of 2 years. As the gentleman knows, the big problem with many of the agencies and departments is trying to get public officials to make decisions based upon what is in the public interest and not on what they are going to be doing 2 or 3 years hence. If they have their eye on another job somewhere down the pike, obviously their decisions are going to be colored and probably not in the public interest.

Mr. HORTON. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I would certainly agree with the statement that has been made by the chairman of the committee, the gentleman from Texas (Mr. BROOKS). In reply to the gentleman from New Jersey (Mr. HUGHES), I would say this is not the boilerplate language that is in-

cluded in other legislation. This is brand new legislation. This is something that the Committee on Government Operations came up with, and what we tried to do was prevent those conflicts of interest that arise when former supervisory employees contact the Department of Energy after they leave the Department of Energy. This amendment goes not to contact with the agency, but it goes to employment. In other words, what the amendment of the gentleman from New Jersey does is to say that anyone who has worked in a supervisory capacity, cannot be directly or indirectly employed by any person subject to regulation by the Department. I think that goes too far. I do not think it is fair. We have limited the amount of contact with the Department by saying that there is a 2-year and a 5-year limitation with regard to appearing before the agency. But I think also that this particular amendment, if adopted, would make it almost impossible for this new agency to get anyone to go to work for it, because no one is going to want to go to work when he is going to have to refrain from employment for 2 years after leaving.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. HORTON. I yield to the gentleman from California.

Mr. ROUSSELOT. I thank the gentleman for yielding.

If we pass this amendment, the standard would be, "no experience" in the field of energy.

Mr. HORTON. Basically that is correct.

Mr. ROUSSELOT. Unless, of course, a former energy worker has been out of work for 2 years.

Mr. HORTON. That would be right.

Mr. ROUSSELOT. That is incredible.

Mr. HORTON. I rise in opposition to the amendment. I feel it goes too far. I certainly am in sympathy with the gentleman's concern. We have addressed that concern in the bill, and I think the manner in which we have handled it is better than to require that they cannot have any employment for 2 years after they leave the agency, so I urge that the amendment be defeated.

Mr. ALLEN. Mr. Chairman, will the gentleman yield for a question?

Mr. HORTON. I yield to the gentleman from Tennessee.

Mr. ALLEN. I thank the gentleman for yielding.

Does the committee bill as it is presently written prohibit such employees from not only contacting the agency, but does it also prohibit them from lobbying with Congress?

Mr. HORTON. I would say the answer to that question is yes. Lobbying the Congress? I misunderstood the gentleman.

Mr. ALLEN. Can someone leave this agency, this department, and go to work for one of these big petroleum companies as a lobbyist in their behalf before the Congress?

Mr. HORTON. Yes.

Mr. ALLEN. In other words, does it

bar him from accepting employment as a lobbyist?

Mr. HORTON. He would be barred, in my interpretation of the language.

Mr. STUDDS. Mr. Chairman, I move to strike the requisite number of words, and I rise in strong support of the amendment offered by the gentleman from New Jersey. I wish there were a way—and I hope someday there will be—in which we could have a provision in law similar to that offered by the gentleman from New Jersey with respect to all Federal agencies, and most particularly with respect to Federal regulatory agencies. One does not have to be in the Congress or this city very long to see the revolving door in operation—people moving from the Department of the Interior to the energy industry, people moving from the Department of Defense to the defense industry, and back and forth and sometimes simultaneous switches.

I think it goes to the heart of the question whether the people of this country have confidence in the integrity of the officials of the Government and most particularly those with substantial regulatory responsibilities.

Mr. HUGHES. Mr. Chairman, will the gentleman yield?

Mr. STUDDS. I yield to the gentleman from New Jersey.

Mr. HUGHES. I thank my colleague for his support.

I would like for just a moment, if I may, to dispel the suggestion that this particular amendment is going to be particularly onerous. There is no prohibition for those who have the expertise and who go from industry into Government. What it says is if they take a job in a supervisory capacity and they are actively making regulation under the act they cannot for a period of 2 years go into the industry they regulated.

I submit that is somewhat restrictive, but if we want to shut the revolving door we have seen for too many years here in Washington, we are going to have to hit where it counts; in the paycheck. I do not think under the circumstances that we are asking too much of those who are taking supervisory jobs in the regulatory agencies. It is only supervisory employees. That is all we are talking about.

I urge my colleagues to support the amendment.

Mr. ERLENBORN. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. HORTON. Mr. Chairman, will the gentleman yield?

Mr. ERLENBORN. I yield to the gentleman from New York.

Mr. HORTON. Mr. Chairman, I would like to clarify the answer I gave a moment ago, if the gentleman from Tennessee would take the microphone. I misunderstood the gentleman's question. As I understood, he was asking whether or not a person could under the language of this bill appear before the agency. He indicated to me in a private conversation that he was talking about appearing before the Congress.

We do not limit anyone with regard

to employment or appearing before the Congress. The bill does not address that subject.

Mr. ALLEN. Mr. Chairman, will the gentleman yield?

Mr. ERLENBORN. I yield briefly to the gentleman from Tennessee.

Mr. ALLEN. I regret that I did not make my question clear, but the gentleman's answer now does clarify the matter as far as I am concerned. This means someone can go right out of the department and accept employment and become a lobbyist for the utility industry.

Mr. HORTON. Mr. Chairman, if the gentleman will yield further, what we tried to do was to prevent a person from leaving the department and coming back and appearing before the department. We did not address the subject of employment, which is the subject of this amendment. I feel that addressing the subject of employment goes too far and that is why I urge defeat of the amendment.

Mr. BROOKS. Mr. Chairman, will the gentleman yield?

Mr. ERLENBORN. I yield briefly to the gentleman from Texas.

Mr. BROOKS. Mr. Chairman, to clarify this particular point, if the amendment is adopted it will prevent people from going to work for any energy company, and that means if they cannot go to work for the company that they will not be able to represent the company before the Congress or the department or even to pump gas as an employee of the company. They will not be on the payroll. Individually, if they want to quit the department and lobby on their own as individuals that is all right, but they will not be able to be on the company payroll for 2 years if we adopt this amendment.

The committee position was that to restrict people that much in that respect was unconscionable and we should instead prevent them from contacting the department they worked in for 2 years; and for 5 years if it is on a matter with which they were involved.

Mr. ERLENBORN. I think that is right. This would prevent lobbying or being in any fashion employed by the industry.

I think the question the gentleman from Tennessee was asking was: Did the bill prohibit that? The answer of the gentleman from New York was correct. The bill does not prohibit employment. It prohibits appearing before the regulatory agency.

I rise in opposition to the amendment. The intent of the sponsor is good, but this is a very simple amendment. Therein lies the problem. It does not discriminate. This would prohibit someone in the most dire circumstances from pumping gasoline. We know that is not a conflict of interest.

I know there is a provision in the bill itself for waivers, and if someone wanted to get a job pumping gasoline I think he ought not to have to come hat in hand to the agency he worked for and say: "Will you please give me a waiver so I can pump some gasoline?"

Mr. HUGHES. Mr. Chairman, will the gentleman yield?

Mr. ERLBORN. I will be happy to yield briefly. I have not had much time.

Mr. HUGHES. Mr. Chairman, I cannot imagine the Assistant Secretary pumping gas; can the gentleman imagine that?

Mr. ERLBORN. In the kind of hard times we may face with this administration, yes, I can imagine that. I am glad the gentleman asked that question.

This is the point I would like to make, that this is a subject that I think deserves more attention than this simple amendment. It requires drafting something that will discriminate between conflict of interest and employment. This says compensation directly or indirectly. Does that mean he cannot invest in that industry directly and get dividends? Does it mean that if a person is in an ad agency, that no one in that ad agency, though it may have clients across the country, can take an account of an energy-related company?

Does it mean a lawyer associated with a law firm would have to make certain none of his associates had clients serving energy related companies?

The CHAIRMAN. The time of the gentleman from Illinois has expired.

(By unanimous consent, Mr. ERLBORN was allowed to proceed for 1 additional minute.)

Mr. ERLBORN. Mr. Chairman, if he is a lawyer, does this mean that he cannot take employment that is directly or indirectly associated with the energy industry?

These questions are totally unanswered. I think it is obvious, if we read this language, that although the intention is good, the attempt to direct this to stopping abuses falls woefully short in the language. It just is a broad-brush prohibition against employment in the energy area.

We are talking about people, if they held this type of position in the department, people that are pretty well qualified and have their background in the energy industry. We are saying they cannot be employed in the place where they are most likely to have talents that are worth something for 2 years after their work for the Department of Energy. It really means they had better put enough away while they are working in the Department of Energy to take care of their needs for the next 2 years, because they will not be able to get a job in the most likely place where they could get employment. This amendment should be defeated.

Mr. MOSS. Mr. Chairman, I move to strike the requisite number of words. I rise in support of the amendment.

Mr. Chairman, I want to first of all apologize to all those supervisory persons who will have only a gas-pumping assignment to return to. I hope that they can find something more lucrative than pumping gas; But I am concerned over a phenomenon that we have all witnessed in Washington for far too many years. It is now called the revolving door

phenomenon. A person is on one side of the table today and tomorrow he moves to the other side and he starts representing the private interest against the public interest. I do not think this goes a bit too far.

Now, to say that they may not directly contact a department or agency on a matter over which they have had jurisdiction or given direction, as the bill now states, is to ignore the value of advice. People are employed in Washington routinely from the Government, because of contacts they have, the people they know, the avenues within an agency that they are familiar with. They do not have to contact anyone. All they have to do is advise their client on whom to contact, where to go, which shortcut to take.

The gentleman from New Jersey very wisely in drafting this amendment proposes that we eliminate that.

Now, if we are truly serious in our efforts to clean up this revolving door or clear up this revolving door question, we are going to make this kind of move or we are not going to do any more than wipe off the facade and make it appear that we are cleaning up a situation which is not good. I have watched these regulatory commissions, in particular, and the executive departments downtown with average tenure of persons appointed to office running, I think, in some instances, less than 2 years.

I do not know how many commissioners or chairmen of the commissions we have had, but I know, in the case of one of the large commissions, we have had eight of them in about the last 9 years. That kind of phenomena occurs because it is a training ground. It is a way of learning who to contact, what to say, what shortcuts to take. That advice is advice that is marketable. It is highly marketable, but for a short period of time it has premium price. Let us take away any short premium price period of time and wait and let them prove their true worth. It does not hurt them to go into another field for 2 years.

Mr. ECKHARDT. Mr. Chairman, will the gentleman yield?

Mr. MOSS. I yield to the gentleman from Texas.

Mr. ECKHARDT. What is the penalty for violating this? Suppose somebody does go to work or joins a law firm that has something to do with the field in which he has been engaged. Do we enroll him from engaging in the law firm, fine him, or what is the penalty?

Mr. MOSS. I would suggest the gentleman address that question to the gentleman from New Jersey, to whom I now yield.

Mr. HUGHES. If my colleague will yield. The violator, in addition to the civil penalties in the act, would be subject to having his compensation from the prohibited employment forfeited.

Mr. ECKHARDT. But by that time he has already collected his salary and his compensation.

Mr. HORTON. Mr. Chairman, will the gentleman yield on that point?

Mr. MOSS. I yield to the gentleman from New York.

Mr. HORTON. The bill provides, on page 101, line 21:

(e) Any person who violates subsections (b), (c), or (d), taking into account any waiver under subsection (b) (3) or (d) (4), shall be subject to a civil penalty, assessed by the Secretary, not to exceed \$10,000 for each violation.

Mr. MOSS. I assume, this being a substitute for section (c), it would impose the same penalty.

Mr. ECKHARDT. Mr. Chairman, I move to strike the last word, and I wish to speak against the amendment.

Mr. Chairman, I am entirely in accord with my colleague from California and the gentleman from New Jersey (Mr. HUGHES) in their position that we should not have a revolving door policy, but I think this goes too far. If my colleagues would read in place of the term "supervisory employee," the term "Member of Congress," I wonder how many of us would think that to be fair.

Suppose I deal in decisionmaking in this body, and I later desire to go into a law firm, to retire from Congress, or I am beaten. I go into a law firm that affects those policies. I would then be barred. Now, should I be barred? I think not.

Should a person who is working for an agency and who is a supervisory employee, who engages in decisionmaking and later goes into a law firm and receives proceeds from that law firm which deals with agency matters, should he be barred? Who is going to determine the fine? I guess the Secretary is still empowered to say that it will be \$10,000 or it will be \$5,000 or it will be 10 cents, because the penalty section leaves the question of penalty with the Secretary.

Now, that portion of the act providing the civil penalty originally was directed at activity by the employee while he was working for the secretary or at activity wherein the former employee, after he left the department, should deal with that department. Mind you, this follows him after he leaves employment for 2 years; and yet, the Secretary determines the fine. Also, the Secretary determines who is a supervisory employee. The act says the Secretary determines that. Now, should the Secretary tell Joe Bloke, "You cannot go to work for that law firm, because I called you a supervisory employee, but Bill Smith, you can, because I said you were not a supervisory employee?"

I think there is a good policy embodied in this amendment, but I think it is improper to attempt to attach it to this single agency at this time and I think the manner in which the amendment is framed is improvident.

If we want to stop the revolving door, let us stop all such doors in all agencies, and let us do it after we consider the consequences of our actions. Are these consequences good or bad? This is not only a question of whether or not a person can go to work for a firm after he leaves. It also goes to the question of whether or not we would so discourage good men who later want to practice law in the field—whether or not we have so

discouraged them from going to work in the agency in the first place, that we are not able to get people who can cope with the lawyers downtown. Let us think about it in a little bit more depth.

Mr. FUQUA. Mr. Chairman, will the gentleman yield?

Mr. ECKHARDT. I yield to the gentleman from Florida (Mr. FUQUA).

Mr. FUQUA. I thank the gentleman for yielding.

Mr. Chairman, one of the things that we are doing here is that we are confusing regulatory people with research and development people. Suppose there is a nuclear physicist who heads a program in what is now called ERDA, and he later returns to a university, let us say as president of that university, and he later comes back to this agency to discuss something, some legislation or some other matter. He will be prohibited, I assume, by the amendment offered by the gentleman from New Jersey (Mr. HUGHES).

Mr. ECKHARDT. Mr. Chairman, the gentleman is absolutely correct, because "supervisory employee," as defined on page 96, includes an individual compensated at the rate provided for grade of GS-16 or above, or any other individual who, in the judgment of the Secretary, exercises sufficient decisionmaking authority so that the provisions of this section shall apply to such individual.

Mr. Chairman, it is true that the amendment offered by the gentleman from New Jersey (Mr. HUGHES) says that he must be a supervisor, and then he adds a qualification, "who participated personally and substantially through decisionmaking," but he also says, "recommendation, investigation, or otherwise."

That is pretty broad. Who is ultimately going to determine this?

The CHAIRMAN. The time of the gentleman from Texas (Mr. ECKHARDT) has expired.

(On request of Mr. HUGHES and by unanimous consent, Mr. ECKHARDT was allowed to proceed for 1 additional minute.)

Mr. HUGHES. Mr. Chairman, will the gentleman yield?

Mr. ECKHARDT. I yield to the gentleman from New Jersey (Mr. HUGHES).

Mr. HUGHES. I thank the gentleman for yielding.

Mr. Chairman, as the gentleman knows, he was just getting to the language of the amendment—it is not a long amendment—in which it is further stated, "in the exercise of regulatory functions." That is very, very specific. My colleague indicates about applying it to the Congress.

I will say to my colleague that there are some practices of some former Members of Congress that we ought to be looking at, too, when it comes to lobbying efforts and going to work for some of the agencies for perhaps a period of time. Certainly that is no argument against this amendment. If we are really going to get to the nub of the problem and be serious about conflicts of interest, we will adopt this amendment.

Mr. ECKHARDT. Mr. Chairman, I merely ask the Members to look at this

point more sensitively in connection with supervisory employees.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Jersey (Mr. HUGHES).

The question was taken; and on a division (demanded by Mr. HUGHES) there were—ayes 12, noes 37.

Mr. HUGHES. Mr. Chairman, I demand a recorded vote, and, pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

#### QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to clause 2, rule XXIII, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

#### RECORDED VOTE

The CHAIRMAN. The pending business is the demand of the gentleman from New Jersey, Mr. HUGHES, for a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 146, noes 184, not voting 103, as follows:

| Dent           | Marlenee       | Van Deerlin   |
| Devine         | Metcalfe       | Waggoner      |
| Dornan         | Milford        | Wilson, Bob   |
| Downey         | Miller, Calif. | Wirth         |
| Early          | Mineta         | Wyder         |
| Filippo        | Minish         | Young, Alaska |
| Florio         | Mitchell, Md.  | Zeferetti     |
| Flowers        | Moakley        |               |
| Ford, Mich.    | Murphy, Ill.   |               |

The Clerk announced the following pairs:

On this vote:

Mr. Akaka for, with Mr. Devine against.  
Mr. Jenrette for, with Mr. Dornan against.  
Mr. Risenhoover for, with Mr. Davis against.  
Mr. Harrington for, with Mr. LaFalce against.  
Mr. Florio for, with Mr. Carney against.  
Mr. Nolan for, with Mr. Pepper against.  
Mr. Mitchell of Maryland for, with Mr. Andrews of North Dakota against.  
Mr. Addabbo for, with Mr. Lujan against.  
Mr. Staggers for, with Mr. Taylor against.

Messrs. YATES, FINDLEY, BONKER, WOLFF, and RONCALIO changed their vote from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. VOLKMER

Mr. VOLKMER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. VOLKMER: Page 100, beginning on line 11, strike out "which was directly or indirectly under his official responsibility while a supervisory employee." and insert in lieu thereof a period.

Mr. VOLKMER. Mr. Chairman, this amendment does not go as far as the Hughes amendment which has just been previously voted on. However, it does clarify the language in the present conflict of interest provision relating to supervisory employees of the Department.

During the discussion on the Hughes amendment, in answer to a question from the gentleman from Tennessee, the gentleman from New York, if I remember correctly, stated that under this provision supervisory employees of the Department could not appear before the Department. However, under the bill as it is written, I would like to bring to the attention of the Members that the bill has a loophole in it which, in my opinion, is about as big as a truck. It says, " \* \* \* which was directly or indirectly under his sole responsibility while a supervisory employee."

So, my question to the committee is that, if I am an Assistant Secretary for Congressional and Intergovernmental Relations, and had nothing to do with fossil fuel, then may I appear before the agencies or those persons in the Department having to do with fossil fuel? It is obvious to me that if I do not directly or indirectly, while I am an employee, have anything to do with those things, then I can do so.

My amendment would just prohibit those supervisory employees—we are talking about a GS-16 and above, talking about Assistant Secretaries, talking about Commission members—it would prohibit them for 2 years, just for 2 years, from ever appearing before the Department on any matter. It does not say they cannot go to work for the industries or for the utilities. It just says, "You cannot come back over here and try to influence the Department people on matters that concern the public."

Mr. GLICKMAN. Mr. Chairman, will the gentleman yield?

Mr. VOLKMER. I yield to the gentleman from Kansas.

Mr. GLICKMAN. Mr. Chairman, I strongly support the gentleman's amend-

ment. I did not vote for the previous amendment because I thought it was too excessive, too strong. This amendment gets to the heart of the bill, which is coming back and representing clients before the Government, and it takes into account the fact that if one works as an Assistant Secretary for Fossil and comes back and represents somebody in a regulatory matter, this bill would not prohibit that in its present form.

That is clearly wrong, so I think those Members, such as myself, who voted against the last amendment, ought to vote for this amendment.

Mr. VOLKMER. I would like to continue by saying that I do not believe that this amendment is in any way onerous. It does not prevent anybody from going to work for any utility or industry that is under regulation. It just means that one cannot go back to the Department or to the Commission and try to influence their decisions in regard to the matter at hand which concerns one's new employer.

Mr. ECKHARDT. Mr. Chairman, will the gentleman yield?

Mr. VOLKMER. I yield to the gentleman from Texas (Mr. ECKHARDT).

Mr. ECKHARDT. I thank the gentleman for yielding.

Mr. Chairman, I want to compliment the gentleman. I think this is a reasonable and restricted amendment.

Mr. VOLKMER. I thank the gentleman for his remarks.

Mr. ERLENBORN. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I wonder if the gentleman from Missouri (Mr. VOLKMER) would lend his attention to some questions I would like to discuss with him and which I would ask him to answer.

Mr. Chairman, the way I read this language which will be left after the language has been stricken, the section will now read:

For a period of two years after ceasing to be an employee of the Department, no supervisory employee shall, in any professional capacity for anyone other than the United States, appear or attend before, or make any oral or written communication or submission to, or filing with, the Department or any officer or employee of the Department in connection with any Department proceeding.

Not having seen the gentleman's amendment before, I am trying to very quickly read this language and interpret what it might mean in different circumstances. Let us say that the person we are talking about, the former employee, is an attorney.

Mr. VOLKMER. Yes.

Mr. ERLENBORN. And he therefore would be acting in a professional capacity when he acted as an attorney. Let us say he personally has been charged with some conduct, possibly the violation of one of these prohibitions, charged by the Department, and there is some correspondence between himself and the Department, he acting as his own attorney. Would he violate this provision because he is acting in a professional capacity and is communicating with or is appearing before the Department?

Mr. VOLKMER. Is he representing a client?

Mr. ERLENBORN. He is representing himself. But he would be, I think, violating the terms of this provision.

Mr. VOLKMER. That is correct.

Mr. ERLENBORN. I am not sure that that is the sort of activity that one would say was really a conflict of interest and should be prohibited.

Mr. VOLKMER. Then perhaps the other body of the section should be amended to provide "as an employee of others." If he wants to do it on his own, that is one thing. But, in the first place, I do not think the hypothetical situation the gentleman is discussing is going to occur very often. I am not saying it would never occur. The instances of being employed by others and appearing are more numerous than those the gentleman gave me.

Mr. ERLENBORN. I know this is not the gentleman's language, because it is in the bill—and I suppose someone on the committee may want to join in this colloquy—but I wondered, in reading this, what a "professional capacity" is. There are different definitions of professions. There are some who would say that professions are really a very narrow category, law, medicine, the clergy, and that is about it. There are others who would apply the term "profession" to any employment. I do not know that there is any definition of "professional capacity" contained in the bill. In drafting the amendment affecting this section, did the gentleman give any attention to the definition of the term "professional capacity"?

Mr. VOLKMER. I thought about it because, like the gentleman, it is questionable about what it actually means.

As a general statement, I suppose in its broad meaning it would include anyone who, in a position in which they work for the Department, would in that capacity be considered a professional person. It might be an engineer, a lawyer, a PR man, or anyone else who would be considered to be functioning in a professional capacity. I would say that it is a very broad, general term. That would be my interpretation, and that is the only one I could supply. I agree that it is not specific as to what is exactly intended.

Mr. ERLENBORN. Mr. Chairman, I thank the gentleman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Missouri (Mr. VOLKMER).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. TSONGAS

Mr. TSONGAS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. TSONGAS: Page 115, lines 10-11, after "practices," add "and to increase efficiency;"

Page 115, line 11, strike out "and shall include" and all that follows down through line 13 and insert: "and further, said summary shall include a description of the activities the Department is performing in support of environmental, including social, economic and institutional, biomedical, physical and safety research, development, demonstration, and monitoring activities necessary to guarantee that technological programs, funded by the Department, are un-

dertaken in a manner consistent with and capable of maintaining or improving the quality of the environment and of mitigating any undesirable environmental and safety impacts."

Mr. TSONGAS. Mr. Chairman, this amendment is simple and should be non-controversial. I believe that it places into language everyone's intent that environmental concerns be considered on the front end of energy development decisions as well as on the back end.

Section 621 specifically authorizes the Secretary to make a report to the President for submission to the Congress on the activities of the Department at the end of each fiscal year. The report is to include a statement of the Secretary's goals, priorities, plans and an assessment of the Department's achievements during the preceding fiscal year. The report shall further include information currently required by section 15 of the Federal Energy Administration Act of 1974 and section 307 of the Energy Research and Development Act of 1974. Although the reporting requirements of the Department as currently stated in H.R. 6804 and the Senate bill, S. 826, are consistent with the reports currently required of the Administrators of ERDA, FEA, and FPC, they provide insufficient information upon which the Congress and the President can base their assessments of the activities of the Department so as to assure protection of the environment.

The language of this amendment is consistent with the intent of the administration as referenced in the numerous statements before the Congress on the formation of both the new Department and the national energy plan, and, specifically, in the report of the Senate Government Operations Committee on S. 826.

Further, the House Science and Technology Committee has, in the ERDA 1978 authorization legislation, H.R. 6796, seen fit to amend sections 6 and 15(a) of the Federal Nonnuclear Research and Development Act of 1974 so as to require that similar information be provided to the President for submission to the Congress.

Mr. Chairman, simply stated, my amendment will specifically place into the legislation the stated intent of the administration to have reported the activities of the Federal Government, including the Department of Energy, which have been and are intended to be undertaken to guarantee the maintenance of the environment.

Mr. Chairman, I believe that such a responsibility will add to the efficiency of the Department's development of energy resources. We are all painfully aware of circumstances in which the failure to consider environmental impacts on the front end of the process have led to costly difficulties, delay, and waste when such impacts arose on the back end of the process. In my area of the country, we are witnessing such a sad occurrence with respect to the construction of the Seabrook Nuclear Power Plant at Sea-

brook, N.H. Although this example relates to the interaction between NRC and EPA and not directly to activity which will be carried out by DOE, it is a startling example of the economic havoc and waste which can be generated by the failure to factor environmental considerations at an early stage.

I am sure that we can all agree that the monitoring activities necessary to guarantee that technological programs, funded by the Department, are undertaken in a manner consistent with the quality of the environment are desirable and necessary. My amendment is basically a "housekeeping effort" to insure that specific mandate in the legislation.

Mr. HORTON. Mr. Chairman, will the gentleman yield?

Mr. TSONGAS. I yield to the gentleman from New York.

Mr. HORTON. Mr. Chairman, I have gone over the amendment with the gentleman from Massachusetts (Mr. TSONGAS), and I feel it is a good amendment. I think it adds to the bill, and I would be willing to accept the amendment.

Mr. TSONGAS. Mr. Chairman, I thank the gentleman.

Mr. BROOKS. Mr. Chairman, will the gentleman yield?

Mr. TSONGAS. I yield to the gentleman from Texas.

Mr. BROOKS. Mr. Chairman, I agree that this is a constructive amendment, and I have no objection to it.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Massachusetts (Mr. TSONGAS).

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

#### TITLE VII—TRANSITIONAL, SAVINGS, AND CONFORMING PROVISIONS

SEC. 701. (a) Except as otherwise provided in this Act, the personnel employed in connection with, and the personnel positions, assets, liabilities, contracts, property, records, and unexpended balances of appropriations, authorizations, allocations, and other funds employed, held, used, arising from, available to or to be made available in connection with the functions transferred by this Act, subject to section 202 of the Budget and Accounting Procedures Act of 1950, are hereby transferred to the Secretary for appropriate allocation.

(b) Positions expressly specified by statute or reorganization plan, personnel occupying those positions on the effective date of this Act, and personnel authorized to receive compensation at the rate prescribed for offices and positions at level I, II, III, IV, or V of the Executive Schedule (5 U.S.C. 5312-5316) on the effective date of this Act shall be subject to the provisions of section 705 of this Act.

SEC. 702. Except as otherwise provided in this Act, the transfer of full-time personnel (except special Government employees) and part-time personnel holding permanent positions pursuant to this title shall not cause any such employee to be separated or reduced in grade or compensation for one year after the date of enactment of this Act.

SEC. 703. Any person who, on the effective date of this Act, held a position compensated in accordance with the Executive Schedule prescribed in chapter 53 of title 5, United States Code, and who, without a break in service, is appointed in the Department

or the Commission to a position having duties comparable to those performed immediately preceding his appointment shall continue to be compensated in his new position at not less than the rate provided for his previous position, for the duration of his service in the new position.

SEC. 704. Employees transferred to the Department holding reemployment rights acquired under section 28 of the Federal Energy Administration Act of 1974 or any other provision of law or regulation may exercise such rights only within one hundred and twenty days from the effective date of this Act.

SEC. 705. Except as otherwise provided in this Act, whenever all of the functions vested by law in an agency, commission, or other body, or any component thereof, have been terminated or transferred from that agency, commission, or other body, or component by this Act, the agency, commission, or other body, or component, shall terminate. If an agency, commission, or other body, or any component thereof, terminates pursuant to the preceding sentence, each position and office therein which was expressly authorized by law, or the incumbent of which was authorized to receive compensation at the rates prescribed for an office or position at level II, III, IV, or V of the Executive Schedule (5 U.S.C. 5313-5316), shall terminate.

SEC. 706. The Director of the Office of Management and Budget, in consultation with the Secretary and the Commission, is authorized and directed to make such determinations as may be necessary with regard to the transfer of functions which relate to or are utilized by an agency, commission or other body, or component thereof affected by this Act, to make such additional incidental dispositions of personnel, assets, liabilities, contracts, property, records, and unexpended balances of appropriations, authorizations, allocations, and other funds held, used, arising from, available to or to be made available in connection with the functions transferred by this Act as he may deem necessary to accomplish the purposes of this Act.

SEC. 707. All orders, determinations, rules, regulations, permits, contracts, certificates, licenses, and privileges—

(1) which have been issued, made, granted, or allowed to become effective by the President, any Federal department or agency or official thereof, or by a court of competent jurisdiction, in the performance of functions which are transferred under this Act to the Department or the Commission after the date of enactment of this Act, and

(2) which are in effect at the time this Act takes effect, shall continue in effect according to their terms until modified, terminated, superseded, set aside, or revoked by the President, the Secretary, the Federal Energy Regulatory Commission, or other authorized officials, a court of competent jurisdiction, or by operation of law.

SEC. 708. (a) (1) The provisions of this Act shall not affect any proceedings or any application for any license, permit, certificate, or financial assistance pending at the time this Act takes effect before any department, agency, commission, or component thereof, functions of which are transferred by this Act; but such proceedings and applications, to the extent that they relate to functions so transferred, shall be continued. Orders shall be issued in such proceedings, appeals shall be taken therefrom, and payments shall be made pursuant to such orders, as if this Act had not been enacted; and orders issued in any such proceedings shall continue in effect until modified, terminated, superseded, or revoked by a duly authorized official, by

a court of competent jurisdiction, or by operation of law. Nothing in this subsection shall be deemed to prohibit the discontinuance or modification of any such proceeding under the same terms and conditions and to the same extent that such proceeding could have been discontinued if this Act had not been enacted.

(2) The Secretary and the Commission are authorized to promulgate regulations providing for the orderly transfer of such proceedings to the Department or the Commission.

(b) Except as provided in subsection (d)—

(1) the provisions of this Act shall not affect suits commenced prior to the date this Act takes effect, and,

(2) in all such suits, proceedings shall be had, appeals taken, and judgments rendered in the same manner and effect as if this Act had not been enacted.

(c) No suit, action, or other proceeding commenced by or against any officer in his official capacity as an officer of any department or agency, functions of which are transferred by this Act, shall abate by reason of the enactment of this Act. No cause of action by or against any department or agency, functions of which are transferred by this Act, or by or against any officer thereof in his official capacity shall abate by reason of the enactment of this Act.

(d) If, before the date on which this Act takes effect, any department or agency, or officer thereof in his official capacity, is a party to a suit, and under this Act any function of such department, agency, or officer is transferred to the Secretary or any other official, then such suit shall be continued with the Secretary or other official, as the case may be, substituted.

SEC. 709. If any provision of this Act or the application thereof to any person or circumstance is held invalid, neither the remainder of this Act nor the application of such provision to other persons or circumstances shall be affected thereby.

SEC. 710. With respect to any functions transferred by this Act and exercised after the effective date of this Act, reference in any other Federal law to any department, commission, or agency or any officer or office the functions of which are so transferred shall be deemed to refer to the Secretary, the Federal Energy Regulatory Commission, or other official or component of the Department in which this Act vests such functions.

SEC. 711. Nothing contained in this Act shall be construed to limit, curtail, abolish, or terminate any function of, or authority available to, the President which he had immediately before the effective date of this Act; or to limit, curtail, abolish, or terminate his authority to delegate, redelegate, or terminate any delegation of functions.

SEC. 712. (a) The Federal Energy Administration Act of 1974 is hereby amended as follows:

(1) in section 4—

(A) by striking out the heading of such section and inserting in lieu thereof "Conflicts of Interest";

(B) by striking out subsections (a) through (h) of such section and redesignating subsections (i) and (j) as subsections (a) and (b), respectively; and

(C) by striking out, in the subsection redesignated as subsection (b), "holding any of the positions described in subsections (a), (c), (d), and (e) of this section" and inserting in lieu thereof "who is compensated at level II, III, or IV of the Executive Schedule and who is assigned principal responsibility for any program under this Act";

(2) in section 7—

(A) by striking out subsections (a) and

(b) and redesignating subsection (c) as subsection (a);

(B) by striking out subsections (d), (e), (f), (g), and (h);

(C) by striking out "(1) (1)" and by striking out subparagraphs (A), (B), (C), (E), and (F) of subsection (1) (1) and redesignating subparagraph (D) of such subsection as subsection (b);

(D) by striking out, in the matter redesignated as subsection (b), "the rules, regulations, or orders described in paragraph (A)" and inserting in lieu thereof "any rule or regulation, or any order having the applicability and effect of a rule as defined in section 551(4) of title 5, United States Code, pursuant to this Act";

(E) by striking out, in such subsection, "paragraph (2) of this subsection" and inserting in lieu thereof "subsection (c)";

(F) by redesignating paragraph (2) (A) of subsection (1) as subsection (c) and by striking out subparagraph (B) of subsection (1) (2); and

(G) by striking out paragraph (3) of subsection (1) and by striking out subsections (j) and (k);

(3) by repealing sections 9, 28, and 30;

(4) in section 52(a)—

(A) by striking out "and" at the end of paragraph (2);

(B) by striking out the period at the end of paragraph (3) and inserting in lieu thereof "; and"; and

(C) by adding after such paragraph (3) the following new paragraph:

"(4) The States to the extent required by the Natural Gas Act and the Federal Power Act"; and

(5) in section 55(b)—

(A) by striking out "seven" and inserting in lieu thereof "six";

(B) by inserting "and" after "Federal Trade Commission"; and

(C) by striking out "one shall be designated by the Chairman of the Federal Power Commission; and";

(b) The Energy Reorganization Act of 1974 is hereby amended by repealing section 108.

(c) (1) The Atomic Energy Act of 1954 is hereby amended by repealing section 26.

(2) Section 161(d) of the Atomic Energy Act of 1954 shall not apply to functions transferred by this Act.

(d) Section 502 of the Motor Vehicle Information and Cost Savings Act is amended by adding at the end thereof the following:

"(h) The Secretary shall consult with the Secretary of Energy in carrying out his responsibilities under this section."

(e) The Energy Conservation Standards for New Buildings Act of 1976 is hereby amended as follows:

(1) in section 303(11), strike out "Secretary of Housing and Urban Development" and insert in lieu thereof "Secretary of Energy";

(2) in section 304(c), by inserting "the Secretary of Housing and Urban Development," after "the Administrator,"; and

(3) in section 310, by inserting "Secretary of Housing and Urban Development," after "the Administrator,".

(f) The Rural Electrification Act of 1936 is hereby amended by adding a new section 16 to title I thereof to read as follows:

"Sec. 16. In order to insure coordination of electric generation and transmission financing under this Act with the national energy policy, the Administrator in making or guaranteeing loans for the construction, operation, or enlargement of generating plants or electric transmission lines or systems, shall consider such general criteria consistent with the provisions of this Act as may be published by the Secretary of Energy."

SEC. 713. Section 19(d) (1) of title 3, United States Code, is amended by inserting immediately before the period at the end thereof the following: "Secretary of Energy".

SEC. 714. (a) Section 101 of title 5, United States Code is amended by adding at the end thereof the following:

"The Department of Energy."

(b) Subsection (a) of section 3104 of title 5, United States Code, is amended by inserting after paragraph (4) the following new paragraph:

"(5) Department of Energy—not more than 200."

(c) Subsection (a) of section 5108 of title 5, United States Code, is amended by striking out "an aggregate of 2,754" and inserting in lieu thereof "an aggregate of 3,104".

(d) Section 5312 of title 5, United States Code, is amended by adding at the end thereof the following:

"(14) Secretary of Energy."

(e) Paragraph (22) of section 5313 of title 5, United States Code, is amended to read as follows:

"(22) Deputy Secretary of Energy."

(f) Section 5314 of title 5, United States Code, is amended by striking out, in paragraph (21), "Federal Power Commission" and by inserting in lieu thereof "Federal Energy Regulatory Commission", and by amending paragraph (60) to read as follows:

"(60) Administrator, Economic Regulatory Administration, Department of Energy."

(g) Section 5315 of title 5, United States Code, is amended by striking out, in paragraph (60), "Federal Power Commission" and inserting in lieu thereof "Federal Energy Regulatory Commission", by striking out paragraph 102, and by adding at the end of the section the following:

"(114) Assistant Secretaries of Energy (9).

"(115) General Counsel of the Department of Energy."

"(116) Administrator, Energy Information Administration, Department of Energy."

"(117) Inspector General, Department of Energy."

"(118) Additional Officers, Department of Energy (4)."

(h) Paragraphs (135) and (136) of section 5316 of title 5, United States Code, are amended to read as follows:

"(135) Deputy Inspector General, Department of Energy."

"(136) Additional Officers, Department of Energy (10)."

SEC. 715. With the consent of the appropriate department or agency head concerned, the Secretary is authorized to utilize the services of such officers, employees, and other personnel of the departments and agencies from which functions have been transferred to the Secretary for such period of time as may reasonably be needed to facilitate the orderly transfer of functions under this Act.

SEC. 716. The Civil Service Commission shall, as soon as practicable but not later than one year after the effective date of this Act, prepare and transmit to the Congress a report on the effects on employees of the reorganization under this Act, which shall include—

(1) an identification of any position within the Department or elsewhere in the executive branch, which it considers unnecessary due to consolidation of functions under this Act;

(2) a statement of the number of employees entitled to pay savings by reason of the reorganization under this Act;

(3) a statement of the number of employees who are voluntarily or involuntarily separated by reason of such reorganization;

(4) an estimate of the personnel costs associated with such reorganization;

(5) the effects of such reorganization on labor management relations; and

(6) such legislative and administrative

recommendations for improvements in personnel management within the Department as the Commission considers necessary.

Sec. 717. The transfer of functions under titles III and IV of this Act shall not affect the validity of any draft environmental impact statement published before the effective date of this Act.

Sec. 718. As used in this Act (1) references to "function" or "functions" shall be deemed to include reference to duty, obligation, power, authority, responsibility, right, privilege, and activity, or the plural thereof, as the case may be; and (2) references to "perform" when used in relation to functions, shall be deemed to include the exercise of power, authority, rights, and privileges.

Mr. BROOKS (during the reading). Mr. Chairman, I ask unanimous consent that title VII be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

AMENDMENT OFFERED BY MR. MOSS

Mr. MOSS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. Moss: Page 127, after line 6, insert the following new paragraph:

"(118) Director, Office of Energy Research, Department of Energy."

Page 127, line 7, strike out "(118)" and insert in lieu thereof "(119)".

Mr. MOSS. Mr. Chairman, this amendment is in the nature of a technical and conforming amendment.

On yesterday we adopted language creating the Office of Energy Research within the Department. This amendment assigns the Director of that Office to a level IV in the Federal executive salary structure.

Mr. BROOKS. Mr. Chairman, will the gentleman yield?

Mr. MOSS. I yield to the gentleman from Texas.

Mr. BROOKS. Mr. Chairman, the gentleman from California (Mr. Moss) has stated the situation accurately. This is a technical amendment, and to that extent I have no objection whatsoever to the amendment.

Mr. HORTON. Mr. Chairman, will the gentleman yield?

Mr. MOSS. I yield to the gentleman from New York.

Mr. HORTON. Mr. Chairman, the minority is willing to accept the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. Moss).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. FUQUA

Mr. FUQUA. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. Fuqua: Amend section 702 by adding the following proviso: "Provided, That full-time temporary personnel employed at the Energy Research Centers of the Energy Research and Development Administration upon the establishment of the Department who are determined by the Department to be performing continuing functions may at the employee's option be converted to permanent full-time status within 120 days following their transfer to

the Department. The employment levels of full-time permanent personnel authorized for the Department by other law or administrative action shall be increased by the number of employees who exercise the option to be so converted."

Mr. FUQUA (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. FUQUA. Mr. Chairman, the intent of this amendment is to clarify and correct an unusual employment situation that exists at the Energy Research and Development Administration's five energy research centers so that the full-time personnel are transferred into the Department of Energy in full accordance with the regular established civil service procedures.

At the present time, approximately 330 Government employees at the five energy research centers are in temporary positions. Many of these temporary employees are working full-time on research work of a continuing nature. This situation has been created due to the fact ERDA is an exempted agency and, therefore, has greater flexibility to use temporary employees to perform full-time long-term continuing research projects.

These personnel are Government employees currently working at these centers and their services are fully authorized and appropriated in the annual ERDA bills. They are working on key research projects in the areas of Devonian shale, fluidized bed combustion, methane from coal seams, oil shale and enhanced oil recovery. Therefore, this amendment does not create any new positions at the energy research centers. This amendment does not require any additional funds or increase the operating costs of these centers.

What the amendment does is simply convert these full-time temporary employees performing critical ongoing research at these energy research centers to full-time permanent employees in accordance with standard civil service procedures. The net effect is that there is no increase in total employees.

It is important that personnel performing full-time research of a continuing nature at these centers be converted to permanent positions so that when the Department is established all personnel will be employed in accordance with civil service standards and procedures. ERDA as an exempted agency must transfer its employees to the Department in a manner consistent with civil service rules in order to maintain the complete integrity of the civil service system. This amendment will accomplish such a transfer by clarifying the unique situation at the energy research centers and is totally consistent with the committee's intent.

Mr. BROOKS. Mr. Chairman, will the gentleman yield?

Mr. FUQUA. I yield to the gentleman from Texas.

Mr. BROOKS. Mr. Chairman, I have no objection to the amendment.

Mr. HORTON. Mr. Chairman, will the gentleman yield?

Mr. FUQUA. I yield to the gentleman from New York.

Mr. HORTON. Mr. Chairman, I am willing to accept the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Florida (Mr. Fuqua).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. SYMMS

Mr. SYMMS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. Symms: At the end of title VII, add:

Sec. 719. (a) Notwithstanding other provisions of this Act, the Secretary is authorized an employee ceiling not to exceed for three years following enactment the combined employee authorizations of the functions and organizational elements to be transferred.

(b) The Secretary is authorized an average pay grade not to exceed for three years following enactment the average pay grade of the personnel authorized to be transferred.

Mr. SYMMS. Mr. Chairman, this amendment is self-explanatory.

What it simply does is put a cap on the total of number of people that can be hired and be working in the Department of Energy for 3 years. That is consistent with the other language in the bill, with relationship to the people who are guaranteed employment in this legislation from being transferred from other agencies.

Mr. Chairman, the intention of this bill, according to the proponents of the bill, is supposedly to cause the Government to have less conflicts and less duplication of employees' duties by putting all these agencies under one roof.

If this is the case, Mr. Chairman, I think the minimum we can do for the taxpayer, who has to pay this \$10.6 billion bill—a figure, I might add, that is nearly double what we pay for imported oil from Saudi Arabia each year—would be to put a cap on how many people they are going to hire in the Department of Energy.

Mr. Chairman, as I pointed out yesterday in the debate, the Federal Energy Administration has gone from zero people to 4,000 people in a 3- or 4-year period. I think it would behoove us in this House to put a cap on DOE to indicate to the administration that if they are going to be streamlining the Government, making it supposedly more efficient and supposedly causing it to do a better job in carrying out their responsibilities, that they do not need to hire a whole army of people, many of whom they should be getting rid of.

Therefore, Mr. Chairman, the total number would be 19,767, by the administration's own count.

I might add, Mr. Chairman, that none of these people will be producing energy, so I think this is the least we could do. I would favor putting the cap down to a much lower figure, but I think we have to start somewhere.

Mr. Chairman, I would ask the support of the Members in putting a cap on

the number of employees in DOE, as required by my amendment, and urge its adoption.

Mr. BROOKS. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, this amendment would freeze the employee level and the average pay level of this new Department for 3 years.

I do not believe that there is any necessity to do that. That is a function which should be considered each year as the Congress acts on appropriations for this purpose. There is no reason whatever to single out these particular employees of this single agency for this special treatment, and I would therefore oppose the amendment.

Mr. SYMMS. Mr. Chairman, will the gentleman yield?

Mr. BROOKS. I yield to the gentleman from Idaho.

Mr. SYMMS. Mr. Chairman, I thank the gentleman for yielding.

I think the point the gentleman is missing is that we are going to have people leaving the agency anyway from normal attrition, therefore, there is a turnover in any agency, of personnel.

What we are trying to do is to protect the taxpayer from having to pay for a whole mass of GS high-level bureaucrats. If they cut down the total numbers, they can keep it at the average at which it is today. Therefore, we are not going to fire those at the GS-5 level and keep those who are GS-13.

Furthermore, Mr. Chairman, my amendment is not going to freeze any individual employee. It is not going to stop promotions of people within the total average.

Mr. Chairman, I do not think that my amendment would have the effect which the chairman, Mr. Brooks, is talking about. I think it is the only way in which we can protect not only the taxpayer but the Congress itself from having a runaway department here that is going to run rampant.

Mr. BROOKS. Mr. Chairman, I thank the gentleman, but I ask for a "no" vote on the amendment.

Mr. HORTON. Mr. Chairman, I move to strike the last word, and I rise in opposition to the amendment.

Mr. Chairman, I am certainly in sympathy with the proposal of the gentleman from Idaho (Mr. SYMMS) to put a limit on the number of employees in the department because I do think that we are going to have to do something about the size of Government. However, I do not think that this is the way to do it, to single out this particular department and say that it can have no more employees than are authorized under this bill.

Mr. Chairman, we do have the process where they can come back each year to the authorizing committee and then also to the Committee on Appropriations, and I think that is a sufficient hold on the number of employees at the present time.

Further, Mr. Chairman, I think this would be unfair to a new department, in creating a new department, to say that it can have no more employees than those

that are authorized by the enabling legislation.

Therefore, Mr. Chairman, I would urge a "no" vote on this amendment, in spite of the fact that I am very much concerned about the size of the Government and the size of the number of employees that we have in the Federal Government.

If the Congress wants to enact some overall ceilings with regard to employees then that would be a different way to approach it. But we ought not to do it on this particular agency.

I also feel that this agency needs to have the opportunity to find out how best to perform its functions. It might be that after operating for a while, it can reduce the number of employees. However, it does have a tremendous responsibility. I believe the Congress has a hold on the number of employees through the authorizing and appropriating committees when this agency has to come before us for its budget authorizations.

Mr. SYMMS. Mr. Chairman, will the gentleman yield?

Mr. HORTON. I yield to the gentleman from Idaho.

Mr. SYMMS. Mr. Chairman, I thank the gentleman from New York for yielding to me.

I would just say that if we do not adopt this amendment I would predict that within a year from now this agency will mushroom like an atomic bomb and that we will have not 20,000 employees employed at the Department of Energy but perhaps 30,000 employees and that in just a matter of a few years the employees will number 40,000.

This is one way we can put a handle on them from the Congress.

If the purpose of the Carter administrative reorganization plan is to have fewer Government employees, less red-tape, and less harassment of the American people, then I believe we should adopt my amendment in order to reduce the number of potential employees, limit the bureaucracy as we should do.

Mr. HORTON. Mr. Chairman, I would state to the gentleman from Idaho that I am definitely for less bureaucracy, and for reorganizing the Federal Government so as to limit the number of employees. But, I repeat, I do not believe that this is the way we ought to do it in this instance. I repeat again, I believe that this agency will have a cap put on its personnel and budget because it does have to come back before the authorizing and appropriating committees to get the number of employees approved and get the budget approved. That would be the manner in which we should attack this.

Mr. SYMMS. Mr. Chairman, will the gentleman yield still further?

Mr. HORTON. Of course I yield further to the gentleman from Idaho.

Mr. SYMMS. Mr. Chairman, I appreciate the gentleman from New York yielding further to me.

Let me say that I believe the problem is that we are always hearing in this House that this is not the way to do it. I would agree that the new energy agen-

cy should not be singled out and I believe that every agency should have a cap put on them. We are facing a \$70 billion budget deficit. The only way we have of cutting that and reducing the budget is to cut the numbers of the Government employees. The only way that we can accomplish that is to limit the number of people who are hired. This will not hurt any of the present employees. This can be carried out as each person leaves for retirement or quits. It will only be for a limited time there, and in that way we can make sure that the hiring of employees not exceed the 19,000 plus as stated in my amendment.

Mr. HORTON. Mr. Chairman, I want to emphasize to the gentleman from Idaho that we have put a cap on the number of supergrades. We have tried to incorporate in the provisions of this bill all of the controls that we possibly can. I believe to place a ceiling on a new agency before it can even get started would be an unfair imposition on the agency.

Mr. Chairman, I would urge that the amendment offered by the gentleman from Idaho (Mr. SYMMS) be defeated.

Mr. BROWN of California. Mr. Chairman, will the gentleman yield?

Mr. HORTON. I yield to the gentleman from California.

Mr. BROWN of California. Mr. Chairman, I rise in support of the position taken by the gentleman from New York (Mr. HORTON), and in opposition to the amendment offered by the gentleman from Idaho (Mr. SYMMS).

Primarily, Mr. Chairman, I want to clarify a statement that was made by the gentleman from Idaho (Mr. SYMMS). Perhaps I misunderstood the gentleman. Did the gentleman from Idaho state that the amount of the budget of ERDA was twice that of the value of imported Arabian oil?

Mr. SYMMS. If the gentleman from New York will yield, I said Saudi Arabian oil.

Mr. BROWN of California. Just Saudi Arabian oil?

Mr. SYMMS. As a matter of fact, I can quote the statistics, if the gentleman from New York will yield still further.

Mr. HORTON. I will be glad to yield further to the gentleman from Idaho.

Mr. SYMMS. They show that this \$10.6 billion that we will spend for this budding new Department of Energy, for example is about double the value of all the oil the United States imported from Saudi Arabia last year.

The CHAIRMAN. The time of the gentleman has expired.

(On request of Mr. SYMMS, and by unanimous consent, Mr. HORTON was allowed to proceed for 1 additional minute.)

Mr. SYMMS. The \$10.6 billion exceeds the capital and exploration expenditures made by the U.S. petroleum industry to find and produce oil, gas and gas liquids. It exceeds by \$800 million the 1974 profits of the seven largest international oil companies.

So I think that it is a lot of money we are spending, and all I am trying to do is put a cap on it. These people are

going to do a lot of violence to the productive capacity of the country.

Mr. BROWN of California. Mr. Chairman, will the gentleman yield further?

Mr. SYMMS. I yield to the gentleman from California.

Mr. BROWN of California. Just to put this in perspective, I am glad that the gentleman carefully limited the figure on oil imports. The total value of the oil imports to the United States is much closer to \$30 billion than it is to half of the ERDA budget, although much of it comes from other places than Saudi Arabia.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Idaho (Mr. SYMMS).

The question was taken; and on a division (demanded by Mr. SYMMS), there were—ayes 23, noes 31.

Mr. SYMMS. Mr. Chairman, I demand a recorded vote.

A recorded vote was refused.

So the amendment was rejected.

AMENDMENT OFFERED BY MRS. SPELLMAN

Mrs. SPELLMAN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mrs. SPELLMAN: Section 704, line 17, delete the words "one hundred and twenty days" and insert in place thereof "two years".

Section 704, line 13, add the following new sentence: "Reemployment rights may only be exercised at the request of the employee."

Mrs. SPELLMAN. Mr. Chairman, my amendment is a simple one which helps clarify the rights of the Federal employee transferred into this new Department of Energy. Section 704 of the bill, as reported, grants to those employees reemployment rights for 120 days from the effective date of the bill. One hundred and twenty days is an unrealistically short period of time, and I propose to extend that time to 2 years, as is standard in the Federal Government.

As a new agency, the Energy Department will go through a "shakedown" period. In the beginning it will be staffed by those who were employed in the various agencies being consolidated into the Energy Department. After it has become organized, however, it is most apparent that not everyone will be needed, and staffing will be decreased. Reemployment rights insures that the employee can return to the position which he held originally, before he was "drafted" into one of the various energy agencies.

The granting of reemployment rights is a standard procedure in the Federal Government when employees are "lent" to another agency for a particular task. Title 5 of the Code of Federal Regulations, section 352.206, provides that reemployment rights in executive agencies normally expire at the end of a 2-year period, unless exercised before that time. I believe that this same 2-year period is appropriate for the new Energy Department. It gives the consolidated agency adequate "startup" time, and affords employees sufficient opportunity to determine whether they wish to stay with the Energy Department or to return to their previous agencies. One hundred

and twenty days will not give the employees, or the managers, time to find out what the Department is going to be like, or what the Department will actually need in the way of staffing.

Most importantly, the longer time period enables employees as well as the Department to know which positions will be downgraded and which will be abolished. With only 120 days, the employees are being asked to play Russian roulette with their careers. If they decide not to exercise their reemployment rights within 120 days, they may find themselves out of work after 1 year, as provided in section 702. Rather than take this risk, qualified employees who have worked in the existing energy programs will bail out before the 120 days expire. This could leave the new Energy Department without the expertise necessary to commence operation. In fact, I have learned that one employee union which represents over 2,500 FEA employees is recommending that they use those reemployment rights as soon as possible, unless the 120 days is changed to 2 years. Those FEA employees are a valuable asset to the energy program, and our efforts to develop a comprehensive energy policy would sorely miss their experience.

During testimony before the Employee Ethics and Utilization Subcommittee, Mr. Robert Allnutt, Acting Assistant Administrator for Administration, ERDA, noted that "There's no particular magic to 120 days." We should have a time limit for the exercise of reemployment rights—sooner or later, people should make a decision about going back, and not have the permanent right to go back to the old agency. But there should be a reasonable time limit, and not one as unrealistically short as the 120-day requirement.

Reemployment rights can be granted administratively if it is determined that the need exists after the 120 days provided for in the bill. However, this is a time-consuming process, and it does not afford the affected employee any assurance that he will have reemployment rights granted to him. The administrative provision does not prevent the potential "bail-out" problem.

The second part of my amendment corrects a problem that has cropped up in the Federal Energy Administration resulting from the exercise of reemployment rights. It appears that management has used this right to circumvent reduction in force and adverse action protections of the employee, simply by sending the employee back to the old agency. The employee has no appeal to this process. If the employee's position is being eliminated, or if the employee's performance and/or attitude are lacking, RIF and adverse action procedures exist for management to use, and under which the employee's rights are protected.

Reemployment rights were intended as a protection against interpretation in the careers of Federal employees, and as an inducement for employees to take a chance and accept a position in a new agency. Management has turned this shield into a sword to be used against its

employees and to circumvent their procedural protections. The result has been widespread distrust and low morale among the employees.

In order to prevent such abuses from occurring in the new Department, it is imperative that this legislation clearly specify that reemployment rights may only be exercised by the employee, if he or she chooses to return to the parent agency. My amendment does not shield poor employees, or employees whose positions are no longer needed—procedures exist for those instances. It simply insures that those procedures are used, and that exercise of reemployment rights are not forced on an employee by management.

I urge my colleagues to accept these changes in section 704.

Mr. HORTON. Mr. Chairman, will the gentleman yield?

Mrs. SPELLMAN. I yield to the gentleman from New York.

Mr. HORTON. I thank the gentleman for yielding.

Is this the amendment to make it 2 years instead of 120 days?

Mrs. SPELLMAN. It is that.

Mr. HORTON. This is the amendment we spoke about yesterday?

Mrs. SPELLMAN. The amendment we spoke about yesterday.

Mr. HORTON. As I understand it, if the gentleman would yield further, the present law is 2 years; is that correct?

Mrs. SPELLMAN. That is right. Title V of the Code of Federal Regulations, section 352.206, provides that reemployment rights in executive agencies normally expire in a 2-year period.

Mr. HORTON. With that understanding, Mr. Chairman, I am willing to accept the amendment. I commend the gentleman for presenting it.

Mrs. SPELLMAN. I thank the gentleman. I am very grateful to him.

Mr. BROOKS. Mr. Chairman, will the gentleman yield?

Mrs. SPELLMAN. I yield to the gentleman from Texas.

Mr. BROOKS. I thank the gentleman for yielding.

I will ask my distinguished friend, the gentleman from Maryland, do I understand that the reemployment rights to be exercised only at the request of the employee will not affect the right of the Department to terminate such employees.

Mrs. SPELLMAN. That is exactly right.

Mr. BROOKS. I have no objection to the legislation and thank the gentleman for her contribution.

Mrs. SPELLMAN. I am very grateful to the chairman for accepting it.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Maryland (Mrs. SPELLMAN).

The amendment was agreed to.

Mr. TUCKER. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise to clarify provisions of title VII, perhaps title VI, and other provisions of the act with regard to the transfer of personnel from the Federal Energy Administration to the Department of Energy as is con-

templated by those sections. I was recently informed that Mr. Gorman Smith, who has served in the FEA since its inception, may be serving currently illegally as Acting Deputy Administrator of the FEA since February of this year. I understand further that the position of Deputy Administrator of FEA created by section 4(c) of Public Law 93-275 (15 U.S.C.A. 763(c)), is filled through appointment by the President with the advice and consent of the Senate. However, no authority is contained in the statute for a temporary appointment. Moreover, the Vacancies Act (5 U.S.C.A. 3345-48) does not provide for the temporary filling of this position as the FEA is not an executive department as defined by 5 U.S.C.A. 101.

As my colleagues know, article II, section 2 of the Federal Constitution requires that all "Officers of the United States" other than those whose appointment is vested by law in some authority be nominated by the President and appointed with the advice and consent of the Senate. I am told that Mr. Smith has not even been nominated to the post of Deputy Administrator, much less confirmed by the Senate.

Apparently, the illegality of temporary appointments without legislative sanction was clearly stated in the case of *Williams v. Phillips*, 360 F. Supp. 1363 (D.D.C. 1973). Then President Nixon had appointed Mr. Phillips Acting Director of the Office of Economic Opportunity in January 1973, and had failed to submit his name to the Senate, although it was in session. Several Senators, including Vice President MONDALE, joined in a suit to have Mr. Phillips' appointment declared illegal.

Therefore I would ask the chairman of the committee two questions: Does either title VI or VII or any other section of the act authorize in any way directly or indirectly the circumvention of or exceptions to the Vacancies Act or authorize avoidance of congressional approval of any individual serving in the FEA in a position requiring congressional approval who has not received such approval?

Mr. BROOKS. If the gentleman will yield, to my distinguished friend I would say it was not the intent of the legislation to extend any rights to individual employees of the agencies that they have not had at any time and do not have now, nor to broaden nor to legalize any illegal holding of office or appointment that they now have or may have.

Mr. TUCKER. I thank the chairman. Therefore, if a person is "acting" in some position at FEA the permanent filling of which requires congressional approval and he does not have such approval, then neither title VI nor VII nor to the gentleman's knowledge any other provision of the Act would allow such person to be transferred to the Department of Energy without first securing such congressional approval?

Mr. BROOKS. We have no intent, I assure my distinguished friend, of correcting any deficiencies in their appointments by this legislation.

CXXIII—1096—Part 14

Mr. TUCKER. I thank the chairman very much.

#### AMENDMENT OFFERED BY MR. CONYERS

Mr. CONYERS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. CONYERS: On page 129, after line 6, insert the following new title:

#### TITLE VIII—PUBLIC ENERGY ADMINISTRATION

SECTION 801. (a) There is established within the Department of Public Energy Administration, at the head of which shall be an administrator appointed by the Secretary.

(b) Notwithstanding the provisions of section 205 of this Act, the President, in the exercise of his authority under section 13 of the Emergency Petroleum Allocation Act of 1973, may provide in the regulations promulgated under such section for the delegation of his functions under such section to the Public Energy Administration. The Administrator shall by rule provide for a separation of regulatory and enforcement function assigned to him.

Redesignate the following title or titles and sections thereof accordingly.

Mr. HORTON. Mr. Chairman, I make a point of order against the amendment.

The CHAIRMAN. The gentleman will state it.

Mr. HORTON. Mr. Chairman, first of all the language I have says that:

There is established within the Department of Public Energy Administration—

And I am not clear I understand what that means. Perhaps the amendment at the desk is different from the one I have, but if that is the way the amendment reads, I think there is a clarification needed in the amendment.

But the point of order I make refers to subparagraph (b) which says:

Notwithstanding the provisions of section 205 of this Act, the President, in the exercise of his authority under section 13 of the Emergency Petroleum Allocation Act of 1973, may provide in the regulations promulgated under such section for the delegation of his functions under such section to the Public Energy Administration.

It seems to me we are extending the provisions of section 13 of the Emergency Petroleum Allocation Act of 1973 and I do not think we have the authority to do that in this legislation.

Therefore I make a point of order against the amendment.

The CHAIRMAN. Does the gentleman from Michigan wish to be heard on the point of order?

Mr. CONYERS. Yes, Mr. Chairman. This amendment, as the Committee knows, is a revision from the original amendment that was debated in the Committee on Government Operations.

I would argue very strongly that it is merely taking a responsibility and a duty specifically provided in law. It really does not matter which law. If we will examine the act, we will find that we have borrowed authorities from agencies and Departments that have been created by law from before 1973 and after 1973, so that that has absolutely no relevance whatsoever.

The point that I think is critical to

whether this amendment is germane or not is whether or not it transfers an existing authority, which the gentleman by admission that it is already existing in the statute concedes.

I will say that the gentleman is right, that we should not have a Department of Public Energy. It was a typing error. It should be Department of Energy.

Mr. Chairman, I would rest my case in opposition to the point made against the amendment.

Mr. ECKHARDT. Mr. Chairman, I rise in opposition against the point of order.

Mr. Chairman, the amendment proposes to permit the President to exercise discretionary authority and does not really change the Allocation Act, because the President now has authority under that act. All the amendment, it seems to me to do, is permit him to exercise authority under existing legislation in a new way and in a way comparable to the manner in which he is permitted permissively to grant authority under the act.

Therefore, it seems to me to be wholly germane.

The CHAIRMAN. The Chair is prepared to rule.

The Chair has listened very carefully to the arguments made on behalf of the point of order and against it and is in agreement with the gentleman from Michigan, that the purpose of the bill is merely to transfer certain authorities that exist in other agencies and departments of Government and finds that the amendment of the gentleman from Michigan is consistent with that intent and, therefore, overrules the point of order.

Mr. HORTON. Mr. Chairman, will the gentleman yield?

Mr. CONYERS. I yield to the gentleman from New York.

Mr. HORTON. Mr. Chairman, can we get a clarification of section (a):

There is established within the Department of Public Energy Administration,

Mr. CONYERS. Yes.

Mr. HORTON. The amendment should be revised to include "Department of Energy."

The CHAIRMAN. Does the gentleman from Michigan ask unanimous consent to modify the amendment?

Mr. CONYERS. Mr. Chairman, I ask unanimous consent to make that modification.

The CHAIRMAN. Is there objection to request of the gentleman from Michigan?

There was no objection.

Mr. CONYERS. Mr. Chairman, this amendment, I think, may be one of the most important that will be considered in the entire bill. It is one that I have given a great deal of consideration to. I think it has attracted a great deal of discussion in the committee. It has been modified, so that in this Reorganization Act we give no new authorities that do not already exist in terms of the right and the ability of the President of the United States in any manner that he may designate to establish an exclu-

sive importing purchase authority for oil, crude oil, residual fuel oil, or refined petroleum products.

Mr. LEVITAS. Mr. Chairman, will the gentleman yield?

Mr. CONYERS. I yield to the gentleman from Georgia.

Mr. LEVITAS. Mr. Chairman, as I understand this amendment, it simply gives the President the right, if he so chooses, to delegate his existing authority under the Emergency Petroleum Allocation Act of 1973 and no more.

Mr. CONYERS. The gentleman is correct and it is discretionary.

Mr. LEVITAS. Mr. Chairman, if the gentleman will yield further, in the event the President should choose not to make such a delegation, there would be no requirement that it would have to be appointed to do nothing. It would only be if he made that delegation that a person would actually be appointed as Administrator, as I understand it.

Mr. CONYERS. This is a point, I must confess to my colleague, that I have not gone into; but I think that would be a correct interpretation.

Mr. LEVITAS. I just wanted to be certain that we would not have someone sitting around doing nothing unless things were delegated to him.

Mr. CONYERS. I agree with the logic of the gentleman.

Mr. LEVITAS. I think it is a constructive and worthwhile amendment.

Mr. CONYERS. I am pleased to hear my colleague say that, because I know of his concern about the whole subject of import authority.

I would say to the members of the committee that this is, of course, a very important subject that will be dealt with, I hope in more detail, in the appropriate committee which handles the substantive legislation. It is a matter of great import. We had a previous discussion about the nature and the size of our imported oil. We now know that approximately 50 percent of all the oil that is used in this country is imported oil. We had an extension of the calculation of the dollar figure in the previous discussion.

So, I think that this shows to all who are looking that we are not unmindful of the relationships between the OPEC countries and the major multinational oil giants who have heretofore entered into rather exclusive arrangements. This anticipates a thoughtful discussion and action on the part of the President and, incidentally, on the part of the Congress also, which would be required under this law to approve any action that he would make thereto.

Mr. BROOKS. Mr. Chairman, will the gentleman yield?

Mr. CONYERS. I yield.

Mr. BROOKS. I want to tell my distinguished neighbor and friend from Michigan that I appreciate his modifying this amendment and making clear what he is doing. He is giving the President an opportunity that he has now under the Emergency Petroleum Allocation Act of 1973. He has this opportunity and he has the option to create a new public energy administration. It is totally within the discretion, as far as filling the

office is concerned, of the Secretary of the Department of Energy. As to whether or not the President would exercise the authority is his own judgment, but it points up that possibility if the circumstances necessitate that type of action.

Mr. CONYERS. The Chairman is absolutely correct.

Mr. BROOKS. I say, with that understanding and with the very clear reading of this amendment, that it makes sense to me and I have no objection to it.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

(On request of Mr. MOORHEAD of Pennsylvania and by unanimous consent Mr. CONYERS was allowed to proceed for 1 additional minute.)

Mr. MOORHEAD of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. CONYERS. I yield to the gentleman from Pennsylvania.

Mr. MOORHEAD of Pennsylvania. Do I understand that the President can delegate in whole or in part? He would not have to if he did not want to have the United States Government be the sole procurer? It could be in competition with the normal market processes?

Mr. CONYERS. The gentleman is correct. It is discretionary, and it is also provided in the law that some of my colleagues had in mind, that the President should submit a report, but I am not sure that he ever did, 90 days after December 22, 1975, discussing and evaluating the feasibility of the subject matter that my colleague raised. So that, I think there would be that kind of discretion within my provision certainly, and I think it is the discretion that exists in the law presently.

Mr. HORTON. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I opposed the amendment that was offered in the full committee by the gentleman from Michigan, and I consistently opposed it. I opposed it when he first offered it, and the next day when it was offered again, when the committee reversed itself. I want to take a position here again in opposition to the amendment.

This is a very subtly drafted amendment, and I think we ought to know what we are doing. We have before us a proposal which seeks to open the door to the Federal Government becoming the sole purchasing agent of foreign oil. It is subtly drafted to relate to section 13 of the Emergency Petroleum Allocation Act, which gives the President standby authority to be the exclusive purchasing agent of foreign oil in an emergency.

The gentleman from Michigan is not trying to be cute. He comes in here and he says that this is the amendment that he offered, but does it in a different way. He wants to provide for this agency to be the sole agency for purchasing foreign oil.

That section which the gentleman refers to, section 13 of the Emergency Petroleum Allocation Act, gives the President standby authority to be the exclusive purchasing agent of foreign oil in an emergency. I emphasize again the emergency requirement. The gentleman

is seeking to establish an administration which would have the authority to do so under existing law. He would create a permanent administration for an emergency which may never arise. According to the gentleman's amendment, he would establish within the Department a Public Energy Administration. That would not have any function at the present time unless the provisions of section 13 of the Emergency Petroleum Allocation Act are brought to bear. Then the President would, in accordance with this law, delegate that responsibility to this administrator. So, in essence, he would be doing exactly what the gentleman proposed when he attempted to get his amendment through the committee. What he is doing, then, is attempting to set up an administration which would grow weary of waiting for that emergency to happen and then the gentleman could sponsor at some future date a bill to make that authority permanent and not related to an emergency. I think the amendment is wrong. I oppose the concept of the Government being the purchasing agent of foreign oil. I strongly believe that such a provision will create a momentum of its own to attempt to establish such purchasing authority as a continuing authority.

We have heard many arguments these past 2 days about the encroachment of the Government into our lives through this new department. If we want to insure that this will happen, this amendment will accomplish that.

Mr. Chairman, I would also point out that I have been informed under section 13(e) the FEA last year submitted a report in which they said that the Federal Government should not be the purchasing agent for foreign oil.

Mr. Chairman, I urge the defeat of this amendment. I think it is more than just a matter of organization. I think it is a matter of public policy, and I think that the consideration of this amendment is without merit. I urge its defeat.

Mr. CONYERS. Mr. Chairman, will the gentleman yield?

Mr. HORTON. I yield to the gentleman from Michigan (Mr. CONYERS).

Mr. CONYERS. I thank the gentleman for yielding.

Mr. Chairman, I would like to point out that the gentleman's arguments, which, of course, I think are appropriate to his position on the subject, would be better debated in another committee. We are not here to argue whether the standby purchasing authority of the President should be revoked or not. All we are doing is setting this up in the Department of Energy.

Mr. HORTON. The gentleman argued against me when I made a point of order. I agree with the gentleman that what we are doing here is establishing a matter which ought to be handled under another committee. I urged that it not be considered here. The gentleman argued against it. We are now considering it. I do not think we should be considering it. If we do consider it, I am opposed to it.

Mr. CONYERS. If the gentleman will yield further, we are not arguing whether or not we are for or against the standby

purchasing authority. That is the law now.

Mr. HORTON. That is right.

Mr. CONYERS. If it is the law now and the gentleman does not like it, we cannot repeal that law in this spirit on this day in this way.

Mr. HORTON. I certainly do not want to take the position through the gentleman's amendment that I support what the gentleman tried to do in the full committee. I am opposed to the administration being the agent for foreign imported oil.

Mr. MOFFETT. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Michigan (Mr. CONYERS), as modified.

The question was taken; and on a division (demanded by Mr. CONYERS) there were—ayes 16, noes 34.

Mr. CONYERS. Mr. Chairman, I demand a recorded vote.

A recorded vote was refused.

So the amendment, as modified, was rejected.

Mr. FISH. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I ask for the attention of the chairman of the full committee, the gentleman from Texas (Mr. BROOKS), and also for the attention of the gentleman from Florida (Mr. FUQUA), if he is in the Chamber at this time.

Mr. Chairman, I rise as a member of the Committee on Science and Technology, in the absence of a majority of the leadership of that committee, the chairman, the ranking member, and the chairmen of the two subcommittees that deal with energy, the gentleman from Washington (Mr. MCCORMACK) and the gentleman from Alabama (Mr. FLOWERS).

The reason I take this time is that the gentleman from Alabama (Mr. FLOWERS), the gentleman from Washington (Mr. MCCORMACK), and the gentleman from Florida (Mr. FUQUA) testified before the Committee on Government Operations at the time of the consideration of this bill, expressing their deep concern over ERDA's place in this bill and about the degree of emphasis on research, development, and demonstration in this bill. In other words, how the bill structures the Department to further the very programs which the Committee on Science and Technology has been encouraging ERDA to undertake over the last several years.

I think it is worthwhile, Mr. Chairman, to mention these facts. The gentleman from Florida (Mr. FUQUA), during the hearings on this bill, said that ERDA was just beginning to function as an agency.

If we recall, Mr. Chairman, originally its main emphasis was on nuclear power, and it is growing in its strengths in broad ranges of energy research, development, and demonstration. Mr. FUQUA voiced the concern that a further shake-up would set back the efforts to solve our energy problems.

Mr. Chairman, I quote the gentleman's testimony before Government Operations with reference to ERDA. He said:

It is just beginning to function now as an agency. To have it subjected, maybe, to another tearing apart and putting back together would leave a certain period of inertia that may not be in the national interest.

Secondly, the chairman of one of our subcommittees on energy, the gentleman from Alabama (Mr. FLOWERS), expressed his concern that energy research and development must be emphasized in any new department.

Mr. Chairman, reading from the testimony of the gentleman from Alabama (Mr. FLOWERS), he said:

One of the basic concerns I have is that R&D which is very important for our energy policy goals doesn't appear to be given the strong and central role it deserves, either in the bill or the explanation.

Further, in the course of the hearing, the chairman, the gentleman from Texas (Mr. BROOKS), asked a question of the gentleman from Washington (Mr. MCCORMACK):

The proposed organization of the Department of Energy places energy research and development in at least 5 separate units. Do you believe that this division of research and development may have an adverse effect?

Mr. MCCORMACK replied:

Definitely; I do. I think it would be catastrophic for this country to do that.

I believe it is essential that we create an under-Secretary having all responsibility for energy research, development and demonstration.

Mr. Chairman, my fear, as I stated before, is that the structure of this Department does not make possible needed emphasis on research, development, and demonstration.

We have, yesterday, the statement of the chairman, the gentleman from Texas (Mr. BROOKS), in which he stated:

As the gentleman knows, I did not prefer naming all of the Assistant Secretaries, but when the committee adopted an amendment allocating functions among the Assistant Secretaries, on a bipartisan effort by Republicans and Democrats, several of those Assistant Secretaries particularly the Assistant Secretary for Fossil and Nuclear Energy Technologies and the Assistant Secretary for Solar, Geothermal, Recycling, and Other Technologies, will have the responsibility for policy and management of research and development, including demonstration. About five Assistant Secretaries will have some research requirements and responsibilities.

That is why I am expressing the fear that we have fragmented something that we have nursed along for years. It could be answered that there is an Assistant Secretary for Policy in a position to coordinate the research and development, but I point out to the committee that, an Assistant Secretary is only the peer of the other seven who have responsibilities in this field, and certainly not a supervisory figure. I certainly would have preferred to have this whole emphasis placed under an Under Secretary.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. FISH was allowed to proceed for 2 additional minutes.)

Mr. FISH. So, Mr. Chairman, as I say, I fear fragmentation. I am not satisfied

that the degree of emphasis that is needed in the area of research, development, and demonstration to make meaningful strides toward solving our national energy problems exists in the legislation we are considering.

If I am mistaken, Mr. Chairman, I would certainly appreciate being corrected on this point.

Mr. BROOKS. Mr. Chairman, will the gentleman yield?

Mr. FISH. I yield to the gentleman from Texas.

Mr. BROOKS. Mr. Chairman, I would say to my distinguished friend, the gentleman from New York (Mr. FISH), that ERDA will have the benefit of screening their actions with the other agencies involved in energy and research. I think that the research and development will, as the gentleman now in the well says, be in five different administrations under the Department of Energy, but it will be coordinated. In addition to that, yesterday we created an additional Administrator for Research who, theoretically, will coordinate it for the benefit of the universities and scientists who benefit directly from it and make their great contributions to the Government.

Mr. FISH. The chairman is referring to the amendment offered by the gentleman from California (Mr. MOSS) that could be referred to as the university amendment. This concerns basic research, research in new areas, but I do not think it would have applicability to technologies aimed at commercial applications.

I will be happy to be proven wrong, if that is not the case, because I think it is very important that there is this total research, not in just research and development, but on practical demonstrations.

Mr. BROOKS. We require some demonstration projects. Research, development, and demonstration are included in the legislation.

Mr. FISH. So that the chairman, the gentleman from Texas (Mr. BROOKS) is confident we can move forward with research, development and demonstration under the structure of this reorganization bill without fragmenting the present responsibilities of ERDA?

Mr. BROOKS. I am.

Mr. FISH. I thank the chairman.

Mr. TREEN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I oppose this bill because I have grave doubt that it will be helpful in achieving its perceived purpose—solving our energy problems.

The issue posed is whether structural realignment is necessary or even helpful, or whether our needs can be met just as well by existing agencies with modifications to those agencies where needed.

We do have an enormous energy problem in this country, and the natural reaction is: Why not create a Department of Energy? One could also make the same kind of argument about our water problems. Why not create a Department of Water?

What I am suggesting is that there is no necessary logic in creating a new department based on the subject matter of a problem, rather than dealing with

that problem on a functional basis through established departments and agencies. The Interior Department is capable of handling Federal leasing of offshore lands for mineral production, with the President setting policy within the guidelines established by the Congress. The Commerce Department is capable of making decisions within its authority in a way that implements energy conservation policy. The Department of Transportation is probably best equipped to apply energy policy and regulations with respect to the various modes of transportation falling within its jurisdiction. The same situation exists with other departments and agencies.

If we are going to focus in on the energy "problem" why not draw into this Department all of the policymaking and regulatory functions of all other departments and agencies of Government that have an effect on the energy problem? To do that, of course, would be to strip virtually every department and agency of Government of substantial portions of their historic jurisdictions. Where does one draw the line? Is there any logical criteria for determining what authority should be given over to the Department of Energy and what should remain with established agencies? The difficulty of defining the division of responsibility between the Interior Department and the new Department of Energy with respect to Outer Continental Shelf leasing and production proves the point.

But what of the existing structure for handling the various aspects of our energy problems? Can one say that the Energy Research and Development Administration will be more efficient and productive if it is part of a Cabinet department? Will Outer Continental Shelf production be better handled by the DOE rather than the DOI? Will the Federal Energy Administration, with its pricing and allocation powers, really function better in a new department? Will nuclear policy and regulation be enhanced by putting some authority over nuclear power in a new department?

I have seen nothing that convinces me that the answers to these questions are in the affirmative. Those who advocate a change in existing structure have the burden of proof. Without that proof should we make changes which will, at a very minimum, result in a period of great uncertainty because of inevitable transitional problems?

I have two other concerns. First, it seems to me that we should defer consideration of the creation of a new Department of Energy at least until the Congress and the President have worked out our overall energy policy. This will happen over the course of the next few months as the Congress takes up the administration's energy proposals. It seems to me that we would have a much better idea of the kind of structure we need for the implementation of energy policy after we have shaped that policy.

Finally, and perhaps most important, I fear that the creation of a Department of Energy will institutionalize Federal involvement in all aspects of energy production and use. It is my hope, shared in

by many in the Congress, that we will be able to diminish Federal control over the energy industry as we work our way out of our current problems. I doubt that this will ever happen if we create a Department of Energy with the usual voracious appetite of departments to increase their spheres of power and responsibility. The bureaucracy will feed upon itself, and our hopes for returning to a productive free market with regard to oil, gas and other forms of energy will be shattered.

What happened to Presidential candidate Jimmy Carter's hand-wringing about the growing Washington bureaucracy? His campaign promises to get the Government out of our lives? His rhetoric about faith in the American people to make their own decisions? His vow to cut down on the size of the Federal Government? Are we to assume that these promises are to be sacrificed to a "new enlightenment" like the written promise during the closing days of last fall's campaign to deregulate the price of new natural gas?

I am not trying to make a case for the immediate destruction of all Government instrumentalities that presently deal with aspects of the energy problem. I am trying to sound the alarm about creating another governmental octopus which could strangle the economy of this country by completely programing that economy through the control of its lifeblood: energy.

The CHAIRMAN. The Clerk will read. The Clerk read as follows:

#### TITLE VIII—EFFECTIVE DATE AND INTERIM APPOINTMENTS

Sec. 801. (a) The provisions of this Act shall take effect one hundred and twenty days after the Secretary first takes office, or on such earlier date as the President may prescribe and publish in the Federal Register, except that at any time after the date of enactment of this Act, (1) any of the officers provided for in title II and title IV of this Act may be nominated and appointed, as provided in those titles, and (2) the Secretary may promulgate regulations pursuant to section 708(a)(2) of this Act at any time after the date of enactment of this Act. Funds available to any department or agency (or any official or component thereof), functions of which are transferred to the Secretary or the Commission by this Act, may with the approval of the Director of the Office of Management and Budget, be used to pay the compensation and expenses of any officer appointed pursuant to this subsection until such time as funds for that purpose are otherwise available.

(b) In the event that one or more officers required by this Act to be appointed by and with the advice and consent of the Senate shall not have entered upon office on the effective date of this Act, the President may designate any officer, whose appointment was required to be made by and with the advice and consent of the Senate and who was such an officer immediately prior to the effective date of the Act, to act in such office until the office is filled as provided in this Act. While so acting such persons shall receive compensation at the rates provided by this Act for the respective offices in which they act.

Mr. BROOKS (during the reading). Mr. Chairman, I ask unanimous consent that title VIII be considered as having been read, printed in the Record, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

AMENDMENT OFFERED BY MR. BROYHILL

Mr. BROYHILL. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BROYHILL: On page 130, after line 11, add the following new title:

#### TITLE IX—SUNSET PROVISIONS

Sec. 901. The provisions of this Act shall expire on December 31, 1982.

Mr. BROYHILL. Mr. Chairman, this is a very simple amendment. This is a sunset amendment. We have been hearing a lot about proposals to have the life of agencies come to an end at some point in time. A number of Members are offering bills that would accomplish this purpose, so I am offering a sunset amendment to this bill which would say that the authorities and provisions in this act would expire in about 5 years.

What it would do is it would force the Congress to review the activities of this agency. It would not necessarily mean that the new Department would come to an end. I am sure that in the 97th Congress the Congress will be conducting full-scale hearings and will be coming in here with legislation either to continue the agency, to revise it, to amend it, or whatever.

Mr. Chairman, this is a \$10 billion agency at the outset with 20,000 Federal employees, an agency with awesome power to control energy which is needed to operate our economy. Energy is needed to keep us working in this country, and this new Department and the Secretary of this Department will be able to control when we will have energy available, where we are going to obtain energy, what price will be paid for that energy, and who will produce it. Energy is the lifeblood of our economy. Without adequate energy supplies, jobs will be lost, standards of living will drop. He who controls energy supplies in this country controls the economy. All I am asking is that the Congress review the activities of this agency. The Congress does a very good job of setting up different offices, agencies, and departments of the Federal Government, but the Congress does a very poor job of reviewing the activities and the track records of those agencies. I would urge that we adopt this sunset amendment to insure that the Congress will do an adequate job of legislative review and oversight at the proper time.

Mr. MOSS. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I invite the attention of all Members to the language in section 623 at the top of page 116:

Appropriations to carry out the provisions of this Act shall be subject to annual authorization.

It means that there are going to be two oversights—the annual authorization of funds and the annual appropriation of funds.

We are starting down a path here that troubles me. Yesterday we adopted the amendment that requires that all rules and regulations be in a state of suspen-

sion for 90 days while the Congress is in session. I do not know what happens when we are out of session for 90 days as we were last year. I suppose the rules and regulations would wait then for 180 days or more before they could become operative. But now we are going to have whole departments cease to exist unless we reauthorize the entirety.

Members who have been around here very long know exactly what is going to happen. We will end up with every department and agency operating under a continuing resolution, and there will be no sense of stability to government. This is one of those packages that looks attractive on the outside, but if we think about it at all and apply just a little of the facts that we have learned in Government or in business or in any other activity, we know we do not achieve efficiency through creating uncertainty. This amendment would create a great deal of uncertainty.

We have adequately assured a review by the Congress both through the authorizing mechanism and through the appropriating mechanism. Let us not go to this ridiculous extreme of calling it "sunset" but let us go beyond the sunset to the rule of reason and adopt reasonable laws, not ridiculous ones.

Mr. CUNNINGHAM. Mr. Chairman, I rise in strong support of the amendment offered by my colleague, the gentleman from North Carolina (Mr. BROYHILL). His amendment is simple. It sets a date when the Department of Energy will close its doors if it has not proven to be an effective addition to our Government's policy machinery.

Sunset legislation was a concept I strongly supported as a member of both Houses of the Washington State Legislature. I did so at that time because I saw that a government agency tends to grow and have a life of its own, once it is created. It becomes almost unstoppable, like Frankenstein's monster. It creates its own followers in the community, its own fans in legislative bodies that fund it, and a safe and secure home for numbers of bureaucrats whose jobs are tied to its continued life.

Setting a date for agency termination is even more vital when it comes to Federal legislation. For, here in Washington, D.C., more agencies come into life and people back home tend to forget what they cost and the burden these agencies place on their lives. The result is that the public becomes more and more unhappy about a government that does not listen and that seems not to care.

The Department of Energy is created to set policy and to unite us behind certain goals that sound noble. I hope it does not become a pest to the consumer and the businessman, as so many have in the past. We can help to guarantee its responsiveness to us by approving the Broyhill amendment and other amendments that would give Congress a vehicle to bring the agency back to a common-sense approach if, like so many in the past, this agency begins to wallow in its own power.

I urge my colleagues to join me in supporting this excellent amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from North Carolina (Mr. BROYHILL).

The question was taken; and on a division (demanded by Mr. ROUSSELOT) there were—ayes 36, noes 22.

Mr. BROOKS. Mr. Chairman, I demand a recorded vote.

A recorded vote was refused.

So the amendment was agreed to.

Mr. FINDLEY. Mr. Chairman, the more I ponder the energy requirements of our Nation, the more convinced I am that we must place our confidence in the private sector, as contrasted with the authority of Government.

The principal function of Government in economic life should be to establish and maintain adequate levels of competition in the private sector—and then permit the disciplines of competition and profit incentive to produce the supplies that the public demands.

This bill to establish a Department of Energy moves, I feel, in the wrong direction.

It will have these bad effects:

First. It will tend to institutionalize and therefore make permanent the energy crisis;

Second. It will establish a bureaucracy with a built-in bias for permanent Government management of energy in all its aspects; and

Third. It will inhibit the functioning of marketplace disciplines.

Government has already thrown too many roadblocks in the way of energy development and distribution. Controls over pricing in interstate commerce of natural gas supplies have made this form of energy unnecessarily scarce. Restrictions on pricing of crude oil produced in the United States have discouraged production tended to increase our dependence on outside supplies.

Government is already involved too heavily in the business of regulating the energy business. And Government regulation is a powerful opiate. Witness the recent tendency of sectors of the petroleum industry to ask for extensions of the Federal energy allocation system. One can even hear murmurs of applause and appreciation for the Federal Energy Administration from the giants of the petroleum industry.

In my view, Government action for the most part will tend to delay the constant and essential readjustment of our energy system. Government edict will lie between the user and producer to the disadvantage of both.

Given the opportunity, our marketplace system will produce adequate supplies of energy indefinitely. Of that I am confident. As one form becomes scarce and therefore more costly, other forms will become profitable.

The FEA was established as a short term emergency authority. There is nothing temporary or short term in respect to the proposed Department of Energy. It will be here to stay. Its employees will busily construct plans, proposals, and authorities to justify their existence for evermore.

Once the Department of Energy is es-

tablished our Nation will never again be without an energy crisis. You can depend on that.

Mr. DRINAN. Mr. Chairman, I rise in strong support of the Conyers amendment to the Energy Organization Act (H.R. 6804), which would authorize the Federal Government to bargain as the sole importer of foreign petroleum.

The time has come for us to seriously question the symbiotic relationship between the multinational energy corporations and the OPEC cartel—an anti-competitive arrangement by which bargaining for lower prices has been virtually eliminated at the expense of the general public. We must admit that the oil giants not only lack the leverage to stand up to OPEC, but an economic incentive to do so.

Faced with no threat of being undercut by competition from fellow importers, the energy corporations are content to allow high-priced OPEC oil to artificially inflate the price of domestic oil and natural gas. Considering that five of the largest oil importers control 42 percent of our domestic crude reserves, it can hardly be in their interest to provide a competitive rate when they can merely pass along price increases to independent refiners and other purchasers of foreign oil.

Tolerating the whims of the OPEC cartel is not just the easy way out for the "Seven Sister" companies of energy importation: it is a corporate windfall. The hard-pressed American consumer—as might be expected—comes out on the short end.

The response to this problem embodied in the Conyers amendment is not a radical one and is certainly nothing new. Economists have long recognized that only if U.S. oil purchases are made en bloc can the OPEC cartel be effectively countered, and amorphous authority for the Government to do so was granted under the Energy Policy and Conservation Act of 1975 as signed by President Ford. The language proposed by my colleague from Michigan (Mr. CONYERS) seeks to clarify this discretionary authority, delineate its administration by the Department of Energy, and provide assurances that the public interest will be better protected and future energy costs minimized in accord with the expressed will of Congress.

I commend the gentleman for bringing this amendment to the floor, and reaffirm the support of the proposal which I initially expressed in the full Committee on Government Operations. This is legislation which is long overdue, and an effort which we owe to those millions of Americans who needlessly pay the price of economic collusion. I urge its passage.

Mr. Chairman, I might also give mention to an amendment to H.R. 6804 offered by the gentleman from California (Mr. MOSS) and adopted by the House yesterday, which would establish an Office of Energy Research within the Department of Energy. There exists an urgent need to coordinate energy R. & D. among the jurisdictions of the several

Assistant Secretaries of Energy, especially as this relates to basic supporting research in areas such as superconductivity and plasma physics. The proposed Office would serve this function in a coordinating capacity at the secretarial level, and thus I urge continued support of the Moss amendment in conference as an effective means of providing continuity of research in the basic energy sciences.

Mr. McDONALD. Mr. Chairman, the proposed Department of Energy reminds me of the proverbial bride who has been left standing at the church with no husband in sight—all dressed up and no place to go. This legislation guarantees 20,000 employees and \$10.6 billion kindling money for an agency whose purpose and goals are yet to be determined by this Congress. It seems to me that we are approaching this challenge backwards. Why, when we have in committee the most complex and far-reaching piece of energy legislation since World War II, should we put the cart before the horse, and lock this new Department into a process which may not fit the ultimate policy.

Indeed there are, I would wager to guess, such profound differences of opinion in this body as to the role and extent of the Government's rightful place in the energy-producing sector that any agency would be justly confused over its mandate.

For example, is the new Department to be the seedling from which a Federal Oil and Gas Company—FOGCO—would begin? Clearly President Carter's recommendations for Outer Continental Shelf basing make this a possible conclusion.

Or is the Department merely to be the central coordinating agency for a wide variety of limited energy research programs, with the private sector taking the lead in the exploration, development and sale of natural gas, oil, coal, and soon futuristic forms of energy supply.

As an example, take natural gas. The President's policy calls for Government control not just of the wellhead price for interstate gas, but also for Government regulation of and thus a wellhead price cut for that gas sold intrastate. Many Members of this body think that the whole idea of the Government controlling natural gas prices is harmful.

Members who oppose this extension of Government power, as I do, point to the fact that Government intervention in the interstate market has caused the supply of this safe, clean-burning fossil fuel to be cut; caused a crisis last winter which resulted in perhaps as many as 2 million being laid off, and for all this the price to heat a household in the Midwest and Northeast skyrocketed.

Then, during the darkest and coldest days of the crisis, it was to the free market priced intrastate gas that our Government turned and called for help and was rescued.

The economic arguments for deregulation are not difficult, but they are elusive. Why do the Government and some of the big oil companies believe that price controls are the answer? It is simple. The Government does it because they do not understand the economic realities involved, and the few major oil companies

support government price regulation because they do understand the economic realities and what it means to their vested interests.

First, let us deal with the Government's misconceptions. They fear two things: That there is not enough natural gas in the United States, which geologists tell them is wrong, and that the price to supply what is there will be too high for the consumer.

There is no problem with the supply of natural gas in the United States. ERDA has a study which shows that at free market prices of \$2.25 over 60 years of natural gas is easily available. If that price rises to between \$2.50 and \$3 per thousand cubic feet another 20,000 trillion cubic feet or 1,000 years of natural is readily available from geopressurized methane. This ERDA study simply confirms what the best economic advice has said for years—natural gas is plentiful at reasonable prices.

Still the question of consumer costs remains to be answered. To understand the problem one must realize that the consumer gas bills have skyrocketed not due to the price of domestic natural gas, but due to the marginal supplies of extremely high priced—that is over \$3 per thousand cubic feet—foreign substitutes such as liquefied natural gas. Thus the prices paid for these additional increments were much higher than the decontrolled price of domestic natural gas. Thus, the price controls stopped the relatively cheaper domestic natural gas from being produced and supplied and instead, forced the consumer to substitute much higher priced foreign source fuels.

One other problem added to the increase in natural gas prices. The pipeline costs which are the same no matter how much gas is flowing, had to be amortized over fewer units of gas and thus the price of domestic natural gas was increased to pay for the unused capacity of the pipelines.

Some of the major oil companies are only too familiar with the economics involved. Mobil intends to spend \$4 to \$6 billion in the next 5 years to develop high-priced Indonesian gas. Phillips Petroleum has multibillion-dollar programs for high priced North Sea oil and gas and also for Indonesian natural gas. El Paso Natural Gas Co. has a billion dollars firmly committed to buy liquefied natural gas tankers to be used to import high-priced foreign fuel. Exxon has enormous investments tied up in high-priced synthetic natural gas.

All of these substitutes will cost more than the current free market price for natural gas. Thus their interest lies in stopping the development of the vast quantities of domestic natural gas. To do this, they support the Carter administration's proposed \$1.75 per thousand cubic feet ceiling. And the consumer will pay extremely high marginal cost for foreign substitutes. Only the Government and the few major oil companies who bet on foreign gas substitutes over domestic natural gas come out ahead under price controls. Small domestic independents and, more importantly, the consumer, loses.

Clearly there are some difficult policy decisions to be made before we hastily

grant to one man, and a political appointee at that, the potentially incredible powers over energy supply and price. Considering the lack of policy direction at this point, such a move would be folly. Let us at least forge the policy and the goals before we invent the structure in which they are to be housed.

Mr. KEMP. Mr. Chairman, I rise in opposition to this legislation creating a new \$10 billion bureaucracy, the Department of Energy. Far from helping America meet its need for additional supplies of energy, the creation of such a bureaucracy will have exactly the opposite effect. It will reduce even further the available supplies of petroleum and natural gas by perpetuating the Government policies which created the present shortages in the first place.

Our present shortage of oil and natural gas is entirely the creation of Government price controls. If the price of natural gas, for example, had not been held to the artificially low price of 52 cents per thousand cubic feet for many years, this country—and especially western New York—would have the natural gas it so desperately needs. As it now stands, western New York is importing natural gas from Canada at well over the price set domestically by the Federal Power Commission—at times as high as \$3.70 per thousand cubic feet.

Those who say we are running out of natural gas and point to the steady reduction in proven reserves are totally ignoring the fact that proven reserves relate to an artificially low price. There are estimated to be anywhere from 100,000 to 250,000 trillion cubic feet of natural gas in the Texas gulf coast region alone, at a price above the FPC controlled price, of course. Even if we assume that some of this gas is beyond the reach of current technology, this would be more than enough to last the country for hundreds of years, even at increased rates of consumption. And the same goes for certain oil reserves as well.

There is only one thing which prevents the development of these new energy supplies: the right price.

What is the right price? Some people think it would be some astronomical figure which would totally impoverish the Nation. In fact, a price of just over \$2 per thousand cubic feet would be very likely to bring a considerable amount of new natural gas on line. The present decontrolled price for natural gas sold intrastate in Texas, for example, is only around \$1.70 per thousand cubic feet. At a price of about \$2.50 per thousand cubic feet there is no doubt whatsoever that drillers would be able to begin exploiting the vast reserves of gas which lie at depths of 15,000 feet or more. Consequently, on behalf of the consumers of natural gas that I represent, and the workers whose jobs are at stake, we must stop this insanity of discouraging domestic exploration.

I personally have no doubt whatsoever that the retail price of natural gas would fall within a short time after drillers had recovered their initial investments, and we would be left with a price for natural gas which is lower than the present price—which in many cases ranges way up over \$3 per thousand cubic feet at the

retail level now. And the decontrolled price would certainly be less than the price frequently discussed for importing liquid natural gas from Algeria, at as much as \$4 per thousand cubic feet, or manufacturing synthetic natural gas at even higher prices.

The reason why I am so concerned about this is that I represent an area of the country which is very heavily dependent on uninterrupted supplies of energy, to heat our homes and keep our businesses and factories running. The energy issue is the jobs issue, and I intend to see that the workers and homeowners in my district do not lose their jobs or their fuel supplies because of government policies which prevent them from getting adequate amounts of energy at reasonable prices.

The alternative to energy decontrol would, in fact, lead to a vast increase in energy costs considerably above the free market level. Liquid natural gas, synthetic oil and gas, atomic energy, and other exotic energy sources all would cost more than the decontrolled price of domestic oil and natural gas. Big energy corporations know this and are gambling billions of dollars on being able to get these higher prices, either because a Government-caused crisis necessitates their use at any price, or because the Government subsidizes their production sufficiently to lower the retail price. This is especially true in the areas of energy research and development, where companies openly demand subsidies for atomic energy or synfuel development which cannot possibly be justified otherwise. Furthermore, many of these exotic forms of energy are among the most environmentally harmful alternatives that exist. I say, why take the risk if we do not have to?

We can assume that the new Department of Energy will not become the leader of a decontrol solution for energy. Thousands of bureaucrats already depend for their jobs on the maintenance of the cumbersome and complex Government price controls which presently exist. Can we reasonably assume they would support elimination of these controls when they know it will cost them their jobs? Experience teaches us that they are very unlikely to do so.

As a matter of fact, there is already evidence that officials of the Energy Research and Development Administration are deliberately suppressing evidence which supports the availability of natural gas at a slightly higher price. According to the Wall Street Journal, an ERDA study called the Market Oriented Program Planning Study calculated that at \$2.25 per thousand cubic feet the Nation would be awash with natural gas, and at \$2.50 to \$3 completely engulfed with it. Since this study contradicted the ERDA position, a revised study was ordered to refute the first one. The new study supported ERDA's view that decontrol would mean gas prices vastly above the \$2.50 level.

Prof. Milton Friedman has called the Department of Energy a Trojan horse, because it will enthrone a bureaucracy with a vested interest in expanding the Government's control over energy. He feels—and I think rightly—that this De-

partment will just be one more step on the road to a totally controlled economy from Washington, D.C.

As I have noted, the big corporations do not dislike the Department of Energy idea at all. They are the recipients of Government contracts and subsidies for energy research and development. The people who need to be encouraged are the independents, who go out and risk all in an attempt to find new sources of energy. But to make them take such risks, artificial pricing is a total discouragement.

We do not need an energy czar. We do need less Government interference with the price mechanisms in the market which provide incentives not only for conservation, but for production of new supplies of existing and alternative sources of energy. Nor can the cost of a new Energy Department be justified on grounds of cost efficiency. As the Wall Street Journal recently noted:

A Chevron statistician has been sizing up the \$10.6 billion budget of the proposed new Department of Energy. For example, it is about double the value of all the oil the U.S. imported from Saudi Arabia last year. It exceeds capital and exploration expenditures by the petroleum industry to find and produce oil, gas and gas liquids in the U.S. in 1975. It exceeds by \$800 million the 1974 profits of the seven largest international oil companies; Chevron can't resist adding that those profits were described by a U.S. Senator as "obscene." It is equivalent to about \$3 a barrel of domestic crude oil production, which means, if our own arithmetic is correct, that you could decontrol all domestic crude oil prices and still end up paying less for oil than the federal energy bureaucracy costs. And one should keep in mind that the \$10.6 billion is only the cost of the newly born baby DOE. Think what it will cost when it grows up!

And even if the cost could somehow be justified, I do not believe we can safely vest such incredible power in the hands of one individual as the Secretary of Energy will have. As my colleague, Mr. ARMSTRONG, of Colorado, recently noted:

The truly ominous aspect of H.R. 6804 is the extent to which it will consolidate unprecedented power over energy producers and consumers in the hands of one person. In a Nation whose very essence is freedom, Congress should go slow in giving any person the kind of power granted to the new Secretary of Energy under this legislation:

Oil pricing and allocation, conservation, coal utilization, strategic petroleum reserve, energy information, resource development; Natural gas regulation, interstate wholesale electric rate setting, and hydroelectric licensing;

R. & D. in fossil, nuclear, fusion, solar, geothermal, and conservation—energy efficiency—uranium enrichment and production, military applications and safeguards, environment and health research;

Power marketing functions—the power marketing functions of Bonneville, Alaska, Southwestern, Southeastern Power, and Defense Electric Power Administration; and the marketing power by the Bureau of Reclamation—coal mine production research, fuel data, production goals;

Naval Petroleum Reserves No. 1, 2, 3, and Naval Oil Shale Reserves No. 1, 2, 3;

Pipeline valuation, pipeline rate setting; Industrial energy conservation program; New buildings energy efficiency standards—program will continue to be carried out through HUD;

Competitive bidding among companies for Federal leases, use of alternative bidding

systems, production rates, due diligence requirements that mandate development of a lease within a certain time limit, distribution of lease revenues; and, the authority to approve all economic terms and conditions of leases;

Authority over electric utility mergers; Authority to approve loans made by the Agriculture Department's Rural Electrification Administration for construction, operation, or expansion of utility plants, and a role in advising the Department of Transportation on automobile efficiency standards;

A total of 20,000 employees and a \$10.6 billion budget.

It sounds appealing to vote for an agency that might help coordinate energy policies in a comprehensive manner, but this goes too far and costs too much.

Lastly, I would like to say that I do not believe the panic atmosphere created by President Carter in proposing this legislation is at all justified. America has had less than a dozen years supply of oil left for a hundred years. As early as 1886 the Government was concerned about developing synthetics for when the crude oil production ran out. In 1891, the U.S. Geological Commission stated that there was little likelihood that oil existed in Texas. And in 1914 the Bureau of Mines estimated total future U.S. production of crude oil at 6 billion barrels—an amount which has been produced every 20 months for years. This doomsday syndrome is a consistent pattern in American history which has always been proven wrong.

All that is needed to solve the energy problem is to turn the creative and productive powers of the incentive system. The solution does not lie in institutionalizing a Government energy bureaucracy and spending more than \$10 billion of the taxpayers hard-earned money.

Mr. FORD of Michigan. Mr. Chairman, I favored the amendment offered by the gentlewoman from Maryland (Mrs. SPELLMAN) as previously adopted. I was very concerned over section 704 of the measure calling for the creation of a new Department of Energy. As you know, section 704 of this bill, as reported, granted employees from the consolidated agencies reemployment rights for only 120 days from the effective date of the act.

I believed the 120-day period was too short and I raised the question of what constitutes a reasonable period of time in which to extend employees' reemployment rights.

Title 5 of the Code of Federal Regulations, section 352.206, provides that reemployment rights in executive agencies normally expire at the end of a 2-year period unless exercised before that time. I felt this 2-year period was also appropriate for the new Department of Energy. As to be expected, the Department of Energy, as a new agency, will be going through a transformation period. In the beginning, all the employees of the various agencies being consolidated will be absorbed by the new Department. The Department will discover that all these employees will not be needed or new employees will discover that they are unhappy in their new duties. I believe, therefore, that a 2-year period will be ideal for the agency to establish itself and give employees the opportunity to evaluate their positions and seek employment elsewhere if desired.

A 2-year period will benefit the Department of Energy. Two years will give employees as well as the Department the time necessary to know which positions will be downgraded or eliminated and allow employees ample time to make reasoned decisions. The 120 days would not have given employees the time necessary to make decisions which affect their careers. If an employee had decided not to exercise reemployment rights within the 120 days as would have been required, he may have found himself out of work after 1 year as provided in section 702. Rather than take this risk, qualified employees who have worked in the existing energy programs would have bailed out before the 120 days had expired. Thus, the new Department would have been deprived of the expertise necessary to begin operation.

I believe my colleague's amendment eliminated another weakness of section 704 that was a great concern of mine. The bill, as reported, did not clearly specify that reemployment rights may only be exercised by the employee if he or she chooses to return to the parent agency. This amendment makes this distinction in order to prevent reoccurrences of past abuses in this area.

Several past abuses by the Federal Energy Administration quickly come to mind. One has resulted in a suit's being filed on behalf of a former FEA employee by the Treasury Employees Union. Another example involves an employee of the FEA whose reemployment right was exercised because of the agency's determination that her performance and attitude were lacking. FEA management decided that instead of proposing an adverse action they would simply return her to her former agency. By taking this action, the FEA deprived the employee of the procedural protections to which she was clearly entitled.

Mr. Chairman, as we all know, an adverse action can only be taken against an employee when it promotes the efficiency of the service. The employee must be afforded notice and a hearing. This employee would have preferred to remain with the FEA and defend her position. The FEA, however, successfully avoided proving the merits of their case by shunting her back to her original agency.

Reemployment rights, Mr. Chairman, were intended as a protection against interruptions in the careers of Federal employees and, moreover, as an inducement for employees to take a chance and accept a position in a new agency. This amendment prevents this shield from being turned into a sword and used against the employees of the Department of Energy to circumvent their procedural protections.

For these reasons, Mr. Chairman, I am pleased this amendment was adopted.

Mr. ROUSSELOT. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, H.R. 6804 is a bad bill and I cannot encourage its enactment.

There are a number of reasons why I believe this legislation is ill-advised and should be voted down. Granted, that consolidation of all energy functions of the Federal Government has some ap-

peal. H.R. 6804, however, goes much too far, and will discourage production in the private sector.

First, the legislation is premature. The administration has submitted a series of energy proposals which Carter himself termed "one of the most complicated legislative packages that a President has ever sent to Congress." We are now in the middle of considering this package, as well as other alternative proposals. It is inappropriate, in my view, to make a massive overhaul in the administrative branch of government in order to accommodate an energy policy which has not yet been firmly established.

Second, this legislation takes one more step toward omnipotent government.

We have heard it said often in the past couple of months that this agency will cut red tape, reduce paperwork, perhaps even reduce the number of people who have overlapping responsibilities in the general agencies to be combined. Still 3 months after the introduction of this proposal there are no plans or specifics to accomplish these worthy goals. In fact, all we have found out about internal operations is that no one will be fired or drop a grade for at least a year, and \$2 million will be needed for moving expenses.

Nobel Prize-winning economist Milton Friedman has recognized the ominous portents of this bill and has warned that—

A Department of Energy has the potential of being the most powerful, and the most harmful, of all Federal agencies. It would control the life-blood of our economic system. Its tentacles would reach into every factory, into every dwelling in the land. Our economic system has been able to survive the U.S. Postal Service. It has been able to survive Amtrak. I suspect that it will survive Conrail—though Conrail is potentially more harmful than its predecessors. But can our economic system survive Federal control of the pricing, the production, the distribution, the import of energy?

Do not be misled into supposing that the energy problem is a purely technical problem that engineers can solve. No government engineer is in as good a position as you are to decide whether you would rather use expensive energy for heating your home, driving your car, or helping to produce one or another product for you to buy. No government engineer is in as good a position as the owner of a factory to choose the most economical fuel for his purposes or the cheapest way to conserve energy. No government engineer can replace the market in calculating the indirect effects of energy use or conservation. And no government engineer will enforce the ever more numerous edicts that will come down from on high. That will be done by policemen.

Make no mistake about it. The establishment of a Department of Energy, with the powers requested by the President, would be a further major step toward converting our free-enterprise system into a corporate state.

Third, approval of this legislation will further entrench bureaucratic control over energy prices and the allocation of energy resources in this country—areas which should be governed by the forces of the free market. Government control over price and allocation has led in great measure to the shortages this country presently experiences. To extend this authority to the new Department of Energy

is to invite a continuation of the shortages and inefficiencies which are associated with bureaucratic tampering with sensitive market mechanisms.

Finally, it is highly likely that this new agency will impose great costs on the Nation's consumers and taxpayers. In the June 1 edition of the Wall Street Journal, the cost question was succinctly treated:

A Chevron statistician has been sizing up the \$10.6 billion budget of the proposed new Department of Energy. For example, it is about double the value of all the oil the U.S. imported from Saudi Arabia last year. It exceeds capital and exploration expenditures by the petroleum industry to find and produce oil, gas and gas liquids in the U.S. in 1975. It exceeds by \$800 million the 1974 profits of the seven largest international oil companies; Chevron can't resist adding that those profits were described by a U.S. Senator as "obscene." It is equivalent to about \$3 a barrel of domestic crude oil production, which means, if our own arithmetic is correct, that you could decontrol all domestic crude oil prices and still end up paying less for oil than the federal energy bureaucracy costs. And one should keep in mind that the \$10.6 billion is only the cost of the newly born baby DOE. Think what it will cost when it grows up!

In summary Mr. Speaker, this legislation is premature, enlarges the powers of the bureaucracy, extends price and allocation controls which will perpetuate the energy crisis—not solve it—and is unnecessarily costly. In short, it is the wrong bill at the wrong time and I urge its defeat.

The CHAIRMAN. The question is on the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. NEDZI, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee having had under consideration the bill (H.R. 6804) to establish a Department of Energy in the executive branch by the reorganization of energy functions within the Federal Government in order to secure effective management to assure a coordinated national energy policy, and for other purposes, pursuant to House Resolution 603, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment to the committee amendment in the nature of a substitute adopted by the Committee of the Whole?

Mr. BROOKS. Mr. Speaker, I demand a separate vote on the so-called Broyhill amendment.

The SPEAKER. Is a separate vote demanded on any other amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER. The Clerk will report the amendment on which a separate vote has been demanded.

The Clerk read as follows:

Amendment: On page 130, after line 11, add the following new title.

## TITLE IX—SUNSET PROVISIONS

Sec. 901. The provisions of this Act shall expire on December 31, 1982.

The SPEAKER. The question is on the amendment.

The question was taken; and the Speaker announced that the noes appeared to have it.

Mr. BROYHILL. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 202, nays 126, not voting 105, as follows:

[Roll No. 304]

## YEAS—202

| Downey         | Mitchell, Md.  | Young, Alaska |
| Early          | Murphy, Ill.   | Zerferetti    |

The Clerk announced the following pairs:

Mr. Thompson with Mr. Dent.  
Mr. Staggers with Mr. Cotter.  
Mr. Addabbo with Mr. Flowers.  
Mrs. Chisholm with Mr. Akaka.  
Mr. Lehman with Mr. Hall.  
Mr. Richmond with Mr. Downey.  
Mr. Rodino with Mr. Harkin.  
Mr. Biaggi with Mr. Clay.  
Mr. Kazen with Mr. Mann.  
Mr. Nolan with Mr. Steed.  
Mr. Carney with Mr. Pressler.  
Mr. McKay with Mr. Baucus.  
Mr. Traxler with Mr. Lujan.  
Mr. Davis with Mr. Madigan.  
Mr. Jenrette with Mr. Bafalis.  
Mr. Koch with Mr. Fraser.  
Mrs. Burke of California with Mr. Pepper.  
Mr. Zerferetti with Mr. Milford.  
Mr. Florio with Mr. Burgener.  
Mr. Waggoner with Mr. Smith of Iowa.  
Mr. McCormack with Mr. Holland.  
Mr. Corman with Mr. Mitchell of Maryland.  
Mr. Badillo with Mr. Early.  
Mr. Chappell with Mr. McKinney.

Mr. Flippo with Mr. Cochran of Mississippi.  
Mr. Murphy of Illinois with Mr. Dorman.  
Mr. Charles Wilson of Texas with Mr. Brown of Michigan.  
Mr. Teague with Mr. Hubbard.  
Mr. Price with Mr. Lloyd of California.  
Mr. LaFalce with Mr. Ireland.  
Mr. Sikes with Mr. Mineta.  
Mr. Metcalfe with Mr. Aspin.  
Mr. Ichord with Mr. Wyder.  
Mr. Rosenthal with Mr. Miller of California.  
Mr. Breaux with Mr. Bob Wilson.  
Mr. Delaney with Mr. Wirth.  
Mr. Beard of Rhode Island with Mr. Pritchard.  
Mr. Young of Alaska with Mr. Van Deerlin.  
Mr. Devine with Mr. Roe.  
Mr. Don H. Clausen with Mr. Hammer-schmidt.  
Mr. Steers with Mr. Neal.  
Mr. McDade with Mr. Marlenee.  
Mr. Lent with Mr. Selberling.  
Mr. Hollenbeck with Mr. Ashbrook.  
Mr. Taylor with Mr. Gary A. Myers.  
Mr. Quayle with Mr. Thornton.  
Mr. Jeffords with Mr. Anderson of Illinois.  
Mr. Carter with Mr. Steiger.  
Mr. St Germain with Mr. Rhodes.  
Mr. Caputo with Mr. Andrews of North Dakota.  
Mr. Dellums with Mr. Diggs.

So the amendment was agreed to.  
The result of the vote was announced as above recorded.

The SPEAKER. The question is on the committee amendment, as amended.

The committee amendment, as amended, was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

## MOTION TO RECOMMIT OFFERED BY MR. ARMSTRONG

Mr. ARMSTRONG. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the legislation?

Mr. ARMSTRONG. I am, Mr. Speaker. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. ARMSTRONG moves to recommit the bill H.R. 6804 to the Committee on Government Operations with instructions to report the same back to the House forthwith with an amendment as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:

That this Act may be cited as the "Department of Energy Organization Act".

## TITLE I—DECLARATION OF FINDINGS, POLICY, AND PURPOSES

Sec. 101. (a) The Congress of the United States finds that—

(1) the United States and the world face an increasing shortage of nonrenewable energy resources;

(2) this energy shortage presents a serious threat to the national security of the United States and to the health, safety, and welfare of its citizens;

(3) a strong national energy program is needed to increase the efficiency of energy use and availability of energy resources, particularly renewable energy resources;

(4) responsibility for energy policy execution, regulation, and research, development, and demonstration is presently vested in many agencies and departments, and this fragmentation hinders development of an effective Federal response to the energy shortage; and

(5) formulation and implementation of a

national energy program require the integration of certain Federal energy functions into a single department in the executive branch.

(b) It is the policy of the United States that—

(1) energy conservation shall enjoy the highest priority in any national energy program, and shall be carefully considered as an adjunct to programs to increase energy supply and as an option to programs that may present health, safety, or other environmental hazards;

(2) major emphasis shall also be given to the development and commercial use of solar, thermal, recycling, and other technologies utilizing renewable energy resources;

(3) in the conservation and development of energy resources, the energy needs of both rural and urban residents shall be given full consideration;

(4) the environmental and social consequences of any national energy program shall be analyzed and considered in evaluation of the program's potential;

(5) public participation in the development and enforcement of any national energy program shall be provided for, encouraged, and assisted; and

(6) to the maximum extent practicable the productive capacity of the private sector of the free enterprise system shall be utilized in the development and achievement of the policies and purposes of this act.

SEC. 102. The purposes of this Act are (1) to establish a permanent Department of Energy in the executive branch, (2) to vest in the Secretary of Energy such functions as are vested in, or transferred to, him by this Act, (3) to achieve, through the Department, effective management of energy functions of the Federal Government, (4) to provide the mechanism through which a coordinated national energy policy can be formulated and implemented to deal with the short-, mid-, and long-term energy problems of the Nation, (5) to safeguard and conserve our natural resources and environment, and (6) to promote the interest of consumers.

#### TITLE II—ESTABLISHMENT OF DEPARTMENT

SEC. 201. There is hereby established at the seat of government an executive department to be known as the Department of Energy (hereinafter in this Act referred to as the "Department"). There shall be at the head of the Department a Secretary of Energy (hereinafter in this Act referred to as the "Secretary") who shall be appointed by the President by and with the advice and consent of the Senate. The Department shall be administered under the supervision and direction of the Secretary.

SEC. 202. There shall be in the Department a Deputy Secretary, nine Assistant Secretaries, and a General Counsel, each of whom shall be appointed by the President, by and with the advice and consent of the Senate, and who shall perform such functions as the Secretary shall prescribe from time to time. The Assistant Secretaries shall be designated as follows:

- (1) Assistant Secretary for Public, Congressional, and Intergovernmental Relations;
- (2) Assistant Secretary for Conservation;
- (3) Assistant Secretary for Defense Programs;
- (4) Assistant Secretary for Environment;
- (5) Assistant Secretary for Fossil and Nuclear Energy Technologies;
- (6) Assistant Secretary for Policy, Evaluation, and International Programs;
- (7) Assistant Secretary for Competition;
- (8) Assistant Secretary for Production and Resource Applications; and
- (9) Assistant Secretary for Solar, Geothermal, Recycling, and Other Energy Technologies.

SEC. 203. The Deputy Secretary shall act

for, and exercise the functions of, the Secretary during the absence or disability of the Secretary or in the event the office of Secretary becomes vacant. The Secretary shall designate the order in which the Assistant Secretaries, General Counsel, and other officials shall act for, and perform the functions of, the Secretary and Deputy Secretary or in the event of vacancies in both of those offices.

SEC. 204. (a) There shall be within the Department an Energy Information Administration to be headed by an Administrator, who shall be appointed by the President, by and with the advice and consent of the Senate. Such Administrator shall be a person who, by reason of professional background and experience, is especially qualified to manage an energy information system. There shall be transferred to and vested in the Administrator (on a nonexclusive basis as the Secretary may determine) all functions and authorities transferred to, and vested in, the Secretary under this Act relating to collection, analysis, and dissemination of energy information and data. The Administrator shall be subject to all duties and responsibilities established under part B of the Federal Energy Administration Act of 1974.

(b) In the performance of his professional functions in connection with collecting, analyzing, and disseminating energy information, the Administrator shall not be responsible to, or subject to, the direction of any officer, employee, or agent of the Department.

(c) The Administrator shall, upon request, promptly provide any information or analysis in his possession to any other administration, commission, or office within the Department relating to the function of such administration, commission, or office.

SEC. 205. (a) There shall be within the Department an Economic Regulatory Administration to be headed by an Administrator, who shall be appointed by the President, by and with the advice and consent of the Senate. The Secretary shall by rule provide for a separation of regulatory and enforcement functions assigned to or vested in the Administration.

(b) The Secretary shall utilize the Economic Regulatory Administration to administer—

- (1) any function which may be delegated to the Secretary under the Emergency Petroleum Allocation Act of 1973; and
- (2) such other functions as the Secretary may consider appropriate.

(c) The Administrator shall insure an adequate opportunity for public participation, including an opportunity for hearings, in issuing any rules or regulations under this section.

SEC. 206. (a) (1) There shall be within the Department an Office of Inspector General to be headed by an Inspector General, who shall be appointed by the President, by and with the advice and consent of the Senate, solely on the basis of integrity and demonstrated ability and without regard to political affiliation. The Inspector General shall report to, and be under the general supervision of, the Secretary or, to the extent such authority is delegated, the Deputy Secretary, but shall not be under the control of, or subject to supervision by, any other officer of the Department.

(2) There shall also be in the Office a Deputy Inspector General appointed by the President, by and with the advice and consent of the Senate, solely on the basis of integrity and demonstrated ability and without regard to political affiliation. The Deputy shall assist the Inspector General in the administration of the Office and shall, during the absence or temporary incapacity of the Inspector General, or during a vacancy in that Office, act as Inspector General.

(3) The Inspector General or the Deputy may be removed from office by the Presi-

dent. The President shall communicate the reasons for any such removal to both Houses of Congress.

(4) The Inspector General shall, in accordance with applicable laws and regulations governing the civil service, appoint an Assistant Inspector General for Audits and an Assistant Inspector General for Investigations.

(b) It shall be the duty and responsibility of the Inspector General—

(1) to supervise, coordinate, and provide policy direction for auditing and investigative activities relating to programs and operations of the Department;

(2) to recommend policies for, and to conduct, supervise, or coordinate other activities carried out or financed by the Department for the purpose of promoting economy and efficiency in the administration of, or preventing and detecting fraud and abuse in, its programs and operations;

(3) to recommend policies for, and to conduct, supervise, or coordinate relationships between the Department and other Federal agencies, State and local governmental agencies, and nongovernmental entities with respect to (A) all matters relating to the promotion of economy and efficiency in the administration of, or the prevention and detection of fraud and abuse in, programs and operations administered or financed by the Department, and (B) the identification and prosecution of participants in such fraud or abuse; and

(4) to keep the Secretary and the Congress fully and currently informed, by means of the reports required by subsection (c) and otherwise, concerning fraud and other serious problems, abuses, and deficiencies relating to the administration of programs and operations administered or financed by the Department, to recommend corrective action concerning such problems, abuses, and deficiencies, and to report on the progress made in implementing such corrective action.

(c) The Inspector General shall, not later than March 31 of each year, submit a report to the Secretary and to the Congress summarizing the activities of the Office during the preceding calendar year. Such report shall include, but need not be limited to—

- (1) an identification and description of significant problems, abuses, and deficiencies relating to the administration of programs and operations of the Department disclosed by such activities;
- (2) a description of recommendations for corrective action made by the Office with respect to significant problems, abuses, or deficiencies identified and described under paragraph (1);

(3) an evaluation of progress made in implementing recommendations described in the report or, where appropriate, in previous reports; and

(4) a summary of matters referred to prosecutive authorities and the extent to which prosecutions and convictions have resulted.

(d) The Inspector General shall report immediately to the Secretary and to the appropriate committees or subcommittees of the Congress whenever the Office becomes aware of particularly serious or flagrant problems, abuses, or deficiencies relating to the administration of programs and operations of the Department. The Deputy and Assistant Inspectors General shall have particular responsibility for informing the Inspector General of such problems, abuses, or deficiencies.

(e) The Inspector General (1) may make such additional investigations and reports relating to the administration of the programs and operations of the Department as are, in the judgment of the Inspector General, necessary or desirable, and (2) shall provide such additional information or documents as may be requested by either House of Congress or, with respect to mat-

ters within their jurisdiction, by any committee or subcommittee thereof.

(f) Notwithstanding any other provision of law, the reports, information, or documents required by or under this section shall be transmitted to the Secretary and to the Congress, or committees or subcommittees thereof, by the Inspector General without further clearance or approval. The Inspector General shall, insofar as feasible, provide copies of the reports required under subsection (c) to the Secretary sufficiently in advance of the due date for their submission to Congress to provide a reasonable opportunity for comments of the Secretary to be appended to the reports when submitted to Congress.

(g) In addition to the authority otherwise provided by this section, the Inspector General, in carrying out the provisions of this section, is authorized—

(1) to have access to all records, reports, audits, reviews, documents, papers, recommendations, and other material available to the Department which relate to programs and operations with respect to which the Inspector General has responsibilities under this section;

(2) to require by subpoena the production of all information, documents, reports, answers, records, accounts, papers, and other data and documentary evidence necessary in the performance of the functions assigned by this section, which subpoena, in the case of contumacy or refusal to obey, shall be enforceable by order of any appropriate United States district court; and

(3) to have direct and prompt access to the Secretary when necessary for any purpose pertaining to the performance of functions and responsibilities under this section.

(h) For purposes of this section, the term "Department" includes any component thereof.

Sec. 207. (a) There shall be within the Department an Office of Energy Research to be headed by a Director, who shall be appointed by the President, by and with the advice and consent of the Senate.

(b) It shall be the duty and responsibility of the Director—

(1) to administer the physical research program transferred to the Department from the Energy Research and Development Administration;

(2) to monitor the Department's energy research and development programs in order to advise the Secretary with respect to any undesirable duplication or gaps in such programs;

(3) to advise the Secretary with respect to the well-being and management of the multipurpose laboratories under the jurisdiction of the Department, excluding laboratories that constitute part of the nuclear weapon complex;

(4) to advise the Secretary with respect to education and training activities required for effective short- and long-term basic and applied research activities of the Department;

(5) to advise the Secretary with respect to grants and other forms of financial assistance required for effective short- and long-term basic and applied research activities of the Department; and

(6) to carry out such additional duties assigned to the Office by the Secretary relating to basic and applied research, including but not limited to supervision or support of research activities carried out by any of the Assistant Secretaries designated by section 202 of this Act, as the Secretary considers advantageous.

#### TITLE III—TRANSFERS OF FUNCTIONS

Sec. 301. Except as otherwise provided in this Act there are hereby transferred to, and vested in, the Secretary all of the functions vested by law in the Administrator of the Federal Energy Administration or the Fed-

eral Energy Administration, the Administrator of the Energy Research and Development Administration or the Energy Research and Development Administration; and the functions vested by law in the officers and components of either such Administration.

Sec. 302. (a) There are hereby transferred to and vested in the Secretary all functions and authorities of the Secretary of the Interior under section 5 of the Flood Control Act of 1944 (16 U.S.C. 825e), and all other functions and authorities of the Secretary of the Interior, and officers and components of the Department of the Interior, with respect to—

(1) the Southeastern Power Administration;

(2) the Southwestern Power Administration;

(3) the Alaska Power Administration;

(4) the Bonneville Power Administration including but not limited to the authority contained in the Bonneville Project Act of 1937 (50 Stat. 731), as amended, and the Federal Columbia River Transmission System Act (88 Stat. 1376);

(5) the power marketing functions of the Bureau of Reclamation including the construction, operation, and maintenance of transmission lines and attendant facilities; and

(6) the transmission and disposition of the electric power and energy generated at Falcon Dam and Amistad Dam, International storage reservoir projects on the Rio Grande, pursuant to the Act of June 18, 1954, as amended by the Act of December 23, 1963.

(b) The Southeastern Power Administration, the Southwestern Power Administration, the Bonneville Power Administration, and the Alaska Power Administration shall be preserved as separate and distinct organizational entities within the Department; shall each be headed by an administrator appointed by the Secretary. The functions and authority hereby transferred to the Secretary shall be exercised by the Secretary, acting by and through such Administrators. Each such Administrator shall maintain his principal office at a place located in the region served by his respective Federal power marketing entity.

(c) There is hereby created a separate and distinct Administration within the Department of Energy which shall be headed by an Administrator appointed by the Secretary. The functions and authority transferred in paragraph (a) (5) or (a) (6) of this section shall be exercised by the Secretary, acting by and through such Administrator; and the Administrator shall establish and shall maintain such regional offices as necessary to facilitate the performance of such functions. Neither the transfer of functions and authority effected by subsection a(5) of this section nor any changes in cost allocation or project evaluation standards shall be deemed to authorize the reallocation of joint costs of multipurpose facilities theretofore allocated unless and to the extent that such change is hereafter approved by Congress.

(d) (1) The authority of the Secretary of the Interior to prescribe regulations under the Outer Continental Shelf Lands Act, the Mineral Lands Leasing Act, the Mineral Leasing Act for Acquired Lands, the Geothermal Steam Act of 1970, and the Energy Policy and Conservation Act, which relate to the—

(A) fostering of competition for Federal leases (including, but not limited to, prohibition on bidding for development rights by certain types of joint ventures);

(B) implementation of alternative bidding systems authorized for the award of Federal leases;

(C) establishment of diligence requirements for operations conducted on Federal leases (including, but not limited to, procedures relating to the granting or ordering by the Secretary of the Interior of suspension

of operations or production as they relate to such requirements;

(D) setting rates of production for Federal leases; and

(E) specifying the procedures, terms, and conditions for the acquisition and disposition of Federal royalty interests takes in kind,

except that such regulations shall be promulgated by the Secretary only after consultation with the Secretary of the Interior.

(2) The Secretary of the Interior shall retain any authorities not transferred by paragraph (1) of this subsection and shall be solely responsible for the issuance and supervision of leases and the enforcement of all regulations applicable to the leasing of mineral resources, including, but not limited to, lease terms and conditions and production rates. No regulation issued by the Secretary shall restrict or limit any authority retained by the Secretary of the Interior under this paragraph with respect to the issuance or supervision of leases. Nothing in this subsection shall be construed to affect Indian lands and resources or to transfer any responsibilities of the Secretary of the Interior concerning such lands and resources.

(e) Those functions of the Secretary of the Interior, the Department of the Interior, and officers and components of that Department under the Act of May 16, 1910, and other authorities, exercised by the Bureau of Mines, but limited to—

(1) fuel supply and demand analysis and data gathering;

(2) research and development relating to increased efficiency of production technology of solid fuel minerals, other than research relating to mine health and safety and research relating to the environmental and leasing consequences of solid fuel mining, which shall remain in the Department of the Interior; and

(3) coal preparation and analysis.

(f) The functions of the Secretary of the Interior to establish production rates for all Federal leases.

Sec. 303. The Secretary of the Interior shall afford the Secretary a reasonable opportunity, prior to the execution of a Federal lease, to disapprove any term or condition of such Federal lease which relates to the matters with respect to which the Secretary has authority to prescribe regulations under section 302(d). No such term or condition may be included in such a lease if it is disapproved by the Secretary.

Sec. 304. As used in sections 302 and 303 of this Act, "Federal lease" means an agreement which, for any consideration, including, but not limited to, bonuses, rents, or royalties conferred and covenants to be observed, authorizes any person to explore for, develop, or produce (or to do any or all of these) oil and gas, coal, oil shale, tar sands, or geothermal resources in public, acquired, or submerged lands or interests therein under Federal jurisdiction.

Sec. 305. All functions vested by law in the Director of the Office of Energy Information and Analysis by part B of the Federal Energy Administration Act of 1974 are hereby transferred to the Administrator of the Energy Information Administration.

Sec. 306. There are hereby transferred to and vested in the Secretary all of the functions vested in the Secretary of Housing and Urban Development by the Energy Conservation Standards for New Buildings Act of 1976 (title III of the Energy Conservation and Production Act).

Sec. 307. There are hereby transferred to and vested in the Secretary such functions as are set forth in the Interstate Commerce Act and vested by law in the Interstate Commerce Commission or the Chairman and members thereof as relate to transportation of oil by pipeline.

Sec. 308. There are hereby transferred to and vested in the Secretary all functions vested by chapter 641 of title 10, United States Code, in the Secretary of the Navy as

they relate to the administration of, and there is hereby transferred to, and vested in, the Secretary jurisdiction over—

(1) Naval Petroleum Reserve Numbered 1 (Elk Hills) located in Kern County, California, established by Executive order of the President, dated September 2, 1912;

(2) Naval Petroleum Reserve Numbered 2 (Buena Vista), located in Kern County, California, established by Executive order of the President, dated December 13, 1912;

(3) Naval Petroleum Reserve Numbered 3 (Teapot Dome) located in Wyoming, established by Executive order of the President, dated April 30, 1915;

(4) Oil Shale Reserve Numbered 1, located in Colorado, established by Executive order of the President, dated December 6, 1916, as amended by Executive order of the President, dated June 12, 1919;

(5) Oil Shale Reserve Numbered 2, located in Utah, established by Executive order of the President, dated December 6, 1916; and

(6) Oil Shale Reserve Numbered 3, located in Colorado, established by Executive order of the President, dated September 27, 1974. The surface management of such reserves shall be carried out by the Secretary of the Interior under applicable laws, including the Federal Land Policy and Management Act of 1976, administered by such Secretary.

Sec. 309. There are hereby transferred to and vested in the Secretary all functions of the Secretary of Commerce, the Department of Commerce, and officers and components of that Department, as relate to or are utilized by the Office of Energy Programs, but limited to industrial energy conservation programs.

Sec. 310. (a) The Division of Naval Reactors, established pursuant to section 25 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2035), and responsible for research, design, development, health and safety matters pertaining to naval nuclear propulsion plants and assigned civilian power reactor programs, is transferred to the Department under the Assistant Secretary for Fossil and Nuclear Energy Technologies and shall be deemed to be an organizational unit established by this Act.

(b) The Division of Military Application, established by section 25 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2035), and the functions of the Energy Research and Development Administration with respect to the Military Liaison Committee, established by section 27 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2037), are transferred to the Department under the Assistant Secretary for Defense Programs and such organizational units shall be deemed to be an organizational unit established by this Act.

Sec. 311. Notwithstanding section 301(a), there are hereby transferred to, and vested in, the Secretary of Transportation all of the functions vested in the Administrator of the Federal Energy Administration by section 381(b)(1)(B) of the Energy Policy and Conservation Act.

#### TITLE V—ADMINISTRATIVE PROCEDURES AND JUDICIAL REVIEW

Sec. 501. (a) Subject to the other requirements of this title, the provisions of subchapter II of chapter 5 of title 5, United States Code, shall apply in accordance with its terms to any rule or regulation, or any order having the applicability and effect of a rule (as defined in section 551(4) of title 5, United States Code), issued pursuant to authority vested by law in, or transferred or delegated to, the Secretary, or required by this Act or any other Act to be carried out by any other officer, employee, or component of the Department, other than the Federal Energy Regulatory Commission, including any such rule, regulation, or order of a State, or local government agency or officer thereof, issued pursuant to authority delegated by the Secretary in accordance with this title. If any provision in any Act, the functions of

which are transferred, vested, or delegated pursuant to this Act, provides administrative procedure requirements in addition to those provided in this title, such additional requirements shall also apply to actions under that provision.

(b)(1) In addition to the requirements of subsection (a) of this section, notice of any proposed rule, regulation, or order described in subsection (a) shall be given by publication of such proposed rule, regulation, or order in the Federal Register. Such publication shall be accompanied by a statement of the research, analysis, and other available information in support of, the need for, and the probable effect of, any such proposed rule, regulation, or order. Other effective means of publicity shall be utilized as may be reasonably calculated to notify concerned or affected parties of the nature and probable effect of any such proposed rule, regulation, or order. In each case, a minimum of thirty days following such publication shall be provided for opportunity to comment prior to the effective date of any such rule, regulation, or order; except that the requirements of this subsection as to time of notice and opportunity to comment may be waived, subject to paragraph (3) of this section, where strict compliance is found by the Secretary to be likely to cause serious harm or injury to the public health, safety, or welfare, and such finding is set out in detail in such rule, regulation, or order.

(2) Public notice of all rules, regulations, or orders described in subsection (a) which are promulgated by officers of a State or local government agency pursuant to a delegation under this Act shall be provided by publication of such proposed rules, regulations, or orders in at least two newspapers of statewide circulation. If such publication is not practicable, notice of any such rule, regulation, or order shall be given by such other means as the officer promulgating such rule, regulation, or order determines will reasonably assure wide public notice.

(3) The requirements of this subsection may be satisfied within a reasonable period of time subsequent to the promulgation of the rule, regulation, or order if the Secretary finds, under paragraph (1), that an emergency exists requiring the immediate implementation of any such rule, regulation, or order.

(c)(1) If the Secretary determines at the time of publication of a proposed rule, regulation, or order described in subsection (a) that no substantial issue exists and that such rule, regulation, or order is unlikely to have a substantial impact on the nation's economy or large numbers of individuals or businesses, the proposed rule, regulation, or order may be promulgated in accordance with section 553 of title 5, United States Code, except that subsection (a)(2) of section 553 shall not apply. If the Secretary determines at the time of publication of any such rule, regulation, or order that a substantial issue exists or that such rule, regulation, or order is likely to have a substantial impact on the nation's economy or large numbers of individuals or businesses, an opportunity for oral presentation of views, data, and arguments shall be provided.

(2) Any person, who would be adversely affected by the implementation of any proposed rule, regulation, or order issued pursuant to the first sentence of paragraph (1) and who desires an opportunity for oral presentation of views, data, and arguments, shall offer evidence supporting the existence of such substantial issues or such impact during the period established for public comment. If the Secretary determines that such evidence is sufficient to establish the existence of such issues or impact, the Secretary shall provide an opportunity for such oral presentation.

(3) Following the notice and comment period, including any oral presentation re-

quired by this subsection, the Secretary may promulgate such rule, regulation, or order, which shall include therewith an explanation responding to the major comments, criticisms, and alternatives offered during the comment period.

(4) A transcript shall be kept of any oral presentation with respect to a rule, regulation, or order described in subsection (a).

(d) The Secretary, or any officer authorized to issue rules, regulations, or orders under the Federal Energy Administration Act, the Emergency Petroleum Allocation Act of 1973, the Energy Supply and Environmental Coordination Act of 1974, or the Energy Policy and Conservation Act shall provide for the making of such adjustments, consistent with the other purposes of the relevant Acts, as may be necessary to prevent special hardship, inequity, or unfair distribution of burdens, and shall, by rule, establish procedures which are available to any person for the purpose of seeking an interpretation, modification, or rescission of, exception to, or exemption from, such rule, regulation, or order. The Secretary or any such officer shall additionally insure that each decision on any application or petition requesting an adjustment shall specify the standards of hardship, inequity, or unfair distribution of burden by which any disposition was made, and the specific application of such standards to the facts contained in any such application or petition. If any person is aggrieved or adversely affected by a denial of a request for adjustment under the preceding sentences, such person may request a review of such denial by the Secretary and may obtain judicial review in accordance with this title when such a denial becomes final. The Secretary shall, by rule, establish appropriate procedures including a hearing when requested for review of a denial, and where deemed advisable by the Secretary, for considering other requests for action under this subsection, except that no review of a denial under this subsection shall be made by the same officer denying the adjustment.

(e)(1) With respect to any rule regulation or order, the effects of which, except for indirect effects of an inconsequential nature, are confined to—

(A) a single unit of local government or the residents thereof;

(B) a single geographic area within a State or the residents thereof; or

(C) a single State or the residents thereof; the Secretary shall in any case where appropriate, afford an opportunity for a hearing or the oral presentation of views and provide procedures for the holding of such hearing or oral presentation within the boundaries of the unit of local government, geographic area, or State described in paragraphs (A) through (C) of this paragraph as the case may be.

(2) For purposes of this subsection—

(A) the term "unit of local government" means a county, municipality, town, township, village or other unit of general government below the State level; and

(B) the term "geographic area within a State" means a special purpose district of other region recognized for governmental purposes within such State which is not a unit of local government.

(3) Nothing in this subsection shall be construed as requiring a hearing or an oral presentation of views where none is required by this section or other provision of law.

(f)(1) Judicial review of agency action taken under any law the functions of which are vested by law in, or transferred or delegated to, the Secretary or any officer, employee or component of the Department shall, notwithstanding such vesting, transfer, or delegation, be made in the manner specified in such law.

(2) Notwithstanding the amount in controversy, the district courts of the United

States shall have exclusive original jurisdiction of all other cases or controversies arising under this Act, or under rules, regulations, or orders issued exclusively thereunder, other than any actions taken to implement or enforce any rule, regulation, or order by any officer of a State or local government agency under this Act, except that nothing in this section affects the power of any court of competent jurisdiction to consider, hear, and determine in any proceeding before it any issue raised by way of defense (other than a defense based on the unconstitutionality of this Act or the validity of action taken by any agency under this Act). If in any such proceeding an issue by way of defense is raised based on the unconstitutionality of this Act or the validity of agency action under this Act, the case shall be subject to removal by either party to a district court of the United States in accordance with the applicable provisions of chapter 89 of title 28, United States Code. Cases or controversies arising under any rule, regulation, or order of any officer of a State or local government agency may be heard in either (A) any appropriate State court, or (B) without regard to the amount in controversy, the district courts of the United States.

(3) Where authorized by any law vested, transferred, or delegated pursuant to this Act, the Secretary may, by rule, prescribe procedures for State or local government agencies authorized by the Secretary to carry out such functions as may be permitted under applicable law. Such procedures shall apply to such agencies in lieu of this section, and shall require that prior to taking any action, such agencies shall take steps reasonably calculated to provide notice to persons who may be affected by the action, and shall afford an opportunity for presentation of views (including oral presentation of views where practicable) a reasonable time before taking the action.

(4) Notwithstanding any other law, the litigation of the Department shall be subject to the supervision of the Attorney General pursuant to chapter 31 of title 28, United States Code. This paragraph shall not apply to the Federal Energy Regulatory Commission.

Sec. 502. (a) Section 501 of this title shall remain in effect for two years after the effective date of this Act. Any proceeding commenced under such section prior to the termination of its effect shall, notwithstanding such termination, be conducted in accordance with such section. Orders shall be issued in such proceedings, appeals shall be taken therefrom, and payment shall be made pursuant to such orders as if such section had not terminated; and orders issued in any such proceedings shall continue in effect until modified, terminated, superseded, or revoked by a duly authorized official, by a court of competent jurisdiction, or by operation of law. Nothing in this section shall be deemed to prohibit the discontinuance or modification of any such proceeding under the same terms and conditions and to the same extent that such proceeding could have been discontinued or modified if such section had not terminated.

(b) Within one year after effective date of this Act, the Secretary shall submit a report to Congress concerning the actions taken to implement section 501. The report shall include a discussion of the adequacy of such section from the standpoint of the Department and the public, including a summary of any comments obtained by the Secretary from the public about such section and implementing regulations, and such recommendations as the Secretary deems appropriate concerning the extension and revision of such section.

(c) Nothing in this title shall be construed as repeating by implication any existing provision of law relating to administrative procedures and judicial review ap-

plicable to any authority vested, transferred or delegated pursuant to this Act, except that such existing provisions shall, to the extent provided by section 501, be superseded by the provisions of such section during the two years specified in subsection (a).

Sec. 503. (a) (1) Except as provided in subsection (c), but notwithstanding any other provision of this or of any other Act, simultaneously with promulgation or repromulgation of any rule or regulation issued pursuant to authority transferred, vested, or delegated to the Secretary or the Federal Energy Regulatory Commission, other than a rule or regulation establishing a price for petroleum, petroleum products, or natural gas, the Secretary or the Commission, as the case may be, shall submit a copy thereof to the Secretary of the Senate and the Clerk of the House of Representatives. Except as provided in paragraph (2), the rule or regulation shall not become effective, if—

(A) within 90 calendar days of continuous session of Congress after the date of promulgation, both Houses of Congress adopt a concurrent resolution, the matter after the resolving clause of which is as follows: "That Congress disapproves the rule or regulation promulgated by \_\_\_\_\_ dealing with the matter of \_\_\_\_\_, which rule or regulation was transmitted to Congress on \_\_\_\_\_, the blank spaces therein being appropriately filled; or

(B) within 60 calendar days of continuous session of Congress after the date of promulgation, one House of Congress adopts such a concurrent resolution and transmits such resolution to the other House, and such resolution is not disapproved by such other House within 30 calendar days of continuous sessions of Congress after such transmittal.

(2) If at the end of 60 calendar days of continuous session of Congress after the date of promulgation of a rule or regulation described in paragraph (1), no committee of either House of Congress has reported or been discharged from further consideration of a current resolution disapproving the rule or regulation, and neither House has adopted such a resolution, the rule or regulation may go into effect immediately. If, within such 60 calendar days, such a committee has reported or been discharged from further consideration of such a resolution, or either House has adopted such a resolution, the rule or regulation may go into effect not sooner than 90 calendar days of continuous session of Congress after its promulgation unless disapproved as provided in paragraph (1) (A).

(b) (1) The agency may not promulgate a new rule or regulation identical to one disapproved pursuant to this section unless a statute is adopted affecting the agency's powers with respect to the subject matter of the rule or regulation.

(2) If the agency proposes a new rule or regulation dealing with the same subject matter as a disapproved rule or regulation, the agency shall comply with the procedures required for the issuance of a new rule or regulation.

(c) The provisions of this section shall not apply with respect to a rule or regulation which is promulgated under a provision of law which provides for another method of congressional review and disapproval or approval of such rule or regulation than that provided by this section.

(d) For the purpose of this section, calendar days of continuous session of Congress shall be computed in accordance with section 906(b) of title 5, United States Code.

Sec. 504. (a) If upon investigation, the Secretary or his authorized representative believes that a person has violated any regulation, rule, or order promulgated pursuant to the Emergency Petroleum Allocation Act, he may issue a remedial order to the person. Each remedial order shall be in writing and shall describe with particularity the nature

of the violation, including a reference to the provision of the rule, regulation, or order alleged to have been violated. For purposes of this section "person" includes any individual, association, company, corporation, partnership, or other entity however organized.

(b) If within thirty days from the receipt of the remedial order issued by the Secretary, the person fails to notify the Secretary that he intends to contest the remedial order, the remedial order shall become effective and shall be deemed a final order of the Secretary and not subject to review by any court or agency.

(c) If within thirty days from the receipt of the remedial order issued by the Secretary, the person notifies the Secretary that he intends to contest a remedial order issued under subsection (a) of this section, the Secretary shall immediately advise the Economic Regulatory Administration of such notification. Upon such notice, the Administrator shall stay the effect of the remedial order except where he finds the public interest requires remedial compliance with such remedial order. The Administrator shall, upon request, afford an opportunity for a hearing, including the submission of briefs, evidence (oral or documentary) and oral arguments. To the extent that the Administrator in his discretion determines such is required for a full and true disclosure of the facts, he shall afford the right of cross examination. The Administrator shall thereafter issue an order, based on findings of fact, affirming, modifying, or vacating the Secretary's remedial order, or directing other appropriate relief, and such order shall, for the purpose of judicial review, constitute final agency action.

(d) The Secretary may set reasonable time limits for the Administration to complete action on a proceedings referred to it pursuant to this section.

(e) Nothing in this section shall be construed to affect any procedural action taken by the Secretary prior to or incident to initial issuance of a remedial order which is the subject of the hearing provided herein, but such procedures shall be reviewable in the hearing.

#### TITLE VI—ADMINISTRATIVE PROVISIONS

Sec. 601. (a) For purposes of this section—

(1) the term "Department" includes any agency, administration, commission, or other component thereof;

(2) the term "Department proceeding" includes any Department hearing, application, rulemaking or other determination, contract, grant, reward, fund transfer, claim, controversy, charge, accusation, or arrest;

(3) the term "employee" means any person holding a position in the Department;

(4) the term "employment" means employment with an energy concern and includes employment as a consultant, agent, attorney, or otherwise and includes voluntary employment;

(5) the term "energy concern" means any person significantly engaged in the production, generation, transmission, distribution, or sale of electric power, petroleum or petroleum products, synthetic fuels, energy from renewable resources, wastes, or geothermal steam, nuclear energy, natural gas, coal, solar energy, or other energy-related source or resource, or in any research or development significantly related to such production, generation, transmission, distribution, or sale;

(6) the term "participate" includes participation by way of decision, approval, disapproval, recommendation, the rendering of advice, or investigation; and

(7) the term "supervisory employee" means any of the following officers or employees of the Department—

(A) an individual compensated at the rate

provided for grade of GS-16 or above under section 5332 of title 5, United States Code;

(B) an individual compensated under the Executive Schedule, as provided in subchapter II of chapter 53 of title 5 of the U.S. Code;

(C) any other individual who, in the judgment of the Secretary, exercises sufficient decisionmaking authority so that the provisions of this section should apply to such individual;

(D) the Director or Deputy Director of any State, regional, district, local, or other field office; or

(E) an employee or officer who has responsibility with respect to the award, review, modification, or termination of any grant, contract, reward, or fund transfer within the authority of the Secretary.

(b)(1) No supervisory employee shall knowingly receive compensation from, or hold any official relation to, any energy concern, or own stocks or bonds thereof, or have any pecuniary interest therein.

(2) Personnel transferred to the Department pursuant to section 701 of this Act shall have six months to comply with the provisions of paragraph (1) of this subsection with respect to prohibited property holdings. Any person transferred pursuant to section 701 shall notify the Secretary of all circumstances which would be violative of the restrictions described in subsection (b)(1) not later than fifteen days after the date of such transfer as determined by the United States Civil Service Commission.

(3) Where exceptional hardship would result, or where the interest is vested, the Secretary is authorized to waive the requirements of this subsection with respect to any person covered. Such waiver shall:

(A) be published in the Federal Register;

(B) contain a finding by the Secretary that exceptional hardship would result; and

(C) indicate the steps taken by the Secretary to minimize conflict of interest and the appearance of conflict of interest.

Such waiver shall in no instance constitute a waiver of the requirements of section 208 of title 18, United States Code.

(c)(1) Each supervisory employee shall file with the Secretary, in such form and manner as the Secretary shall prescribe, a report describing all previous employment with any energy concern.

(2) Each former supervisory employee of the Department shall file with the Secretary, in such form and manner as the Secretary shall prescribe, not later than the November 15 of—

(A) the fiscal year following the fiscal year in which such person ceased to be an employee of the Department, and

(B) each of the succeeding two fiscal years, a report describing any employment with any energy concern during the fiscal year to which such report relates.

(3) Each report filed pursuant to paragraphs (1) and (2) shall contain the name and address of the person filing the report, the name and address of the energy concern with which he held employment, a brief description of his duties and work for the energy concern, the dates of his employment, and such other pertinent information as the Secretary may require.

(4) The Secretary shall maintain a file containing the reports filed with him pursuant to paragraphs (1) and (2). All such reports shall be available for public inspection and copying at all times during regular working hours.

(d)(1)(A) For a period of two years after terminating any employment with any energy concern, no supervisory employee shall knowingly participate in any Department proceeding in which his former employer is substantially, directly, or materially involved, other than in a rulemaking proceeding which has a substantial effect on numerous energy concerns.

(B) While an employee of the Department, no supervisory employee shall knowingly participate in any Department proceeding for which he had direct responsibility, or in which he participated substantially or personally, while in the employment of any energy concern.

(C) No supervisory employee who solicits, negotiates, or arranges for employment with any energy concern shall participate in any Department proceeding in which such energy concern is substantially, directly, or materially involved.

(2)(A) For a period of two years after ceasing to be an employee of the Department, no supervisory employee shall, in any professional capacity for anyone other than the United States, appear or attend before, or make any oral or written communication or submission to, or filing with, the Department or any officer or employee of the Department in connection with any Department proceeding.

(B) For a period of five years after ceasing to be an employee of the Department, no supervisory employee shall, in any professional capacity for anyone other than the United States, appear or attend before, or make any oral or written communication to, or filing with, the Department or any officer or employee of the Department in connection with any Department proceeding in which he participated substantially or personally while a supervisory employee.

(3) Notwithstanding any penalty imposed under subsection (e), any violation of this subsection shall be taken into consideration in deciding the outcome of any Department proceeding in connection with which the prohibited appearance, attendance, communication, or submission was made.

(4) Whenever the Secretary makes a written finding as to a particular supervisory employee that the application of a particular restriction or requirement imposed by paragraph (1) or (2) of this subsection in a particular circumstance would work an exceptional hardship upon such supervisory employee or would be contrary to the national interest, the Secretary may waive in writing such restriction or requirement as to such supervisory employee. The Secretary shall maintain a file containing all findings and waivers made by him pursuant to this paragraph, and all such findings and waivers shall be available for public inspection and copying at all times during regular working hours. Any waiver made by the Secretary of a restriction imposed under paragraph (2) of this subsection shall also be filed with any record of the Department proceeding as to which the waiver for purposes of participation is granted. No such waiver shall in any instance constitute a waiver of the requirements of section 207 of title 18, United States Code.

(e) Any person who violates subsections (b), (c), or (d), taking into account any waiver under subsection (b)(3) or (d)(4), shall be subject to a civil penalty, assessed by the Secretary, not to exceed \$10,000 for each violation.

(f) Nothing in this section shall be deemed to limit the operation of section 207 or section 208 of title 18, United States Code.

Sec. 602. (a) Each officer or employee of the Department who has any known financial interest—

(1) in any person engaged in the business, other than at the retail level, of developing, producing, refining, transporting by pipeline, or converting into synthetic fuel, minerals, wastes, or renewable resources, or in the generation of energy from such minerals, wastes, or renewable resources, or in conducting research, development, and demonstration with financial assistance under this Act or any Act, the administration of which is transferred pursuant to this Act;

(2) in property from which coal, natural gas, crude oil, or nuclear material is commercially produced;

(3) in any person engaged in the production, generation, transmission, distribution, or sale of electric power; or

(4) in any person engaged in production, sale, or distribution of nuclear materials;

shall, beginning on February 1, 1978, annually file with the Secretary a written statement disclosing all such interests held by such officer or employee during the preceding calendar year. Such statement shall be subject to examination, and available for copying, by the public upon request.

(b) The Secretary shall—

(1) act, within ninety days after the effective date of this Act, by rule—

(A) to define the term "known financial interest" for purposes of subsection (a); and

(B) to establish the methods by which the requirement to file written statements specified in subsection (a) will be monitored and enforced, including appropriate provisions for the filing by such officers and employees of such statements and the review by the Secretary of such statements; and

(2) include, as part of the report made pursuant to section 621, a report with respect to such disclosures and the actions taken in regard thereto during the preceding calendar year.

(c) In the rules prescribed in subsection (b), the Secretary may identify specific positions, or classes thereof, within the Department which are of a nonregulatory or non-policy-making nature and provide that officers or employees occupying such positions shall be exempt from the requirements of this section.

(d) Any officer or employee who is subject to, and knowingly violates, subsection (a) shall be fined not more than \$2,500 or imprisoned not more than one year, or both.

Sec. 603. The Secretary is authorized to prescribe such policies, standards, criteria, procedures, rules, and regulations as he may deem to be necessary or appropriate to carry out functions now or hereafter vested in him.

Sec. 604. Except as otherwise expressly prohibited by law, the Secretary may delegate any of his functions to such officers and employees of the Department as he may designate, and may authorize such successive redelegations of such functions as he may deem to be necessary or appropriate.

Sec. 605. The Secretary is authorized to establish, alter, consolidate, or discontinue and to maintain such State, regional, district, local, or other field offices as he may deem to be necessary to carry out functions now or hereafter vested in him.

Sec. 606. The Secretary may, from time to time, establish, alter, consolidate, or discontinue such organizational units or components within the Department as he may deem to be necessary or appropriate, except that such authority shall not extend to the abolition of organizational units or components established by this Act.

Sec. 607. In the performance of functions transferred to, and vested in, the Secretary or any officer or component of the Department, the Secretary is authorized to appoint and fix the compensation of such officers and employees as may be necessary to carry out such functions. Such officers and employees shall be appointed in accordance with the civil service laws and their compensation fixed in accordance with title 5, United States Code, except that to the extent the Secretary deems such action necessary to the discharge of his functions, he may establish scientific or professional positions within the Department as provided in section 3104 of title 5, United States Code.

Sec. 608. (a) There shall be within the Department not more than fourteen additional officers in positions authorized by section 5315 and 5316 of title 5, United States Code, who shall be appointed by the Secretary and who shall perform such functions as the Secretary shall prescribe from time to time.

(b) (1) Subject to the provisions of chapter 51 of title 5, United States Code, but notwithstanding the last two sentences of section 5108(a) of such title, the Secretary may place at GS-16, GS-17, and GS-18, not to exceed 350 positions of the positions subject to the limitation of the first sentence of section 5108(a) of such title.

(2) Any position placed at GS-16, GS-17, or GS-18 under the authority of paragraph (1) may be filled only by a person who is transferred in connection with a transfer of function under this Act and who, immediately before the effective date of this Act, held a position having duties comparable to those of such position. Appointments under this paragraph may be made without regard to the provisions of section 3324 of title 5, United States Code, relating to the approval by the Civil Service Commission of appointments to GS-16, GS-17, and GS-18.

(3) The Secretary's authority under this subsection with respect to any position shall cease when the person appointed to fill such position under paragraph (2) leaves such position.

SEC. 609. The Secretary may obtain services as authorized by section 3109 of title 5, United States Code, at rates not to exceed the daily rate prescribed for grade GS-18 of the General Schedule by section 5332 of title 5, United States Code, for persons in Government service employed intermittently.

SEC. 610. Section 17 of the Federal Energy Administration Act of 1974 shall be applicable to advisory committees chartered by the Department to provide advice with respect to regulatory activities of the Department.

SEC. 611. (a) The Secretary is authorized to provide for participation of Armed Forces personnel in carrying out functions performed, on the date of enactment of this Act, in the Energy Research and Development Administration and under chapter 641 of title 10, United States Code. Members of the Armed Forces may be detailed for service in the Department by the Secretary concerned (as said term is defined in section 101 of such title) pursuant to cooperative agreements with the Secretary.

(b) The detail of any personnel to the Department under this section shall in no way affect status, office, rank, or grade which officers or enlisted men may occupy or hold or any emolument, perquisite, right, privilege, or benefit incident to, or arising out of, such status, office, rank, or grade, nor shall any member so detailed be charged against any statutory or other limitation on strengths applicable to the Armed Forces or the Department. A member so detailed shall not be subject to direction or control by his armed force, or any officer thereof, directly or indirectly, with respect to the responsibilities exercised in the position to which detailed.

SEC. 612. (a) With their consent, the Secretary may, with or without reimbursement, use the research, equipment, and facilities of any agency or instrumentality of the United States or of any State, the District of Columbia, the Commonwealth of Puerto Rico, or any territory or possession of the United States, or of any political subdivision thereof, or of any foreign government, in carrying out any function now or hereafter vested in the Secretary.

(b) The Secretary may, with or without reimbursement, provide research, equipment, and facilities to any agency or instrumentality of the United States or any State, territory, the Commonwealth of Puerto Rico, the District of Columbia, or any political subdivision thereof, or to any foreign government, whenever he deems such action to be necessary and appropriate to the performance of functions now or hereafter vested in him.

(c) Proceeds from reimbursements under this section shall be deposited in the Treasury and may be withdrawn by the Secretary

or the head of the agency or instrumentality of the United States involved, as the case may be, to pay directly the costs of the equipment or facilities provided, to repay or make advances to appropriations or funds which do or will initially bear all or a part of such costs, or to refund excess sums when necessary, except that such proceeds may be credited to a working capital fund otherwise established by law, including the fund established pursuant to section 619 of this Act, and used under the law governing such fund, if the fund is available for use for providing the equipment or facilities involved.

SEC. 613. The Secretary is authorized to enter into and perform such contracts, leases, cooperative agreements, or other similar transactions with public agencies and private organizations and persons, and to make such payments (in lump sum or installments, and by way of advance or reimbursement) as he may deem to be necessary or appropriate to carry out functions now or hereafter vested in the Secretary.

SEC. 614. The Secretary is authorized to acquire (by purchase, lease, condemnation, or otherwise), construct, improve, repair, operate, and maintain laboratories, research and testing sites and facilities, quarters and related accommodations for employees and dependents of employees of the Department, such personal property (including patents), or any interest therein, as the Secretary deems necessary; and to provide by contract or otherwise for eating facilities and other necessary facilities for the health and welfare of employees of the Department at its installations and purchase and maintain equipment therefor.

SEC. 615. (a) As necessary and when not otherwise available, the Secretary is authorized to provide for, construct, or maintain the following for employees and their dependents stationed at remote locations:

- (1) emergency medical services and supplies;
- (2) food and other subsistence supplies;
- (3) messing facilities;
- (4) audiovisual equipment, accessories, and supplies for recreation and training;
- (5) reimbursement for food, clothing, medicine, and other supplies furnished by such employees in emergencies for the temporary relief of distressed persons;
- (6) living and working quarters and facilities; and
- (7) transportation of school age dependents of employees to the nearest appropriate educational facilities.

(b) The furnishing of medical treatment under paragraph (1) of subsection (a) and the furnishing of services and supplies under paragraphs (2) and (3) of subsection (a) shall be at prices reflecting reasonable value as determined by the Secretary.

(c) Proceeds from reimbursements under this section shall be deposited in the Treasury and may be withdrawn by the Secretary to pay directly the cost of such work or services, to repay or make advances to appropriations of funds which will initially bear all or a part of such cost, or to refund excess sums when necessary: *Provided*, That such payments may be credited to a working capital fund otherwise established by law, including the fund established pursuant to section 619 of this Act, and used under the law governing such fund, if the fund is available for use by the Department for performing the work or services for which payment is received.

SEC. 616. The Secretary is authorized to acquire any of the following described rights if the property acquired thereby is for use by or for, or useful to, the Department:

- (1) copyrights, patents, and applications for patents, designs, processes, and manufacturing data;
- (2) licenses under copyrights, patents, and applications for patents; and

(3) releases, before suit is brought, for past infringement of patents or copyrights.

SEC. 617. The Secretary is authorized to accept, hold, administer, and utilize gifts, bequests, and devises of property, both real and personal, for the purpose of aiding or facilitating the work of the Department. Gifts, bequests, and devises of money and proceeds from sales of other property received as gifts, bequests, or devises shall be deposited in the Treasury and shall be disbursed upon the order of the Secretary. Property accepted pursuant to this section, and the proceeds thereof, shall be used as nearly as possible in accordance with the terms of the gift, bequest, or devise. For the purposes of Federal income, estate, and gift taxes, property accepted under this section shall be considered as a gift, bequest, or devise to the United States.

SEC. 618. The Secretary shall cause a seal of office to be made for the Department of such design as he shall approve and judicial notice shall be taken of such seal.

SEC. 619. The Secretary is authorized to establish a working capital fund, to be available without fiscal-year limitation, for expenses necessary for the maintenance and operation of such common administrative services as he shall find to be desirable in the interests of economy and efficiency. There shall be transferred to the fund the stocks of supplies, equipment, other assets, liabilities, and unpaid obligations relating to the services which he determines will be performed through the fund. Appropriations to the fund in such amounts as may be necessary to provide additional working capital are authorized. The working capital fund shall recover from the appropriations and funds for which services are performed, either in advance or by way of reimbursement, amounts which will approximate the costs incurred, including the accrual of annual leave and the depreciation of equipment. The fund shall also be credited with receipts from the sale or exchange of its property, and receipts in payment for loss or damage to property owned by the fund.

SEC. 620. To the extent necessary or appropriate to perform any function transferred by this Act, the Secretary may exercise, in carrying out the function so transferred, any authority or part thereof available by law, including appropriation Acts, to the official or agency from which such function was transferred.

SEC. 621. The Secretary shall, as soon as practicable after the end of each fiscal year, commencing with the first complete fiscal year following the effective date of this Act, make a report to the President for submission to the Congress on the activities of the Department during the preceding fiscal year. Such report shall include a statement of the Secretary's goals, priorities, and plans for the Department, together with an assessment of the progress made toward the attainment of those goals, the effective and efficient management of the Department, and progress made in coordination of its functions with other departments and agencies of the Federal Government. In addition, such report shall include the information required by section 15 of the Federal Energy Administration Act of 1974, section 307 of the Energy Reorganization Act of 1974, and section 15 of the Federal Nonnuclear Energy Research and Development Act of 1974, and shall include:

- (1) projected energy needs of the United States to meet the requirements of the general welfare of the people of the United States and the commercial and industrial life of the Nation, including a comprehensive summary of data pertaining to all fuel and energy needs of residents of the United States residing in—

(A) areas outside standard metropolitan statistical areas; and

(B) areas within such areas which are unincorporated or are specified by the Bureau of the Census, Department of Commerce, as rural areas;

(2) an estimate of (A) the domestic and foreign energy supply on which the United States will be expected to rely to meet such needs in an economic manner with due regard for the protection of the environment, the conservation of natural resources, and the implementation of foreign policy objectives, and (B) the quantities of energy expected to be provided by different sources (including petroleum, natural and synthetic gases, coal, uranium, hydroelectric, solar, and other means) and the expected means of obtaining such quantities;

(3) current and foreseeable trends in the price, quality, management, and utilization of energy resources and the effects of those trends on the social, environmental, economic, and other requirements of the Nation;

(4) a summary of research and development efforts funded by the Federal Government to develop new technologies, to forestall energy shortages, to reduce waste, to foster recycling, and to encourage conservation practices, and shall include recommendations for developing technologies capable of improving the quality of the environment and increasing efficiency;

(5) a review and appraisal of the adequacy and appropriateness of technologies, procedures, and practices (including competitive and regulatory practices) employed by Federal, State, and local governments and non-governmental entities to achieve the purposes of this Act;

(6) a summary of cooperative and voluntary efforts that have been mobilized to promote conservation and recycling, together with plans for such efforts in the succeeding fiscal year, and recommendations for changes in laws and regulations needed to encourage more conservation and recycling by all segments of the Nation's populace.

Sec. 622. The Secretary, when authorized in an appropriation act, in any fiscal year, may transfer funds from one appropriation to another within the Department, except that no appropriation shall be either increased or decreased pursuant to this section more than 5 per centum of the appropriation for such fiscal year.

Sec. 623. Appropriations to carry out the provisions of this Act shall be subject to annual authorization.

Sec. 624. Notwithstanding any other provision of this title, no authority to enter into contracts or to make payments under this title shall be effective except to such extent or in such amounts as are provided in advance in appropriations Acts.

"Sec. 625. The Secretary of Defense, the Secretary of Commerce, the Secretary of Housing and Urban Development, the Secretary of Agriculture, the Secretary of Transportation, the Secretary of Interior, the United States Postal Service, and the Administrator of General Services shall each designate one Assistant Secretary or Assistant Administrator, as the case may be, as the principal energy conservation officer of such Department or of the Administration. Such designated principal energy conservation officer shall be responsible for coordination with the Department with respect to energy matters."

#### TITLE VII—TRANSITIONAL, SAVINGS, AND CONFORMING PROVISIONS

Sec. 701. (a) Except as otherwise provided in this Act, the personnel employed in connection with, and the assets, liabilities, contracts, property, records, and unexpended balances of appropriations, authorizations, allocations, and other funds employed, held, used, arising from, available to or to be made available in connection with the functions transferred by this Act, subject to section 202 of the Budget and Accounting

Procedures Act of 1950, are hereby transferred to the Secretary for appropriate allocation.

(b) Positions expressly specified by statute or reorganization plan, personnel occupying those positions on the effective date of this Act, and personnel authorized to receive compensation at the rate prescribed for offices and positions at level I, II, III, IV, or V of the Executive Schedule (5 U.S.C. 5312-5316) on the effective date of this Act shall be subject to the provisions of section 705 of this Act.

Sec. 702. Except as otherwise provided in this Act, the transfer of full-time personnel (except special Government employees) and part-time personnel holding permanent positions pursuant to this title shall not cause any such employee to be separated or reduced in grade or compensation for one year after the date of enactment of this Act.

Sec. 703. Any person who, on the effective date of this Act, held a position compensated in accordance with the Executive Schedule prescribed in chapter 53 of title 5, United States Code, and who, without a break in service, is appointed in the Department to a position having duties comparable to those performed immediately preceding his appointment shall continue to be compensated in his new position at not less than the rate provided for his previous position, for the duration of his service in the new position.

Sec. 704. Employees transferred to the Department holding reemployment rights acquired under section 28 of the Federal Energy Administration Act of 1974 or any other provision of law or regulation may exercise such rights only within two years from the effective date of this Act. Reemployment rights may only be exercised at the request of the employee.

Sec. 705. Except as otherwise provided in this Act, whenever all of the functions vested by law in an agency, commission, or other body, or any component thereof, have been terminated or transferred from that agency, commission, or other body, or component by this Act, the agency, commission, or other body, or component, shall terminate. If an agency, commission, or other body, or any component thereof, terminates pursuant to the preceding sentence, each position and office therein which was expressly authorized by law, or the incumbent of which was authorized to receive compensation at the rates prescribed for an office or position at level II, III, IV, or V of the Executive Schedule (5 U.S.C. 5313-5316), shall terminate.

Sec. 706. The Director of the Office of Management and Budget, in consultation with the Secretary, is authorized and directed to make such determinations as may be necessary with regard to the transfer of functions which relate to or are utilized by an agency, commission or other body, or component thereof affected by this Act, to make such additional incidental dispositions of personnel, assets, liabilities, contracts, property, records, and unexpended balances of appropriations, authorizations, allocations, and other funds held, used, arising from, available to or to be made available in connection with the functions transferred by this Act as he may deem necessary to accomplish the purposes of this Act.

Sec. 707. All orders, determinations, rules, regulations, permits, contracts, certificates, licenses, and privileges—

(1) which have been issued, made, granted, or allowed to become effective by the President, any Federal department or agency or official thereof, or by a court of competent jurisdiction, in the performance of functions which are transferred under this Act to the Department after the date of enactment of this Act, and

(2) which are in effect at the time this Act takes effect,

shall continue in effect according to their terms until modified, terminated, superseded, set aside, or revoked by the President, the Secretary, or other authorized officials, a court of competent jurisdiction, or by operation of law.

SEC. 708. (a) (1) The provisions of this Act shall not affect any proceedings or any application for any license, permit, certificate, or financial assistance pending at the time this Act takes effect before any department, agency, commission, or component thereof, functions of which are transferred by this Act; but such proceedings and applications, to the extent that they relate to functions so transferred, shall be continued. Orders shall be issued in such proceedings, appeals shall be taken therefrom, and payments shall be made pursuant to such orders, as if this Act had not been enacted; and orders issued in any such proceedings shall continue in effect until modified, terminated, superseded, or revoked by a duly authorized official, by a court of competent jurisdiction, or by operation of law. Nothing in this subsection shall be deemed to prohibit the discontinuance or modification of any such proceeding under the same terms and conditions and to the same extent that such proceeding could have been discontinued if this Act had not been enacted.

(2) The Secretary is authorized to promulgate regulations providing for the orderly transfer of such proceedings to the Department.

(b) Except as provided in subsection (d)—  
(1) the provisions of this Act shall not affect suits commenced prior to the date this Act takes effect, and,

(2) in all such suits, proceedings shall be had, appeals taken, and judgments rendered in the same manner and effect as if this Act had not been enacted.

(c) No suit, action, or other proceeding commenced by or against any officer in his official capacity as an officer of any department or agency, functions of which are transferred by this Act, shall abate by reason of the enactment of this Act. No cause of action by or against any department or agency, functions of which are transferred by this Act, or by or against any officer thereof in his official capacity shall abate by reason of the enactment of this Act.

(d) If, before the date on which this Act takes effect, any department or agency, or officer thereof in his official capacity, is a party to a suit, and under this Act any function of such department, agency, or officer is transferred to the Secretary or any other official, then such suit shall be continued with the Secretary or other official, as the case may be, substituted.

Sec. 709. If any provision of this Act or the application thereof to any person or circumstance is held invalid, neither the remainder of this Act nor the application of such provision to other persons or circumstances shall be affected thereby.

Sec. 710. With respect to any functions transferred by this Act and exercised after the effective date of this Act, reference in any other Federal law to any department, commission, or agency or any officer or office the functions of which are so transferred shall be deemed to refer to the Secretary or other official or component of the Department in which this Act vests such functions.

Sec. 711. Nothing contained in this Act shall be construed to limit, curtail, abolish, or terminate any function of, or authority available to, the President which he had immediately before the effective date of this Act; or to limit, curtail, abolish, or terminate his authority to delegate, redelegate, or terminate any delegation of functions.

Sec. 712. (a) The Federal Energy Administration Act of 1974 is hereby amended as follows:

(1) in section 4—  
(A) by striking out the heading of such section and inserting in lieu thereof "Conflicts of Interest";

(B) by striking out subsections (a) through (h) of such section and redesignating subsections (i) and (j) as subsections (a) and (b), respectively; and

(C) by striking out, in the subsection redesignated as subsection (b), "holding any of the positions described in subsections (a), (c), (d), and (e) of this section" and inserting in lieu thereof "who is compensated at level II, III, or IV of the Executive Schedule and who is assigned principal responsibility for any program under this Act";

(2) in section 7—

(A) by striking out subsections (a) and (b) and redesignating subsection (c) as subsection (a);

(B) by striking out subsections (d), (e), (f), (g), and (h);

(C) by striking out "(1) (1)" and by striking out subparagraphs (A), (B), (C), (E), and (F) of subsection (1) (1) and redesignating subparagraph (D) of such subsection as subsection (b);

(D) by striking out, in the matter redesignated as subsection (b), "the rules, regulations, or orders described in paragraph (A)" and inserting in lieu thereof "any rule or regulation, or any order having the applicability and effect of a rule as defined in section 551(4) of title 5, United States Code, pursuant to this Act";

(E) by striking out, in such subsection, "paragraph (2) of this subsection" and inserting in lieu thereof "subsection (c)";

(F) by redesignating paragraph (2) (A) of subsection (1) as subsection (c) and by striking out subparagraph (B) of subsection (1) (2); and

(G) by striking out paragraph (3) of subsection (1) and by striking out subsections (j) and (k);

(3) by repealing sections 9, 28, and 30; and

(4) in section 52(a)—

(A) by striking out "and" at the end of paragraph (2);

(B) by striking out the period at the end of paragraph (3) and inserting in lieu thereof "; and"; and

(C) by adding after such paragraph (3) the following new paragraph:

"(4) the States to the extent required by the Natural Gas Act and the Federal Power Act."

(b) The Energy Reorganization Act of 1974 is hereby amended by repealing section 108.

(c) (1) The Atomic Energy Act of 1954 is hereby amended by repealing section 26.

(2) Section 161(d) of the Atomic Energy Act of 1954 shall not apply to functions transferred by this Act.

(d) Section 502 of the Motor Vehicle Information and Cost Savings Act is amended by adding at the end thereof the following:

"(h) The Secretary shall consult with the Secretary of Energy in carrying out his responsibilities under this section."

(e) The Energy Conservation Standards for New Buildings Act of 1976 is hereby amended as follows:

(1) in section 303(11), strike out "Secretary of Housing and Urban Development" and insert in lieu thereof "Secretary of Energy";

(2) in section 304(c), by inserting "the Secretary of Housing and Urban Development," after "the Administrator,"; and

(3) in section 310, by inserting "Secretary of Housing and Urban Development," after "the Administrator,".

(f) The Rural Electrification Act of 1936 is hereby amended by adding a new section 16 to title I thereof to read as follows:

"Sec. 16. In order to insure coordination of electric generation and transmission financing under this Act with the national energy policy, the Administrator in making or guaranteeing loans for the construction, operation, or enlargement of generating

plants or electric transmission lines or systems, shall consider such general criteria consistent with the provisions of this Act as may be published by the Secretary of Energy."

SEC. 713. Section 19(d) (1) of title 3, United States Code, is amended by inserting immediately before the period at the end thereof the following: "Secretary of Energy."

SEC. 714. (a) Section 101 of title 5, United States Code, is amended by adding at the end thereof the following:

"The Department of Energy."

(b) Subsection (a) of section 3104 of title 5, United States Code, is amended by inserting after paragraph (4) the following new paragraph:

"(5) Department of Energy—not more than 200."

(c) Subsection (a) of section 5108 of title 5, United States Code, is amended by striking out an aggregate of 2,754" and inserting in lieu thereof an aggregate of 3,104".

(d) Section 5312 of title 5, United States Code, is amended by adding at the end thereof the following:

"(14) Secretary of Energy."

(e) Paragraph (22) of section 5313 of title 5, United States Code, is amended to read as follows:

"(22) Deputy Secretary of Energy."

(f) Section 5314 of title 5, United States Code, is amended by amending paragraph (60) to read as follows:

"(60) Administrator, Economic Regulatory Administration, Department of Energy."

(g) Section 5315 of title 5, United States Code, is amended by striking out paragraph 102, and by adding at the end of the section the following:

"(114) Assistant Secretaries of Energy (9)."

"(115) General Counsel of the Department of Energy."

"(116) Administrator, Energy Information Administration, Department of Energy."

"(117) Inspector General, Department of Energy."

"(118) Director, Office of Energy Research, Department of Energy."

"(119) Additional Officers, Department of Energy (4)."

(h) Paragraphs (135) and (136) of section 5316 of title 5, United States Code, are amended to read as follows:

"(135) Deputy Inspector General, Department of Energy."

"(136) Additional Officers, Department of Energy (10)."

SEC. 715. With the consent of the appropriate department or agency head concerned, the Secretary is authorized to utilize the services of such officers, employees, and other personnel of the departments and agencies from which functions have been transferred to the Secretary for such period of time as may reasonably be needed to facilitate the orderly transfer of functions under this Act.

SEC. 716. The Civil Service Commission shall, as soon as practicable but not later than one year after the effective date of this Act, prepare and transmit to the Congress a report on the effects on employees of the reorganization under this Act, which shall include—

(1) an identification of any position within the Department or elsewhere in executive branch, which it considers unnecessary due to consolidation of functions under this Act;

(2) a statement of the number of employees entitled to pay savings by reason of the reorganization under this Act;

(3) a statement of the number of employees who are voluntarily or involuntarily separated by reason of such reorganization;

(4) an estimate of the personnel costs associated with such reorganization;

(5) the effects of such reorganization on labor management relations; and

(6) such legislative and administrative recommendations for improvements in per-

sonnel management within the Department as the Commission considers necessary.

SEC. 717. The transfer of functions under titles III and IV of this Act shall not affect the validity of any draft environmental impact statement published before the effective date of this Act.

SEC. 718. As used in this Act (1) references to "function" or "functions" shall be deemed to duty, obligation, power, authority, responsibility, right, privilege, and activity, or the plural thereof, as the case may be; and (2) references to "perform" when used in relation to functions, shall be deemed to include the exercise of power, authority, rights, and privileges.

#### TITLE VIII—EFFECTIVE DATE AND INTERIM APPOINTMENTS

SEC. 801. (a) The provisions of this Act shall take effect one hundred and twenty days after the Secretary first takes office, or on such earlier date as the President may prescribe and publish in the Federal Register, except that at any time after the date of enactment of this Act, (1) any of the officers provided for in title II and title IV of this Act may be nominated and appointed, as provided in those titles, and (2) the Secretary may promulgate regulations pursuant to section 708(a) (2) of this Act at any time after the date of enactment of this Act. Funds available to any department or agency (or any official or component thereof), functions of which are transferred to the Secretary by this Act, may with the approval of the Director of the Office of Management and Budget, be used to pay the compensation and expenses of any officer appointed pursuant to this subsection until such time as funds for that purpose are otherwise available.

(b) In the event that one or more officers required by this Act to be appointed by and with the advice and consent of the Senate shall not have entered upon office on the effective date of this Act, the President may designate any officer, whose appointment was required to be made by and with the advice and consent of the Senate and who was such an officer immediately prior to the effective date of the Act, to act in such office until the office is filled as provided in this Act. While so acting such persons shall receive compensation at the rates provided by this Act for the respective offices in which they act.

#### TITLE IX—SUNSET PROVISIONS

SEC. 901. The provisions of this Act shall expire on December 31, 1982.

MR. ARMSTRONG (during the reading). Mr. Speaker, I ask unanimous consent that further reading of the motion to recommit with instructions be dispensed with, and that it be printed in the RECORD.

THE SPEAKER. Is there objection to the request of the gentleman from Colorado?

There was no objection.

THE SPEAKER. The gentleman from Colorado (Mr. ARMSTRONG) is recognized for 5 minutes.

MR. ARMSTRONG. Mr. Speaker, the bill has been debated with great sufficiency, and I will take only a moment to explain the purpose of the motion which I now present.

The effect of these instructions is to retain all the amendments adopted during the debate in the Committee of the Whole except those amendments offered by the gentleman from California (Mr. Moss) relating to the Federal Energy Regulatory Commission, and to substitute in lieu of those the Erlenborn

amendment which was offered early on during our debate.

Mr. Speaker, the issue is a very simple one. It is whether or not we want to have this regulatory authority vested in the Department, where it would be subject to a degree of political pressure and where, in the view of many of us, it would be improperly lodged.

I believe—and I believe there are substantial numbers of us in this body who share my belief—that it would be far better to retain the concept of an independent Federal Power Commission. That is the entire purpose of this amendment.

Let me stress that all of the other amendments which have been adopted during the deliberations in the Committee of the Whole are continued in this proposal. Those amendments are the amendments offered by the gentleman from North Carolina (Mr. ROSE), the gentleman from Texas (Mr. BROOKS), the gentleman from Texas (Mr. CHARLES WILSON), the gentleman from Washington (Mr. MEEDS), the gentleman from Pennsylvania (Mr. EDGAR), the gentleman from Michigan (Mr. DINGELL), the gentleman from Texas (Mr. ECKHARDT), the gentleman from Nebraska (Mr. THONE), the gentleman from Florida (Mr. FUQUA), the gentleman from California (Mr. McCLOSKEY), the gentleman from New Jersey (Mr. HUGHES), the gentlewoman from Maryland (Mrs. SPELLMAN), the gentleman from Texas (Mr. KRUEGER), and the gentleman from Georgia (Mr. LEVITAS), and including as well the amendment adopted just a moment ago in the House that was offered by the gentleman from North Carolina (Mr. BROYHILL).

So, Mr. Speaker, with that word of explanation, I urge the adoption of the motion and the amendment.

The SPEAKER. The gentleman from Texas (Mr. BROOKS) is recognized for 5 minutes in opposition to the motion to recommit.

Mr. BROOKS. Mr. Speaker, I rise in opposition to the motion to recommit.

I will simply say that the Federal Power Commission is retained and is protected within this Department of Energy. It has adequate protection and it has independence within that umbrella. I think that is where it ought to be. That is where the committee thought it ought to be, and that is where the Committee of the Whole agreed earlier it should be placed.

Mr. Speaker, I ask for a no vote on the motion to recommit.

The SPEAKER. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER. The question is on the motion to recommit.

The question was taken; and the Speaker announced that the noes appeared to have it.

Mr. ARMSTRONG. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were refused.

Mr. BAUMAN. Mr. Speaker, I demand a division on the motion to recommit.

On a division (demanded by Mr. BAUMAN) there were—ayes 58, noes 140.

So the motion to recommit was rejected.

The SPEAKER. The question is on the passage of the bill.

Mr. BAUMAN. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 310, nays 20, not voting 103, as follows:

[Roll No. 305]

#### YEAS—310

|                  |                 |                |

 Mr. Caputo with Mr. Andrews of North Dakota.  
 Mr. Dellums with Mr. Digs.

Mr. MARRIOTT changed his vote from "nay" to "yea."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Mr. BROOKS. Mr. Speaker, pursuant to the provisions of House Resolution 603, I call up the Senate bill (S. 826) to establish a Department of Energy in the executive branch by the reorganization of energy functions within the Federal Government in order to secure effective management to assure a coordinated national energy policy, and for other purposes, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

#### MOTION OFFERED BY MR. BROOKS

Mr. BROOKS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BROOKS moves to strike out all after the enacting clause of the Senate bill (S. 826), and to insert in lieu thereof the provisions of H.R. 6804, as passed, as follows:

That this Act may be cited as the "Department of Energy Organization Act".

#### TITLE I—DECLARATION OF FINDINGS, POLICY, AND PURPOSES

SEC. 101. (a) The Congress of the United States finds that—

(1) the United States and the world face an increasing shortage of nonrenewable energy resources;

(2) this energy shortage presents a serious threat to the national security of the United States and to the health, safety, and welfare of its citizens;

(3) a strong national energy program is needed to increase the efficiency of energy use and availability of energy resources, particularly renewable energy resources;

(4) responsibility for energy policy execution, regulation, and research, development and demonstration is presently vested in many agencies and departments, and this fragmentation hinders development of an effective Federal response to the energy shortage; and

(5) formulation and implementation of a national energy program require the integration of certain Federal energy functions into a single department in the executive branch.

(b) It is the policy of the United States that—

(1) energy conservation shall enjoy the highest priority in any national energy program, and shall be carefully considered as an adjunct to programs to increase energy supply and as an option to programs that may present health, safety, or other environmental hazards;

(2) major emphasis shall also be given to the development and commercial use of solar, thermal, recycling, and other technologies utilizing renewable energy resources;

(3) in the conservation and development of energy resources, the energy needs of both rural and urban residents shall be given full consideration;

(4) the environmental and social consequences of any national energy program shall be analyzed and considered in evaluation of the program's potential;

(5) public participation in the development and enforcement of any national energy program shall be provided for, encouraged, and assisted; and

(6) to the maximum extent practicable the productive capacity of the private sector of the free enterprise system shall be utilized in the development and achievement of the policies and purposes of this act.

SEC. 102. The purposes of this Act are (1) to establish a permanent Department of Energy in the executive branch, (2) to vest in the Secretary of Energy such functions as are vested in, or transferred to, him by this Act, (3) to achieve, through the Department, effective management of energy functions of the Federal Government, (4) to provide the mechanism through which a coordinated national energy policy can be formulated and implemented to deal with the short-, mid-, and long-term energy problems of the Nation, (5) to safeguard and conserve our natural resources and environment, and (6) to promote the interest of consumers.

#### TITLE II—ESTABLISHMENT OF DEPARTMENT

SEC. 201. There is hereby established at the seat of government an executive department to be known as the Department of Energy (hereinafter in this Act referred to as the "Department"). There shall be at the head of the Department a Secretary of Energy (hereinafter in this Act referred to as the "Secretary") who shall be appointed by the President by and with the advice and consent of the Senate. The Department shall be administered under the supervision and direction of the Secretary.

SEC. 202. There shall be in the Department a Deputy Secretary, nine Assistant Secretaries, and a General Counsel, each of whom shall be appointed by the President, by and with the advice and consent of the Senate, and who shall perform such functions as the Secretary shall prescribe from time to time. The Assistant Secretaries shall be designated as follows:

(1) Assistant Secretary for Public, Congressional, and Intergovernmental Relations;

(2) Assistant Secretary for Conservation;

(3) Assistant Secretary for Defense Programs;

(4) Assistant Secretary for Environment;

(5) Assistant Secretary for Fossil and Nuclear Energy Technologies;

(6) Assistant Secretary for Policy, Evaluation, and International Programs;

(7) Assistant Secretary for Competition;

(8) Assistant Secretary for Production and Resource Applications; and

(9) Assistant Secretary for Solar, Geothermal, Recycling, and Other Energy Technologies.

SEC. 203. The Deputy Secretary shall act for, and exercise the functions of, the Secretary during the absence or disability of the Secretary or in the event the office of Secretary becomes vacant. The Secretary shall designate the order in which the Assistant Secretaries, General Counsel, and other officials shall act for, and perform the functions of, the Secretary during the absence or disability of both the Secretary and Deputy Secretary or in the event of vacancies in both of those offices.

SEC. 204. (a) There shall be within the De-

partment an Energy Information Administration to be headed by an Administrator, who shall be appointed by the President, by and with the advice and consent of the Senate. Such Administrator shall be a person who, by reason of professional background and experience, is especially qualified to manage an energy information system. There shall be transferred to and vested in the Administrator (on a nonexclusive basis as the Secretary may determine) all functions and authorities transferred to, and vested in, the Secretary under his Act relating to collection, analysis, and dissemination of energy information and data. The Administrator shall be subject to all duties and responsibilities established under part B of the Federal Energy Administration Act of 1974.

(b) In the performance of his professional functions in connection with collecting, analyzing, and disseminating energy information, the Administrator shall not be responsible to, or subject to, the direction of any officer, employee, or agent of the Department.

(c) The Administrator shall, upon request, promptly provide any information or analysis in his possession to any other administration, commission, or office within the Department relating to the functions of such administration, commission, or office.

SEC. 205. (a) There shall be within the Department an Economic Regulatory Administration to be headed by an Administrator, who shall be appointed by the President, by and with the advice and consent of the Senate. The Secretary shall by rule provide for a separation of regulatory and enforcement functions assigned to or vested in the Administration.

(b) The Secretary shall utilize the Economic Regulatory Administration to administer—

(1) any function which may be delegated to the Secretary under the Emergency Petroleum Allocation Act of 1973;

(2) any function transferred to the Secretary by section 301(b) of this Act which relates to establishment of rates and charges under the Federal Power Act and the Natural Gas Act (subject to the provisions of section 401); and

(3) such other functions as the Secretary may consider appropriate.

(c) The Administrator shall insure an adequate opportunity for public participation, including an opportunity for hearings, in issuing any rules or regulations under this section.

SEC. 206. (a) (1) There shall be within the Department an Office of Inspector General to be headed by an Inspector General, who shall be appointed by the President, by and with the advice and consent of the Senate, solely on the basis of integrity and demonstrated ability and without regard to political affiliation. The Inspector General shall report to, and be under the general supervision of, the Secretary or, to the extent such authority is delegated, the Deputy Secretary, but shall not be under the control of, or subject to supervision by, any other officer of the Department.

(2) There shall also be in the Office a Deputy Inspector General appointed by the President, by and with the advice and consent of the Senate, solely on the basis of integrity and demonstrated ability and without regard to political affiliation. The Deputy shall assist the Inspector General in the administration of the Office and shall, during the absence or temporary incapacity of the Inspector General, or during a vacancy in that Office, act as Inspector General.

(3) The Inspector General or the Deputy may be removed from office by the President. The President shall communicate the reasons for any such removal to both Houses of Congress.

(4) The Inspector General shall, in ac-

cordance with applicable laws and regulations governing the civil service, appoint an Assistant Inspector General for Audits and an Assistant Inspector General for Investigations.

(b) It shall be the duty and responsibility of the Inspector General—

(1) to supervise, coordinate, and provide policy direction for auditing and investigative activities relating to programs and operations of the Department;

(2) to recommend policies for, and to conduct, supervise, or coordinate other activities carried out or financed by the Department for the purpose of promoting economy and efficiency in the administration of, or preventing and detecting fraud and abuse in, its programs and operations;

(3) to recommend policies for, and to conduct, supervise, or coordinate relationships between the Department and other Federal agencies, State and local governmental agencies, and nongovernmental entities with respect to (A) all matters relating to the promotion of economy and efficiency in the administration of, or the prevention and detection of fraud and abuse in, programs and operations administered or financed by the Department, and (B) the identification and prosecution of participants in such fraud or abuse; and

(4) to keep the Secretary and the Congress fully and currently informed, by means of the reports required by subsection (c) and otherwise, concerning fraud and other serious problems, abuses, and deficiencies relating to the administration of programs and operations administered or financed by the Department, to recommend corrective action concerning such problems, abuses, and deficiencies, and to report on the progress made in implementing such corrective action.

(c) The Inspector General shall, not later than March 31 of each year, submit a report to the Secretary, to the Federal Energy Regulatory Commission, and to the Congress summarizing the activities of the Office during the preceding calendar year. Such report shall include, but need not be limited to—

(1) an identification and description of significant problems, abuses, and deficiencies relating to the administration of programs and operations of the Department disclosed by such activities;

(2) a description of recommendations for corrective action made by the Office with respect to significant problems, abuses, or deficiencies identified and described under paragraph (1);

(3) an evaluation of progress made in implementing recommendations described in the report or, where appropriate, in previous reports; and

(4) a summary of matters referred to prosecutive authorities and the extent to which prosecutions and convictions have resulted.

(d) The Inspector General shall report immediately to the Secretary, to the Federal Energy Regulatory Commission as appropriate, and to the appropriate committees or subcommittees of the Congress whenever the Office becomes aware of particularly serious or flagrant problems, abuses, or deficiencies relating to the administration of programs and operations of the Department. The Deputy and Assistant Inspectors General shall have particular responsibility for informing the Inspector General of such problems, abuses, or deficiencies.

(e) The Inspector General (1) may make such additional investigations and reports relating to the administration of the programs and operations of the Department as are, in the judgment of the Inspector General, necessary or desirable, and (2) shall provide such additional information or documents as may be requested by either House of Congress or, with respect to matters within their jurisdiction, by any committee or subcommittee thereof.

(f) Notwithstanding any other provision of

law, the reports, information, or documents required by or under this section shall be transmitted to the Secretary, to the Federal Energy Regulatory Commission, if applicable, and to the Congress, or committees or subcommittees thereof, by the Inspector General without further clearance or approval. The Inspector General shall, insofar as feasible, provide copies of the reports required under subsection (c) to the Secretary and the Commission, if applicable, sufficiently in advance of the due date for their submission to Congress to provide a reasonable opportunity for comments of the Secretary and the Commission to be appended to the reports when submitted to Congress.

(g) In addition to the authority otherwise provided by this section, the Inspector General, in carrying out the provisions of this section, is authorized—

(1) to have access to all records, reports, audits, reviews, documents, papers, recommendations, and other material available to the Department which relate to programs and operations with respect to which the Inspector General has responsibilities under this section;

(2) to require by subpoena the production of all information, documents, reports, answers, records, accounts, papers, and other data and documentary evidence necessary in the performance of the functions assigned by this section, which subpoena, in the case of contumacy or refusal to obey, shall be enforceable by order of any appropriate United States district court; and

(3) to have direct and prompt access to the Secretary when necessary for any purpose pertaining to the performance of functions and responsibilities under this section.

(h) For purposes of this section, the term "Department" includes any component thereof, including the Federal Energy Regulatory Commission.

Sec. 207. (a) There shall be within the Department an Office of Energy Research to be headed by a Director, who shall be appointed by the President, by and with the advice and consent of the Senate.

(b) It shall be the duty and responsibility of the Director—

(1) to administer the physical research program transferred to the Department from the Energy Research and Development Administration;

(2) to monitor the Department's energy research and development programs in order to advise the Secretary with respect to any undesirable duplication or gaps in such programs;

(3) to advise the Secretary with respect to the well-being and management of the multi-purpose laboratories under the jurisdiction of the Department, excluding laboratories that constitute part of the nuclear weapon complex;

(4) to advise the Secretary with respect to education and training activities required for effective short- and long-term basic and applied research activities of the Department;

(5) to advise the Secretary with respect to grants and other forms of financial assistance required for effective short- and long-term basic and applied research activities of the Department; and

(6) to carry out such additional duties assigned to the Office by the Secretary relating to basic and applied research, including but not limited to supervision or support of research activities carried out by any of the Assistant Secretaries designated by section 202 of this Act, as the Secretary considers advantageous.

#### TITLE III—TRANSFERS OF FUNCTIONS

Sec. 301. (a) Except as otherwise provided in this Act, there are hereby transferred to, and vested in, the Secretary all of the functions vested by law in the Administrator of the Federal Energy Administration or the

Federal Energy Administration, the Administrator of the Energy Research and Development Administration or the Energy Research and Development Administration; and the functions vested by law in the officers and components of either such Administration.

(b) Except as provided in section 401, there are hereby transferred to, and vested in, the Secretary the functions of the Federal Power Commission, or of the members, officers, or components thereof—

(1) relating to energy information, subject to subsection (c) of this section, under sections 304 and 311 of the Federal Power Act and sections 10 and 11 of the Natural Gas Act;

(2) under section 202(a) of the Federal Power Act (relating to establishment of regional districts);

(3) under section 202 (c) and (d) of the Federal Power Act (relating to emergency interconnections);

(4) under section 202(e) of the Federal Power Act (relating to regulation of exports of electric energy);

(5) under (A) section 3 of the Natural Gas Act, and (B) section 7 of such Act (to the extent such section is applicable to the regulation of exports and imports of natural gas); and

(6) under sections 4, 5, and 7 of the Natural Gas Act (to the extent that such sections relate to the establishment and review of priorities for curtailments of natural gas deliveries).

(c) In carrying out the functions transferred to the Secretary by subsection (b) of this section, the Secretary may issue, prescribe, make, amend, and rescind rules, regulations, and statements of policy pursuant to the Federal Power Act and the Natural Gas Act, which are of general applicability. Whenever the Secretary proposes any such action, he shall notify the Federal Energy Regulatory Commission, established by section 401 of this Act, of the proposed action. If the Commission determines, within such period as the Secretary may prescribe, that the proposed action may significantly affect any function administered by the Commission pursuant to title IV of this Act, the Secretary shall, except in a case where the Secretary determines that an emergency exists which requires immediate action, allow the Commission an additional period of at least 30 days to comment on the proposed action. Before taking the proposed action (other than immediate action required by an emergency), the Secretary shall take into account any comment or recommendation received from the Commission pursuant to this subsection. If the Secretary takes the proposed action and such action is inconsistent in any respect with such comment or recommendation, the Secretary shall publish in the Federal Register the reasons for such inconsistency.

(C) The Secretary, in formulating the information to be requested in the reports or investigations under section 304 and section 311 of the Federal Power Act and section 10 and section 11 of the Natural Gas Act, shall include in such reports and investigations such specific information as requested by the Federal Energy Regulatory Commission and copies of all reports, information, results of investigations and data under said sections shall be furnished by the Secretary to the Federal Energy Regulatory Commission.

Sec. 302. (a) There are hereby transferred to and vested in the Secretary all functions and authorities of the Secretary of the Interior under section 5 of the Flood Control Act of 1944 (16 U.S.C. 825a), and all other functions and authorities of the Secretary of the Interior, and officers and components of the Department of the Interior, with respect to—

(1) the Southeastern Power Administration;  
(2) the Southwestern Power Administration;

(3) the Alaska Power Administration;  
(4) the Bonneville Power Administration including but not limited to the authority contained in the Bonneville Project Act of 1937 (50 Stat. 731), as amended, and the Federal Columbia River Transmission System Act (88 Stat. 1376);

(5) the power marketing functions of the Bureau of Reclamation including the construction, operation, and maintenance of transmission lines and attendant facilities; and

(6) the transmission and disposition of the electric power and energy generated at Falcon Dam and Amistad Dam, international storage reservoir projects on the Rio Grande, pursuant to the Act of June 18, 1954, as amended by the Act of December 23, 1963.

(b) The Southeastern Power Administration, the Southwestern Power Administration, the Bonneville Power Administration, and the Alaska Power Administration shall be preserved as separate and distinct organizational entities within the Department, shall each be headed by an Administrator appointed by the Secretary. The functions and authority hereby transferred to the Secretary shall be exercised by the Secretary, acting by and through such Administrators. Each such Administrator shall maintain his principal office at a place located in the region served by his respective Federal power marketing entity.

(c) There is hereby created a separate and distinct Administration within the Department of Energy which shall be headed by an Administrator appointed by the Secretary. The functions and authority transferred in paragraph (a) (5) or (a) (6) of this section shall be exercised by the Secretary, acting by and through such Administrator; and the Administrator shall establish and shall maintain such regional offices as necessary to facilitate the performance of such functions. Neither the transfer of functions and authority effected by subsection a(5) of this section nor any changes in cost allocation or project evaluation standards shall be deemed to authorize the reallocation of joint costs of multipurpose facilities theretofore allocated unless and to the extent that such change is hereafter approved by Congress.

(d) (1) The authority of the Secretary of the Interior to prescribe regulations under the Outer Continental Shelf Lands Act, the Mineral Lands Leasing Act, the Mineral Leasing Act for Acquired Lands, the Geothermal Steam Act of 1970, and the Energy Policy and Conservation Act, which relate to the—

(A) fostering of competition for Federal leases (including, but not limited to, prohibition on bidding for development rights by certain types of joint ventures);

(B) implementation of alternative bidding systems authorized for the award of Federal leases;

(C) establishment of diligence requirements for operations conducted on Federal leases (including, but not limited to, procedures relating to the granting or ordering by the Secretary of the Interior of suspension of operations or production as they relate to such requirements);

(D) setting rates of production for Federal leases; and

(E) specifying the procedures, terms, and conditions for the acquisition and disposition of Federal royalty interests taken in kind,

except that such regulations shall be promulgated by the Secretary only after consultation with the Secretary of the Interior.

(2) The Secretary of the Interior shall retain any authorities not transferred by paragraph (1) of this subsection and shall

be solely responsible for the issuance and supervision of leases and the enforcement of all regulations applicable to the leasing of mineral resources, including, but not limited to, lease terms and conditions and production rates. No regulation issued by the Secretary shall restrict or limit any authority retained by the Secretary of the Interior under this paragraph with respect to the issuance or supervision of leases. Nothing in this subsection shall be construed to affect Indian lands and resources or to transfer any responsibilities of the Secretary of the Interior concerning such lands and resources.

(e) Those functions of the Secretary of the Interior, the Department of the Interior, and officers and components of that Department under the Act of May 18, 1910, and other authorities, exercised by the Bureau of Mines, but limited to—

(1) fuel supply and demand analysis and data gathering;

(2) research and development relating to increased efficiency of production technology of solid fuel minerals, other than research relating to mine health and safety and research relating to the environmental and leasing consequences of solid fuel mining, which shall remain in the Department of the Interior; and

(3) coal preparation and analysis.

(f) The functions of the Secretary of the Interior to establish production rates for all Federal leases.

Sec. 303. The Secretary of the Interior shall afford the Secretary a reasonable opportunity, prior to the execution of a Federal lease, to disapprove any term or condition of such Federal lease which relates to the matters with respect to which the Secretary has authority to prescribe regulations under section 302(d). No such term or condition may be included in such a lease if it is disapproved by the Secretary.

Sec. 304. As used in sections 302 and 303 of this Act, "Federal lease" means an agreement which, for any consideration, including, but not limited to, bonuses, rents, or royalties conferred and covenants to be observed, authorizes any person to explore for, develop, or produce (or to do any or all of these) oil and gas, coal, oil shale, tar sands, or geothermal resources in public, acquired, or submerged lands or interests therein under Federal jurisdiction.

Sec. 305. All functions vested by law in the Director of the Office of Energy Information and Analysis by part B of the Federal Energy Administration Act of 1974 are hereby transferred to the Administrator of the Energy Information Administration.

Sec. 306. There are hereby transferred to and vested in the Secretary all of the functions vested in the Secretary of Housing and Urban Development by the Energy Conservation Standards for New Buildings Act of 1976 (title III of the Energy Conservation and Production Act).

Sec. 307. There are hereby transferred to and vested in the Secretary such functions as are set forth in the Interstate Commerce Act and vested by law in the Interstate Commerce Commission or the Chairman and members thereof as relate to transportation of oil by pipeline.

Sec. 308. There are hereby transferred to and vested in the Secretary all functions vested by chapter 641 of title 10, United States Code, in the Secretary of the Navy as they relate to the administration of, and there is hereby transferred to, and vested in, the Secretary jurisdiction over—

(1) Naval Petroleum Reserve Numbered 1 (Elk Hills) located in Kern County, California, established by Executive order of the President, dated September 2, 1912;

(2) Naval Petroleum Reserve Numbered 2 (Buena Vista), located in Kern County, California, established by Executive order of the President, dated December 13, 1912;

(3) Naval Petroleum Reserve Numbered 3 (Teapot Dome) located in Wyoming, established by Executive order of the President, dated April 30, 1915;

(4) Oil Shale Reserve Numbered 1, located in Colorado, established by Executive order of the President, dated December 6, 1916, as amended by Executive order of the President, dated June 12, 1919;

(5) Oil Shale Reserve Numbered 2, located in Utah, established by Executive order of the President, dated December 6, 1916; and

(6) Oil Shale Reserve Numbered 3, located in Colorado, established by Executive order of the President, dated September 27, 1974.

The surface management of such reserves shall be carried out by the Secretary of the Interior under applicable laws, including the Federal Land Policy and Management Act of 1976, administered by such Secretary.

Sec. 309. There are hereby transferred to and vested in the Secretary all functions of the Secretary of Commerce, the Department of Commerce, and officers and components of that Department, as relate to or are utilized by the Office of Energy Programs, but limited to industrial energy conservation programs.

Sec. 310. (a) The Division of Naval Reactors, established pursuant to section 25 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2035), and responsible for research, design, development, health and safety matters pertaining to naval nuclear propulsion plants and assigned civilian power reactor programs, is transferred to the Department under the Assistant Secretary for Fossil and Nuclear Energy Technologies and shall be deemed to be an organizational unit established by this Act.

(b) The Division of Military Application, established by section 25 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2035), and the functions of the Energy Research and Development Administration with respect to the Military Liaison Committee, established by section 27 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2037), are transferred to the Department under the Assistant Secretary for Defense Programs and such organizational units shall be deemed to be an organizational unit established by this Act.

Sec. 311. Notwithstanding section 301(a), there are hereby transferred to, and vested in, the Secretary of Transportation all of the functions vested in the Administrator of the Federal Energy Administration by section 381(b) (1) (B) of the Energy Policy and Conservation Act.

#### TITLE IV—FEDERAL ENERGY REGULATORY COMMISSION

Sec. 401. (a) (1) There is hereby established within the Department an independent regulatory commission to be known as the Federal Energy Regulatory Commission (hereinafter referred to in this title as the "Commission").

(2) There are hereby transferred to, and vested in, the Commission (A) all functions and authority of the Federal Power Commission under the Federal Power Act, the Natural Gas Act, and all other laws under which the Commission operates, which are not specifically transferred to, and vested in, the Secretary pursuant to section 301(b) of this Act, and (B) all other functions transferred by title III of this Act which involve an agency determination required by law to be made on the record after opportunity for an agency hearing.

(3) Except as provided in section 301(b) (1), the Commission shall have the authority to prescribe, issue, make, amend, and rescind rules, regulations, and statements of policy under the Federal Power Act and the Natural Gas Act, and, in exercising such authority, shall coordinate its actions with the Secretary.

(4) The Secretary may assign to the Commission, by rule, any other functions vested in or delegated to him.

(b) The Commission shall be comprised of five members appointed by the President, by and with the advice and consent of the Senate. One of the members shall be designated by the President as Chairman. Members shall hold office for a term of four years and may be removed by the President only for inefficiency, neglect or duty, or malfeasance in office. The terms of the members first taking office shall expire (as designated by the President at the time of appointment), two at the end of two years, two at the end of three years, and one at the end of four years. Not more than three members of the Commission shall be members of the same political party. Any Commissioner appointed to fill a vacancy occurring prior to the expiration of the term for which his predecessor was appointed shall be appointed only for the remainder of such term. A Commissioner may continue to serve after the expiration of this term until his successor has taken office, except that he may not so continue to serve more than one year after the date on which his term would otherwise expire under this subsection.

(c) The Chairman shall be responsible on behalf of the Commission for the executive and administrative operation of the Commission, including functions of the Commission with respect to (1) the appointment and employment of hearing examiners in accordance with the provisions of title 5, United States Code, (2) the selection, appointment, and supervision of personnel employed by or assigned to the Commission, except that each member of the Commission may select and supervise personnel for his personal staff, (3) the distribution of business among personnel and among administrative units of the Commission, and (4) the use and expenditure of funds appropriated for Commission functions. The Secretary shall provide to the Commission such support and facilities as the Commission may need to carry out its functions.

(d) In each annual authorization and appropriation request under this Act, the Secretary shall identify the portion thereof intended for the support of the Commission and include a statement by the Commission (1) showing the amount requested by the Commission in its budgetary presentation to the Secretary and the Office of Management and Budget and (2) an assessment of the budgetary needs of the Commission. Whenever the Commission submits any legislative recommendation or testimony, or comments on legislation, to the Secretary, the President, or the Office of Management and Budget, it shall concurrently transmit a copy thereof to the appropriate committees of Congress.

(e) In the performance of their functions, the members and employees of the Commission shall not be responsible to, or subject to the supervision or direction of, any officer, employee, or agent of the Department.

(f) A decision of the Commission shall be a final agency action within the meaning of section 704 of title 5, United States Code, with respect to matters within the Commission's jurisdiction and shall not be subject to further review by the Secretary or any officer or employee of the Department.

(g) The Chairman of the Commission may from time to time designate any other member of the Commission as Acting Chairman to act in the place and stead of the Chairman during his absence. The Chairman (or the Acting Chairman in the absence of the Chairman) shall preside at all sessions of the Commission and a quorum for the transaction of business shall consist of at least three members present. Each member of the Commission, including the Chairman, shall have one vote. Actions of the Commission shall be determined by a majority vote

of the members present. The Commission shall have an official seal which shall be judicially noticed.

(h) The Commission is authorized to establish such procedural and administrative rules as are necessary to the exercise of its functions. Until changed by the Commission, such rules of the Federal Power Commission shall continue in effect.

(i) In carrying out all its functions, the Commission shall have the powers authorized by the Federal Power Act and the Natural Gas Act to hold hearings, sign and issue subpoenas, administer oaths, examine witnesses, and receive evidence at any place in the United States it may designate. The Commission may, by one or more of its members or by such agents as it may designate, conduct any hearing or other inquiry necessary or appropriate to its functions.

Sec. 402. No person in the employ of, or holding any official relation to, any person engaged in the production, generation, transmission, distribution, or sale of electric power, petroleum, petroleum products, natural gas, coal, nuclear material, synthetic fuels, or energy from renewable resources, wastes, or geothermal steam, or in energy research or development, or owning stock or bonds thereof, or having a pecuniary interest therein, shall enter upon the duties of, or hold the office of Commission member. Members shall not engage in any other business, vocation, or employment while members of the Commission.

Sec. 403. The principal office of the Commission shall be in or near the District of Columbia, where its general sessions shall be held; but the Commission may sit anywhere in the United States.

Sec. 404. The Secretary, each officer of the Department, and each Federal agency, subject to applicable provisions of law, shall cooperate with the Commission in providing, upon request, such information as it may require.

Sec. 405. Nothing in this title shall be construed in any way to limit the functions of the Secretary relating to activities within the jurisdiction of the Secretary, including any function shared with the Commission.

Sec. 406. The Secretary may as of right intervene or otherwise participate in any adjudicatory proceeding before the Commission. The Secretary shall comply with rules of procedure of general applicability governing the timing of intervention or participation in such proceeding or activity and, upon intervening or participating therein, shall comply with rules of procedure of general applicability governing the conduct thereof. The intervention or participation of the Secretary in any proceeding or activity shall not affect the obligation of the Commission to assure procedural fairness to all participants.

Sec. 407. For the purpose of section 552b of title 5, United States Code, the Commission shall be deemed to be an agency. For the purposes of chapter 9 of title 5, United States Code, the Commission shall be deemed to be an independent regulatory agency.

#### TITLE V—ADMINISTRATIVE PROCEDURES AND JUDICIAL REVIEW

Sec. 501. (a) Subject to the other requirements of this title, the provisions of subchapter II of chapter 5 of title 5, United States Code, shall apply in accordance with its terms to any rule or regulation, or any order having the applicability and effect of a rule (as defined in section 551(4) of title 5, United States Code), issued pursuant to authority vested by law in, or transferred or delegated to, the Secretary, or required by this Act or any other Act to be carried out by any other officer, employee, or component of the Department, other than the Federal Energy Regulatory Commission, including any such rule, regulation, or order of a State, or local government agency or officer thereof, issued pursuant to authority dele-

gated by the Secretary in accordance with title. If any provision in any Act, the functions of which are transferred, vested, or delegated pursuant to this Act, provides administrative procedure requirements in addition to those provided in this title, such additional requirements shall also apply to actions under that provision.

(b) (1) In addition to the requirements of subsection (a) of this section, notice of any proposed rule, regulation, or order described in subsection (a) shall be given by publication of such proposed rule, regulation, or order in the Federal Register. Such publication shall be accompanied by a statement of the research, analysis, and other available information in support of, the need for, and the probable effect of, any such proposed rule, regulation, or order. Other effective means of publicity shall be utilized as may be reasonably calculated to notify concerned or affected parties of the nature and probable effect of any such proposed rule, regulation, or order. In each case, a minimum of thirty days following such publication shall be provided for opportunity to comment prior to the effective date of any such rule, regulation, or order; except that the requirements of this subsection as to time of notice and opportunity to comment may be waived, subject to paragraph (3) of this section, where strict compliance is found by the Secretary to be likely to cause serious harm or injury to the public health, safety, or welfare, and such finding is set out in detail in such rule, regulation, or order.

(2) Public notice of all rules, regulations, or orders described in subsection (a) which are promulgated by officers of a State or local government agency pursuant to a delegation under this Act shall be provided by publication of such proposed rules, regulations, or orders in at least two newspapers of statewide circulation: If such publication is not practicable, notice of any such rule, regulation, or order shall be given by such other means as the officer promulgating such rule, regulation, or order determines will reasonably assure wide public notice.

(3) The requirements of this subsection may be satisfied within a reasonable period of time subsequent to the promulgation of the rule, regulation, or order if the Secretary finds, under paragraph (1), that an emergency exists requiring the immediate implementation of any such rule, regulation, or order.

(c) (1) If the Secretary determines at the time of publication of a proposed rule, regulation, or order described in subsection (a) that no substantial issue exists and that such rule, regulation, or order is unlikely to have a substantial impact on the nation's economy or large numbers of individuals or businesses, the proposed rule, regulation, or order may be promulgated in accordance with section 553 of title 5, United States Code, except that subsection (a) (2) of section 553 shall not apply. If the Secretary determines at the time of publication of any such rule, regulation, or order that a substantial issue exists or that such rule, regulation, or order is likely to have a substantial impact on the nation's economy or large numbers of individuals or businesses, an opportunity for oral presentation of views, data, and arguments shall be provided.

(2) Any person, who would be adversely affected by the implementation of any proposed rule, regulation, or order issued pursuant to the first sentence of paragraph (1) and who desires an opportunity for oral presentation of views, data, and arguments, shall offer evidence supporting the existence of such substantial issues or such impact during the period established for public comment. If the Secretary determines that such evidence is sufficient to establish the existence of such issues or impact, the Secretary shall provide an opportunity for such oral presentation.

(3) Following the notice and comment period, including any oral presentation required by this subsection, the Secretary may promulgate such rule, regulation, or order, which shall include therewith an explanation responding to the major comments, criticisms, and alternatives offered during the comment period.

(4) A transcript shall be kept of any oral presentation with respect to a rule, regulation, or order described in subsection (a).

(d) The Secretary, or any officer authorized to issue rules, regulations, or orders under the Federal Energy Administration Act, the Emergency Petroleum Allocation Act of 1973, the Energy Supply and Environmental Coordination Act of 1974, or the Energy Policy and Conservation Act shall provide for the making of such adjustments, consistent with the other purposes of the relevant Acts, as may be necessary to prevent special hardship, inequity, or unfair distribution of burdens, and shall, by rule, establish procedures which are available to any person for the purpose of seeking an interpretation, modification, or rescission of, exception to, or exemption from, such rule, regulation, or order. The Secretary or any such officer shall additionally insure that each decision on any application or petition requesting an adjustment shall specify the standards of hardship, inequity, or unfair distribution of burden by which any disposition was made, and the specific application of such standards to the facts contained in any such application or petition. If any person is aggrieved or adversely affected by a denial of a request for adjustment under the preceding sentences, such person may request a review of such denial by the Secretary and may obtain judicial review in accordance with this title when such a denial becomes final. The Secretary shall, by rule, establish appropriate procedures, including a hearing when requested, for review of a denial, and where deemed advisable by the Secretary, for considering other requests for action under this subsection, except that no review of a denial under this subsection shall be made by the same officer denying the adjustment.

(e) (1) With respect to any rule, regulation, or order, the effects of which, except for indirect effects of an inconsequential nature, are confined to—

(A) a single unit of local government or the residents thereof;

(B) a single geographic area within a State or the residents thereof; or

(C) a single State or the residents thereof; the Secretary shall, in any case where appropriate, afford an opportunity for a hearing or the oral presentation of views and provide procedures for the holding of such hearing or oral presentation within the boundaries of the unit of local government, geographic area, or State described in paragraphs (A) through (C) of this paragraph as the case may be.

(2) For purposes of this subsection—

(A) the term "unit of local government" means a county, municipality, town, township, village, or other unit of general government below the State level; and

(B) the term "geographic area within a State" means a special purpose district or other region recognized for governmental purposes within such State which is not a unit of local government.

(3) Nothing in this subsection shall be construed as requiring a hearing or an oral presentation of views where none is required by this section or other provision of law.

(f) (1) Judicial review of agency action taken under any law the functions of which are vested by law in, or transferred or delegated to, the Secretary or any officer, employee, or component of the Department shall, notwithstanding such vesting, transfer, or delegation, be made in the manner specified in such law.

(2) Notwithstanding the amount in controversy, the district courts of the United States shall have exclusive original jurisdiction of all other cases or controversies arising under this Act, or under rules, regulations, or orders issued exclusively thereunder, other than any actions taken to implement or enforce any rule, regulation, or order by any officer of a State or local government agency under this Act, except that nothing in this section affects the power of any court of competent jurisdiction to consider, hear, and determine in any proceeding before it any issue raised by way of defense (other than a defense based on the unconstitutionality of this Act or the validity of action taken by any agency under this Act). If in any such proceeding an issue by way of defense is raised based on the unconstitutionality of this Act or the validity of agency action under this Act, the case shall be subject to removal by either party to a district court of the United States in accordance with the applicable provisions of chapter 89 of title 28, United States Code. Cases or controversies arising under any rule, regulation, or order of any officer of a State or local government agency may be heard in either (A) any appropriate State court, or (B) without regard to the amount in controversy, the district courts of the United States.

(3) Where authorized by any law vested, transferred, or delegated pursuant to this Act, the Secretary may, by rule, prescribe procedures for State or local government agencies authorized by the Secretary to carry out such functions as may be permitted under applicable law. Such procedures shall apply to such agencies in lieu of this section, and shall require that prior to taking any action, such agencies shall take steps reasonably calculated to provide notice to persons who may be affected by the action, and shall afford an opportunity for presentation of views (including oral presentation of views where practicable) a reasonable time before taking the action.

(4) Notwithstanding any other law, the litigation of the Department shall be subject to the supervision of the Attorney General pursuant to chapter 31 of title 28, United States Code. This paragraph shall not apply to the Federal Energy Regulatory Commission.

SEC. 502. (a) Section 501 of this title shall remain in effect for two years after the effective date of this Act. Any proceeding commenced under such section prior to the termination of its effect shall, notwithstanding such termination, be conducted in accordance with such section. Orders shall be issued in such proceedings, appeals shall be taken therefrom, and payment shall be made pursuant to such orders as if such section had not terminated; and orders issued in any such proceedings shall continue in effect until modified, terminated, superseded, or revoked by a duly authorized official, by a court of competent jurisdiction, or by operation of law. Nothing in this section shall be deemed to prohibit the discontinuance or modification of any such proceeding under the same terms and conditions and to the same extent that such proceeding could have been discontinued or modified if such section had not terminated.

(b) Within one year after effective date of this Act, the Secretary shall submit a report to Congress concerning the actions taken to implement section 501. The report shall include a discussion of the adequacy of such section from the standpoint of the Department and the public, including a summary of any comments obtained by the Secretary from the public about such section and implementing regulations, and such recommendations as the Secretary deems appropriate concerning the extension and revision of such section.

(c) Nothing in this title shall be construed as repealing by implication any existing provision of law relating to administrative procedures and judicial review applicable to any authority vested, transferred, or delegated pursuant to this Act, except that such existing provisions shall, to the extent provided by section 501, be superseded by the provisions of such section during the two years specified in subsection (a).

SEC. 503. (a) (1) Except as provided in subsection (c), but notwithstanding any other provision of this or of any other Act, simultaneously with promulgation or repromulgation of any rule or regulation issued pursuant to authority transferred, vested, or delegated to the Secretary or the Federal Energy Regulatory Commission, other than a rule or regulation establishing a price for petroleum, petroleum products, or natural gas, the Secretary or the Commission, as the case may be, shall submit a copy thereof to the Secretary of the Senate and the Clerk of the House of Representatives. Except as provided in paragraph (2), the rule or regulation shall not become effective, if—

(A) within 90 calendar days of continuous session of Congress after the date of promulgation, both Houses of Congress adopt a concurrent resolution, the matter after the resolving clause of which is as follows: "That Congress disapproves the rule or regulation promulgated by dealing with the matter of \_\_\_\_\_, which rule or regulation was transmitted to Congress on \_\_\_\_\_," the blank spaces therein being appropriately filled; or

(B) within 60 calendar days of continuous session of Congress after the date of promulgation, one House of Congress adopts such a concurrent resolution and transmits such resolution to the other House, and such resolution is not disapproved by such other House within 30 calendar days of continuous session of Congress after such transmittal.

(2) If at the end of 60 calendar days of continuous session of Congress after the date of promulgation of a rule or regulation described in paragraph (1), no committee of either House of Congress has reported or been discharged from further consideration of a concurrent resolution disapproving the rule or regulation, and neither House has adopted such a resolution, the rule or regulation may go into effect immediately. If, within such 60 calendar days, such a committee has reported or been discharged from further consideration of such a resolution, or either House has adopted such a resolution, the rule or regulation may go into effect not sooner than 90 calendar days of continuous session of Congress after its promulgation unless disapproved as provided in paragraph (1) (A).

(b) (1) The agency may not promulgate a new rule or regulation identical to one disapproved pursuant to this section unless a statute is adopted affecting the agency's powers with respect to the subject matter of the rule or regulation.

(2) If the agency proposes a new rule or regulation dealing with the same subject matter as a disapproved rule or regulation, the agency shall comply with the procedures required for the issuance of a new rule or regulation.

(c) The provisions of this section shall not apply with respect to a rule or regulation which is promulgated under a provision of law which provides for another method of congressional review and disapproval or approval of such rule or regulation than that provided by this section.

(d) For the purpose of this section, calendar days of continuous session of Congress shall be computed in accordance with section 906(b) of title 5, United States Code.

Sec. 504(a) If upon investigation, the Secretary or his authorized representative believes that a person has violated any regulation, rule, or order promulgated pursuant to the Emergency Petroleum Allocation Act, he may issue a remedial order to the person. Each remedial order shall be in writing and shall describe with particularity the nature of the violation, including a reference to the provision of the rule, regulation, or order alleged to have been violated. For purposes of this section "person" includes any individual, association, company, corporation, partnership, or other entity however organized.

(b) If within thirty days from the receipt of the remedial order issued by the Secretary, the person fails to notify the Secretary that he intends to contest the remedial order, the remedial order shall become effective and shall be deemed a final order of the Secretary and not subject to review by any court or agency.

(c) If within thirty days from the receipt of the remedial order issued by the Secretary, the person notifies the Secretary that he intends to contest a remedial order issued under subsection (a) of this section, the Secretary shall immediately advise the Economic Regulatory Administration of such notification. Upon such notice, the Administrator shall stay the effect of the remedial order except where he finds the public interest requires immediate compliance with such remedial order. The Administrator shall, upon request, afford an opportunity for a hearing, including the submission of briefs, evidence (oral or documentary) and oral arguments. To the extent that the Administrator in his discretion determines such is required for a full and true disclosure of the facts, he shall afford the right of cross examination. The Administrator shall thereafter issue an order, based on findings of fact, affirming, modifying, or vacating the Secretary's remedial order, or directing other appropriate relief, and such order shall, for the purpose of judicial review, constitute final agency action.

(d) The Secretary may set reasonable time limits for the Administration to complete action on a proceeding referred to it pursuant to this section.

(e) Nothing in this section shall be construed to affect any procedural action taken by the Secretary prior to or incident to initial issuance of a remedial order which is the subject of the hearing provided herein, but such procedures shall be reviewable in the hearing.

#### TITLE VI—ADMINISTRATIVE PROVISIONS

Sec. 601. (a) For purposes of this section—

(1) the term "Department" includes any agency, administration, commission, or other component thereof;

(2) the term "Department proceeding" includes any Department hearing, application, rulemaking or other determination, contract, grant, reward, fund transfer, claim, controversy, charge, accusation, or arrest;

(3) the term "employee" means any person holding a position in the Department;

(4) the term "employment" means employment with an energy concern and includes employment as a consultant, agent, attorney, or otherwise and includes voluntary employment;

(5) the term "energy concern" means any person significantly engaged in the production, generation, transmission, distribution, or sale of electric power, petroleum or petroleum products, synthetic fuels, energy from renewable resources, wastes, or geothermal steam, nuclear energy, natural gas, coal, solar energy, or other energy-related source or resource, or in any research or development significantly related to such production, generation, transmission, distribution, or sale;

(6) the term "participate" includes participation by way of decision, approval, disapproval, recommendation, the rendering of advice, or investigation; and

(7) the term "supervisory employee" means any of the following officers or employees of the Department—

(A) an individual compensated at the rate provided for grade of GS-16 or above under section 5332 of title 5, United States Code;

(B) an individual compensated under the Executive Schedule, as provided in subchapter II of chapter 53 of title 5 of the United States Code;

(C) any other individual who, in the judgment of the Secretary, exercises sufficient decisionmaking authority so that the provisions of this section should apply to such individual;

(D) the Director or Deputy Director of any State, regional, district, local, or other field office; or

(E) an employee or officer who has responsibility with respect to the award, review, modification, or termination of any grant, contract, reward, or fund transfer within the authority of the Secretary.

(b)(1) No supervisory employee shall knowingly receive compensation from, or hold any official relation to, any energy concern, or own stocks or bonds thereof, or have any pecuniary interest therein.

(2) Personnel transferred to the Department pursuant to section 701 of this Act shall have six months to comply with the provisions of paragraph (1) of this subsection with respect to prohibited property holdings. Any person transferred pursuant to section 701 shall notify the Secretary of all circumstances which would be violative of the restrictions described in subsection (b)(1) not later than fifteen days after the date of such transfer as determined by the United States Civil Service Commission.

(3) Where exceptional hardship would result, or where the interest is vested, the Secretary is authorized to waive the requirements of this subsection with respect to any person covered. Such waiver shall:

(A) be published in the Federal Register;

(B) contain a finding by the Secretary that exceptional hardship would result; and

(C) indicate the steps taken by the Secretary to minimize conflict of interest and the appearance of conflict of interest.

Such waiver shall in no instance constitute a waiver of the requirements of section 208 of title 18, United States Code.

(c)(1) Each supervisory employee shall file with the Secretary, in such form and manner as the Secretary shall prescribe, a report describing all previous employment with any energy concern.

(2) Each former supervisory employee of the Department shall file with the Secretary, in such form and manner as the Secretary shall prescribe, no later than the November 15 of—

(A) the fiscal year following the fiscal year in which such person ceased to be an employee of the Department, and

(B) each of the succeeding two fiscal years, a report describing any employment with any energy concern during the fiscal year to which such report relates.

(3) Each report filed pursuant to paragraphs (1) and (2) shall contain the name and address of the person filing the report, the name and address of the energy concern with which he held employment, a brief description of his duties and work for the energy concern, the dates of his employment, and such other pertinent information as the Secretary may require.

(4) The Secretary shall maintain a file containing the reports filed with him pursuant to paragraphs (1) and (2). All such reports shall be available for public inspection and copying at all times during regular working hours.

(d)(1)(A) For a period of two years after terminating any employment with any energy concern, no supervisory employee shall knowingly participate in any Department proceeding in which his former employer is substantially, directly, or materially involved, other than in a rulemaking proceeding which has a substantial effect on numerous energy concerns.

(B) While an employee of the Department, no supervisory employee shall knowingly participate in any Department proceeding for which he had direct responsibility, or in which he participated substantially or personally, while in the employment of any energy concern.

(C) No supervisory employee who solicits, negotiates, or arranges for employment with any energy concern shall participate in any Department proceeding in which such energy concern is substantially, directly, or materially involved.

(2)(A) For a period of two years after ceasing to be an employee of the Department, no supervisory employee shall, in any professional capacity for anyone other than the United States, appear or attend before, or make any oral or written communication or submission to, or filing with, the Department or any officer or employee of the Department in connection with any Department proceeding.

(B) For a period of five years after ceasing to be an employee of the Department, no supervisory employee shall, in any professional capacity for anyone other than the United States, appear or attend before, or make any oral or written communication to, or filing with, the Department or any officer or employee of the Department in connection with any Department proceeding in which he participated substantially or personally while a supervisory employee.

(3) Notwithstanding any penalty imposed under subsection (e), any violation of this subsection shall be taken into consideration in deciding the outcome of any Department proceeding in connection with which the prohibited appearance, attendance, communication, or submission was made.

(4) Whenever the Secretary makes a written finding as to a particular supervisory employee that the application of a particular restriction or requirement imposed by paragraph (1) or (2) of this subsection in a particular circumstance would work an exceptional hardship upon such supervisory employee or would be contrary to the national interest, the Secretary may waive in writing such restriction or requirement as to such supervisory employee. The Secretary shall maintain a file containing all findings and waivers made by him pursuant to this paragraph, and all such findings and waivers shall be available for public inspection and copying at all times during regular working hours. Any waiver made by the Secretary of a restriction imposed under paragraph (2) of this subsection shall also be filed with any record of the Department proceeding as to which the waiver for purposes of participation is granted. No such waiver shall in any instance constitute a waiver of the requirement of section 207 of title 18, United States Code.

(e) Any person who violates subsections (b), (c), or (d), taking into account any waiver under subsection (b)(3) or (d)(4), shall be subject to a civil penalty, assessed by the Secretary, not to exceed \$10,000 for each violation.

(f) Nothing in this section shall be deemed to limit the operation of section 207 or section 208 of title 18, United States Code.

Sec. 602. (a) Each officer or employee of the Department, including the Federal Energy Regulatory Commission, who has any known financial interest—

(1) in any person engaged in the business, other than at the retail level, of developing,

producing, refining, transporting by pipeline, or converting into synthetic fuel, minerals, wastes, or renewable resources, or in the generation of energy from such minerals, wastes, or renewable resources, or in conducting research, development, and demonstration with financial assistance under this Act or any Act, the administration of which is transferred pursuant to this Act;

(2) in property from which coal, natural gas, crude oil, or nuclear material is commercially produced;

(3) in any person engaged in the production, generation, transmission, distribution, or sale of electric power; or

(4) in any person engaged in production, sale, or distribution of nuclear materials; shall, beginning on February 1, 1978, annually file with the Secretary a written statement disclosing all such interests held by such officer or employee during the preceding calendar year. Such statement shall be subject to examination, and available for copying, by the public upon request.

(b) The Secretary shall—

(1) act, within ninety days after the effective date of this Act, by rule—

(A) to define the term "known financial interest" for purposes of subsection (a); and

(B) to establish the methods by which the requirement to file written statements specified in subsection (a) will be monitored and enforced, including appropriate provisions for the filing by such officers and employees of such statements and the review by the Secretary of such statements; and

(2) include, as part of the report made pursuant to section 621, a report with respect to such disclosures and the actions taken in regard thereto during the preceding calendar year.

(c) In the rules prescribed in subsection (b), the Secretary may identify specific positions, or classes thereof, within the Department and the Commission which are of a nonregulatory or nonpolicymaking nature and provide that officers or employees occupying such positions shall be exempt from the requirements of this section.

(d) Any officer or employee who is subject to, and knowingly violates, subsection (a) shall be fined not more than \$2,500 or imprisoned not more than one year, or both.

Sec. 603. The Secretary is authorized to prescribe such policies, standards, criteria, procedures, rules, and regulations as he may deem to be necessary or appropriate to carry out functions now or hereafter vested in him.

Sec. 604. Except as otherwise expressly prohibited by law, the Secretary may delegate any of his functions to such officers and employees of the Department as he may designate, and may authorize such successive re-delegations of such functions as he may deem to be necessary or appropriate.

Sec. 605. The Secretary is authorized to establish, alter, consolidate, or discontinue and to maintain such State, regional, district, local, or other field offices as he may deem to be necessary to carry out functions now or hereafter vested in him.

Sec. 606. The Secretary may, from time to time, establish, alter, consolidate or discontinue such organizational units or components within the Department as he may deem to be necessary or appropriate, except that such authority shall not extend to the abolition of organizational units or components established by this Act.

Sec. 607. In the performance of functions transferred to, and vested in, the Secretary or any officer or component of the Department, other than the Commission, the Secretary is authorized to appoint and fix the compensation of such officers and employees as may be necessary to carry out such functions. Such officers and employees shall be appointed in accordance with the civil service laws and their compensation fixed in accord-

ance with title 5, United States Code, except that to the extent the Secretary deems such action necessary to the discharge of his functions, he may establish scientific or professional positions within the Department as provided in section 3104 of title 5, United States Code.

Sec. 608. (a) There shall be within the Department not more than fourteen additional officers in positions authorized by sections 5315 and 5316 of title 5, United States Code, who shall be appointed by the Secretary and who shall perform such functions as the Secretary shall prescribe from time to time.

(b) (1) Subject to the provisions of chapter 51 of title 5, United States Code, but notwithstanding the last two sentences of section 5108(a) of such title, the Secretary may place at GS-16, GS-17, and GS-18, not to exceed 350 positions of the positions subject to the limitation of the first sentence of section 5108(a) of such title.

(2) Any position placed at GS-16, GS-17, or GS-18 under the authority of paragraph (1) may be filled only by a person who is transferred in connection with a transfer of function under this Act and who, immediately before the effective date of this Act, held a position having duties comparable to those of such position. Appointments under this paragraph may be made without regard to the provisions of section 3324 of title 5, United States Code, relating to the approval by the Civil Service Commission of appointments to GS-16, GS-17, and GS-18.

(3) The Secretary's authority under this subsection with respect to any position shall cease when the person appointed to fill such position under paragraph (2) leaves such position.

Sec. 609. The Secretary may obtain services as authorized by section 3109 of title 5, United States Code, at rates not to exceed the daily rate prescribed for grade GS-18 of the General Schedule by section 5332 of title 5, United States Code, for persons in Government service employed intermittently.

Sec. 610. Section 17 of the Federal Energy Administration Act of 1974 shall be applicable to advisory committees chartered by the Department to provide advice relating to the regulatory activities of the Department.

Sec. 611. (a) The Secretary is authorized to provide for participation of Armed Forces personnel in carrying out functions performed, on the date of enactment of this Act, in the Energy Research and Development Administration and under chapter 641 of title 10, United States Code. Members of the Armed Forces may be detailed for service in the Department by the Secretary concerned (as said term is defined in section 101 of such title) pursuant to cooperative agreements with the Secretary.

(b) The detail of any personnel to the Department under this section shall in no way affect status, office, rank, or grade which officers or enlisted men may occupy or hold or any emolument, perquisite, right, privilege, or benefit incident to, or arising out of, such status, office, rank, or grade, nor shall any member so detailed be charged against any statutory or other limitation on strengths applicable to the Armed Forces or the Department. A member so detailed shall not be subject to direction or control by his armed force, or any officer thereof, directly or indirectly, with respect to the responsibilities exercised in the position to which detailed.

Sec. 612. (a) With their consent, the Secretary and the Federal Energy Regulatory Commission may, with or without reimbursement, use the research, equipment, and facilities of any agency or instrumentality of the United States or of any State, the District of Columbia, the Commonwealth of Puerto Rico, or any territory or possession

of the United States, or of any political subdivision thereof, or of any foreign government, in carrying out any function now or hereafter vested in the Secretary or the Commission.

(b) The Secretary may, with or without reimbursement, provide research, equipment, and facilities to any agency or instrumentality of the United States or any State, territory, the Commonwealth of Puerto Rico, the District of Columbia, or any political subdivision thereof, or to any foreign government, whenever he deems such action to be necessary and appropriate to the performance of functions now or hereafter vested in him.

(c) Proceeds from reimbursements under this section shall be deposited in the Treasury and may be withdrawn by the Secretary or the head of the agency or instrumentality of the United States involved, as the case may be, to pay directly the costs of the equipment, or facilities provided, to repay or make advances to appropriations or funds which do or will initially bear all or a part of such costs, or to refund excess sums when necessary, except that such proceeds may be credited to a working capital fund otherwise established by law, including the fund established pursuant to section 619 of this Act, and used under the law governing such fund, if the fund is available for use for providing the equipment, or facilities involved.

Sec. 613. The Secretary is authorized to enter into and perform such contracts, leases, cooperative agreements, or other similar transactions with public agencies and private organizations and persons, and to make such payments (in lump sum or installments, and by way of advance or reimbursement) as he may deem to be necessary or appropriate to carry out functions now or hereafter vested in the Secretary.

Sec. 614. The Secretary is authorized to acquire (by purchase, lease, condemnation, or otherwise), construct, improve, repair, operate, and maintain laboratories, research and testing sites and facilities, quarters and related accommodations for employees and dependents of employees of the Department, such personal property (including patents), or any interest therein, as the Secretary deems necessary; and to provide by contract or otherwise for eating facilities and other necessary facilities for the health and welfare of employees of the Department at its installations and purchase and maintain equipment therefor.

Sec. 615. (a) As necessary and when not otherwise available, the Secretary is authorized to provide for, construct, or maintain the following for employees and their dependents stationed at remote locations:

- (1) emergency medical services and supplies;
- (2) food and other subsistence supplies;
- (3) messing facilities;
- (4) audiovisual equipment, accessories, and supplies for recreation and training;
- (5) reimbursement for food, clothing, medicine, and other supplies furnished by such employees in emergencies for the temporary relief of distressed persons;
- (6) living and working quarters and facilities; and
- (7) transportation of school age dependents of employees to the nearest appropriate educational facilities.

(b) The furnishing of medical treatment under paragraph (1) of subsection (a) and the furnishing of services and supplies under paragraphs (2) and (3) of subsection (a) shall be at prices reflecting reasonable value as determined by the Secretary.

(c) Proceeds from reimbursements under this section shall be deposited in the Treasury and may be withdrawn by the Secretary to pay directly the cost of such work or services, to repay or make advances to appropriations of funds which will initially bear all or a part of such cost, or to refund

excess sums when necessary: *Provided*, That such payments may be credited to a working capital fund otherwise established by law, including the fund established pursuant to section 619 of this Act, and used under the law governing such fund, if the fund is available for use by the Department for performing the work or services for which payment is received.

Sec. 616. The Secretary is authorized to acquire any of the following described rights if the property acquired thereby is for use by or for, or useful to, the Department:

(1) copyrights, patents, and applications for patents, designs, processes, and manufacturing data;

(2) licenses under copyrights, patents, and applications for patents; and

(3) releases, before suit is brought, for past infringement of patents or copyrights.

Sec. 617. The Secretary is authorized to accept, hold, administer, and utilize gifts, bequests, and devises of property, both real and personal, for the purpose of aiding or facilitating the work of the Department. Gifts, bequests, and devises of money and proceeds from sales of other property received as gifts, bequests, or devises shall be deposited in the Treasury and shall be disbursed upon the order of the Secretary. Property accepted pursuant to this section, and the proceeds thereof, shall be used as nearly as possible in accordance with the terms of the gift, bequest, or devise. For the purposes of Federal income, estate, and gift taxes, property accepted under this section shall be considered as a gift, bequest, or devise to the United States.

Sec. 618. The Secretary shall cause a seal of office to be made for the Department of such design as he shall approve and judicial notice shall be taken of such seal.

Sec. 619. The Secretary is authorized to establish a working capital fund, to be available without fiscal-year limitation, for expenses necessary for the maintenance and operation of such common administrative services as he shall find to be desirable in the interests of economy and efficiency. There shall be transferred to the fund the stocks of supplies, equipment, other assets, liabilities, and unpaid obligations relating to the services which he determines will be performed through the fund. Appropriations to the fund in such amounts as may be necessary to provide additional working capital are authorized. The working capital fund shall recover from the appropriations and funds for which services are performed, either in advance or by way of reimbursement, amounts which will approximate the costs incurred, including the accrual of annual leave and the depreciation of equipment. The fund shall also be credited with receipts from the sale or exchange of its property, and receipts in payment for loss or damage to property owned by the fund.

Sec. 620. To the extent necessary or appropriate to perform any function transferred by this Act, the Secretary may exercise, in carrying out the function so transferred, any authority or part thereof available by law, including appropriation Acts, to the official or agency from which such function was transferred.

Sec. 621. The Secretary shall, as soon as practicable after the end of each fiscal year, commencing with the first complete fiscal year following the effective date of this Act, make a report to the President for submission to the Congress on the activities of the Department during the preceding fiscal year. Such report shall include a statement of the Secretary's goals, priorities, and plans for the Department, together with an assessment of the progress made toward the attainment of those goals, the effective and efficient management of the Department, and progress made in coordination of its functions with other departments and agencies of the Federal Government. In addition, such re-

port shall include the information required by section 15 of the Federal Energy Administration Act of 1974, section 307 of the Energy Reorganization Act of 1974, and section 15 of the Federal Nonnuclear Energy Research and Development Act of 1974, and shall include:

(1) projected energy needs of the United States to meet the requirements of the general welfare of the people of the United States and the commercial and industrial life of the Nation including a comprehensive summary of data pertaining to all fuel and energy needs of residents of the United States residing in—

(A) areas outside standard metropolitan statistical areas; and

(B) areas within such areas which are unincorporated or are specified by the Bureau of the Census, Department of Commerce, as rural areas;

(2) an estimate of (A) the domestic and foreign energy supply on which the United States will be expected to rely to meet such needs in an economic manner with due regard for the protection of the environment, the conservation of natural resources, and the implementation of foreign policy objectives, and (B) the quantities of energy expected to be provided by different sources (including petroleum, natural and synthetic gases, coal, uranium, hydroelectric, solar, and other means) and the expected means of obtaining such quantities;

(3) current and foreseeable trends in the price, quality, management, and utilization of energy resources and the effects of those trends on the social, environmental, economic, and other requirements of the Nation;

(4) a summary of research and development efforts funded by the Federal Government to develop new technologies, to forestall energy shortages, to reduce waste, to foster recycling, and to encourage conservation practices, and to increase efficiency; and further, said summary shall include a description of the activities the Department is performing in support of environmental, including social, economic and institutional, biomedical, physical and safety research, development, demonstration, and monitoring activities necessary to guarantee that technological programs, funded by the Department, are undertaken in a manner consistent with and capable of maintaining or improving the quality of the environment and of mitigating any undesirable environmental and safety impacts;

(5) a review and appraisal of the adequacy and appropriateness of technologies, procedures, and practices (including competitive and regulatory practices) employed by Federal, State, and local governments and nongovernmental entities to achieve the purposes of this Act; and

(6) a summary of cooperative and voluntary efforts that have been mobilized to promote conservation and recycling, together with plans for such efforts in the succeeding fiscal year, and recommendations for changes in laws and regulations needed to encourage more conservation and recycling by all segments of the Nation's populace.

Sec. 622. The Secretary, when authorized in an appropriation act, in any fiscal year, may transfer funds from one appropriation to another within the Department, except that no appropriation shall be either increased or decreased pursuant to this section more than 5 per centum of the appropriation for such fiscal year.

Sec. 623. Appropriations to carry out the provisions of this Act shall be subject to annual authorization.

Sec. 624. Notwithstanding any other provision of this title, no authority to enter into contracts or to make payments under this title shall be effective except to such extent or in such amounts as are provided in advance in appropriation Acts.

Sec. 625. The Secretary of Defense, the Secretary of Commerce, the Secretary of Housing and Urban Development, the Secretary of Agriculture, the Secretary of Transportation, the Secretary of the Interior, the United States Postal Service, and the Administrator of General Services shall each designate one Assistant Secretary or Assistant Administrator, as the case may be, as the principal energy conservation officer of such Department or of the Administration. Such designated principal energy conservation officer shall be responsible for coordination with the Department with respect to energy matters.

#### TITLE VII—TRANSITIONAL, SAVINGS, AND CONFORMING PROVISIONS

Sec. 701. (a) Except as otherwise provided in this Act, the personnel employed in connection with, and the assets, liabilities, contracts, property, records, and unexpended balances of appropriations, authorizations, allocations, and other funds employed, held, used, arising from, available to or to be made available in connection with the functions transferred by this Act, subject to section 202 of the Budget and Accounting Procedures Act of 1950, are hereby transferred to the Secretary for appropriate allocation.

(b) Positions expressly specified by statute or reorganization plan, personnel occupying those positions on the effective date of this Act, and personnel authorized to receive compensation at the rate prescribed for offices and positions at level I, II, III, IV, or V of the Executive Schedule (5 U.S.C. 5312-5316) on the effective date of this Act shall be subject to the provisions of section 705 of this Act.

Sec. 702. Except as otherwise provided in this Act, the transfer of full-time personnel (except special Government employees) and part-time personnel holding permanent positions pursuant to this title shall not cause any such employee to be separated or reduced in grade or compensation for one year after the date of enactment of this Act. *Provided*, That full time temporary personnel employed at the Energy Research Centers of the Energy Research and Development Administration upon the establishment of the Department who are determined by the Department to be performing continuing functions may at the employee's option be converted to permanent full-time status within 120 days following their transfer to the Department. The employment levels of full-time permanent personnel authorized for the Department by other law or administrative action shall be increased by the number of employees who exercise the option to be so converted.

Sec. 703. Any person who, on the effective date of this Act, held a position compensated in accordance with the Executive Schedule prescribed in chapter 53 of title 5, United States Code, and who, without a break in service, is appointed in the Department or the Commission to a position having duties comparable to those performed immediately preceding his appointment shall continue to be compensated in his new position at not less than the rate provided for his previous position, for the duration of his service in the new position.

Sec. 704. Employees transferred to the Department holding reemployment rights acquired under section 28 of the Federal Energy Administration Act of 1974 or any other provision of law or regulation may exercise such rights only within two years from the effective date of this Act. Reemployment rights may only be exercised at the request of the employee.

Sec. 705. Except as otherwise provided in this Act, whenever all of the functions vested by law in an agency, commission, or other body, or any component thereof, have been terminated or transferred from that agency, commission, or other body, or component by this Act, the agency, commission, or other body, or component, shall ter-

minate. If an agency, commission, or other body, or any component thereof, terminates pursuant to the preceding sentence, each position and office therein which was expressly authorized by law, or the incumbent of which was authorized to receive compensation at the rates prescribed for an office or position at level II, III, IV, or V of the Executive Schedule (5 U.S.C. 5313-5316), shall terminate.

Sec. 706. The Director of the Office of Management and Budget, in consultation with the Secretary and the Commission, is authorized and directed to make such determinations as may be necessary with regard to the transfer of functions which relate to or are utilized by an agency, commission or other body, or component thereof affected by this Act, to make such additional incidental dispositions of personnel, assets, liabilities, contracts, property, records, and unexpended balances of appropriations, authorizations, allocations, and other funds held, used, arising from, available to or to be made available in connection with the functions transferred by this Act as he may deem necessary to accomplish the purposes of this Act.

Sec. 707. All orders, determinations, rules, regulations, permits, contracts, certificates, licenses, and privileges—

(1) which have been issued, made, granted, or allowed to become effective by the President, any Federal department or agency or official thereof, or by a court of competent jurisdiction, in the performance of functions which are transferred under this Act to the Department or the Commission after the date of enactment of this Act, and

(2) which are in effect at the time this Act takes effect,

shall continue in effect according to their terms until modified, terminated, superseded, set aside, or revoked by the President, the Secretary, the Federal Energy Regulatory Commission, or other authorized officials, a court of competent jurisdiction, or by operation of law.

Sec. 708. (a) (1) The provisions of this Act shall not affect any proceedings or any application for any license, permit, certificate, or financial assistance pending at the time this Act takes effect before any department, agency, commission, or component thereof, functions of which are transferred by this Act; but such proceedings and applications, to the extent that they relate to functions so transferred, shall be continued. Orders shall be issued in such proceedings, appeals shall be taken therefrom, and payments shall be made pursuant to such orders, as if this Act had not been enacted; and orders issued in any such proceedings shall continue in effect until modified, terminated, superseded, or revoked by a duly authorized official, by a court of competent jurisdiction, or by operation of law. Nothing in this subsection shall be deemed to prohibit the discontinuance or modification of any such proceeding under the same terms and conditions and to the same extent that such proceeding could have been discontinued if this Act had not been enacted.

(2) The Secretary and the Commission are authorized to promulgate regulations providing for the orderly transfer of such proceedings to the Department or the Commission.

(b) Except as provided in subsection (d)—

(1) the provisions of this Act shall not affect suits commenced prior to the date this Act takes effect, and,

(2) in all such suits, proceedings shall be had, appeals taken, and judgments rendered in the same manner and effect as if this Act had not been enacted.

(c) No suit, action, or other proceeding commenced by or against any officer in his official capacity as an officer of any department or agency, functions of which are transferred by this Act, shall abate by reason of

the enactment of this Act. No cause of action by or against any department or agency, functions of which are transferred by this Act, or by or against any officer thereof in his official capacity shall abate by reason of the enactment of this Act.

(d) If, before the date on which this Act takes effect, any department or agency, or officer thereof in his official capacity, is a party to a suit, and under this Act any function of such department, agency, or officer is transferred to the Secretary or any other official, then such suit shall be continued with the Secretary or other official, as the case may be, substituted.

Sec. 709. If any provision of this Act or the application thereof to any person or circumstance is held invalid, neither the remainder of this Act nor the application of such provision to other persons or circumstances shall be affected thereby.

Sec. 710. With respect to any functions transferred by this Act and exercised after the effective date of this Act, reference in any other Federal law to any department, commission, or agency or any officer or office the functions of which are so transferred shall be deemed to refer to the Secretary, the Federal Energy Regulatory Commission, or other official or component of the Department in which this Act vests such functions.

Sec. 711. Nothing contained in this Act shall be construed to limit, curtail, abolish, or terminate any function of, or authority available to, the President which he had immediately before the effective date of this Act; or to limit, curtail, abolish, or terminate his authority to delegate, redelegate, or terminate any delegation of functions.

Sec. 712. (a) The Federal Energy Administration Act of 1974 is hereby amended as follows:

(1) in section 4—

(A) by striking out the heading of such section and inserting in lieu thereof "Conflicts of Interest";

(B) by striking out subsections (a) through (h) of such section and redesignating subsections (i) and (j) as subsections (a) and (b), respectively; and

(C) by striking out, in the subsection redesignated as subsection (b), "holding any of the positions described in subsections (a), (c), (d), and (e) of this section" and inserting in lieu thereof "who is compensated at level II, III, or IV of the Executive Schedule and who is assigned principal responsibility for any program under this Act";

(2) in section 7—

(A) by striking out subsections (a) and (b) and redesignating subsection (c) as subsection (a);

(B) by striking out subsections (d), (e), (f), (g), and (h);

(C) by striking out "(1) (1)" and by striking out subparagraphs (A), (B), (C), (E), and (F) of subsection (1) (1) and redesignating subparagraph (D) of such subsection as subsection (b);

(D) by striking out, in the matter redesignated as subsection (b), "the rules, regulations, or orders described in paragraph (A)" and inserting in lieu thereof "any rule or regulation, or any order having the applicability and effect of a rule as defined in section 551 (4) of title 5, United States Code, pursuant to this Act";

(E) by striking out, in such subsection, "paragraph (2) of this subsection" and inserting in lieu thereof "subsection (c)";

(F) by redesignating paragraph (2) (A) of subsection (1) as subsection (c) and by striking out subparagraph (B) of subsection (1) (2); and

(G) by striking out paragraph (3) of subsection (1) and by striking out subsections (j) and (k);

(3) by repealing sections 9, 28, and 30;

(4) in section 52(a)—

(A) by striking out "and" at the end of paragraph (2);

(B) by striking out the period at the end of paragraph (3) and inserting in lieu thereof "; and"; and

(C) by adding after such paragraph (3) the following new paragraph:

"(4) the States to the extent required by the Natural Gas Act and the Federal Power Act."; and

(5) in section 55(b)—

(A) by striking out "seven" and inserting in lieu thereof "six";

(B) by inserting "and" after "Federal Trade Commission"; and

(C) by striking out "one shall be designated by the Chairman of the Federal Power Commission; and".

(b) The Energy Reorganization Act of 1974 is hereby amended by repealing section 108.

(c) (1) The Atomic Energy Act of 1954 is hereby amended by repealing section 26.

(2) Section 161(d) of the Atomic Energy Act of 1954 shall not apply to functions transferred by this Act.

(d) Section 502 of the Motor Vehicle Information and Cost Savings Act is amended by adding at the end thereof the following:

"(h) The Secretary shall consult with the Secretary of Energy in carrying out his responsibilities under this section."

(e) The Energy Conservation Standards for New Buildings Act of 1976 is hereby amended as follows:

(1) in section 303(11), strike out "Secretary of Housing and Urban Development" and insert in lieu thereof "Secretary of Energy";

(2) in section 304(c), by inserting "the Secretary of Housing and Urban Development," after "the Administrator"; and

(3) in section 310, by inserting "Secretary of Housing and Urban Development," after "the Administrator";

(f) The Rural Electrification Act of 1936 is hereby amended by adding a new section 16 to title I thereof to read as follows:

"Sec. 16. In order to insure coordination of electric generation and transmission financing under this Act with the national energy policy, the Administrator in making or guaranteeing loans for the construction, operation, or enlargement of generating plants or electric transmission lines or systems, shall consider such general criteria consistent with the provisions of this Act as may be published by the Secretary of Energy."

Sec. 713. Section 19(d) (1) of title 3, United States Code, is amended by inserting immediately before the period at the end thereof the following: ", Secretary of Energy."

Sec. 714. (a) Section 101 of title 5, United States Code is amended by adding at the end thereof the following:

"The Department of Energy."

(b) Subsection (a) of section 3104 of title 5, United States Code, is amended by inserting after paragraph (4) the following new paragraph:

"(5) Department of Energy—not more than 200."

(c) Subsection (a) of section 5108 of title 5, United States Code, is amended by striking out "an aggregate of 2,754" and inserting in lieu thereof "an aggregate of 3,104".

(d) Section 5312 of title 5, United States Code, is amended by adding at the end thereof the following:

"(14) Secretary of Energy."

(e) Paragraph (22) of section 5313 of title 5, United States Code, is amended to read as follows:

"(22) Deputy Secretary of Energy."

(f) Section 5314 of title 5, United States Code, is amended by striking out, in paragraph (21), "Federal Power Commission" and by inserting in lieu thereof "Federal Energy Regulatory Commission", and by amending paragraph (60) to read as follows:

"(60) Administrator, Economic Regulatory Administration, Department of Energy."

(g) Section 5315 of title 5, United States

Code, is amended by striking out, in paragraph (60), "Federal Power Commission" and inserting in lieu thereof "Federal Energy Regulatory Commission", by striking out paragraph 102, and by adding at the end of the section the following:

"(114) Assistant Secretaries of Energy (9).  
"(115) General Counsel of the Department of Energy.

"(116) Administrator, Energy Information Administration, Department of Energy.

"(117) Inspector General, Department of Energy.

"(118) Director, Office of Energy Research, Department of Energy.

"(119) Additional Officers, Department of Energy (4)."

(h) Paragraphs (135) and (136) of section 5316 of title 5, United States Code, are amended to read as follows:

"(135) Deputy Inspector General, Department of Energy.

"(136) Additional Officers, Department of Energy (10)."

Sec. 715. With the consent of the appropriate department or agency head concerned, the Secretary is authorized to utilize the services of such officers, employees, and other personnel of the departments and agencies from which functions have been transferred to the Secretary for such period of time as may be reasonably be needed to facilitate the orderly transfer of functions under this Act.

Sec. 716. The Civil Service Commission shall, as soon as practicable but not later than one year after the effective date of this Act, prepare and transmit to the Congress a report on the effects on employees of the reorganization under this Act, which shall include—

(1) an identification of any position within the Department or elsewhere in the executive branch, which it considers unnecessary due to consolidation of functions under this Act;

(2) a statement of the number of employees entitled to pay savings by reason of the reorganization under this Act;

(3) a statement of the number of employees who are voluntarily or involuntarily separated by reason of such reorganization;

(4) an estimate of the personnel costs associated with such reorganization;

(5) the effects of such reorganization on labor management relations; and

(6) such legislative and administrative recommendations for improvements in personnel management within the Department as the Commission considers necessary.

Sec. 717. The transfer of functions under titles II and IV of this Act shall not affect the validity of any draft environmental impact statement published before the effective date of this Act.

Sec. 718. As used in this Act (1) references to "function" or "functions" shall be deemed to include reference to duty, obligation, power, authority, responsibility, right, privilege, and activity, or the plural thereof, as the case may be; and (2) references to "perform" when used in relation to functions, shall be deemed to include the exercise of power, authority, rights, and privileges.

#### TITLE VIII—EFFECTIVE DATE AND INTERIM APPOINTMENTS

Sec. 801. (a) The provisions of this Act shall take effect one hundred and twenty days after the Secretary first takes office, or on such earlier date as the President may prescribe and publish in the Federal Register, except that at any time after the date of enactment of this Act, (1) any of the officers provided for in title II and title IV of this Act may be nominated and appointed, as provided in those titles, and (2) the Secretary may promulgate regulations pursuant to section 708(a)(2) of this Act at any time after the date of enactment of this Act. Funds available to any department or agency (or any official or component thereof), func-

tions of which are transferred to the Secretary or the Commission by this Act, may with the approval of the Director of the Office of Management and Budget, be used to pay the compensation and expenses of any officer appointed pursuant to this subsection until such time as funds for that purpose are otherwise available.

(b) In the event that one or more officers required by this Act to be appointed by and with the advice and consent of the Senate shall not have entered upon office on the effective date of this Act, the President may designate any officer, whose appointment was required to be made by and with the advice and consent of the Senate and who was such an officer immediately prior to the effective date of the Act, to act in such office until the office is filled as provided in this Act. While so acting such persons shall receive compensation at the rates provided by this Act for the respective offices in which they act.

#### TITLE IX—SUNSET PROVISIONS

Sec. 901. The provisions of this Act shall expire on December 31, 1982.

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

A similar House bill (H.R. 6804) was laid on the table.

#### AUTHORIZING CLERK TO MAKE CORRECTIONS IN ENGROSSMENT OF HOUSE AMENDMENT TO S. 826

Mr. BROOKS. Mr. Speaker, I ask unanimous consent that the Clerk be authorized to correct section numbers, punctuation marks, and cross-references in the engrossment of the amendment of the House to the Senate bill (S. 826).

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

#### MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by one of his secretaries, who also informed the House that on the following dates the President approved and signed bills of the House of the following titles:

On June 3, 1977:

H.R. 3437. An act to make certain technical and miscellaneous amendments to provisions relating to vocational education contained in the Education Amendments of 1976.

#### LEGISLATIVE PROGRAM

(Mr. MICHEL asked and was given permission to address the House for 1 minute.)

Mr. MICHEL. Mr. Speaker, I have asked for this time for the purpose of asking the distinguished acting majority leader, the gentleman from Indiana (Mr. BRADEMAS) if the gentleman will give us the program for the rest of the week, if any, and the schedule for next week.

Mr. BRADEMAS. Mr. Speaker, will the distinguished gentleman from Illinois yield?

Mr. MICHEL. I am happy to yield to the gentleman.

Mr. BRADEMAS. Mr. Speaker, the program for the House of Representatives

for the week of June 6, 1977, is as follows:

Monday the House meets at noon.

We will call the Consent Calendar, and we will consider seven bills under suspension, as follows:

S. 955, the Federal crop insurance amendments;

H.R. 75, the Soil and Water Resources Conservation Act of 1977;

S. 1240, deferral of wheat referendum;

H.R. 6794, FEA authorizations;

H.R. 6893, Members' residence for income tax purposes;

H.R. 5023, Indian claims statute of limitation provisions; and,

H.R. 4585, Indian Claims Commission authorization for fiscal year 1978.

Following that, we will take up H.R. 6990, military construction authorization, a bill on which there is an open rule and 2 hours of debate.

On Tuesday, the House meets at noon. We will have the Private Calendar and suspensions, but no bills on suspension.

We will take up H.R. 10, Hatch Act amendments, and complete consideration of that bill.

Then, we will consider H.R. 7010, compensation for victims of crime, with an open rule and 1 hour of debate.

On Wednesday, the House meets at 10 a.m. on H.R. 7552, Treasury-Postal Service appropriations for fiscal year 1978; and H.R. 7557, Transportation appropriations for fiscal year 1978.

At this point, Mr. Speaker, I should observe to the distinguished acting minority leader that on Wednesday, June 8, consideration of appropriations bills is scheduled to begin, and that 10 or more legislative days are being reserved for these measures. Other legislation will be scheduled, however, on days when early completion of the appropriations bill or bills makes time available.

Among bills which will be considered during this period, but not necessarily in this order, are the following:

H.R. 6666, Legal Services Corporation Act amendments;

H.R. 6135, Grain Standards Act amendments;

H.R. 7073, Federal Insecticide, Fungicide and Rodenticide Act amendments (FIFRA);

H.R. 6566, National Security ERDA authorization for fiscal year 1978;

H.R. 6761, youth camp safety programs;

H.R. 4287, mining health and safety.

With respect to all the bills I have just listed, Mr. Speaker, they are to be considered subject to a rule being granted and subject to the other qualifications that I made.

Mr. MICHEL. Might I inquire of the gentleman about that group of bills which may be considered after the appropriation bills, whether the membership of this House will be getting a day's notice before their consideration? Is this a reasonable request? I think it would be appropriate to give the Members ample warning as to when these bills would be considered.

Mr. BRADEMAS. If the gentleman will yield further, I agree with the gentleman, and certainly I believe that would be the intention of the leadership on this side, to give notice.

To complete the program for the rest of next week, on Thursday the House meets at 10 a.m. on the Interior appropriations bill for fiscal year 1978.

On Friday, the House meets at 10 a.m. on H.R. 7556, State-Justice-Commerce-Judiciary appropriations for fiscal year 1978, subject to a rule being granted.

The House will adjourn by 3 p.m. on Fridays and by 5:30 p.m. on all other days except Wednesdays.

Conference reports may be brought up at any time, and any further program will be announced later.

Mr. MICHEL. If I might ask one other question, it would have to do with Tuesday's program when the Hatch Act amendments are scheduled. As I recall, all debate has been limited and there will be no debate on any amendment except those that were printed in the RECORD.

Mr. BRADEMAs. That is my understanding.

Mr. MICHEL. But we have not seen the proposed Clay amendment which is supposed to be offered to water down the Ashbrook amendment. Will there be any attempt to open up this bill for debate on those amendments that are not printed in the RECORD?

Mr. BRADEMAs. I am not in a position, I may say to the gentleman from Illinois, to answer that question. I think his question should more appropriately be addressed to the manager of the bill, Mr. CLAY.

Mr. MICHEL. Well, it was my concern that we had heard rumors that there was to be that kind of amendment offered, but as of today we have seen nothing printed in the RECORD.

Mr. BAUMAN. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from Maryland.

Mr. BAUMAN. I would hope that the majority whip might be able to provide some direction for the Members of the House, because in announcing the program for Tuesday on H.R. 10, and stating that we will complete consideration, I imagine most Members, as does the gentleman from Illinois, would like to know how the gentleman proposes to do that, because we are in a parliamentary fix which we can only get out of by getting a rule from the Rules Committee, or by unanimous consent, unless we want to debate only amendments printed in the RECORD.

Mr. BRADEMAs. I will be very glad to advise the gentleman from Missouri (Mr. CLAY) of the concern that has been voiced here, but that will be his judgment as to how he wishes to proceed.

Mr. BAUMAN. I thank the gentleman.

Mr. MICHEL. I thank the gentleman.

#### ADJOURNMENT TO MONDAY, JUNE 6, 1977

Mr. BRADEMAs. Mr. Speaker, I ask unanimous consent that when the House adjourns today, it adjourn to meet at noon on Monday, June 6, 1977.

The SPEAKER pro tempore (Mr. ASHLEY). Is there objection to the request of the gentleman from Indiana?

There was no objection.

#### DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY NEXT

Mr. BRADEMAs. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule be dispensed with on Wednesday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

#### RECOMMENDATION FOR EXTENSION OF WAIVER AUTHORITY— MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 95-169)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Ways and Means and ordered to be printed:

To the Congress of the United States:

In accordance with section 402(d) (5) of the Trade Act of 1974, I transmit herewith my recommendation that the authority to waive subsections (a) and (b) of section 402 be extended for a further period of twelve months.

This recommendation sets forth the reasons for extending waiver authority and for my determination relating to continuation of the waiver applicable to the Socialist Republic of Romania, as called for by subsections (d) (5) (6) and (d) (5) (c) of section 402.

I include, as part of this recommendation, my determinations that further extension of the waiver authority, and continuation of the waiver applicable to the Socialist Republic of Romania, will substantially promote the objectives of this section.

JIMMY CARTER.

THE WHITE HOUSE, June 2, 1977.

#### PERMISSION FOR COMMITTEE ON INTERIOR AND INSULAR AFFAIRS TO FILE REPORT ON H.R. 2437, MANASSAS NATIONAL BATTLEFIELD PARK

Mr. BAUMAN. Mr. Speaker, on behalf of the Committee on Interior and Insular Affairs, I ask unanimous consent that the committee may have until midnight tonight to file a report on the bill (H.R. 2437) to amend the act of April 17, 1954, which preserves within Manassas Battlefield Park, Va., important historic properties relating to the battles of Manassas, and for other purposes.

The SPEAKER pro tempore (Mr. ASHLEY). Is there objection to the request of the gentleman from Maryland?

There was no objection.

#### PRESIDENT CARTER PAYS A CAMPAIGN DEBT TO RALPH NADER

(Mr. QUAYLE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. QUAYLE. Mr. Speaker, it is appar-

rent from yesterday's Washington Post that President Carter is going to continue his push for the creation of the Agency for Consumer Protection. As a member of the Government Operations Committee, I can only too recently recall the effects of the White House to force the committee into voting this bill out by a mere one vote. If it had not been for the intense pressure from the White House and the President, the consumer agency would have died in committee.

During the campaign, President Carter made great inroads with the people in his speeches calling for a reduction of the bureaucratic maze in Washington. As a matter of fact, he ran against Washington and its Federal bureaucracy. One can easily understand the present bewilderment of many of my constituents, who thought they were voting for a man who would not add layers of new bureaucracy. They really believed the President when he promised a cut in Federal expenses and Government regulation, and when he claimed to understand the needs of the private sector as well as big government.

The mere lobbying done by the President for this agency makes it quite obvious that President Carter must be attempting to pay off a campaign debt to Ralph Nader at the taxpayer's expense.

Mr. Nader took considerable credit for Carter's election victory, and has been frequently consulted by the White House on a variety of issues. Mr. Nader has lobbied for the consumer agency for at least 7 years. This new superpower, long a cherished dream of Nader's and affectionately nicknamed "Nader's Raiders' Retirement Policy," will cost at least \$22 million in the first 2 years of operation, and will add untold new bureaucrats to the Washington establishment.

Just when the American people are learning the truth about this legislation, President Carter launches his attack on the business community criticizing their lobbying effort. Why is it right for the President and his corps of bureaucrats to lobby for the agency, and wrong for the business community, and the people, to lobby against it? I am sure if the Members were to vote the conscience of their districts the vote would be overwhelmingly no. The bill is obviously in trouble because of the delay by the House leadership in bringing it to the floor. If the bill ever does reach the floor, I hope this time, Members will pay heed to the wishes of the people who sent them to Washington.

The President promised the American people less Government, not more, and he also promised a balanced budget. It is time to deliver on those promises. Tough Ralph Nader has immense influence with President Carter, I hope the people who elected him have some influence, too. Instead of paying off a political debt to Mr. Nader, I hope the President keeps his word of giving us less government.

#### NATIONAL DEFENSE AND THE IMPORTANCE OF RESEARCH AND DEVELOPMENT

The SPEAKER pro tempore (Mr. Ashley). Under a previous order of the

House, the gentleman from New York (Mr. KEMP) is recognized for 30 minutes.

Mr. KEMP. Mr. Speaker, the U.S. Government participates regularly in research and development in the physical sciences. It does this through Federal agencies and laboratories, through grants to universities and research institutes, through independent research and development—IRAD—funding, and through tax policies. We, therefore, have a continuing obligation to evaluate the effectiveness of the Nation's R. & D. program.

My own committee assignment and interests center on national defense. I have been looking at R. & D. in this context.

I want to share with my colleagues a way of viewing military-related research and development which has led me to two conclusions.

The first is that R. & D. is indispensable to our country's defense.

The second is that R. & D. flows from remarkably many sources and pathways to find successful application in military systems. The Federal Government should therefore, consistently support the process but should not pretend to improve it through excessive regulation.

The viewpoint that I have chosen is the opposite of the one that is often taken. Instead of trying to predict the eventual value and use of a certain research program currently underway, I want to look only at established results; namely, to survey the R. & D. background of the technical features of a particular aircraft. The airplane that I have chosen is the B-1 bomber.

#### B-1 AS AN EXAMPLE

The prime contractor, Rockwell International, will provide an abundance of information about the B-1's capabilities. Its engineers and those of its subcontractors have written many papers for the technical literature describing the aircraft's development. One point that comes through is that the B-1 is a reasonably conservative design. Although it is far in advance of our other bombers, all of the technology that is used is well in hand. A second point is that the development program was a painstaking one. Although strong efforts to get the most out of all tests were made, those tests were more thorough and realistic than previous designs had experienced. For example, the same airplane that was loaded up for structural strength tests on the ground was also used to measure flight loads. But that ground test used 3,300 strain measuring instruments. And models for determining air pressures and air flows spent over 2,200 hours in wind tunnels.

However, the papers written by the contractors' people do not give a very good picture of all the R. & D. that occurred before the B-1 project got underway. It was that earlier work which provided the technology upon which the aircraft is based. To get a handle on it, we went back into the scientific archive literature.

Looking at the B-1, the first thing that strikes a person is that it has very smooth contours, especially when the wings are swept rearward for high speed flight. There are several aerodynamic—

air flow force—reasons for this. By smoothing the wing into the body or fuselage, all parts can contribute some lift. By avoiding corners, the drag can be kept to a minimum. One particular component of air resistance is called wave drag and it occurs as the airplane approaches and exceeds the speed of sound. It turns out that wave drag can be combated by not letting the design show any sudden increase in cross-sectional area, as viewed from the front, in moving from the nose to the tail. That is why earlier supersonic aircraft, especially Russian ones, had conical coked-bottle fuselage shapes, that is, had waists where the wings were attached.

It was during the Second World War that it became clear to everybody that it would be nice to be able to fly faster than the speed of sound. In the 1946-49 time period, there were many reports and papers which defined and started work on the transonic and supersonic flow problems that are being solved today. The area rule discussed above was perceived in a 1952 NACA research memorandum. A detailed study of wing-fuselage junctures was described in a 1960 NASA technical note.

In general, the shape of one part of an airplane affects the aerodynamic forces on many other parts. Although the mechanisms and the differential equations by which this happens have been known for some time, the computers big enough to attack the problem are only now becoming available. An American Institute of Aeronautics and Astronautics paper in 1974 describes a computer solution for B-1 aerodynamics in supersonic flight. The numerical technique was described in a paper published 10 years earlier, and the basic theory was formulated 8 years before that. It is called finite difference analysis.

There is an analogous class of methods for the computer solution of complicated aircraft structural problems, and it is called finite element analysis. The supporting theory is even older than in aerodynamics, but it is only the advent of the high-speed computer that enables its full use.

#### B-1 STRUCTURAL FEATURES

The B-1 has various structural features not possible in the previous generation of bombers. It uses hybrid materials called composites for certain members; these typically make 20 percent weight savings over the corresponding metal parts. Most of the development of composites has been done during the last 15 years on IRAD funding.

The smooth, blended shape which makes the B-1 aerodynamically efficient also facilitates alternate load path design; that is, the airplane will hang together even if some parts are shot away. The same characteristic enables more fuel to be carried, thus increasing range.

Much attention was given to the physics of structural failure, especially to the presence and growth under stress of microscopic material faults. An important aspect of this fatigue, that is, the effects of repeated loading. Reports on fatigue relevant to automobile engines appeared during 1922-24. In the early 1930's applications to aircraft

structures were being made, and there has been steady advance since then.

Titanium was used extensively in the B-70 airplane of some 15 years ago, and machining techniques were developed at that time. Compared with the B-70, the B-1 uses less titanium, but in a more sophisticated fashion. A method known as diffusion bonding, by which parts fuse into one another at elevated but premelt temperatures, is employed. Shaping of titanium pieces at such temperatures, called superplastic forming, has been developed during the program under contract research and development—CRAD—funding. This is also used in the B-1.

Another advantage of the smooth lines of the aircraft is that a decreased radar signature or disturbance is produced; that is it is more resistant to radar detection. The B-1's own radar includes altitude measuring and forward scanning units to enable it to track and fly automatically along the Earth's contour at altitudes of only a few hundred feet. This further aid to penetration of enemy defenses is called terrain following and was pioneered in the F-111 aircraft. Radar was conceived as a military device during World War II. Progress had been modest until about 10 years ago when the marriage of it with new signal processing, miniaturization, and computer technology made it possible to recognize particular objects and to cover much larger fields, as well as to package these more capable systems in aircraft.

In terrain following at near sonic speeds, an airplane and its crew can take a tremendous beating from the natural, turbulent currents in the air. The successful ride-control system in the B-1 uses vanes that automatically deflect to produce the air flow forces necessary to correct against any turbulence or anomaly as soon as it is encountered. This is aerodynamically straightforward. The closed loop system or servomechanism was also conceived many years ago; there is an NACA research memorandum dated 1955 which speaks directly to the problem.

The F101 turbofan engine and its air inlet system on the B-1 must operate effectively at many speeds and altitudes. Bypass turbofans, by operating on a much larger air flow volume than is actually used in burning the fuel, achieve efficiency and performance not possible in the first generation of jet engines. This technology has been developed gradually, through IRAD funding and through other means. In the B-1, engine air is captured through ramped inlets which adjust automatically. That is, the aircraft senses and assesses its flight condition, and changes its inlet shape to gulp the right amount of air with minimum losses. This uses the closed-loop technology mentioned in connection with ride control. There was extensive development within the B-1 program.

Because of the long design range of the aircraft, an important part of the B-1's take-off weight is fuel. The airplane would not be able to maintain its proper balance if remaining fuel were not periodically redistributed. This function is pilot-in-the-loop, that is, the balance status and indicated action are displayed

to the operator, and he commands the appropriate adjustment.

It is apparent that many functions are monitored electronically, and, in many cases, acted upon automatically. Added to those noted above, we should mention variable engine exit nozzle shape, positioning of the variable sweep wings and other aerodynamic surfaces, air temperature control to protect both crew and equipment, aiming and firing of weapons, defensive maneuvers of an electronic nature, flight instrument circuitry, and something called CITS.

CITS stands for central integrated test system. It amounts to sensors plus data processing hardware for monitoring the health of the aircraft's equipment. The kinds of things that are measured include various temperatures and pressures, vibration levels, and engine speeds and air flow rates. Some readings may indicate immediate trouble, while others may suggest the slow deterioration of some component. For that reason, the data is displayed to the crew in flight, and printed for prompt post-flight examination, as well as taped for more careful, later analysis. With CITS, parts replacement and maintenance can be done more systematically and economically.

#### THE ROLE OF DIGITAL COMPUTERS ON THE B-1

It seems obvious at this point that digital computer science has played a large role in the B-1 aircraft. Computerized methods were used in the aerodynamic and structural design. Onboard computers are used to operate advanced equipment and to perform many tasks that a much larger crew could not address. This does not amount to substitution of gadgetry for commonsense humans. Instead, the electronics are designed to handle, according to careful plan, well-understood tasks at speeds which exceed human reflexes. The B-1 in fact carries two computers, even though one could do the job. This gives the system a fail-safe characteristic. Also it conforms to a plan that was adopted early in the airplane's design; namely, to allow space or capacity for advanced capabilities to be incorporated into future versions.

The primary event in the history of digital computer development was the invention of the transistor. This occurred in 1947, in a non-Government laboratory, under private company funding. Its usefulness was not recognized at the time, and so Government regulation or relevance rules would not have helped. Since then computer development has been evolutionary rather than revolutionary, but rapid. One measure of capability is speed of calculation of the current largest machine. This seems to increase by a factor of 10 every 6 years or so. For onboard aircraft calculations, smallness of size is important. Circuit miniaturization techniques have shown great progress during the last 10 years. There have been many sources of computer R. & D. funding.

At the same time that the super-size ILLIAC IV was being developed within a Government laboratory under direct budget allocations of two separate Federal agencies, several private companies

were working on miniaturization development in their competition for the pocket calculator market.

An important related technology is called multiplexing. Nowadays this means the collection of many electronic inputs and their systematic feeding to a computer. Obviously this is necessary if there are one or two high-capability computers but many functions to be monitored, as in the B-1. In keeping with the extra-capacity concept, the airplane has three multiplex systems. This technology got underway in the 1920's, for the more efficient utilization of telephone cables. During the 1960's it was applied to data collection in experimental facilities, especially in wind tunnels. Such tunnels were direct-government funded in NASA and DOD centers, and indirect-Government funded—through aircraft sales and IRAD allotments—in airframe companies.

#### B-1 WEAPONS SYSTEMS

During the lifetime of the B-1 bomber, it will probably carry a variety of weapons, using several concepts of guidance or aiming. These may include laser-designating and infrared seeking. The laser concept, namely that a beam of the right wavelength can gather strength as it moves through a crystal or gas whose molecules have been excited in a certain way, was recognized in the late 1950's. Since the mid-1960's the DOD has been cultivating progress in this field, through a reasonable mix of IRAD and CRAD funding. In general, small amounts of IRAD seed money are allowed for the testing of concepts on a small scale, and the more promising work is then rewarded with contract support for larger scale development. There are three important general categories of lasers, and many subcategories, that compete with each other for CRAD money. Analogously, much work on instruments sensitive to that part of the electromagnetic spectrum known as the infrared has been done under IRAD funding during the last 10 years.

#### SUMMARY

To summarize all this, I would simply say that the B-1 weapons system is a product of the research and development that has preceded it, and that the kinds of weapons systems that we will need in the future will depend on our maintaining a strong and diverse national R. & D. program.

We have often allowed our potential adversaries to achieve certain numerical advantages. To compensate for this, we need to have a quality advantage in hand. Most importantly, we must not allow the possibility of a technological surprise which could seriously tip the scales against us. I am concerned that, according to the National Science Foundation, DOD research and development funding has experienced a real decline of 22 percent during the past 10 years.

I would like to mention two other aspects of R. & D. in the physical sciences which are only indirectly related to national defense. I would characterize them as economics, and morale.

Many economists have reported studies which indicate that resources assigned to

scientific research and development multiply themselves in an industrial economy. This seems only logical; entire new industries, such as the liquified gas business which is important in modern steel manufacturing and in medical care, have resulted from space program R. & D. Chase Econometrics estimates that a billion dollar annual NASA budget increase would affect the economy in 1986 as follows: gross national product \$23 billion higher; inflation rate 2 percent lower; employment level 1.1 million higher.

Although the precise results of R. & D. cannot be predicted, it is predictable that there will be results. We know that American intellect will produce innovations for us; we know that American insight will perceive national defense applications; we know that American ingenuity will make those new systems a reality. Return for our R. & D. dollar is inevitable. I do not know if this is because of the mind-set of the typical scientist/engineer or if it is due to some other cause. But I cannot help contrasting the solid results with those produced by other competitors for the budget dollar, such as the food stamp program, or the Head Start program, or countless other well-intentioned schemes.

I think that the American people take satisfaction in the continuing success story that is called research and development, and I think that the Congress should, too. It is a national asset.

#### THE TREATMENT OF ANATOLY SHCHARANSKY IS A SOVIET TRAGEDY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. BURKE) is recognized for 5 minutes.

Mr. BURKE of Florida. Mr. Speaker, I am saddened and angered at reports from Moscow concerning a vicious official action by the Soviet Government against a valiant and articulate individual, Anatoly Shcharansky. Mr. Shcharansky is a Jew who was refused an exit visa and became part of an unofficial group who monitor Soviet compliance with the Helsinki Accords on human rights. Highly regarded for his personal courage and his skill at public relations, Shcharansky has been a crucial figure among active Soviet dissidents. The Soviet Government has formally charged Shcharansky with treason and accused him of being an agent of the Central Intelligence Agency. This charge is the most brutal attack perhaps since the evil reign of Josef Stalin on the growing movement for broader freedoms in Soviet Russia.

There is no doubt that plenty of "evidence" will be adduced smearing the dissidents and painting the United States as engaged in subversion of Soviet society and state. The coopted, the corrupted, the misguided, and the fearful will offer outrageous testimony. The inevitable verdict will follow: guilty of treason, to be punished by disappearance into the fearful world of Soviet labor camps, or perhaps the even more fearful mental hospitals where other dissidents and religionists have been "treated."

Mr. Speaker, I am uncertain about the administration's current attitude on human rights in the Soviet Union. I know that it was most vigorous earlier, including personal communication with Sakharov and a series of strong statements on the subject. Lately, however, it appears the President is taking a softer line. Undoubtedly the Soviets recognizing the President's softer approach will hasten to say that the incarceration of Shcharansky has no connection with the human rights issue, but merely reflects a matter of Soviet internal policy. I will wait to see just what President Carter will say. So too will others throughout the world.

Our reaction is important, Mr. Chairman, because this "trial" precedes by merely 2 weeks the Belgrade discussions on human rights under the Helsinki Accords. There is no question that if we intend to do more than use rhetoric about human rights that we must be firm about our commitment to human rights, and we must keep faith with the brave spirits who run fearsome risks to further these rights, freedom fighters like Anatoly Shcharansky. Why? Because the treatment of him may well be the shadow that casts its image before the similar treatment of others.

#### THE POSTAL SERVICE DOES NOT BELONG TO THE POSTMASTER GENERAL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Arkansas (Mr. ALEXANDER) is recognized for 30 minutes.

Mr. ALEXANDER. Mr. Speaker, the U.S. Postal Service remains a puzzle to the Nation. Though it seems simple to most of us, it is difficult to explain why the Postal Service high command does not comprehend the basic fact that an agency established to serve the people must be accountable and responsive to the people. The best explanation I have heard is that the L'Enfant super clerks view their domain as a medieval baronial estate not to be ruled necessarily in the best interest of the serfs.

A distinguished, award-winning newspaper in my district, the Paragould Daily Press, recently summed up editorially what I think is the current mood of the country with regard to the Postal Service. I would like to share their observations with my colleagues:

#### POSTAL SERVICE SERVES ALL

We repeat:

The Postal Service does not belong to the Postmaster General, the Congress or the President.

It belongs to you and me.

It is the only governmental agency with which we are in almost daily contact and in which we have a very real interest.

If we want to spend a few billion dollars for our own benefit and convenience, then we should do so.

In fact, we should insist on that privilege.

The Congress, the President, the Secretary of State, the CIA, etc., are all perfectly willing to subsidize nations, governments, private industries and, yes, even conspiracies that by no stretch of the imagination can be deemed essential to the nation's ongoing interest.

So, why should we sit back and see a vital public service go down the drain?

Technical advances and the virtual elimination of the railroads as a viable conveyor of the nation's mail have had a wide impact on collection and delivery schedules.

This is a spin-off of progress, although the demise of our railroads can be viewed with some well-founded concern by the nation.

The Daily Press believes the Postal Service should be returned to the people and that it be renamed the United States Postoffice Department.

It should be managed by career employees under the overview of the Congress and a Postmaster General appointed by the President.

It should no longer be a haven for retired and less-than-successful executives of big corporations.

The U.S. postoffice system was not established to pay its own way.

It was established to serve the people and bind the nation together into a viable entity. It should not, of course, be wasteful of its resources.

However, there are many government functions costing us billions whose activities serve only limited segments of our people.

And, there is hardly ever a voice raised in protest.

Why then should we permit the demise of the one government institution which serves us all?

#### CONGRESSMAN DRINAN DISSENTS FROM THE ADMINISTRATION'S PROPOSAL TO AUTHORIZE COURT ORDERS TO APPROVE THE USE OF ELECTRONIC SURVEILLANCE TO OBTAIN FOREIGN INTELLIGENCE INFORMATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. DRINAN) is recognized for 30 minutes.

Mr. DRINAN. Mr. Speaker, I had the hope that the almost frantic desire of the Ford administration to legalize electronic surveillance solely for the purpose of wiretapping Embassies of foreign nations in the United States would fade away with the departure from Washington of a wide variety of persons who persisted in indulging, without any statutory justification, in eavesdropping on the conversations of the representatives of foreign nations residing in the United States.

Unfortunately, President Carter and his Attorney General, Griffin B. Bell, announced on May 18, 1977, that they want the Congress to join the administration in following the specious, faulty and dangerous reasoning by which Attorney General Edward Levi sought to legalize the use of extensive electronic surveillance not when representatives of foreign powers are suspected of crime in America but when information about their conversations is "deemed necessary" for the "successful conduct of the foreign affairs of the United States."

The Levi measure, condemned by the entire civil liberties community of the United States, has perhaps been somewhat improved in the administration's bill filed by Senator KENNEDY as S. 1566 and by Chairman RODINO as H.R. 7308. But the essential danger and the incredible effrontery of the Levi bill are present in the administration proposal. The bill proposes that the State Department or other agency be permitted to persuade the Attorney General to file an application for a judicial warrant per-

mitting the agency to learn any and all things which in its judgment would be necessary or even helpful for the conduct of the foreign affairs of the United States.

This incredible purpose is shrouded and even concealed in the bill where the desire of the State Department, the Central Intelligence Agency—CIA—and other agencies to learn about the conversations of their foreign counterparts operating in the United States is surrounded by language extolling the danger of actual or potential attack on the United States and the perils of clandestine intelligence activities of foreign powers on American soil.

The essential purpose of the administration bill is to authorize and legalize the vast network of wiretaps in which several agencies of the Federal Government are now engaged. The pressure for the enactment of the Levi measure came from the same source as does the pressure to enact the Carter-Bell proposal: the intelligence community in America which is fearful of potential indictments of some of their members as well as lawsuits by American citizens or foreign nations whose privacy has been invaded by the interception of their conversations by electronic surveillance done by American officials without court order or perhaps even without any authorization from the Justice Department.

President Carter, in his message on May 18, 1977, in the Rose Garden to selected Members of Congress and to many members of the intelligence community stressed what he conceived to be a balance between "adequate intelligence to guarantee our Nation's security" and the "preservation of basic human rights." The central question which President Carter—like everyone else who desires to legalize foreign intelligence surveillance—evaded comes to this: is the ability of the United States to obtain adequate intelligence from legal sources so bankrupt that the government must alter fundamentally the standards of the fourth amendment and insist upon a "funny warrant" given by a Federal court not because there is probable cause of crime but only because a Federal official asserts in court that the acquisition by wiretapping of the communications of foreign nations—even with American citizens—is indispensable for the maintenance of America's foreign policy?

President Carter asserted on May 18 that this is a question "on which almost complete unanimity has been arrived at between myself and the intelligence groups and the Attorney General."

Neither the President nor anyone else raised the fundamental question of what the United States would think if England, France, or another nation in the free world enacted legislation that would permit those nations to wiretap any foreigner residing within their borders not because he was suspected of criminal activity but only because the government of the nation where he temporarily made his home wants to know what he is saying to his superiors or to his friends in his country of origin.

Attorney General Bell has failed to confront any of the questions behind the unprecedented proposals which he is

urging on the country. At the White House conference on May 18 the Attorney General expressed the hope that the new administration could "restore the confidence of the American people in all of our institutions." He continued by noting that such confidence was nowhere more lacking "than in intelligence gathering." The Attorney General asserted the hope that bringing "the judiciary into the process" would be beneficial because "I think the American people trust the judiciary, and they will have more confidence in the system if we have the executive, the congressional and the judiciary all tied into the process so as to have one check the other." The critical point totally omitted by the Attorney General is the secrecy built into his plan which prevents even the judge much less the Congress from knowing the real reasons why the Secretary of State for instance, wants to wiretap the Romanian Embassy or indulge in electronic surveillance on a "faction" of the Government of Saudi Arabia.

This crucial question was shrugged off totally by Senator Thurmond at the White House press conference when he stated "there is no question that our national security demands that we collect foreign intelligence. Electronic surveillance is one of the best ways to do that."

The civil liberties community in America objects strenuously to the Carter-Bell proposal because it virtually strips foreigners residing in America of any rights under the fourth amendment by subjecting them to invasions of their privacy for reasons that would not justify such an invasion upon American citizens or aliens residing permanently in America.

#### AN ANALYSIS OF THE ADMINISTRATION'S BILL

An analysis of the Carter administration's bill reveals that it contains the same pernicious assumption of the Ford-Levi bill; namely, that the Congress should eviscerate the letter and spirit of the fourth amendment in order to allow the State Department, the CIA, the Defense Department, and other agencies to acquire information which allegedly they cannot otherwise secure. Some of the assumptions running in this unbelievable assault on the fourth amendment include the following: First, the barrage of electronic eavesdropping now indulged in by the Federal Government brings information that is useful and necessary to our foreign policy; second, the legalization of this invasion of the privacy of the representatives of foreign nations in America is not in violation of international law, and third, clandestine intelligence gathering by foreign nations in the United States constitutes such a threat to our national security that only the most extraordinary compromising of the Bill of Rights can protect America from the agents of a foreign-based political organization.

Members of the Senate who in the 94th Congress favored the Foreign Intelligence Surveillance Act (S. 3197) regularly stated that this would bring the rule of law to the intelligence community and that, in addition, it would be a shield for those persons who regularly did intelli-

gence surveillance without the support of defined statutory guidelines.

The question above all questions has hardly been mentioned in whatever debate has occurred on this question up to this time: Can the alleged need of the intelligence community for clandestine information gathering in the United States justify a dramatic departure from any previous legitimate interpretation of the meaning of the fourth amendment?

The vigorous drive now being made by the intelligence community and by the Carter administration to bring American employees who regularly eavesdrop foreign nationals "out of the state of sin" is premised on the conclusion that the information acquired by these "plumbers" in the name of national security is essential to the safety, defense and national interest of the United States. There is hardly a shred of solid evidence for that conclusion in all of the testimony given to the Congress on several occasions by Attorney General Edward Levi and now by representatives of the Carter administration. The fact appears to be that the intelligence community has erected all types of sophisticated methods of intercepting what foreign embassies in Washington send back to their home countries.

Responsible and knowledge observers tell us that virtually all of the information so gathered is worthless. But the intelligence community, determined to exploit its powerful role, now wants to keep the Congress ignorant of the contents or the benefits of the information which they clandestinely gather while simultaneously frightening the Congress into accepting the illusion that the "reforms" proposed by Presidents Ford and Carter will bring protection to our Federal Government from foreign agents while simultaneously guaranteeing the privacy of American citizens. The reality is that the intelligence community, having created a Frankenstein from a paranoia intensified by total secrecy, now seeks to warp and distort the fourth amendment to protect a widespread practice which cannot be justified by facts, international law or any real needs of the American Government.

Reading the Foreign Intelligence Surveillance Act of 1977 proposed by the Carter administration reminds one of the language and spirit of laws proposed in the 1950's to protect the "internal security" of the United States. The administration's bill would permit wiretaps on any "faction" of a foreign nation residing in America if such "faction" is "not substantially composed of United States persons." The power to wiretap extends to any "foreign-based political organization" operating in America or to any "entity which is directed and controlled by a foreign government." The power to install electronic surveillance equipment extends to any foreigner who "knowingly engages in clandestine intelligence activities for or on behalf of a foreign power under circumstances which indicate that such activities would be harmful to the security of the United States." All these individuals do not, of course, have to be engaging in anything which even approaches a crime. Existing law permits

the Federal Government to use the ordinary judicial warrant to obtain wiretapping for any person about whom there is probable cause that he is indulging in sabotage, terrorism, or espionage.

The real grab for power by the intelligence community can be seen in the definitions of "foreign intelligence information" in the administration bill. There are several definitions of this key element, but the most outrageous is the claim that a Federal judge is virtually required to authorize wiretaps when the State Department, for example, desires "information with respect to a foreign power deemed essential to the successful conduct of the foreign affairs of the United States."

The definition of "electronic surveillance" likewise reveals what the intelligence community really desires—the right to obtain a judicial warrant to target any foreign national about whose activities the intelligence community would like to be informed. The definition of electronic surveillance makes it clear that this involves the acquisition of information "under circumstances in which a person has a reasonable expectation of privacy and a warrant would be required for law enforcement purposes." The bill authored by the intelligence community and embraced by the Carter administration openly concedes that the judicial warrant which the bill would authorize violates every "reasonable expectation of privacy" which a foreigner could expect in America and that, in addition, the warrant proposed for intelligence gathering would never be issued for law enforcement purposes. The definition of "electronic surveillance" also concedes that it involves the interception of a communication "without the consent of any party thereto."

It is most important to note that the Carter-Bell bill, while alleging that it does not claim any inherent power possessed by the President to wiretap foreign nationals, does assert this claim for "the acquisition by the United States of foreign intelligence information from international communications by a means other than electronic surveillance" which includes only "wire or radio communication."

The administration bill provides for "minimization" procedures; these are designed to minimize the acquisition, retention and dissemination of any information concerning American citizens wherein such information is not relevant to the purposes for which the Federal Government established the wiretap. One would think that at least in this instance the bill would compel the Government to expunge or destroy the irrelevant information gathered inadvertently on an American citizen. But the bill, incredible as it seems, states that the "minimization procedures shall not preclude the retention and disclosure, for law enforcement purposes, of any information which constitutes evidence of a crime if such disclosure is accompanied by a statement that such evidence, or any information derived therefrom, may only be used in a criminal proceeding with the advance authorization of the Attorney General." In such a case the Government

has the right to assert by affidavit that "an adversary hearing would harm the national security or the foreign affairs of the United States." After such a contention is made the judge may review the circumstances under which the warrant to obtain the evidence on an American citizen was made; if he concludes that the surveillance was legally authorized, the evidence obtained thereby may not be suppressed.

The application by which the Attorney General or his designate can obtain a judicial warrant must contain, under the administration bill, a minimum of information. The identity of the individual targeted may be withheld if there is a "description of the target of the electronic surveillance." The requesting authority must certify that the information sought "cannot reasonably be attained by normal investigative techniques."

The role of the Federal judge in the administration proposal is almost a degradation of the Federal judiciary. The judge is not permitted to question the certification of the administration that the information sought is in fact foreign intelligence information. He may do so only when the target of the surveillance is a U.S. citizen or a permanent resident alien. In such case the judge must accept the certification unless he finds that it is "clearly erroneous" on the basis of the statement submitted with the application.

Even more fraudulent is the pretense in the administration bill that the judge is in a position to make any well-informed judgment. The judge must authorize the electronic surveillance requested when there is "probable cause" to believe that the target "is a foreign power or an agent of a foreign power." Under the administration bill there appears to be no way by which a judge could receive or even request information as to why the intelligence sought was necessary for the conduct of American foreign policy. The judge is a rubber stamp from whom virtually all of the essential background of the requested authorization could be withheld.

In view of the fact that Federal judges now under title III of the Omnibus Crime Control and Safe Streets Act of 1968 virtually never deny a request for wiretaps, Federal judges would be in all probability even more reluctant to go against the Government when the request originates with the intelligence community and is surrounded by warnings that the defense or security of the United States would be endangered if the requested authorization for surveillance is not granted.

The role of the Federal judge in the administration bill is virtually identical with the judicial role in S. 3197, which the Senate Judiciary and Intelligence Committees reported favorably in 1976. That role is almost a mockery and a travesty of the function of a Federal judge. Under these bills for electronic surveillance for informational purposes alone, the Federal judge is required to preside over the emasculation of the fourth amendment and grant judicial warrants without information, without standards, and without any regard to the right of privacy which Justice Brandeis

has called "the right most valued by civilized men."

Even the time periods permitted for invasions of the privacy of foreign nationals is abused under the administration bill. The standard in the existing criminal wiretap statute, 18 U.S.C. 2518, is 30 days, but the administration bill would authorize surveillance for 90 days on U.S. citizens or permanent resident aliens and an entire year on all other persons whose phones are to be tapped.

The administration bill requires a Federal judge to issue an order which will permit those who execute the electronic surveillance on foreign nationals to compel a "landlord, custodian, contractor" to furnish "forthwith any and all information, facilities, or technical assistance, necessary to accomplish the electronic surveillance." The court order will also mandate that landlords and custodians keep any secrets which they learn according to procedures to be approved by the Director of Central Intelligence.

The administration bill, H.R. 7308 and S. 1566 filed by Chairman ROBINO and Senator KENNEDY, also authorizes the Attorney General in an emergency situation to authorize electronic surveillance for a period not to exceed 24 hours. If the electronic surveillance is terminated before any court order is granted, the information obtained from such surveillance may never be revealed in any judicial proceeding or to any congressional committee. The contents of the conversations recorded may be revealed to a U.S. citizen whose conversations were intercepted only if the Attorney General allows it.

The rights which Americans have to sue for monetary damages when the Government wiretaps them in violation of the United States Code are withdrawn from foreign nationals even though their privacy has been invaded in violation of the law.

Another bizarre idea in the administration bill, which derives from the Levi proposal, recommends that all applications for judicial warrants authorizing electronic surveillance for foreign intelligence purposes be restricted to seven district court judges selected by the Chief Justice of the United States. No standards are set forth for the selection of these chosen seven "wise persons" nor has anyone in the intelligence community confessed to being the author of such an idea which is practically insulting to the integrity of Federal judges. In the event that one of these seven judges somehow denies an application, the Chief Justice is mandated to establish a "special" court of appeals. Again, no standards are established either for the selection of the three judges or with respect to the norms by which they should reverse a judge who refused to carry out the ministerial act assigned to him by the law.

THE PRESS MISSES THE INSIDIOUS ASPECTS OF THE FOREIGN INTELLIGENCE GATHERING PROPOSAL

Even in the most sophisticated journals the idea lingers on that somehow Federal judges will not permit foolish electronic surveillances to continue. The Washington Post on May 23, 1977, cau-

tiously praised the Carter-Bell proposal and concluded that the bill would insure that—

Future electronic surveillance in this country will be governed not by presidential conscience or caprice, but by the rule of law.

If the bill provided that Federal courts pursuant to a Presidential application would give a warrant to tap when there was probable cause of crime on the part of diplomats, then we could say that "the rule of law" would be strengthened by the Carter proposal. But the fact is that there is no "rule of law" when American officials petition for permission to intercept the communications of agents of foreign nations in this country. Those making the application need make no showing beyond the fact that in their judgment the information which they seek to obtain by clandestine methods would be important in their decision-making. No evidence exists to suggest that the gatherers of foreign intelligence would be more careful or more discreet if they had to acquire a judicial warrant before they commenced their acquisition of information. Indeed, one could argue that the present possibility of their being exposed would be eliminated since they would be acting under full color of law and could not even be sued by persons who might be wiretapped illegally.

The Washington Post states that under the proposed system there "could be no legal blank checks." The fact is that there can be nothing but "legal blank checks" since the bill suggests that Federal judges substitute their judgment for that of the Secretary of State or the Director of the CIA.

The Christian Science Monitor on May 20, 1977, concluded:

The Administration bill "would put the country well on the way towards resolving what Mr. Carter called the 'inherent conflict' between legitimate intelligence and preserving rights."

But again, this newspaper misses the essential point that it is a perversion of the fourth amendment to pretend that it has anything to do or any standards to offer to a Federal judge required by law to issue a judicial warrant not to track down criminals but to listen surreptitiously to the conversations of foreigners in our Nation on the supposition that information about their plan for international commerce or their hopes for their country in the family of nations are important to the formulation of American foreign policy.

No newspaper appears willing to take on the fundamental question left open by the Supreme Court in 1972 in the Keith decision. In that ruling the Supreme Court outlawed all warrantless wiretaps for domestic purposes but was not called upon to rule whether wiretapping without a warrant was permitted for foreign intelligence. The fact is that there is no law, no reason, no international authority that can justify the contention that an American President as Commander in Chief can in peacetime conduct electronic eavesdropping without any of the restraints mandated by the fourth amendment. It is an illusion to think that we have "reform" when we seek to legitimize abominable and de-

plorable invasions of the privacy of foreign nations by casting the burden of approving these practices in an ex parte decree by a Federal judge.

No one in the press or even in the legal profession has apparently realized that the proposal to legalize the acquisition of information unrelated to crime or criminal conduct represents the very first time in American history that Congress would permit intrusions into the lives of aliens and citizens alike for activities having nothing to do with unlawful conduct. In addition, the proposal that the Congress authorize judicial warrants merely to acquire information violates the very words of the fourth amendment which specify that the applicant must submit a sworn statement "particularly describing the place to be searched and the persons or things to be seized."

The New York Times on May 7, 1977, expressed editorially its desire for "corrective legislation" in the area of foreign intelligence surveillance. The editorial notes that the fourth amendment protects "persons" without distinction and by implication rejects the contention "of the intelligence agencies to give less protection from surveillance to transient but legal visitors than to citizens and permanent residents." Despite this and other difficulties which the Times editorial points out, the newspaper somehow hopes and desires the "enactment of this crucial measure." Tom Wicker and Anthony Lewis of the Times have written in favorable terms of the proposal to place electronic surveillance solely for the purpose of acquiring foreign information under the supervision of the Federal courts. But neither they nor hardly anyone else has confronted the question that both the Levi and the Bell proposals appear to be in direct contradiction to the Vienna Convention on Diplomatic Relations. This treaty, ratified by the Senate in 1965, came into force in the United States in 1972. The convention requires that the premises of a diplomatic mission and its personnel, including their private residences, be "inviolable"—see sections 22, 24, 27, 29, and 30. This treaty in effect prohibits electronic surveillance of foreign emissaries and the premises which they occupy.

Former Attorney General Levi testified before a House Judiciary subcommittee in 1976 to the effect that the proposed Foreign Intelligence Surveillance Act was not inconsistent with the convention. He based that opinion on a legal memorandum prepared by the Office of Legal Counsel in the Justice Department. Mr. Levi refused to provide the subcommittee with copies of that memo but allowed members to read it in camera. I read that document and found it unpersuasive. I am inclined to think that the proposals to validate electronic surveillance for the sole purpose of acquiring information in a surreptitious way violates the letter and spirit of the Vienna Convention.

I feel strongly that the contents of that memo, if made public, might well alter the thinking of a number of people with regard to this question. As a result,

I asked Attorney General Levi on January 12, 1977, to declassify that document. On February 28, 1977, Attorney General Bell responded to that request in the following letter:

OFFICE OF THE ATTORNEY GENERAL,  
Washington, D.C., February 28, 1977.

HON. ROBERT F. DRINAN,  
House of Representatives,  
Washington, D.C.

DEAR MR. DRINAN: This is in response to your request of January 12, 1976, to Attorney General Levi for a copy of this Department's memorandum concerning the effect of the Vienna Convention on Diplomatic Relations on certain intelligence activities.

That memorandum is, as you are aware, classified "Secret" pursuant to Executive Order 11652, which requires a determination that its "unauthorized disclosure could reasonably be expected to cause serious damage to the national security." Because of your request I have personally reviewed the memorandum and solicited the views of the Department of State, and I have concluded that it is properly classified, an opinion shared by the State Department. Therefore, I regretfully cannot accede to your request for a copy of the memorandum for insertion in the CONGRESSIONAL RECORD.

You might be interested to know that last year a Freedom of Information request for this memorandum was made by the American Civil Liberties Union. That request was likewise denied, and an appeal of that decision is presently pending in the Department. Judicial review of a final denial may be sought in that case pursuant to 5 U.S.C. § 552(a) (4) (B).

Sincerely,

GRIFFIN B. BELL,  
Attorney General.

I expect to continue to pursue every avenue of appeal so that the secret memo which is enormously relevant to the question of foreign intelligence surveillance will be revealed for everyone to read.

CONGRESSMAN KASTENMEIER'S PROPOSAL,  
H.R. 5632

On March 28, 1977, Mr. KASTENMEIER, the distinguished and able chairman of the Judiciary Subcommittee on Courts, Civil Liberties and the Administration of Justice, filed a bill designed to eliminate undesirable features in the Levi proposal. Congressman KASTENMEIER's intention is to bring all electronic surveillance under the standard set forth in the Fourth Amendment to the Constitution. Not everyone will be able to agree that H.R. 5632 accomplishes that objective. In an explanation of the bill in the CONGRESSIONAL RECORD for March 28 (p. 9274), Mr. KASTENMEIER notes that his bill would permit foreign intelligence surveillance to continue but only after the issuance of a judicial warrant supported by probable cause that the surveillance would reveal evidence of criminal activity. The bill adds violations of the Export Administration Act and the Foreign Agents Registration Act as crimes for which a judicial warrant can be obtained. Mr. KASTENMEIER notes that "wiretaps already may be sought in cases of violations of espionage, sabotage, and treason statutes."

The Kastenmeier bill does not, however, appear to restrict its applicability solely to situations where evidence received from an electronic surveillance

might lead to knowledge of a crime. At least the bill defines foreign intelligence information in such a broad manner—virtually identical to the Levi bill—that it is difficult to see how the impact of the Kastenmeier bill would be essentially different from that intended by the Levi or Griffin Bell proposals. Indeed, the purpose of H.R. 5632 as set forth in its preamble is "to provide special procedures in the case of applications for court orders for the interception of oral or wire communications to obtain foreign intelligence information."

The Kastenmeier bill does, however, eliminate the idea of only seven judges acting in this area and provides that all of the judges of the U.S. Court of Appeals for the District of Columbia Circuit would have jurisdiction over applications for authorization to intercept wire or oral communications. The Kastenmeier bill is also progressive in that it does not structure a new chapter 120 of title 18 of the United States Code but amends the existing electronic surveillance statute, chapter 119, to permit surveillance in the context of the traditional criminal probable cause showing—although once again, the bill expressly states that it would permit surveillance for intelligence purposes.

IS SURREPTITIOUS WIRETAPPING ESSENTIAL TO  
U.S. FOREIGN POLICY?

All of those who have written about electronic surveillance for intelligence purposes have condemned and lamented the scandalous situation by which an unknown but probably large number of wiretaps have been installed in the name of national security. At the same time, virtually everyone assumes—without any empirical evidence whatsoever—that the mightiest nation in the world must continue to engage in the dirty business of wiretapping if it wants to protect itself against nations who send authorized representatives to America. Just a few years ago such a proposition would be rejected as preposterous. But the grip which the intelligence community has on the Congress and on the country is so intense at this time that anyone who asserts the idea that American officials should apply for wiretaps only to apprehend criminals is deemed to be naive and unrealistic.

The fact is that those who are proposing anything different from this traditional legal standard must bear the burden of demonstrating that the profound alteration which they are recommending is the only possible remedy for the problem whose existence they allege. The intelligence community has not offered a single bit of evidence that wiretapping merely for the purpose of gathering intelligence is the one indispensable element which they require in order to protect the Nation from calamities. The Ford administration and Attorney General Levi offered not a scintilla of evidence that the interception of the communications of the authorized personnel of foreign nations in this country was necessary or desirable. The Carter administration has defined the overwhelming consensus in the civil liberties com-

munity in its proposal to permit easy bugging and convenient wiretapping of both foreign nationals and American citizens—when the latter group phone embassies or talk to foreign businessmen by electronic means. The least that the Congress and the country could expect is disclosure by the administration of enough evidence to constitute at least some justification for the unprecedented demands now being made by the intelligence community.

Secrecy in America—even in the conduct of its foreign policy in peacetime—should be a very rare exception. The invasion of privacy by electronic means carried out by the Federal Government—even on foreigners—should be a phenomenon which should be encouraged or tolerated only for the most extraordinary circumstances in the most unusual cases. The proposal that this Nation legalize and validate routine requests of super-secret intelligence officials to engage in wiretapping is shocking and shattering. The Congress and the Nation should demand an infinitely more precise justification for these extremely radical measures than has been offered by the Ford or the Carter administrations.

#### VETERANS' AFFAIRS COMMITTEE TO CONDUCT HEARINGS ON PRO- GRAMS TO UPGRADE BAD DIS- CHARGES FOR CERTAIN VET- ERANS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. ROBERTS) is recognized for 10 minutes.

Mr. ROBERTS. Mr. Speaker, on June 20 and 21, the Committee on Veterans' Affairs will be conducting hearings in reference to President Carter's and former President Ford's programs to upgrade bad discharges for certain veterans who received such discharges resulting in service during the Vietnam era. During the hearings we will attempt to get all the facts pertaining to the programs; number of veterans affected; record of service of the individuals affected; cost of the programs, et cetera.

Mr. Speaker, other than two releases received from the Department of Defense, we have not been advised of the total impact of these discharge review programs nor have we been advised of the costs involved. As an example of our inability to receive information pertaining to the programs, it was recently called to my attention that the Acting Assistant Commissioner for Operations of the Immigration and Naturalization Service had sent a message to all customs stations outlining a plan of action being imposed on all customs inspectors to assure that returning deserters from military service are extended courtesy of the port upon their reentry into the United States. The instructions specifically state that returning personnel "will be accorded professional and courteous service." It is my understanding that most, if not all, such deserters will have transportation tickets provided them by the Government. Deserters will be

deemed members of the U.S. military on orders and will be exempt from any inspection by customs officials. In other words, it would appear that these individuals will be able to enter the United States after an extended period of absence and will be able to bring with them anything they desire.

It was recently called to my attention, although I have been unable to verify it, that service records of some members whose discharges are being upgraded have been altered and, in many instances, such records have been destroyed. If this is true a review of such records will not reflect "dishonorable service" should the Congress desire to take action to deny veterans' benefits as a result of such service.

I think this is appalling and we hope to find out exactly what is going on when we begin our hearings during the week of June the 20th.

Mr. Speaker, we must know what is going on and I hope that all Members who have any information that would be helpful to the committee will submit that information to us during hearings on this issue.

#### DEPARTMENT OF ENERGY ORGANIZATION ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Virginia (Mr. HARRIS) is recognized for 5 minutes.

Mr. HARRIS. Mr. Speaker, the significance of H.R. 6804, the Department of Energy Organization Act, is that Congress is making it clear that our Government is going to take effective command of energy policy, and that we are going to do so in a comprehensive manner. In the future, the Government and not the major oil companies will determine the public's energy policy.

The essential problem with the way our Government has dealt with energy issues in the past has been that we have lacked a comprehensive national energy policy and, moreover, that the responsibility for formulating and implementing policy has been widely dispersed through the executive branch and independent commissions.

The need for an energy policy is apparent. Colombia knows more about its coffee production than our Government knows about oil and gas production, even though energy is more important to our economy than coffee is to theirs. The administration and the Congress can and are proceeding to develop the national energy policy; this process has preceded, as it should, through public debate and under the public's scrutiny.

The effective management and implementation of a comprehensive energy policy is dependent upon the consolidation of most Federal energy programs. Of course, the general purpose of H.R. 6804, the bill before us today, is to create a Department of Energy and thereby to consolidate the functions of a vast number of executive agencies and independent commissions that have shared the responsibility for energy policy. I support this purpose.

Clearly understood lines of authority and responsibility will enable our Government to more effectively deal with our energy problems. Consolidation will also tend to eliminate waste and duplication. Very importantly, with greater coordination of information gathering activities, a policy based upon accurate and complete data will become possible.

Needless to say, however, not every Federal program affecting energy policy can or should be brought into the new Department of Energy or placed under the authority of the Secretary of the proposed Department. A review of H.R. 6831, the President's energy policy bill, demonstrates that tax policy is or could be a major aspect of our national energy policy. Yet, it is not reasonable to bring the Treasury Department within the new Department of Energy. I do not believe that anyone has seriously suggested doing so.

The Treasury example may be somewhat extreme, but the principle is clear: There are energy functions that should not be brought under the direct authority of the Secretary of Energy. Consolidation per se is not the goal of this legislation. Rather, the intent of this bill is to create a vehicle through which we can better formulate and implement policy. Blindly lumping all Federal energy programs in one department will not necessarily provide us with the best vehicle to achieve the end we seek.

When the House considered the amendments to H.R. 6804, a number of amendments were offered to restrict or expand the authority of the Department of Energy for certain energy programs. While I believe that, in general, consolidation of energy programs will be beneficial, I believe that in some instances it would not be advantageous to place certain programs under the authority of the Secretary.

For example, I supported an amendment to transfer authority for regulating the wellhead price of natural gas from the proposed Economic Regulatory Administration to the Federal Energy Regulatory Commission. While both are within the Department of Energy, only the Economic Regulatory Administration is under the direct authority of the Secretary. Natural gas regulation should utilize cost based pricing. I believe that protection from political pressure and executive interference would be maximized if the authority for setting natural gas rates was placed in the independent Federal Energy Regulatory Commission, rather than in the Economic Regulatory Administration.

#### DEPARTMENT OF ENERGY ORGANIZATION ACT

(Mr. PERKINS asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. PERKINS. Mr. Speaker, as we debate the proposed Department of Energy Organization Act, the Members ought to know that if the Congress and the administration which had been in office back in the early 1950's had done right

by the American people, we would not have to be here discussing energy problems today.

If the Government had not been negligent back then, we would not have an energy problem. There would be no OPEC, there would be no energy shortage, and our economy would not be riddled and ripped by the price of oil which we are importing today.

Back then, after World War II, this country was well on the way to a process of refining oil from coal that would have produced liquid fuel just as cheaply from coal as it was being produced from petroleum. As a matter of fact, we were also well along the way toward underground coal gasification. The liquefaction plants were located at Louisiana, Mo., and the underground gasification plant was located at Gorgas, Ala.

In 1953, they needed an appropriation of about \$2 million to continue their work, but the administration then in office was against it, and the Congress was not foresighted enough to approve it. So this country dismantled a tremendous technological advantage we had, and threw it down the drain.

Other countries, especially South Africa, grabbed this technology, and began producing fuel from coal, just as we could have, because the processes are old—the processes have existed since well before World War II. They can be improved on—researchers will also say that there is more work to be done, because they are never satisfied—and that may be good, but no member should operate under the delusion that we could not go ahead with coal liquefaction and coal gasification on a commercial scale today, if we wanted to.

Now, while our economy is being drained dry by the exorbitant prices people are paying for imported fuel, South Africa is manufacturing most of her own, using coal. The New York Times ran an article on this several days ago, and I ask that it be carried in the Record, so that the members may have some additional information on this subject.

[From the New York Times, June 1, 1977]  
SOUTH AFRICANS CONVERTING COAL INTO MOTOR FUEL

(By John F. Burns)

**SECUNDA, SOUTH AFRICA.**—While the United States searches anxiously for ways to reduce its dependence on imported oil, South Africa, with no natural oil of its own, has embarked on an ambitious project to produce substantial amounts of gasoline and other liquid motor fuel from coal.

A few months ago, the state-owned South African Coal, Oil and Gas Corporation, known as SASOL, began construction of a \$2.8 billion coal conversion project at this isolated spot 80 miles southeast of Johannesburg. The plant will be based on technology proven over the last two decades at a much smaller plant at Sasolburg, 80 miles to the west.

Together, the two plants will produce about 500 million gallons of motor fuels a year, a third of current consumption. And, if oil prices keep pace with rising capital costs, the only major question mark, the new project is expected to make at least a modest profit.

The idea behind the project is not South African, or even very new. Hitler used it in fueling his tanks and warplanes, after he lost his major oilfields in World War II. But after the war, only South Africa carried it through on a commercial scale.

Developing a German process that had been used only marginally by Hitler but taken over by the M. W. Kellogg Corporation in the United States, Sasol began marketing coal-based fuels in 1955. The products were good enough to be used in family sedans, trucks, jet airplanes, and even racing cars.

#### HUGE SUPPLIES OF CHEAP COAL

From the outset, local factors made the project especially appealing. The country had huge reserves of extraordinarily cheap coal, which even now comes out of Sasol mines at \$4 to \$8 a ton, compared to more than \$20 at many underground mines in the United States. Moreover, it could produce relatively expensive coal-based fuels and remain competitive with imported oil.

In addition, there were strategic considerations. Although South Africa relies on oil for less than a quarter of its energy needs, against 40 percent in the United States, the Government has long feared that the oil-exporting nations might seek to strangle apartheid with an embargo.

At present, a boycott is improbable, since 80 percent of the imported oil comes from Iran, which has been eager to develop strong ties with South Africa. However, Pretoria, aware of the political uncertainties of the Middle East, has been reluctant to overextend its reliance on the Shah.

Over the years, massive oil reserves, believed by diplomats to amount to three years' supply, have been stockpiled across the country, mostly in abandoned mineshafts. With expansion of the oil-from-coal program, self-sufficiency will be taken one step further.

#### CHRONIC DEFICIT PLUS OIL BILL

When the new plant comes on stream in 1981, it will save an estimated \$400 million on oil imports. The oil bill, \$1.2 billion in 1976, is in addition to a chronic trade deficit, \$1.7 billion last year, which the Government is finding increasingly difficult to cover with foreign investments and loans.

Abroad, the oil-from-coal scheme has been largely ignored, or regarded as a South African peculiarity. The attitude puzzles and even irritates Johannes Stegmann, Sasol's managing director. "How wrong they are!" he said in an interview in his office in Sasolburg.

Mr. Stegmann, a 50-year-old engineer who spends his leisure hours reading German novels and listening to baroque music, argued that rising oil prices eventually would persuade other industrial nations, primarily the United States, to follow SASOL's lead.

"It's absolutely inevitable, and I think anybody who has studied the energy scene in the United States would agree," he said, emphasizing the point by citing passages from President Carter's energy message to Congress from a copy on his desk.

The executive, in shirtsleeves predicted that the industrialized nations would have little success in reducing their dependence on oil before the end of the century. In the meantime, with reserves diminishing and demand going up, there was likely to be "a very considerable upward pressure on price," he asserted.

#### CALLS LIQUEFACTION "ABSOLUTELY NECESSARY"

In the circumstances, he said, it was "absolutely necessary" for countries such as the United States, for economic and strategic reasons, to start producing liquid fuels by synthetic means. In practical terms, this meant the liquefaction of oil shale, tar sands or coal.

"Towards the end of the century, the Western world will have no choice but to produce a substantial portion of its liquid fuel needs from liquefaction," the executive declared.

"So I think that a big mistake is being made, particularly in the United States, with its coal reserves, in not paying more attention to the existing technology."

After the war, a pilot liquefaction plant was built at Brownsville, Tex., but the economics of the period—cheap oil, mainly—were against it. In recent years, a number of United States gas companies have considered using a key part of the SASOL process to produce substitute natural gas from coal.

#### PRIVATE COMPANY TAKEN OVER

The companies, among them El Paso Natural Gas Company and the American Natural Gas Company of North Dakota, have maintained close contacts with SASOL. But so far, they have been reluctant to commit the huge start-up costs involved without some form of Federal guarantee, a possibility that was raised in the Carter energy proposals.

Initially, the South African rights to coal liquefaction were held by a private mining company, Anglovaal, now the Anglo-Transvaal Consolidated Investment Company. But in 1950, when the company balked at the capital costs, the Government took over, founding SASOL. The company remains wholly state-owned today.

For the first plant, SASOL I, the Government provided much of the capital costs. In the early years, the plant was plagued with technical problems and customer resistance to the products, which tended to break carbon deposits loose from engines. But by the early 1960's, the problems were solved and the company began making profits.

By 1975-76, net profits were up to \$35 million. The returns were increased by the sale of more than 100 byproducts, including gas for domestic and industrial use, feedstocks such as ethylene for the plastics industry, and nitrates for fertilizer.

Motor fuels, the principal product, were profitable from a fairly early stage. But, Mr. Stegmann conceded, rising capital costs made it impractical to build the second plant, SASOL II, until the sudden leap in oil prices that followed the 1973 Middle East war.

#### THE PROJECT IS VAST

The price increase by the Organization of Petroleum Exporting Countries, while damaging the economies of the industrialized West, simultaneously opened a new horizon to the company. Within a week of the outbreak of war, Prime Minister John Vorster's Cabinet commissioned a feasibility study on an oil-from-coal plant to produce 10 times as much fuel as SASOL I.

Within a year, the Government had approved the project. As with SASOL I, the site was chosen largely for its proximity to major coal reserves and to the Vaal River, source of the substantial amounts of water used in the liquefaction process.

The project is vast, the largest engineering project undertaken in South Africa. Eventually, a labor force of 14,000, largely black, will be involved in construction. German, French and American companies, under the overall management of Fluor Engineers and Constructors Inc. of Los Angeles, the managing contractor, will share major parts of the project.

#### NO ENVIRONMENTALIST OBJECTIONS

There has been opposition to the project. In industry, there are those who believe that it is an extravagance that the country, deep in a recession, cannot afford. Some opposition politicians think the money would be

better spent on black education, housing and jobs. But nobody is saying the project will not work.

Unlike major petrochemical projects in the United States, the new plant has so far encountered no problems with environmentalists. The only population concentration of any size in the immediate vicinity will be Secunda, the \$115 million new town being constructed for the company's workers nearby. Moreover, according to Mr. Stegmann, with processes developed at the first plant for the recovery of effluents, especially sulfur, environmental problems "will be fewer than at a coal-fired power station."

For Mr. Stegmann, the main worry in the three years to completion will be capital costs. If they keep step with the oil price, the new plant is expected to be modestly profitable within a year or two of coming into operation. A profit figure once mentioned by company executives of 9.3 percent has since slipped sharply as a result of rising construction costs.

However, Mr. Stegmann expects the profit picture to improve rapidly after the initial phase. His forecast is that OPEC will push the cost of oil in the 1980's past \$20 a barrel, compared with the current \$11.50, while the South African company, operating a heavily capital-intensive plant will face only modestly rising costs.

His view is that other oil-short nations, particularly the United States, should move without delay to construct liquefaction even if capital and other restraints make it unlikely that oil-from-coal projects can make more than a marginal impact on the overall energy picture in the next decade. "Only in this way can environmental, social, and economic obstacles to future large-scale projects be identified and overcome," he said.

#### PROCESS INVOLVES TWO STAGES

Mr. Stegmann conceded that, in the long term, the technology used in the company may be overtaken by new processes at least twice as efficient. The company's approach, an adaptation of the Fischer-Tropsch process developed in Germany between the World Wars, involves two stages—conversion of the coal into carbon monoxide and hydrogen followed by synthesis of the two in liquid form.

The process gives a thermal efficiency of approximately 35 percent, counting the motor fuels alone. New processes under research at SASOL and elsewhere, including the United States, offer potential efficiencies as high as 60 percent.

Approaches vary, but most involve a more sophisticated version of the hydrogenation technology favored by Germany in World War II. In essence, this involves a conversion stage, radically different from that now used by SASOL, with hydrogen molecules being mixed with coal under extremely high temperatures and pressures.

Mr. Stegmann forecast that it would be at least a decade before the new concepts were sufficiently developed in pilot plants to justify commercial application. By then, he said, SASOL II should have been in profitable operation, showing the way to an oil-depleted world, for at least half a dozen years.

#### PERSONAL EXPLANATION

(Mr. COLEMAN asked and was given permission to extend his remarks at this point in the Record.)

Mr. COLEMAN. Mr. Speaker, last Thursday, May 26th, it was necessary for me to leave Washington before the final vote on the Clean Air Act (H.R. 6161).

Before I left, I was able to participate in the floor proceedings and vote on a

number of critical amendments. However, had I been able to remain I would have been present to cast my vote in favor of final passage of the Clean Air Act as amended.

#### SOVIET PRESENCE FEARED AND HATED IN UKRAINE

(Mr. HANLEY asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. HANLEY. Mr. Speaker, Soviet domination continues to be an ever-present phenomenon in the world today. Soviet presence is feared and hated in Ukraine where the desire for freedom and sovereignty flourishes. The determination shown by these people exemplifies their attitudes and hopes of an independent state free from Soviet encroachment.

While the efforts for Ukrainian independence intensify so does the oppression that exists there. Persecutions and arrests continue at an increasing rate making human rights an almost extinct quality in Ukrainian society. We as Americans must continue to give these nationalists some encouragement by applying pressure and attempting to make the Soviet Union comply with the Helsinki agreement. Accordance with this has been nonevident in Soviet diplomacy. The closer relationship between the United States and the Soviet Union can be used as a tool so that the present situation in Ukraine can be rectified.

Since assuming office, President Carter has frequently expounded on the principles of human rights throughout the world and has declared that the question of human rights would receive priority in his administration. We as a nation must think along these lines so that attempts to alleviate social and political inequities can be successful. The oppression must be ended, however, it can only occur if the free peoples of the world sympathize with the plight of the Ukrainians and similar nations.

The Belgrade Conference is an opportunity for the Ukrainian situation to be widely exposed. The scrutiny of the world presents a possibility for positive actions. An attempt to involve enslaved nations in future conferences may lead to major developments in the quest for human rights and a decent existence. To allow persecutions to continue violates the Declaration of Human Rights and gives little or no hope for future independence. Satisfaction can never be acquired until this great nation fulfills its basic desire for freedom. Let us move with great speed at achieving the ultimate goal of these people.

#### LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows to:

Mr. COTTER (at the request of Mr. WRIGHT), for today, on account of official business.

Mr. AKAKA (at the request of Mr. WRIGHT), for today, on account of official business.

Mr. CORMAN (at the request of Mr. BROWN of California), for today, on account of official business.

Mr. BAFALIS (at the request of Mr. MICHEL), for today, on account of illness.

#### SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. STANGELAND), to revise and extend their remarks, and to include extraneous matter:)

Mr. KEMP, for 30 minutes, today.

Mr. BURKE of Florida, for 5 minutes, today.

(The following Members (at the request of Mr. WHITLEY) to revise and extend their remarks and include extraneous material:)

Mr. ANNUNZIO, for 5 minutes, today.

Mr. GONZALEZ, for 5 minutes, today.

Ms. HOLTZMAN, for 30 minutes, today.

Mr. ALEXANDER, for 30 minutes, today.

Mr. DRINAN, for 30 minutes, today.

Mr. ROBERTS, for 5 minutes, today.

Mr. HARRIS, for 5 minutes, today.

Mr. REUSS, for 30 minutes, June 6, 1977.

#### EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. STANGELAND) and to include extraneous material:)

Mr. WALSH.

Mr. GRASSLEY.

Mr. QUIE.

Mr. FRENZEL in three instances.

Mr. YOUNG of Florida.

Mr. SHUSTER.

Mr. BADHAM.

Mr. BURKE of Florida.

Mr. LAGOMARSINO.

Mr. ROUSSELOT in two instances.

Mr. McCLOY.

Mr. MICHEL in two instances.

(The following Members (at the request of Mr. WHITLEY) and to revise and extend their remarks:)

Mr. ROSE.

Mr. JACOBS.

Mr. MINETA.

Mr. MOORHEAD of Pennsylvania.

Mr. ANDERSON of California in three instances.

Mr. MURTHA.

Mr. ROSENTHAL.

Mr. NEDZI.

Mr. BEVILL.

Mr. BRECKINRIDGE.

Mr. EILBERG in two instances.

Mr. CORMAN in five instances.

Mr. KILDEE.

Mr. EDWARDS of California.

Mr. McDONALD in three instances.

Mr. MAZZOLI.

Mr. AMMERMAN.

Mr. OBERSTAR.

Mrs. BOGGS.

Mr. MAHON.

Mr. BYRON.

## ADJOURNMENT

Mr. WHITLEY. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly at 2 o'clock and 5 minutes p.m., under its previous order, the House adjourned until Monday, June 6, 1977, at 12 o'clock noon.

## EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1610. A letter from the Administrator, U.S. Environmental Protection Agency, transmitting a draft of proposed legislation to amend the Federal Insecticide, Fungicide, and Rodenticide Act and for other purposes; to the Committee on Agriculture.

1611. A letter from the Deputy Director, Office of Management and Budget, Executive Office of the President, transmitting a report that various appropriations to the Department of State and the Arms Control and Disarmament Agency have been apportioned on a basis which indicates the necessity for supplemental appropriations for fiscal year 1977, pursuant to section 3679(e)(2) of the Revised Statutes, as amended; to the Committee on Appropriations.

1612. A letter from the Deputy Assistant Secretary of Defense (Installations and Housing), transmitting notice of the location, nature, and estimated cost of various construction projects to be undertaken by the Army National Guard, pursuant to title 10, United States Code, section 2233a(1); to the Committee on Armed Services.

1613. A letter from the Assistant Secretary of the Army (Research and Development), transmitting a report on Army research and development contracts of \$50,000 and over awarded during the period October 1, 1976, through March 31, 1977, pursuant to title 10, United States Code, section 2357; to the Committee on Armed Services.

1614. A letter from the Administrator of General Services, transmitting notice of proposed changes in a records system, pursuant to title 5, United States Code, section 552a(o); to the Committee on Government Operations.

1615. A letter from the Administrator of General Services, transmitting proposed revised regulations to govern public access to presidential materials, pursuant to section 104(a) of Public Law 93-526; to the Committee on House Administration.

1616. A letter from the Acting Secretary of the Interior, transmitting a report covering calendar year 1976 on disclosures of financial interests by Interior Department officers and employees performing functions under the Energy Policy and Conservation Act, the Mining in the Parks Act, and the Federal Land Policy and Management Act of 1976, pursuant to section 522(b)(2) of Public Law 94-163, section 13(b)(2) of Public Law 94-429, and section 313(b) of Public Law 94-579; to the Committee on Interior and Insular Affairs.

1617. A letter from the Assistant Secretary of State for Congressional Relations, transmitting reports on political contributions made by Melissa Wells and Marvin L. Warner, and their families, pursuant to section 6 of Public Law 93-126; to the Committee on International Relations.

1618. A letter from the Vice President for Government Affairs, National Railroad Passenger Corporation, transmitting a report covering the month of March 1977, on the average number of passengers per day on board each train operated, and the ontime performance at the final destination of each

train operated, by route and by railroad, pursuant to section 308(a)(2) of the Rail Passenger Service Act of 1970, as amended; to the Committee on Interstate and Foreign Commerce.

1619. A letter from the Commissioner, Federal Prison Industries, Inc., Department of Justice, transmitting the annual report of the Board of Directors of the corporation for fiscal year 1976, pursuant to 18 U.S.C. 4127; to the Committee on the Judiciary.

1620. A letter from the Secretary, Aviation Hall of Fame, Inc., transmitting the organization's audit report for calendar year 1976, pursuant to section 15(b) of Public Law 88-372; to the Committee on the Judiciary.

1621. A letter from the President, National Academy of Sciences, transmitting a report on health care for American veterans, pursuant to section 201(c) of Public Law 93-82; to the Committee on Veterans' Affairs.

1622. A letter from the Secretary of Health, Education, and Welfare, transmitting a draft of proposed legislation to extend for 1 year the provisions of Public Law 94-401 which permit increased funding for social services under title XX of the Social Security Act and for other purposes; to the Committee on Ways and Means.

1623. A letter from the Comptroller-General of the United States, transmitting a report on accountability and control of nuclear warheads in the custody of the Department of Defense and the Energy Research and Development Administration (PSAD-77-115, June 2, 1977); jointly, to the Committees on Government Operations, and Armed Services.

1624. A letter from the Comptroller General of the United States, transmitting a report on the withdrawal of U.S. forces from Thailand (LCD-77-402, June 3, 1977); jointly, to the Committees on Government Operations, Armed Services, and International Relations.

1625. A letter from the Comptroller General of the United States, transmitting a report on Department of Defense efforts to comply with the Resource Recovery Act of 1970 and the Environmental Protection Agency's implementing guidelines (LCD-76-345, June 2, 1977); jointly, to the Committees on Government Operations, Armed Services, and Interstate and Foreign Commerce.

1626. A letter from the Comptroller General of the United States, transmitting a report on the barriers to improvement of manpower management caused by personnel ceilings (FPCD-76-88, June 2, 1977); jointly, to the Committees on Government Operations, Armed Services, and Post Office and Civil Service.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 2437. A bill to amend the act of April 17, 1954, which preserved within Manassas National Battlefield Park, Va., important historic properties relating to the battles of Manassas, and for other purposes; with amendment (Rept. No. 95-389). Referred to the Committee of the Whole House on the State of the Union.

## PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BONKER:

H.R. 7590. A bill to require the payment

of interest by Federal agencies on overdue contract payments, to amend the Office of Federal Procurement Policy Act, and for other purposes; to the Committee on Government Operations.

By Mr. BROYHILL (for himself and Mr. MOORHEAD of California):

H.R. 7591. A bill to amend chapter 44 of title 18 of the United States Code (respecting firearms) to penalize the use of firearms in the commission of any felony and to increase the penalties in certain related existing provisions; to the Committee on the Judiciary.

By Mrs. COLLINS of Illinois:

H.R. 7592. A bill to amend section 222 of the National Housing Act; to the Committee on Banking, Finance and Urban Affairs.

By Mr. CORNWELL (for himself, Mr. RUPPE, Mr. ROYBAL, and Mr. DORNAN):

H.R. 7593. A bill to amend title VII of the Social Security Act to require that social security and supplemental security income benefit checks be mailed in time for delivery prior to the regularly scheduled delivery day whenever that day falls on a Saturday, Sunday, or legal holiday; to the Committee on Ways and Means.

By Mr. FLYNT:

H.R. 7594. A bill to amend the Tariff Schedules of the United States; to the Committee on Ways and Means.

By Mrs. LLOYD of Tennessee:

H.R. 7595. A bill to amend title 39, United States Code, to prohibit the U.S. Postal Service from merging post office operations without the approval of persons regularly served by such post offices, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. MAZZOLI (for himself, Mr. BROWN of Michigan, Mr. YOUNG of Missouri, Mr. ADDABO, Mr. EILBERG, Mr. DOWNEY, Mr. McDADE, Mr. WOLFF, Mr. KRUEGER, Mr. WALKER, Mr. BRODHEAD, Mr. ETEL, Mr. NEDZI, Mr. WHITEHURST, Mr. NOLAN, and Mr. GEPHARDT):

H.R. 7596. A bill to provide for financial assistance to improve the capabilities of units of local government to deal with career criminals, and for other purposes; to the Committee on the Judiciary.

By Mr. MOORHEAD of Pennsylvania:

H.R. 7597. A bill to amend the Federal Financing Bank Act of 1973 to require that the receipts and disbursements of the Federal Financing Bank be included in the Federal budget, and for other purposes; jointly to the Committees on Ways and Means, and Banking, Finance and Urban Affairs.

By Mr. MURTHA:

H.R. 7598. A bill to increase the authorization for appropriations for coal mine health and safety research under the Federal Coal Mine Health and Safety Act of 1969 for fiscal year 1978 and succeeding fiscal years; to the Committee on Education and Labor.

By Mr. ROGERS (for himself and Mr. CARTER):

H.R. 7599. A bill to direct the Institute of Medicine of the National Academy of Sciences to conduct a 1-year review and evaluation of all available information respecting the toxicity and carcinogenicity of food additives, including information respecting the ability to predict the effect on humans of food additives found to cause cancer in animals and whether there should be a weighing of risks and benefits in making regulatory decisions respecting such additives, and to direct the Secretary of Health, Education, and Welfare to permit the continued use of saccharin as a food, food additive, drug, and cosmetic for 18 months; to the Committee on Interstate and Foreign Commerce.

By Mrs. SCHROEDER (for herself, Mr. CLAY, Mr. FORD of Michigan, Mr. FORD of Tennessee, Mr. HARRIS, Ms. MIKULSKI, Mrs. SPELLMAN, Mr.

STARK, and Mr. CHARLES H. WILSON of California):

H.R. 7600. A bill to amend title 5, United States Code, to guarantee to each employee in the executive branch who has completed the probationary or trial period, the right to a hearing, a hearing transcript, and all relevant evidence prior to a final decision of an agency to take certain action against such an employee, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. THONE:

H.R. 7601. A bill to amend section 501(e) of the Housing Act of 1949 for the purpose of requiring the Secretary of Agriculture to establish escrow accounts in order to assist persons receiving rural housing loans under such act; to the Committee on Banking, Finance and Urban Affairs.

By Mr. VANIK:

H.R. 7602. A bill to establish procedures and standards for the framing of relief in suits to desegregate the Nation's elementary and secondary public schools, to provide for assistance to voluntary desegregation efforts, to establish a National Community and Education Committee to provide assistance to encourage and facilitate constructive and comprehensive community involvement and planning in the desegregation of schools, and for other purposes; jointly, to the Committees on the Judiciary, and Education and Labor.

By Mr. WHITEHURST (for himself, Mr. CAPUTO, and Mrs. MEYNER):

H.R. 7603. A bill to amend the National Housing Act to provide for the insurance of graduated payment mortgages, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

## PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

Mr. WALKER introduced a bill (H.R. 7604) for the relief of Margaret Somerville Jefferis, which was referred to the Committee on the Judiciary.

## AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 10

By Mr. DERWINSKI:

On page 27 strike all after the enacting clause and insert the following:

That this Act may be cited as the "Federal Employees' Political Activities Act of 1977".

Sec. 2. Chapter 73 of title 5, United States Code, is amended by adding the following new subchapter:

### "SUBCHAPTER VI—POLITICAL ACTIVITIES

#### "§ 7361. Political participation

"It is the policy of the Congress that employees should be encouraged to fully exercise, to the extent not expressly prohibited by law, their rights of voluntary participation in the political processes of our Nation.

#### "§ 7362. Definitions

"For the purpose of this subchapter—

"(1) 'employee' means any individual, employed or holding office in the United States Postal Service;

but does not include a member of the uniformed services;

"(2) 'candidate' means any individual who seeks nomination for election, or election to any elective office, whether or not such individual is elected, and, for the purpose of this paragraph, an individual shall be deemed

to seek nomination for election, or election, to an elective office, if such individual has—

"(A) taken the action required to qualify for nomination for election, or election; or

"(B) received political contributions or made expenditures, or has given consent for any other person to receive political contributions or make expenditures, with a view to bringing about such individual's nomination for election, or election, to such office;

"(3) 'political contribution'—

"(A) means a gift, subscription, loan, advance, or deposit of money or anything of value, made for any political purpose;

"(B) includes a contract, promise, or agreement, express or implied, whether or not legally enforceable, to make a political contribution for any political purpose;

"(C) includes the payment by any person, other than a candidate or a political party or affiliated organization, of compensation for the personal services of another person which are rendered to such candidate or political party or affiliated organization without charge for any political purpose; and

"(D) includes the provision of personal services for any political purpose;

"(4) 'supervisor' means an employee who exercises supervision of, or control or administrative direction over, another employee;

"(5) 'elective office' means any elective public office and any elective office of any political party or affiliated organization;

"(6) 'enforcing authority' means the general counsel of the Civil Service Commission or such other individual within the Commission as the Commissioners may designate to carry out investigation and enforcement activities under this subchapter;

"(7) 'State' means each of the several States and the District of Columbia;

"(8) 'person' means any individual, corporation, trust, association, any State, local, or foreign government, any territory or possession of the United States, or any agency or instrumentality of any of the foregoing; and

"(9) 'restricted position' means any position with respect to which there is in effect a determination by the Commission, by regulation, that—

"(A) the duties and responsibilities of such position require such employee, as a substantial part of his official activities, to engage in—

"(i) the enforcement of any civil or criminal law;

"(ii) the inspection or auditing of the activities of any person;

"(iii) the contracting for goods or services for the Government;

"(iv) the providing, administration, or monitoring of licenses, grants, subsidies, or other benefits; or

"(v) foreign intelligence or national security activities;

"(B) the duties and responsibilities of such position—

"(i) in the case of any inspection, audit, prosecution, or investigation under any civil or criminal law, employees holding such positions have the authority to make policy decisions binding on other employees under their control with regard to who shall be the subject of any such action; or

"(ii) in the case of any Government contract or any Government license, grant, subsidy, or other benefit, employees holding such positions have the authority to make binding decisions on other employees under their control with respect to such contract or benefit which involves any funds or other interest having a substantial monetary value; and

"(C) the restrictions on political activity imposed on such employee in such a position are justified in order to insure the integrity of the Government or the public's confidence in the integrity of the Government.

"§ 7363. Use of official influence or official information; prohibition.

"(a) An employee may not directly or indirectly use or attempt to use the official authority or influence of such employee for the purpose of—

"(1) interfering with or affecting the result of any election; or

"(2) intimidating, threatening, coercing, commanding, influencing, or attempting to intimidate, threat, coerce, command, or influence—

"(A) any individual for the purpose of interfering with the right of any individual to vote as such individual may choose, or of causing any individual to vote, or not to vote, for any candidate or measure in any election;

"(B) any person to give or withhold any political contribution; or

"(C) any person to engage, or not to engage, in any form of political activity whether or not such activity is prohibited by law.

"(b) An employee may not directly or indirectly use or attempt to use, or permit the use of, any official information obtained through or in connection with his employment for any political purpose, unless such official information is available to the general public.

"(c) For the purpose of subsection (a) of this section, 'use of official authority or influence' includes—

"(1) promising to confer or conferring any benefit (such as any compensation, grant, contract, license, or ruling) or effecting or threatening to effect any reprisal (such as deprivation of any compensation, grant, contract, license, or ruling); or

"(2) taking, directing others to take, recommending, processing, or approving any personnel action (such as any appointment, promotion, transfer, assignment, reassignment, reinstatement, restoration, reemployment, performance evaluation or any adverse action under this title, suspension for 30 days or less, or other disciplinary action).

#### "§ 7364. Solicitation; prohibition

"(a) An employee may not—

"(1) give or offer to give a political contribution to any individual either to vote or refrain from voting, or to vote for or against any candidate or measure, in any election;

"(2) solicit, accept, or receive a political contribution to vote or refrain from voting, or to vote for or against any candidate or measure, in any election;

"(3) knowingly give or hand over a political contribution to a superior of such employee; or

"(4) knowingly solicit, accept, or receive, or be in any manner concerned with soliciting, accepting, or receiving, a political contribution—

"(A) from another employee (or a member of another employee's immediate family) with respect to whom such employee is a superior; or

"(B) in any room or building occupied in the discharge of official duties by—

"(i) an individual employed or holding office in the Government of the United States, in the government of the District of Columbia, or in any agency or instrumentality of the foregoing; or

"(ii) an individual receiving any salary or compensation for services from money derived from the Treasury of the United States.

"(b) In addition to the prohibitions of subsection (a) of this section, an employee holding a restricted position may not solicit, accept, or receive a political contribution from, or give a political contribution to, any individual who is an employee, a Member of Congress (or a candidate for such office), or a member of a uniformed service, or any agent of any such individual. The preceding sentence shall not be construed

to prohibit an employee from giving a political contribution to a political committee.  
 "§ 7365. Political activities on duty, etc.; prohibition

"(a) An employee may not engage in political activity—

"(1) while such employee is on duty;

"(2) in any room or building occupied in the discharge of official duties by an individual employed or holding office in the Government of the United States, in the government of the District of Columbia, or in any agency or instrumentality of the foregoing; or

"(3) while wearing a uniform or official insignia identifying the office or position of such employee.

"(b) The provisions of subsection (a) of this section shall not apply to—

"(1) an individual—

"(A) paid from the appropriation for the White House Office;

"(B) paid from funds to enable the Vice President to provide assistance to the President; or

"(C) on special assignment to the White House Office;

"(2) the Mayor of the District of Columbia, the Chairman or a member of the Council of the District of Columbia; or

"(3) any activity of an individual which is not otherwise prohibited by or under law and which is part of such individual's official duties.

"(c) Nothing in this section shall be construed to authorize an individual designated in subsection (b) to engage in political activity otherwise prohibited by or under law.

"(d) (1) In addition to the prohibitions of subsection (a) of this section, an employee holding a restricted position may not take an active part in political management or political campaigns unless such part—

"(A) is in connection with (i) an election and preceding campaign if none of the candidates is to be nominated or elected at that election as representing a party any of whose candidates for Presidential elector received votes in the last preceding election at which Presidential electors were selected or (ii) a question which is not specifically identified with a National or State political party or political party of a territory or possession of the United States; or

"(B) is permitted by regulations prescribed by the Civil Service Commission and involves the municipality or political subdivision in which such employee resides, when—

"(i) the municipality or political subdivision is in Maryland or Virginia and in the immediate vicinity of the District of Columbia or is a municipality in which a majority of voters are employed by the Government of the United States; and

"(ii) the Commission determines that because of special or unusual circumstances which exist in the municipality or political subdivision it is in the domestic interest of the employees to permit political participation.

"(2) For the purpose of this subsection, 'an active part in political management or in political campaigns' means those acts of political management or political campaigning which were prohibited on the part of employees in the competitive service before July 19, 1940, by the determinations of the Civil Service Commission under the rules prescribed by the President.

"§ 7366. Candidates for elective office; leave, notification by employees

"(a) An employee shall promptly notify the agency in which he is employed upon becoming a candidate for elective office and upon the termination of such candidacy.

"(b) An employee who is a candidate for elective office shall, upon the request of such

employee, be granted leave without pay for the purpose of allowing such employee to engage in activities relating to such candidacy.

"(c) Notwithstanding section 6302(d) of this title, an employee who is a candidate for elective office shall, upon the request of such employee, be granted accrued annual leave for the purpose of allowing such employee to engage in activities relating to such candidacy. Such leave shall be in addition to leave without pay to which such employee may be entitled under subsection (b) of this section.

"(d) The foregoing provisions of this section shall not apply in the case of an individual who is an employee by reason of holding an elective public office.

"§ 7367. Investigation; procedures; hearing

"(a) The enforcing authority shall investigate reports and allegations of any activity prohibited by section 7363, 7364, or 7365 of this title. Any such investigation shall terminate not later than 90 days after the date of its commencement. If the enforcing authority does not make the notification required under subsection (c) of this section before the close of the period for investigation, subsections (c) (2) and (3) and (d) of this section, and section 7368 of this title, shall not apply thereafter to the employee involved with respect to the activities under investigation.

"(b) As a part of the investigation of the activities of an employee, the enforcing authority shall provide such employee an opportunity to make a statement concerning the matters under investigation and to support such statement with any documents the employee wishes to submit. An employee of the Commission lawfully assigned to investigate a violation of this subchapter may administer an oath to a witness attending to testify or depose in the course of the investigation.

"(c) (1) If it appears to the enforcing authority after investigation that a violation of section 7363, 7364, or 7365 of this title has not occurred, it shall so notify the employee and the agency in which the employee is employed.

"(2) Except as provided in paragraph (3) of this subsection, if it appears to the enforcing authority after investigation that a violation of section 7363, 7364, or 7365 of this title has occurred, the enforcing authority shall serve upon the employee a notice by certified mail, return receipt requested (or if notice cannot be served in such manner, then by any method calculated to apprise the employee)—

"(A) setting forth specifically and in detail the charges of alleged prohibited activity;

"(B) advising the employee of the penalties provided under section 7368 of this title;

"(C) specifying a period of not less than 30 days within which the employee may file with the enforcing authority a written answer to the charges in the manner prescribed by rules issued by the Commissioners; and

"(D) advising the employee that unless the employee answers the charges, in writing, within the time allowed therefor, the Commissioners may treat such failure as an admission by the employee of the charges set forth in the notice and a waiver by the employee of the right to a hearing on the charges.

"(3) If it appears to the enforcing authority after investigation that a violation of section 7363, 7364, or 7365 of this title has been committed by—

"(A) an employee appointed by the President and with the advice and consent of the Senate;

"(B) an employee whose appointment is

expressly required by statute to be made by the President;

"(C) the Mayor of the District of Columbia; or

"(D) the Chairman or a member of the Council of the District of Columbia;

the enforcing authority shall refer the case to the Attorney General for consideration of prosecution, if appropriate, under title 18, and shall report the nature and details of the apparent violation to the President and to the Congress.

"(d) (1) If a written answer is not filed within the time allowed therefor, the Commissioners may, without further proceedings, issue their final decision and order.

"(2) If an answer is filed within the time allowed therefor, the charges shall be determined by the Commissioners on the record after a hearing conducted by a hearing examiner appointed under section 3105 of this title, and, except as otherwise expressly provided under this subchapter, in accordance with the requirements of subchapter II of chapter 5 of this title, notwithstanding any exception therein for matters involving the tenure of an employee. The hearing shall be commenced within 30 days after the answer is filed with the enforcing authority and shall be conducted without unreasonable delay. As soon as practicable after the conclusion of the hearing, the examiner shall serve upon the Commissioners, the enforcing authority, and the employee such examiner's recommended decision with notice to the enforcing authority and the employee of opportunity to file with the Commissioners, within 30 days after the date of such notice, exceptions to the recommended decision. The Commissioners shall issue their final decision and order in the proceeding no later than 60 days after the date the recommended decision is served. The employee shall not be removed from active duty status by reason of the alleged violation of this subchapter at any time before the effective date specified by the Commissioners.

"(e) (1) At any stage of a proceeding or investigation under this subchapter, the Commissioners may, at the written request of the enforcing authority or the employee, require by subpoena the attendance and testimony of witnesses and the production of documentary or other evidence relating to the proceeding or investigation at any designated place, from any place in the United States or any territory or possession thereof, the Commonwealth of Puerto Rico, or the District of Columbia. Any Commissioner may issue subpoenas, and any Commissioner and any hearing examiner authorized by the Commissioners may administer oaths, examine witnesses, and receive evidence. In the case of contumacy or failure to obey a subpoena, the United States district court for the judicial district in which the person to whom the subpoena is addressed resides or is served may issue an order requiring such person to appear at any designated place to testify or to produce documentary or other evidence. Any failure to obey the order of the court may be punished by the court as a contempt thereof.

"(2) Any Commissioner may order the taking of depositions at any stage of a proceeding or investigation under this subchapter. Depositions shall be taken before an individual designated by the Commissioners and having the power to administer oaths. Testimony shall be reduced to writing by or under the direction of the individual taking the deposition and shall be subscribed by the deponent.

"(f) An employee upon whom a penalty is imposed by an order of the Commissioners under subsection (d) of this section may, within 30 days after the date on which the order was issued, institute an action for judicial review of the Commissioners' order

in the United States Court of Appeals for the District of Columbia Circuit or in the United States court of appeals for the judicial circuit in which the employee resides or is employed. The institution of an action for judicial review shall not operate as a stay of the Commissioners' order. A copy of the summons and complaint shall be served as otherwise prescribed by law and, in addition, upon the Commissioners who shall then certify and file with the court the record upon which the Commissioners' order was based. If application is made to the court for leave to adduce additional evidence, and it is shown to the satisfaction of the court that the additional evidence may materially affect the result of the proceeding and that there were reasonable grounds for failure to adduce the evidence at the hearing conducted under subsection (d) (2) of this section, the court may direct that the additional evidence be taken before the Commissioners in the manner and on the terms and conditions fixed by the court. The Commissioners may modify their findings of fact or order, in the light of the additional evidence, and shall file with the court such modified findings or order. The Commissioners' findings of fact, if supported by substantial evidence, shall be conclusive. The court shall affirm the Commissioners' order if it determines that it is in accordance with law. If the court determines that the order is not in accordance with law—

"(1) it shall remand the proceeding to the Commissioners with directions either to enter an order determined by the court to be lawful (including an order for reinstatement with or without back pay) or to take such further proceedings as, in the opinion of the court, are required; and

"(2) it may assess against the United States reasonable attorney fees and other litigation costs reasonably incurred by the employee.

"(g) The enforcing authority or the Commissioners may proceed with any investigation or proceeding instituted under this subchapter notwithstanding that the enforcing authority or the head of an employing agency or department has reported the alleged violation to the Attorney General as required by section 535 of title 28.

"(h) (1) All decisions of the Commissioners with respect to the exercise of their duties and powers under the provisions of this subchapter shall be made by a majority vote of the Commissioners.

"(2) A Commissioner may not delegate to any person his vote nor, except as expressly provided by this subchapter, may any decisionmaking authority vested in the Commissioners by the provisions of this subchapter be delegated to any Commissioner or other person.

#### "§ 7368. Penalties

"(a) An employee who is found under section 7367 of this title to have violated any provision of—

"(1) section 7363 of this title shall, upon a final order of the Commissioners, be suspended without pay from such employee's position for a period of not less than 30 days, or shall be removed in which event that employee may not thereafter hold any position (other than an elected position) as an employee (as defined in section 7322(1) of this title);

"(2) section 7364 or 7365 of this title shall, upon a final order of the Commissioners, be—

"(A) removed from such employee's position, in which event that employee may not thereafter hold any position (other than an elected position) as an employee (as defined in section 7362(1) of this title) for such period as the Commissioners may prescribe;

"(B) suspended without pay from such employee's position for such period as the Commissioners may prescribe; or

"(C) disciplined in such other manner as the Commissioners shall deem appropriate.

"(b) The Commissioners shall notify the enforcing authority, the employee, and the employing agency of any penalty they have imposed under this section. The employing agency shall certify to the Commissioners the measures undertaken to implement the penalty.

#### "§ 7369. Educational program; reports

"(a) The Commission shall establish and conduct a continuing program to inform all employees of their rights of political participation and to educate employees with respect to those political activities which are prohibited.

"(b) The Commission shall designate an employee within the Commission who shall be responsible for the establishment and administration of the program described in subsection (a) of this section. Such employee may receive and answer questions relating to the provisions of this subchapter. Information received by such employee and the identity of the person who provided such information shall not be disclosed by such employee except with the consent of the person who provided such information.

"(c) On or before March 31 of each calendar year, the Commission shall submit a report covering the preceding calendar year to the Speaker of the House of Representatives and the President pro tempore of the Senate for referral to the appropriate committees of the Congress. The report shall include—

"(1) the number of investigations conducted under section 7367 of this title and the results of such investigations;

"(2) the name and position or title of each individual involved, and the funds expended by the Commission, in carrying out the program required under subsection (a) of this section; and

"(3) an evaluation which describes—

"(A) the manner in which such program is being carried out; and

"(B) the effectiveness of such program in carrying out the purposes set forth in subsection (a) of this section.

#### "§ 7370. Regulations

"(a) The Civil Service Commission shall prescribe such rules and regulations as may be necessary to carry out its responsibilities under this subchapter. Regulations shall be prescribed under this subchapter in accordance with section 553 of this title, notwithstanding any exception therein for matters relating to agency management or personnel.

"(b) The regulations referred to in section 7362(9) of this title shall be prescribed not later than 90 days after the effective date of such section. Thereafter any revision of such regulations shall be prescribed not later than March 1 of the calendar year in which such revision is to take effect. Any employee holding any position with respect to which any such regulation is prescribed may institute an action for judicial review of such regulation by filing a petition in the United States Court of Appeals for the District of Columbia Circuit, or in the United States court of appeals for the judicial circuit in which such employee resides or is employed, except that no such action may be instituted more than 30 days after the effective date of such regulation."

"(b) (1) The section analysis for subchapter VI of chapter 73 of title 5, United States Code, is amended to read as follows:

#### "SUBCHAPTER VI—POLITICAL ACTIVITIES

"7361" Political participation.

"7362" Definitions.

"7363" Use of official influence or official information; prohibition.

"7364" Solicitation; prohibition.

"7365" Political activities on duty, etc.; prohibition.

"7366" Candidates for elective office; leave, notification by employees.

"7367" Investigation; procedures; hearing.

"7368" Penalties.

"7369" Educational program; reports.

"7370" Regulations."

(c) (1) Sections 602 and 607 of title 18, United States Code, relating to solicitations and making of political contributions, are each amended by adding at the end thereof the following new sentences: "This section does not apply to any activity of an employee, as defined in section 7362(1) of title 5, unless such activity is prohibited by section 7364 of that title."

(2) Chapter 29 of title 18 of the United States Code is amended—

(A) by adding at the end the following new section:

"§ 608. Extortion of political contributions from Federal personnel

"Whoever, by the commission of or threat of physical violence to, or economic sanction against, any person, obtains, or endeavors to obtain, from an officer or employee of the United States or of any department or agency thereof, or from a person receiving any salary or compensation for services from money derived from the Treasury of the United States, any contribution for the promotion of a political object, shall be imprisoned not less than two nor more than three years, or fined not more than \$5,000, or both; and

(B) by adding at the end of the table of sections for such chapter the following new item:

"608. Extortion of political contributions from Federal personnel."

(d) Section 6 of the Voting Rights Act of 1965 (42 U.S.C. 1973d) is amended by striking out "the provisions of section 9 of the Act of August 2, 1939, as amended (5 U.S.C. 1181), prohibiting partisan political activity" and by inserting in lieu thereof "the provisions of subchapter VI of chapter 73 of title 5, United States Code, relating to political activities."

(e) Sections 103(a) (4) (D) and 203(a) (4) (D) of the District of Columbia Public Education Act are each amended by inserting "and section 7365" after "7327".

(f) Sections 8332(k) (1), 8706(e), and 8906 (e) (2) of title 5, United States Code, are each amended by inserting immediately after "who enters on" the following: "leave without pay granted under section 7366(b) of this title, or who enters on"

Sec. 3. (a) The amendments made by this Act shall take effect 120 days after the date of the enactment of this Act, except that the authority to prescribe regulations granted under section 7370 of title 5, United States Code, as added by section 2 of this Act, shall take effect on the date of the enactment of this Act.

(b) Any repeal or amendment made by this Act of any provision of law shall not release or extinguish any penalty, forfeiture, or liability incurred under such provision, and such provision shall be treated as remaining in force for the purpose of sustaining any proper proceeding or action for the enforcement of such penalty, forfeiture, or liability.

(c) No provision of this Act shall affect any proceedings with respect to which the charges were filed on or before the effective date of the amendments made by this Act. Orders shall be issued in such proceedings and appeals shall be taken therefrom as if this Act had not been enacted.

Amend the title so as to read: "A bill to restore to Postal Service employees their rights to participate voluntarily, as private citizens, in the political processes of the Nation, to protect such employees from improper political solicitations or influences, and for other purposes."

On page 51, in lines 10 and 11, strike out "120 days after the date of enactment of this Act" and insert in lieu thereof "on the first Wednesday following the first Tuesday of October 1978".

## EXTENSIONS OF REMARKS

## OFF-BUDGET FINANCING ACT

HON. WILLIAM S. MOORHEAD

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, June 3, 1977

Mr. MOORHEAD of Pennsylvania. Mr. Speaker, last June, the Subcommittee on Economic Stabilization, of which I am chairman, undertook a program of studies intended to focus on the impact of credit assistance provided under Federal auspices, but especially that attributable to the increased use of loan and loan guarantee devices. In November of last year, we were joined by the House Ways and Means Oversight Subcommittee and the tax expenditure task force of the House Budget Committee in holding joint hearings aimed at documenting the rapid growth of these guarantees and the role played by the Federal Financing Bank in their expansion. Given the hard fact that new commitments were averaging nearly \$50 billion per year, the development of a solid understanding of their characteristics, their uses, their limitations, and their breadth of application is a matter of utmost interest and importance to all Members of Congress.

As an outgrowth of our joint effort, my distinguished colleague and good friend, Mr. SAM GIBBONS, chairman of the Ways and Means Subcommittee on Oversight, has authored and introduced legislation which would place all receipt and disbursement activity of the Federal Financing Bank on-budget. I am pleased today, to join him in sponsorship of this legislation. The off-budget status of the FFB has permitted transactions financed by the Bank to escape congressional scrutiny, debate, and determination as part of the aggregates of budget authority, outlays, and deficits. The Bank, acting under current authorization, deals in obligations issued, sold, or guaranteed by any Federal agency. As was pointedly established during our hearings, use of this authority has expanded to a level where today most of the obligations held by the FFB are guaranteed loans.

Mr. Speaker, my concern is that new uses of this technique of back door financing will almost certainly continue to surface. Unless stipulated by law, most guaranteed loans are not subject to the limitations of the congressional budget process and the debate it involves.

Our hearing clearly established the fact these developments pose significant debt-management, monetary, and fiscal problems. We also determined that placing the Federal Financing Bank on-budget would be a positive first step toward reestablishing congressional control over these commitments.

Mr. Speaker, I urge my colleagues to support this bill, and I include the text of the bill at this point in the RECORD:

H.R. —

A bill to amend the Federal Financing Bank Act of 1973 to require that the receipts and disbursements of the Federal Financing Bank be included in the Federal budget, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the second sentence of section 11(c) of the Federal Financing Bank Act of 1973 (12 U.S.C. 2290(c)) is amended to read as follows: "The receipts and disbursements of the Bank in the discharge of its functions shall be included in the totals of the budget of the United States Government."

(b) (1) Subsection (a) of section 6 of the Federal Financing Bank Act of 1973 (12 U.S.C. 2285(a)) is amended to read as follows:

"(a) (1) Subject to the limitation of paragraph (2)—

"(A) the Bank is authorized to make commitments to purchase and sell, and to purchase and sell, any obligation which is issued, sold, or guaranteed by a Federal agency; and

"(B) the Bank shall make commitments to purchase, and shall purchase, any obligation offered to it—

"(i) which is guaranteed by a Federal agency;

"(ii) which has not previously been issued or sold to any person or governmental entity; and

"(iii) the guarantee with respect to which would (under subsection (d)) cease to be effective if such obligation were held by any person or governmental entity (other than such agency or the Bank).

Any Federal agency which is authorized to issue, sell, or guarantee any obligation is authorized to issue or sell such obligation directly to the Bank.

"(2) The Bank may, during any fiscal year, purchase and make commitments to purchase obligations only to such extent as may be provided in appropriations Acts.

"(3) Commitments, purchases, and sales by the Bank under this subsection shall be on such terms and conditions as the Bank may determine."

(2) Section 6 of such Act is amended by adding at the end thereof the following new subsection:

"(d) (1) Except as provided in paragraph (2), any guarantee by a Federal agency of an obligation shall be subject to the condition that if such obligation is held by any person or governmental entity, other than such agency or the Bank, such guarantee shall thereafter cease to be effective.

"(2) Paragraph (1) shall not apply in the case of any obligation—

"(A) which the Secretary of the Treasury determines is of a type which is not ordinarily bought and sold in the same markets as investment securities, as defined in the seventh paragraph of section 5136 of the Revised Statutes, as amended (12 U.S.C. 24), or

"(B) which is issued or sold by the Bank.

Before making any determination under subparagraph (A), the Secretary of the Treasury shall consult with the Director of the Office of Management and Budget, the Comptroller of the Currency, and the Chairman of the Board of Governors of the Federal Reserve System."

(2) Section 17 of the Federal Financing Bank Act of 1973 (12 U.S.C. 2295) is amended by striking out "Nothing in this Act shall be construed as impairing" and inserting in

lieu thereof "Except as provided in section 6, nothing in this Act shall be construed as affecting"

SEC. 2. The amendment made by subsection (a) of the first section of this Act shall take effect with respect to the first fiscal year beginning after the date of the enactment of this Act. The amendments made by subsections (b) and (c) of such section shall take effect beginning on the first day of such fiscal year, and shall apply in the case of any obligation, with respect to which a guarantee is made or renewed by a Federal agency on or after such date.

## A RETROSPECTIVE VIEW OF THE DINGELL-BROYHILL AMENDMENT

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, June 3, 1977

Mr. BROWN of California. Mr. Speaker, one of our last actions before Memorial Day was to amend the Clean Air Act. While I do not intend to rehash old arguments here, or react in a "sour grapes" fashion, I would like to tell my colleagues that this issue is not fully behind us. The other body is quite likely to hold out against the lobbying efforts against an effective Clean Air Act. The Committee on Conference is probably going to report back a bill that will not satisfy the industries which lobbied for the weakening amendments this House narrowly adopted. Therefore, it can be expected that at least one more vote, a return to the Dingell-Broyhill-Detroit amendment, will occur. Obviously, I hope my colleagues will take this next opportunity to return to a reasonable air pollution control schedule.

The public reaction to our action last week did not really surprise me. The public was outraged by our apparent disregard of the public health and welfare. Let my colleagues doubt this, let me put two representative newspaper editorials in the CONGRESSIONAL RECORD at this time.

The editorials follow:

[From the Los Angeles Times, June 1, 1977]

SMOG FOULS THE HOUSE

The fumes that come out of the tailpipes of cars are a danger to health. That is not a theory, but a fact. It was a fact in 1970, when Congress first ordered auto makers to begin complying with a strict timetable to control exhaust emissions. It is no less a fact today, and because it is a fact the House vote to delay still further and in some cases abandon emission-control goals must be regarded as unacceptable.

The Senate will have its chance next week to decide what future auto-exhaust standards are to be. The Senate's public duty, we believe, is to stand firm where the House retreated, remembering above all that the primary purpose of the effort to improve air quality is the protection of human health.

The cost of that effort has not been cheap. The cost would rise under the Carter Admin-

istration's sensible proposed timetable and standards for controlling auto emissions. But studies by the Environmental Protection Agency show that the maximum cost for meeting the toughest final standards envisioned would be \$330 more on the sticker prices of 1985 cars. That's less than the cost of an option such as air conditioning, which is now ordered for 85% of all new cars. Given the health benefits, it is a clearly bearable expense.

California is permitted to set its own tougher standards for controlling noxious emissions. Auto makers have met those standards, and undoubtedly will find ways to meet even more stringent requirements in the years ahead. Studies by the EPA and other federal agencies have shown that there are no technological or economic reasons why they should not be able to do so. Those accomplishments could easily be applied nationwide.

The rest of the country is entitled to the same protection against dangerous pollutants as California is. Smog is not unique to this state, nor are the adverse health effects of tailpipe fumes California's worry alone. Hydrocarbons, a major component of smog, are known to aggravate existing respiratory illnesses. Carbon monoxide interferes with the body's ability to deliver oxygen to tissues, a particularly serious risk for those with heart disease. Nitrogen oxides cause decreased lung function and increased bronchitis in children. There is evidence also that NOx may be a cancer-causing agent.

The House vote reflected intense pressure from auto makers, auto unions and auto dealers, who feared that the higher costs of equipment to meet tougher standards and possible small and temporary fuel-economy penalties in certain years would reduce car sales. Strong evidence was presented in the course of hearings and debate to show that this need not happen. In the end, the House chose to ignore that evidence. For the sake of public health, its decision cannot be allowed to stand.

[From the Washington Star, June 1, 1977]  
THE "DIRTY AIR" ACT?

Perhaps the best way to describe the House action on Clean Air Act amendments is to say the lawmakers struck a blow for dirty air.

After voting on Wednesday to allow a substantial increase in air pollution in national parks and other protected areas, the House on Thursday knuckled under to the auto companies, the auto unions and other motorizing interests and passed legislation to delay and weaken controls on auto exhaust emissions.

The Wednesday amendment permits construction of power plants near national parks and forests where the pristine air quality was protected by the Clean Air Act of 1970. The amendment was prompted by plans to build the huge Intermountain Power Project in Utah near several national parks, which is designed to provide electric power for the Los Angeles area.

The amendment almost surely will result in lowering the air quality in some Western areas and will make the large national recreational areas less attractive to visitors, but whether it will have a significant effect on the nation's health is at least debatable.

The more significant amendment was to delay and weaken controls on auto exhaust fumes, which are by far the biggest source of air pollution. In an effort to control this pollution, the 1970 act established limits on the amounts of hydrocarbons, carbon monoxide and nitrogen oxide that could be emitted by autos and established a timetable for the auto industry to meet the limits.

The exhaust standards were supposed to have been met by 1975 but auto makers,

pleading that they haven't had time to develop the necessary technology, obtained three delays from Congress. The House amendment approved Thursday not only grants further delay to the 1980-81 models but more than doubles the carbon monoxide and nitrogen limits established in the 1970 act.

Perhaps the U.S. auto industry can explain why it can't meet the Clean Air Act's emission standards when some foreign auto makers can.

Maybe it can also explain why it can't produce cleaner cars for sale in California, where state standards are stiffer than national, and can't produce them for nationwide sale.

We're inclined to think there's more than a grain of truth in the comment Thursday by Rep. Henry Waxman of California, who said of the auto companies: "If they had spent the money to meet the standards instead of lobbying, we wouldn't be here fighting this fight and we'd have healthier people across the country."

If the Senate, like the House, lets the industry off the hook, the alternative may be for the states to follow California's lead in protecting Americans' lungs.

#### SCHOLARSHIP PROGRAM IN NEWPORT BEACH, CALIF.

#### HON. ROBERT E. BADHAM

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, June 3, 1977

Mr. BADHAM. Mr. Speaker, I would like to call to the attention of my colleagues the fine scholarship program which is being conducted by the Newport Harbor Republican Women of Newport Beach, Calif.

At their Silver Anniversary Luncheon held today, June 3, 1977, scholarships were awarded to one student at each of the five high schools in the Newport-Mesa Unified School District. Contestants submitted an essay on the theme "The Importance of Ethics in Politics".

A panel of distinguished judges selected the following students' essays:

Heidi Beckerman, a senior at Corona del Mar High, will attend the University of Texas, majoring in communications.

Tim Hartwig, a senior at Estancia High, is presently under consideration for an appointment to the U.S. Coast Guard Academy, New London, Conn. He received the outstanding achievement award in math and science given by the Bank of America.

Scott McLeod, a senior at Costa Mesa High, will attend Orange Coast Community College, majoring in business.

Gary Parker, a senior at Newport Harbor High, was the class Salutatorian and recipient of the Bank of America outstanding achievement award in social studies. He plans to major in American History and graduate from the University of North Carolina.

Donna Rosati, a senior at McNally High School, plans to major in social studies and teaching and graduate from California State University, Fullerton.

Runners-up included Debbie Holt, Denise Humphreys, Peter Shelton, and Tom Turner.

I extend my congratulations to these outstanding young scholars for receiving this award. In the immediate future I wish them success in their academic pursuits but upon graduation, I would encourage them to consider entering the field of public service and politics. Our great Nation will look to these bright young people for ethical guidance, and wise leadership to preserve and protect our republic for generations to come.

#### FEDERAL FUNDING OF ABORTIONS

#### HON. CHARLES ROSE III

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Friday, June 3, 1977

Mr. ROSE. Mr. Speaker, this month the House will vote on the Labor/HEW appropriations bill. This legislation contains a provision barring Federal funds appropriated for abortion services. I feel that this measure places a discriminatory burden on the poor.

On April 19, I testified before the Labor HEW Appropriations Subcommittee. At this time, I would like to submit my testimony for the Record:

TESTIMONY BEFORE HOUSE APPROPRIATIONS SUBCOMMITTEE ON LABOR HEW BY CONGRESSMAN CHARLIE ROSE

Mr. Chairman and Members of the Subcommittee, as a Member of Congress I am committed to preserving equal protection of the laws for all citizens of the United States and, therefore, must oppose the inclusion of the Hyde Amendment in this year's Labor H.E.W. bill.

This bill would prohibit the appropriation of funds for abortion under the Medicaid program. Poor women, therefore, would be denied the same services now available to women with higher incomes, a proposition in direct conflict with the tenet of our Constitution that guarantees equal protection of the laws.

Abortion is a reality that will persist despite legislation targeting the poor. Through limiting access to this service, women will once again, as before *Roe v. Wade*, face the grim alternative of self-induced and/or illegal, unsafe, back alley style abortions.

According to Dr. Christopher Tietze of the Population Council, 70 per cent of all women having legal abortions would still have abortions even if it were an illegal procedure. If this restrictive measure passes Congress, the health of approximately 250,000 women whose abortions are paid by Medicaid, may be in serious jeopardy. Compare this with the fact that the Supreme Court's decision in *Roe v. Wade* enabled three million women to have safe abortions. Further, projections indicate that one million women a year will continue to use the new, safe abortion procedures.

In my State of North Carolina for FY '75, Medicaid funds paid for 1,356 abortions. Using Dr. Tietze's estimate, if these funds were not available through Medicaid reimbursements, approximately 949 indigent women would have sought unhealthy, potentially fatal alternatives, rather than bring unwanted children into the world.

In the last days of the second session of the 94th Congress, the controversial Hyde Amendment passed without the benefit of hearings, only to be immediately enjoined

by a Federal court the day it was to take effect. Judge John Dooling, of the U.S. District Court for the Eastern District of New York, found the Hyde Amendment unconstitutional on equal protection and First Amendment grounds. Judge Dooling's decision stated that the intent of Medicaid legislation was to provide medical assistance to the needy and that included pregnancy assistance. He found that the constitutionally protected right to equal protection of the law was violated in two critical ways. First, that the Hyde Amendment denied equal Medicaid services by discriminating against women who choose to terminate pregnancy as opposed to those who carry their pregnancy to term, and second, that the legislation discriminated against poor women by making abortions available only to those who can afford to pay for them.

At least 13 lower courts have supported these equal protection claims. Although the Supreme Court has yet to decide on this specific issue, the Congress should consider these lower Courts' decisions as a guide for legislative action. It does not serve this body to pass legislation of such suspect constitutionality. We cannot choose to ignore the compelling equal protection arguments against the enactment of this bill.

At the last Hyde vote, my colleagues claimed that their vote was motivated not only by personal beliefs, but cost factors. Let's consider the costs, then. According to a Department of H.E.W. impact statement, if abortions are denied to poor women the taxpayer can expect more money to be allotted for prenatal care, A.D.F.C. and hospitalization fees resulting from both delivery and the effects of unsanitary operations.

Each year 45 million dollars in Federal funds pay for abortion services. Louis Hellman, a spokesman for DHEW, estimates the first year cost after birth for medical care and public assistance would run between \$450-\$565 million. According to H.E.W. projections, each individual pregnancy would cost the taxpayer at least \$2,200 for maternity and pediatric care and public assistance.

These costs do not take into account deaths or medical complications resulting from unsafe methods of abortion. With the enactment of the Hyde Amendment, at least 25,000 cases would arise involving medical complications from self-induced abortions. Dr. Hellman suggests these cases would cost the government \$375-2000 per individual, or \$9.4 million to \$50 million.

How can we Members of Congress justify allowing Federal funds to pay for complications from unsafe procedures while at the same time restricting Federal funds that would allow and encourage safe, sanitary abortions? A cost analysis of the Hyde proposal alone is not a legitimate justification for enactment of this punitive measure.

Let us next consider the issue of religious freedom. I understand that many people including Members of Congress have strong religious beliefs opposing abortion. In granting the preliminary injunction against the implementation of the Hyde Amendment, Judge Dooling found the measure to be in violation of the First Amendment guarantee of religious freedom when he stated: "When the power of enactment is used to compel submission to a rule of private conduct shared by the society as a whole without substantial division it falls as law and inures as oppression."

At this time, Members of Congress finally have an opportunity to hear pro and con arguments regarding the Hyde Amendment. In view of the suspect constitutionality involving equal protection, religious and personal freedom and increased costs of the implementation of this measure, I urge my distinguished colleagues to strike this restrictive language from the main body of the bill.

## WILMINGTON 10 THE HUMAN RIGHTS OF THE

### HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, June 3, 1977

Mr. EDWARDS of California. Mr. Speaker, 9 of the Wilmington 10 languish in North Carolina jails. So far, both systems of justice, State, and Federal, have failed to free them, although the three key prosecution witnesses have recanted.

William Raspberry's column in today's Washington Post asks the reasonable question: "If we are concerned with human rights, what about those here at home?" Mr. Raspberry's column follows:

THE HUMAN RIGHTS OF THE WILMINGTON 10

(By William Raspberry)

If President Carter is serious about freeing political prisoners—if he is genuinely concerned about the whole range of human-rights issues—he needn't look to Africa or Latin America or the Soviet Union.

Let him look to North Carolina and the incredible case of the Wilmington 10.

The 10—the Rev. Ben Chavis, eight black teenagers and a white woman—were convicted as conspirators in a wave of violence following racial disturbances in Wilmington, N.C., five years ago.

There is, to understate it severely, "reasonable doubt" that they were guilty. The state's chief witness, Allen Ray Hall, now 23, has said he was tricked into giving false testimony by law officers who convinced him that Chavis had made threats against Hall's family.

"You didn't know [Chavis] came in town in a Volkswagen and left in an Eldorado?" Hall said the sheriff told him. "And so, like, I said no, I didn't know it, and they told me that Chavis had threatened my family, and so like, whenever my mother came to see me on a Saturday [Hall was already in jail on charges growing out of firebombing and other racial violence] I had asked her about it and she said, yeah, that somebody had been calling to the house and making threats, and at that time I didn't know it was just them calling there, you know, saying it was Ben. . . ."

"And so then, like, they told me what to say in court, because I had gotten so mad I had said that for them to just give me a gun, that I would kill Chavis, you know. And so [solicitor Jay] Stroud said, no, uh, you couldn't kill him, because if you kill him, they would investigate because he is in a civil-rights movement, and so, then, they said that the best way to get him is through the law."

Hall, undereducated and already in trouble, said that, partly because he believed what he had been told about Chavis and partly because he had been promised that he "wouldn't get much time" on his own charges, he told the lies the law officers wanted him to tell. He later recanted. According to Stroud, he has subsequently withdrawn his recantation in a tape-recorded telephone call.

Another witness, Eric Junious, 13 at the time, says now that he gave perjured testimony because of similar pressure on him and because of prosecutor Stroud's promise that he would give him a minibike for Christmas.

Stroud admits giving both the minibike and a job to the boy, who already was in frequent trouble with the authorities and is now in jail for breaking and entering. He gave the gift not for false testimony, says

Stroud, but only because of "real strong personal feeling of a positive nature" for Junious.

A third key witness, Jerome Mitchell, now 22, said under oath that he had lied at the trial under coaching by the prosecuting attorney.

That was the nature of the state's case, and notwithstanding its shakiness, the convictions were allowed to stand following the recantations during an unusual post-conviction hearing earlier this month. Superior Court Judge George M. Fountain concluded that there had been "no substantial denial of any constitutional rights of the defendants."

It isn't hard to guess what must be going on. The original convictions may well have been more a product of the temper of time and place than of reliable testimony. And the state must be under enormous pressure to sustain the convictions now.

To do otherwise would not mean merely releasing 10 people who in all probability should never have been jailed in the first place. It would also mean the necessity of prosecuting the officials alleged to have suborned the perjured testimony in the first place. With the choice of imprisoning a number of respected officials on the one hand or 10 nobodies on the other, the outcome may have been automatic.

Because it is a state case, not a federal one, President Carter may be as powerless to do anything about the Wilmington 10 as he is in the case of, say, Russian dissidents.

But it would be a most useful thing if he could bring himself to speak out on it. Human rights, after all, don't begin at the water's edge.

## PHILADELPHIA LAUNCHES INTENSIVE CAMPAIGN TO CURB PHARMACY THEFTS

### HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, June 3, 1977

Mr. EILBERG. Mr. Speaker, the city of Philadelphia has just announced a plan to work with retail druggists, pharmaceutical manufacturers, and State and Federal agencies to combat a sharp increase in the number of pharmacy thefts.

The move is being undertaken at the direction of Mayor Frank L. Rizzo. In announcing the action, the mayor explained his deep concern about the problem, and pointed out that he had requested local agencies to work closely with community representatives and governmental agencies in seeking a solution.

Dr. Christopher D'Amada, chief medical officer of the mayor's Coordinating Office for Drug and Alcohol Abuse Program—CODAAP—was named chairman of the new Pharmacy Theft Prevention Committee.

Dr. D'Amada outlined the joint attack on the drug theft problem at a city hall news conference attended by Ken Durrin, Acting Director of the U.S. Drug Enforcement Administration Office of Compliance in Washington, and Arthur Lewis, Regional Director of DEA.

Other members of the Pharmacy Theft Prevention Committee are:

Wayne Bohrer, regional compliance chief, and Thomas Crow, supervisor of investigations, DEA; Raymond Fleisher,

executive secretary, Philadelphia Association of Retail Druggists; Henry Kowalczyk, vice president, Rite-Aid Corp.; Joseph Cantor, Pennsylvania Board of Pharmacy; Donald Fletcher, SmithKline Corp., and Officer Raymond Thompson, Philadelphia Police Department.

During 1976, Dr. D'Amanda said, 138 drugstores out of a total of 510 in the city were robbed or burglarized. Most of these involved drug thefts.

In addition to reducing pharmacy thefts, goals of the program are to tighten procedures involving prescriptions, support law enforcement and judiciary systems' response to pharmacy thefts, and implement supportive activities such as educational and training seminars.

#### GLOBAL CARBON DIOXIDE INCREASE AND POTENTIAL CLIMATE CHANGE

**HON. GEORGE E. BROWN, JR.**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, June 3, 1977

Mr. BROWN of California. Mr. Speaker, as we move toward floor consideration of H.R. 6669, the National Climate Program Act of 1977, which was reported a little less than a month ago by the Science and Technology Committee, it is especially encouraging to see in today's New York Times an account of the problem of global carbon dioxide increase by a top official of President Carter's administration.

Speaking before the American Geophysical Union here, Dr. William Nordhaus of the Council of Economic Advisers examined in detail the consequences of atmospheric CO<sub>2</sub> buildup. Three tons of carbon dioxide are produced for each ton of coal or other fossil fuel burned. Dr. Nordhaus' analysis of possible consequences in the long-term reinforces concern we have heard in subcommittee work on the climate bill.

The issue is now being studied at the top levels of the administration; I commend to my colleagues the following short report by Walter Sullivan of Dr. Nordhaus' remarks:

**CLIMATE PERIL MAY FORCE LIMITS ON COAL AND OIL, CARTER AIDE SAYS**  
(By Walter Sullivan)

To avoid accumulation in the air of sufficient carbon dioxide to cause major climate changes, it may ultimately be necessary to restrict the burning of coal and other fossil fuels, according to Dr. William D. Nordhaus of the President's Council of Economic Advisers.

This would limit the dependence on coal that, under present policy, is to replace rapid expansion of nuclear energy.

Dr. Nordhaus, who is on leave from his post as professor of economics at Yale University, told this week's spring meeting of the American Geophysical Union in Washington that by early in the next century, the burning of coal, oil and gas might have to be curtailed by taxation or rationing.

He said he was speaking as an individual and not presenting a Government policy. He has been investigating the climatic and economic implications of carbon dioxide accumulation, having also worked on the problem

at the International Institute for Applied Systems Analysis near Vienna.

He cited estimates that if the trend toward heavy use of fossil fuels continued, by early in the next century the level of carbon dioxide in the atmosphere will have doubled. This, it has been proposed, could make the worldwide climate warmer than at any time in the last 100,000 years.

Dr. Nordhaus' argument was based in part on calculations by Dr. Wallace S. Broecker of Columbia University's Lamont-Doherty Geological Observatory, who also presented a report. Each ton of coal or other fossil fuel burned, he said, produces three tons of carbon dioxide.

#### GAS ACTS GREENHOUSE GLASS

In the atmosphere that gas acts much like the glass of a greenhouse. It readily permits the passage of sunlight, warming the earth, but it inhibits the escape of heat into space as infrared radiation.

While carbon dioxide is removed from the atmosphere by absorption into the oceans and incorporation into trees and other plants, these processes have been unable to keep pace with the addition of the gas from smokestacks, automobile exhaust and other sources.

If, as now seems likely, the development of nuclear energy is slowed in favor of heavier coal consumption, a more rapid rise in atmospheric carbon dioxide must be expected. While there is still much uncertainty as to how much of an increase could occur without major influences on climate, Dr. Nordhaus proposed that within 40 years severe restraints might become necessary.

He cited Dr. Broecker's estimate that by 1985 to 1990, there will have been a 20 percent increase in atmospheric carbon dioxide, leading to a mean global warming of about one degree Fahrenheit. This would still be within the range of naturally occurring changes over the last 100,000 years, Dr. Nordhaus said.

In that period, which included the last ice age, the fluctuations remained within 10 degrees, but the current climate is near the upper (warmer) limit of that range. Dr. Nordhaus referred to an analysis by Dr. Syukuro Manabe and R. T. Wetherald at Princeton University's Fluid Dynamics Laboratory, which predicted a rise of almost six degrees if the carbon dioxide doubles.

#### SERIOUS CONSEQUENCE FEARED

This would exceed the fluctuations of the last 100,000 years, deduced from analysis of ocean sediments and cores from ice sheet drill holes, and could have serious consequences. Dr. Nordhaus also noted that the Princeton studies indicated a far more marked warming in the polar regions than near the Equator.

In the long run, as noted by Dr. Broecker, this could melt polar ice, raising sea levels enough to flood many coastal cities and food producing areas.

To limit the accumulation of carbon dioxide in the air to an increase of 100 percent, he suggested an escalating tax schedule that would impose 14 cents a ton of released gas in 1980, increasing to \$87.15 a ton by 2100.

This would force energy consumers to shift to other sources, such as nuclear energy, which he termed presently "the only proven large-scale and low-cost alternative." The shift from carbon-based fuels would not reach major proportions until about 40 years hence.

By then energy sources now at an early stage of development, such as solar power and atomic fusion, might be able to contribute electric power and noncarbon fuels.

Since the United States contributes 10 to 20 percent of the carbon dioxide, any solution must be international, Dr. Nordhaus said. It will be "expensive, but not unthinkable," he added.

#### GOOD INTENTIONS: DISASTROUS RESULTS

**HON. BUD SHUSTER**

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, June 3, 1977

Mr. SHUSTER. Mr. Speaker, one of our distinguished former colleagues, Representative Edith Green of Oregon, who was a member of the House Education and Labor Committee on which I serve, has written a most cogent and illuminating article for a national paper. She deals with the matter of congressional intent. She speaks from a standpoint of 20 years of public service in which she had the opportunity of seeing much legislation debated and passed with the best of congressional intentions, only to become an administrative nightmare wasting the taxpayers' dollars and not accomplishing what the program set out to do. She cites examples of the Higher Education Act of 1974 and the Occupational Health and Safety Act which we all have come to know and love as OSHA.

What happened to the good intentions of Congress in passing OSHA? Why was it necessary to publish seven pages of Federal regulations dealing with the use of step ladders—including telling one that he will be hurt more by falling off the top rung than off the bottom one?

Mrs. Green says:

Regrettably, while Congress can write our common concerns into legislation, we cannot legislate the uncommon gift of common sense needed to administer laws intelligently.

Mr. Speaker, the former Member from Oregon says most succinctly what I fear will happen if this body passes the legislation traveling under the title of Youth Camp Safety. If such proposals as are included in the currently reported bill are passed into law, we will have such an army of backwoods bureaucrats as to strain the wildest imagination.

Can we really imagine a Federal regulation can be written to cover the conduct of a nature hike which may encounter poison ivy, or loose stones, or hot sun? For my part, Mr. Speaker, I want no connection with the proposed OSHA-in-the-woods and I would urge my colleagues to study the proposed legislation in the light of Mrs. Green's most pertinent observations.

Although I do not share Mrs. Green's party affiliation, Mr. Speaker, I do share her concern. Following is her article which appeared in the National Observer as the text of an address given at the Brigham Young University Forum on January 25, 1977:

**CONGRESSIONAL GOOD INTENTIONS OFTEN GO AWAY**

(By Edith Green)

It has been almost 20 years since I made my first visit to Salt Lake City. Sputnik had gone into orbit and there was great concern about American education. Were we producing enough scientists, enough engineers, enough technicians so that we could maintain superiority over the Russians? How many of our ambassadors and foreign service personnel could speak the language of the country to which they were being sent?

Out of this was born the National Defense

Education Act of 1958. The word "Defense" was carefully included because otherwise there would not be enough votes to insure approval by the Congress. This was the first major education bill affecting colleges and universities since the Land-Grant College Act signed by Abraham Lincoln.

The American public and Congress were rightfully concerned about the quality of education, about the small percentage of male high school graduates who were going on to college, about the still smaller percentage of female high school graduates who were being admitted to universities, about the concentration of Negroes in the all-black colleges of the South, yes, and about the black maid with tired feet who defied orders and tradition and who dared sit in the front of that bus in Selma, Ala.

Out of these honest concerns came the National Defense Education Act, the Higher Education Facilities Act to build college libraries and science buildings, the Civil Rights Act of 1964, the Health Personnel Act to train more doctors and nurses, the Housing Act to provide dormitories, the Higher Education Act of 1972 with its controversial Title IX and the Occupational and Safety Health Act to protect the safety and health of some 60 million workers.

The intentions were noble—to improve the quality of education and to provide equality of opportunity for every young person who really wanted an education regardless of race, color, creed, or sex. Many of the intended goals were achieved. College enrollments did increase dramatically in the '60s; between 1955 and 1965 the number of high school graduates going to college increased 110 per cent; women and blacks were being admitted to study at some of the best universities; quotas were being abolished; professions historically closed to most women and most blacks were searching for qualified applicants.

But what also has happened that would cause university presidents to say of the Office of Education in our Nation's Capital that the "road to hell is paved with good intentions—but this is what is happening on our campus!"

The faculty and students at Brigham Young do not need to be reminded of the courageous action of your Board of Trustees and President Oaks in objecting to certain HEW regulations attached to Title IX. I applaud their action. Little Hillsdale College in Michigan joins Brigham Young when it declares, "We will not comply with some of the Title IX regulations as put forth by HEW."

President McGill of Columbia University complains that the only voice the university hears is that of junior officials from EEOC or the HEW Civil Rights Office who have the power to bring harassing suits. A month ago, Oregon colleges opened fire on Congress and the Veterans Administration over a new order requiring colleges to keep detailed records of veterans enrolled in each course of study. HEW backed down.

A syndicated columnist writes about the giant bureaucracy connected with Higher Education: "It seems to be exercising the arrogance of officialdom which Cicero once described in ancient Rome."

A small businessman in Pocatello, Idaho, defied a federal inspector of OSHA (Occupational Health and Safety Act) and took his case to court. A three-judge panel upheld the businessman's position in a strongly worded decree. The United States Supreme Court carefully side-stepped the DeFunis case, but other cases are on the way up on reverse discrimination.

What has happened to our good intentions? First, explosion of paper work. There is much talk about the scientific explosion, the knowledge explosion, but the paper explosion is horrendous.

Each new law, each new regulation in-

creases the volume. A Senate subcommittee estimated that it costs Uncle Sam about \$18 billion a year to "print, shuffle and store" all of the forms, papers that business (including universities) must fill out. It costs businessmen another \$18 billion to get the forms filled out. The head of the National Archives office estimated that guess was conservative. He reported that in one year [he had] paperwork sufficient to fill more than 35 box-cars.

Then in the ever-present bureaucracy, a federal agency consists of an upper echelon of political appointees and Cabinet-sub-Cabinet positions. Traditionally, their life-spans in office are very short.

Then there is a vast underlay of permanent civil service personnel known as the "Feds." The top people rarely get a chance to get a real grasp on the agency before moving on. As a result, the lower-level bureaucracy runs the show. In practice this means that regulations and guidelines are issued, laws are interpreted, contracts are let by third, fourth, and seventh-ranking officials who too often are immune to constituency complaints. In fact, Civil Service manages to protect all who come within their purview—from any serious restraints in their freedom, except in rare cases of malfeasance.

Let's examine briefly just two laws Congress passed. The passage of OSHA (Occupational Safety and Health Act) was accompanied with great hopes that through a coordinated effort and firm but fair enforcement of procedures, we could begin a meaningful attack on the 14,000 deaths, the more than two million disabling injuries and the hundreds of thousands of occupational illnesses that occur in the work place each year—including university campuses.

The legislation had hardly been enacted when complaints began crackling over Congress like a summer electrical storm and its thunder reached such proportions that both the House and the Senate slashed the operating budget of the new safety agency.

The law was put into effect in April 1971. One month later a special edition of the *Federal Register* was published containing 250 pages of safety and health standards. Seven pages dealt with the use of step-ladders alone—such erudite warnings that one could be injured more severely if he fell off the top than from the bottom step.

Sen. Carl Curtis (R-Neb.) asked the Library of Congress to provide a copy of all the standards and codes which the Occupational Safety and Health Act had blanketed into law. Three days later, the Library advised that it was a monumental undertaking which would require the cooperation of the Department of Labor. Sen. Curtis found that the documents made a stack 17 feet high. It would cost a businessman \$4,000 to buy all of the publications that had been incorporated into the law.

The consensus codes of the construction and industrial groups—developed over the years—were incorporated and became federal law. Although many of these "consensus" codes had been in existence for years, most people were, more often than not, completely unaware of their existence. They had been guides, recommendations adopted at different times by industries, but not mandatory. Suddenly—without review—these codes became law.

Some of the now famous and ludicrous examples stemming from OSHA are attributable to this factor. The "ice water flasco" is one of the most notorious.

An OSHA regulation stated that "ice shall not come into direct contact with water it is cooling." Fines were levied against some who were found to have ice in their ice water! This regulation was an archaic throwback to the days when the ice industry cut ice out of lakes in winter and stored blocks for summer use. It was in an old

consensus standard, picked up and incorporated into OSHA regulations without review. Finally, finally, OSHA published standards which provided that ice used in ice water must be free from contamination.

One Navajo Indian miner found himself in violation because he had to have a phone—one outside and one inside the mine—even though he operated the mine alone and there would have been no one to answer the phone at the other end had it been installed. He also had to have a stretcher, so, if he is hurt, someone would carry him out—but again he was the only one there.

Uniform requirements regardless of local conditions, unseasonable regulation, can only breed disrespect. Regrettably, while Congress can write our common concerns into legislation, we cannot legislate the uncommon gift of common sense needed to administer laws intelligently. What can be even more disconcerting to a legislator is to see regulations issued for a program which totally distort the original purpose and intent.

Certainly it was not the intent of the civil rights legislation to bring about reverse discrimination. Yet this is precisely what has happened in many cases, the DeFunis case being the best known.

Yes, in Portland, a ship conversion plant, for example, employed 15 percent minority workers—a considerably higher percentage than in the state itself. Inspectors from San Francisco, however, said they must have at least 15 percent in each department; 15 percent secretaries, carpenters, welders, etc. They had only two secretaries and one bookkeeper, but before they could hire any more whites 15 percent of the two secretaries and one bookkeeper must be minority people.

Qualified black welders were not available. This did not discourage the federal administrators—they said black welders could be imported from Chicago and other areas. Local qualified white welders could not be hired until the 15 percent quota was met. Yet nowhere in the civil rights legislation is such shuffling of population to meet artificial quotas suggested.

In 1972 when we enacted the Higher Education Act—including Title IX—to end discrimination against women, we sought to be exceedingly explicit so that the establishment of quotas would be prohibited. I was surprised and dismayed when complaints from colleges and universities came in stating that the Department of Labor was requiring them to meet quotas.

Some institutions complained that under Labor Department restrictions, they would not be able to hire a white male faculty member until the year 2000. I consider the rhetoric of some in saying, "We don't require quotas—we require goals," as nothing more than a game of semantics!

For years I participated in the great national struggle against discrimination—both discrimination on the basis of race and discrimination on the basis of sex. One of the ugliest aspects of discrimination was always the "quota system"—quotas limiting women, blacks, Jews, persons of Irish descent, and on and on.

As I watched it over the years, quotas represented the crudest form of mindless inequality, because that meant that an important decision was being made not on merit, but on some blatantly unfair, irrelevant criterion.

I find it hard to understand the reasoning that now leads well-intentioned people, in simplistic zeal, to institute reverse quotas. Do they believe that one injustice deserves another? Is the basis of judgment to be "merit" or some strict ethnic or sex formula?

Will we need to parcel out all opportunities to so many people aged 20 to 30, so many aged 30 to 40, etc., so many Protestants, so many Mormons, so many Catholics, so many Jews—and so on without end? Is this what

democracy has come to mean? Can there be opportunity or hope in such a rigid system?

Often people argue that this is the only way to redress evils that have lasted hundreds of years: because my grandmother was considered almost as chattel—because my grandmother did not have the educational opportunities my brothers had—because she could not own or sell property (even property she inherited)—because she was never allowed to vote—I am I, her granddaughter, to be given preferential treatment to supposedly redress the grievances of the past? I think not.

During my life I would only have liked equal treatment. I do not believe it is just, nor fair, nor indeed wise for this generation to try to design a social system based on the mistakes—the injustices practiced by our forefathers. I do not believe this is the best way to launch a more just world of the future.

I have never believed that race, sex, religion or national origin are valid criteria for either "favorable" or "unfavorable" treatment. This is one reason I have been opposed to programs which give an advantage in job consideration and promotion to members of those groups who have suffered historic discrimination. As a woman I am a member of one of those groups and keenly aware of the injustices which exist—and I could recite by chapter and verse personal experiences to document the case.

Nevertheless, I reject the thesis that reverse discrimination is therefore justified. When Congress passed the Civil Rights Act in 1964 the purpose was to end discrimination on the basis of race, color, creed, national origin, or sex. It was not designed to replace one injustice with another.

One of the most damaging things about prejudice, in my view, is that it gives primary value to a group characteristic rather than recognizing the unique individuality of each human being. It does not matter whether this discrimination works in the person's favor or against him. What he or she still loses is the irreplaceable privilege of being looked upon as an individual rather than an anonymous face in the crowd.

As I see it, only genuinely equal opportunity—containing neither advantage nor disadvantage—can provide this.

This is what Title IX was all about—equality of opportunity. It was designed to end discrimination on the basis of sex—in admission standards to undergraduate or graduate schools. It was designed to end discrimination in pay. If a female faculty member had the same professional training—the same experience, the same responsibilities as a male professor, then she should be paid the same salary. Title IX was designed to provide equal opportunities for disadvantaged young girls in the Job Corps and other federally financed educational programs. Title IX was not designed to do away with intercollegiate sports. Title IX was not designed to force the integration by sex of every physical education class in the country. Title IX was not designed to do away with all-male choirs, father-son or mother-daughter banquets—or to require the integration by sex of Boy Scouts, Girl Scouts, Campfire Girls, YMCA's, YWCA's, sororities or fraternities.

In each one of these instances the regulation grew out of the fertile imaginative brain of someone in the administrative branch of the government. And in each instance either the Congress had to pass a specific law prohibiting such action—or the President of the United States had to issue an Executive Order to stop the nonsense.

There is nothing timeless or sacrosanct about local control of education, but there is theoretical sense and good common horse sense in recognizing that all initiative and all wisdom does not somehow automatically flow to and collect on the banks of the Potomac—there to be gathered and redistrib-

uted as gifts of the all-seeing, all-knowing federal government. I suggest the new Administration could make a tremendous contribution—perform a valuable service—if in its new reorganization plans, it passes this word down to the thousands of federal employees who spend their days and their hours drawing up new rules and new regulations:

Good intentions are fine—but what happens in the local paint shop, the local university, the local bus station will determine the degree of confidence people have in their government.

## WHY DECRIMINALIZE MARIHUANA?

HON. J. HERBERT BURKE

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, June 3, 1977

Mr. BURKE of Florida. Mr. Speaker, the Select Committee on Narcotics, of which I am the ranking minority member, held hearings and issued a report under date of May 1977 entitled "Considerations For and Against the Reduction of Federal Penalties for Possession of Small Amounts of Marihuana for Personal Use." This report makes no recommendations with regard to what Congress should or should not do, but it does summarize the opinions of the proponents and opponents of decriminalization of marihuana.

The youth of our Nation are the primary users of marihuana and the cause for concern. The people who testified before the Narcotics Committee during the decriminalization hearings were adults. There are some that would like us to believe that all of our youth are users yet there are a lot of responsible thinking young people who have opinions on this matter that make good sense.

The Washington Star in its June 2 issue had a letter to the editor which I call to the attention of my colleagues. This letter is by 15-year-old Chuck Lane from Chevy Chase, Md., and is an intelligent and interesting peer view of the marihuana problem. I commend this young man for speaking out so eloquently on this controversial subject. The following is the text of his letter:

### A BOY'S HARD VIEW OF "POT"

I am 15 years old and I go to high school in Montgomery County. I read with interest the response by your columnist Garry Wills ("Penalties more toxic than the weed," May 20) to Post columnist George F. Will's opinion on legalization of marihuana. Some of Garry Wills' points are well-taken, but as one who views the effects and speculates on the causes of widespread marihuana and drug use, I would like to explain why I am against its legalization.

As George Wills points out, the harmfulness of marihuana is manifested not physically but mentally in its young user. I have seen too many people my age turn into pot heads, wasting valuable years of their lives, to believe that marihuana is harmless.

These kids start out experimenting on the weekends, then gradually work themselves up to the point where they smoke pot daily, sometimes during school. Marihuana use becomes a part of their routine; they depend on it emotionally to get them by. These "heads" begin to lose interest in school, and they slowly stop caring about making productive use of their time. Ask any of these heavy

users of pot if he sees anything wrong with using so much, and he will invariably answer: "No, they haven't proved it's bad for you."

Yet marihuana use on this level among youth is only a symptom of a larger disease. Our whole society has become based on mechanical and moral change aimed simply at making everything easier. In television, we see a prime example of how mechanical innovation has provided us with a way to get entertainment and information easily, at the flick of a switch. This trend towards easiness has become reflected in moral changes. "Do what's right for you," is one of today's easy moral catch-phrases. "It's okay if they don't catch you," is another.

Indeed, using marihuana and staying high is probably a lot easier than working through high school, so young people see getting high as the natural thing to do. To this extent, society's constant changes in the direction of "easiness" have almost necessitated marihuana use as the easiest way to have fun.

Today, many are pressing for change in the marihuana laws, eventually aimed at its legalization, contending that people "will use it no matter what." This may be true, but to me it seems that for society to adjudge something that affects so many young people in such an adverse way as being morally wrong would be an indication that our country still has the moral character to resist a change for the worse.

Admittedly, we permit use of alcohol and cigarettes. And yet, why should we repeat the same mistake again and legalize marihuana? A society that keeps marihuana illegal may not be "easier," but to my mind, at least, it is more morally sound.

CHUCK LANE, Chevy Chase, Md.

## PENNSYLVANIA'S NORMAN LOURIE UNDER CONSIDERATION FOR POST AS COMMISSIONER OF AGING

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, June 3, 1977

Mr. EILBERG. Mr. Speaker, it is my understanding that Mr. Norman Lourie, of Pennsylvania, is under consideration in the Department of Health, Education, and Welfare for appointment as Commissioner of the Administration on Aging.

It has been my great good fortune, Mr. Speaker, to have known Norman Lourie for nearly a quarter of a century—during my entire legislative career which dates back in 1954. Let me take this opportunity to share with my colleagues the very distinguished career of this fine public servant.

Norman Lourie has been executive deputy secretary of the Pennsylvania Department of Public Welfare since 1955. For most of that time he was the undersecretary, functioning as the operations chief of a comprehensive multiprogram State department which includes programs for the aged, public assistance, medical, children and youth, mental health, mental retardation, vocational rehabilitation, general hospitals, nursing homes, and so forth. The department now has about 44,000 employees and a budget of \$2.5 billion.

Norman Lourie gave leadership to the development of Pennsylvania's excellent

program for the aged which began in the late 1950's. He is a generalist and a well-qualified administrator. The American Society of Public Administration gave him its Man of the Year Award in the early 1960's. He enjoys an excellent professional reputation and has been a national leader in a wide range of social welfare activities.

He is a past president of the National Conference on Social Welfare, the National Association of Social Workers, and the American Orthopsychiatric Association. He is also on the executive committee of the National Council of State Public Welfare Administrators.

#### AN ALTERNATIVE TO ELECTION DAY REGISTRATION

**HON. C. W. BILL YOUNG**

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, June 3, 1977

Mr. YOUNG of Florida. Mr. Speaker, as is so often the case, the Congress will soon be considering implementing a new program to solve an old problem which would be more realistically solved with existing programs and a little initiative.

The administration and some of my colleagues in the Congress feel that the approach to the old problem of increasing voter participation is to implement a new program, the gist of which is election day registration which is going to cost an additional \$50 million every 2 years, not to mention the mass confusion, long waits on election day, and other obvious problems.

Here in Washington, \$50 million may not seem like a lot of money, but to the supervisor of elections in Pinellas County, Fla., Mr. Charles Kaniss, that is an extra bill that the American taxpayer should not have to pay and he has implemented an innovative way to deal with registering new voters with existing funds and volunteer manpower.

Mr. Kaniss has enlisted the aid of eight employees from the CETA program and has trained them in instructing and deputizing volunteer registrars at locations in the community where people normally conduct everyday business—banks, city halls, shopping centers, and libraries. He also envisions volunteer registrars in trailer parks, condominiums, and even temporarily at local events.

His goal is to enlist 2,000 volunteers who will register 100,000 new voters before the 1978 elections. So far, he has signed up 489 new registrars and at one event alone, the annual county fair, 450 new voters were registered.

In my opinion, this approach is far superior to election day registration and I recommend it to my colleagues in hopes that it also might work in their districts.

In a recent editorial, the Clearwater Sun expressed their opinion on Mr. Kaniss' "Outreach Plan" and I believe their pointed analysis of this issue merits the attention of my colleagues:

#### OUTREACH PLAN GETS MOST VOTES

While Congress mulls over President Carter's proposal to require election-day voter

CXXIII—1099—Part 14

registration, Charles Kaniss and his staff are out beating the Pinellas County bushes in an attempt to sign up 100,000 new voters before the 1978 fall elections.

For a variety of reasons, we prefer the Pinellas County elections supervisor's approach to the problem of non-voting.

The Administration bill, which is scheduled for consideration next month, would require every state to register voters in federal elections at the polling places on election day. In addition, it would provide money for states that allow election-day registration in state elections or initiate pre-election day "outreach" programs.

Here in Pinellas, the supervisor of elections office already has kicked off an ambitious "outreach" program that has greatly facilitated the registration process. For instance, citizens can register to vote in any one of 45 local banks, 24 city halls, several chambers of commerce and public libraries.

Periodic efforts at shopping malls and other locations also have helped make it easier to register than ever before. More than 450 new voters were signed up at the Pinellas County Fair this spring, and more than 100 are being registered at area malls each weekend.

Best of all, most of the work is being done by volunteers. In less than five months, 293 citizens throughout the county have been deputized as registrars. Costs are kept to a minimum by the use of employees whose salaries are paid through a federal job program.

Mr. Carter's proposed system, on the other hand, has come under attack for alleged vulnerability to voter fraud and for catering to the political fortunes of the Democrats.

While studies have shown that election-day registration probably would appeal more to low-income, poorly educated citizens, our objections are not based on the possibility of a bonanza for either major party. Nor do we feel that voter fraud would be uncontrollable.

Nevertheless, while the federal government has a legitimate interest in ensuring equal access to the polls (the 1965 Voting Rights Act, for instance, abolished discriminatory practices in the South), we think Uncle Sam's role in local and state elections should be expanded under only the most compelling circumstances.

But when new voters are actively solicited at dozens of private and public locations, during convenient times of the day, local elections officials have more than fulfilled their duty.

A recent study by the U.S. Census Bureau found that of the eligible citizens failing to register, only 21 percent said legal or physical barriers were to blame. Other studies vindicate the most popular theory about poor registration and voter turnout—that America's 60 million or so nonvoters stay away from the polls out of cynicism and apathy.

Rather than force local elections supervisors to initiate costly, time-consuming election-day registration procedures, and politicians ought to examine their own failure to inspire the citizenry.

And if Mr. Carter wants to study an inexpensive way of beefing up voter registration, perhaps he should invite Charles Kaniss to the Oval Office for a chat.

#### THE HYDE AMENDMENT

**HON. BILL FRENZEL**

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Friday, June 3, 1977

Mr. FRENZEL. Mr. Speaker, next week the House will consider the Labor-HEW appropriation. It will contain language prohibiting expenditures for abortion, known last year as the Hyde amendment.

That language in last year's bill has been contested in court, and has been set aside pending final court determination.

The Hyde amendment, if it survives the court test, will not permit abortions. What it will do is prevent abortions only for the needy. Women of means who choose to have abortions can do so. Poor women will be denied this choice.

There will be a motion to strike the Hyde amendment language. I respectfully suggest to all Members that they carefully consider the effects of denying to women of modest means a choice available to most women. It would not save much money. It would not prevent abortions. But it surely will discriminate against the poor.

#### A CALL FOR ACTION TO REPUBLICANS

**HON. CHARLES E. GRASSLEY**

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Friday, June 3, 1977

Mr. GRASSLEY. Mr. Speaker, as a Republican, I often am discouraged by the lack of spirit in my party lately. Although we have gotten in a few well-aimed shots at the majority party, more often than not our shots have been off target.

I am firmly convinced that a majority of Americans do believe in the Republican principles of government—fiscal integrity, conservatism, and libertarianism. But we are still failing to convey our similarities to the public.

The Republican Party offers the best hope for the country. We are finding more and more that our opponents realize this. That explains why the Democrats often steal our ideas. What the Republicans need to do, obviously, is promote their ideas and goals to the hilt, put a patent on them if you will, so that we get the credit, not the opposition. That is one sure way to rebuild the party.

The following editorial from the Mason City, Iowa, Globe-Gazette offers several other valuable suggestions to revitalizing the Republican Party. I would like to share it with those Members who recognize the importance of providing the country a bona fide alternative:

#### LET'S SEE SOME FIGHT

It's time for the Republicans to get their game together.

The Democratic Party is running the country. There is no Republican "government by veto" to complain about. The Democrats are sitting ducks for any legitimate criticism about any point of national policy, foreign or domestic. Jimmy Carter's first 100 days and whatever honeymoon he deserved are over, and his administration is cranking out specific legislative proposals.

But at this point, one would think the only ballgame in Washington is a contest between Carter and his fellow Democrats in Congress.

Sure, the Chuck Grassley types are continuing on their fiscal responsibility line, and having some Republican sharpshooters plinking away from the bushes is fine. Ronald Reagan (and even Gerald Ford sometimes) are being heard out in the hinterlands.

But where are the big guns on the attack in terms of broad policies—in Washington?

Where are the Republican spokesmen of a "loyal opposition" in the legislative halls?

It's easy to blame the press for emphasizing Democratic actions more than Republican objections—but news will always be more oriented toward what's happening than what's being said about it. Strong voices and strong proposals by the minority can diminish any such imbalance.

This brings us to one real party-line clash of the moment, the one over Carter's plan for instant voter registration on election day.

Strong Republican voices for strong Republican principles? Ha!

Congressional Quarterly notes that initial reaction to the Carter plan by the Republican leadership was surprisingly favorable. House Minority Leader John J. Rhodes of Arizona continued on that course after other Republicans found out grassroots party sentiment was against the plan. Now it appears he, too, is "re-examining" his position.

The Republican National Committee lambasted Carter's proposal, and the official party position now seems to be that election-day sign-up would encourage fraud and have small effect on turnout. Experience in the few, mostly rural, states that have tried such a plan indicates it means very slightly higher turnout, a slight Democratic advantage and minimal fraud.

So here we have Republicans starting out on shifting ground, forming their ranks rather raggedly and than launching a major offensive to take a piddling objective. Unless they can show—with no real evidence available—that fraud will soar in more urbanized states, they are not going to inspire the citizenry to rally 'round their flag on this one.

Congressional campaigning will be under way in less than a year, and the Republicans had better start finding and really screaming about some issues that will inspire the voters.

"Let's you and him fight" may be easier for us to say than for the political parties to do. But some sound Democratic-Republican scrapping is the best way to tell the voters what's going on and give them a chance to take intelligent part in it.

#### PAPER SHUFFLING

**HON. ANDREW JACOBS, JR.**

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Friday, June 3, 1977

Mr. JACOBS. Mr. Speaker, do you suppose there would be less paperwork in Washington if there were less paper chase in Indianapolis?

[From Indianapolis (Ind.) News, May 28, 1977]

#### OSHA-COME-LATELY

The news business editor put it humorously; we'll put it in stronger language.

Five hundred years from now the American human brain will be half the size it is today for the simple reason we have turned our thinking over to Washington.

In a newspaper, where some stand ought to be taken against OSHA, we are surrendering like everyone else to directives from the nation's capital.

OSHA has told us to clean off our desk tops, as if cluttered desk tops in Indianapolis or any place else are any business of OSHA's. But we are doing it, capitulating without a whimper of protest.

Next it will be clutter at home. Our clutter in our cars. Or in our vacation vehicles. OSHA is not going to stop unless it is stopped.

Now, in a rare burst of hope, OSHA was told to quit nitpicking about safety in small businesses and to start looking at real rather than imagined dangers. Even that, however, suggests no one has been concerned with safety until OSHA arrived.

#### TRIBUTE TO RICHARD LEVIN

**HON. NORMAN Y. MINETA**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, June 3, 1977

Mr. MINETA. Mr. Speaker, it gives me great pleasure to rise today in honor of a man I have known for many years, Mr. Richard Levin.

Born and raised in Santa Clara County, Calif., Mr. Levin is a successful businessman and is affiliated with numerous civic and charitable organizations.

Married for 38 years to his wife Emmy Lou, Mr. Levin is the father of three daughters and has five grandchildren. He has also been the recipient of many distinguished awards for his devotion to the community and making it a better place to live.

A partial listing of Mr. Levin's remarkable contribution to his community would include:

Charter member and Past President of Willow Glen Kiwanis Club, San Jose.

Charter member and Past President, Sheriff's Posse of Santa Clara County.

Board member, Boys City Boys' Clubs of Santa Clara County, past 20 years.

Served 20 years as member of Board of Directors of Temple Emanu-El, San Jose.

Served as co-chairman of Temple Emanu-El Centennial Foundation and Centennial Civic Celebration.

Member of Regional Board of Trustees of City of Hope.

Member of Board of Trustees of American Friends of Haifa University and Chairman for San Jose on behalf of the Center of Maritime Studies of Haifa University.

National Board Member of National Jewish Hospital and Research Center at Denver. National Committee Member United Jewish Appeal.

Member of Board of Governors, National Conference of Christians and Jews, Santa Clara County Region.

Member of Society of Fellows of the Anti-Defamation League of B'Nai B'rith.

Member of San Jose Chamber of Commerce.

Member of Redwood City Chamber of Commerce.

Member of California State Chamber of Commerce.

Member of Board of Directors of the Better Business Bureau of Santa Clara County.

Member of the Y.M.C.A. Century Club.

Member of Commonwealth Club of California.

Member of World Trade Club, San Francisco.

Member of Japan Society, San Francisco.

#### FRATERNAL ORGANIZATIONS

Member of Observatory Lodge, Native Sons of the Golden West.

Member of Elks Lodge.

Member of B'Nai B'rith.

Masonic affiliations: Member of Islam Shrine Club, San Francisco; Member of San Jose Shrine Club; Member of San Jose Scottish Rite Body; Member of Friendship Lodge No. 210 Free and Accepted Masons.

Served on many Civic Committees of the City of San Jose.

For many years interested in ecology and preservation of natural resources and wild life.

Actively worked for most charitable causes, local and national, including March of Dimes, Heart Association, local hospital drives, Santa Clara County Crippled Children's Society, United Crusade, Hope for Retarded Children and Adults, City of Hope, National Jewish Hospital at Denver and Sisters of Presentation College.

Donor of Antique Fire Engines and Equipment to start a Historical Fire Museum for the City of San Jose.

Donor of Antique Steam Railroad Engines to National Railroad Museums.

On Wednesday, June 15, 1977, Mr. Levin will again be honored by being awarded the 1977 Annual Brotherhood Award from the Santa Clara chapter of the National Conference of Christians and Jews. Mr. Levin is truly deserving of this most distinguished award; for all of his life, through all of his activity, he has promoted good will, kindness, and understanding among people.

Mr. Speaker, I ask you and my colleagues to join me today in congratulating and giving best wishes to Mr. Richard Levin, recipient of the Santa Clara County chapter of the National Conference of Christians and Jews 1977 Annual Brotherhood Award.

#### INCREASING MINE HEALTH AND SAFETY RESEARCH

**HON. JOHN P. MURTHA**

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, June 3, 1977

Mr. MURTHA. Mr. Speaker, despite centuries of mining, there remains a great deal to learn about the best techniques for safe coal mining. Stimulating development of those techniques can significantly increase coal production and be a vital part of the Nation's energy future.

That is why, Mr. Speaker, I am today introducing legislation to raise the authorization ceiling for coal mine health and safety research from \$30 million to \$60 million.

I asked the Bureau of Mines what they would be able to do with such an increase. Here is a partial list of the kind of research they would be able to undertake:

Creating new roof support evaluation methods;

Developing a reliable rotary water seal for ripper-type continuous miners which would produce about a 25-percent dust reduction compared to conventional water spray systems;

Improving design for noise control of major types of underground electric face equipment;

Stimulating new test procedures and toxic product criteria for explosives; and

Producing and demonstrating controlled surface blasting techniques for improved highwall stability.

All those steps would make mines safer. Safe mining techniques are essential if the Nation is to attract the 200,000 new miners needed by 1985 to

meet President Carter's coal production goals. Moreover, the present \$30 million authorization ceiling has effectively been reduced by inflation to purchasing power of \$18 million.

Mr. Speaker, I believe such research is a key element of the Nation's total energy approach, and national efforts to increase coal production and use.

## VOTER REGISTRATION ACT

HON. JOHN H. ROUSSELOT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, June 3, 1977

Mr. ROUSSELOT. Mr. Speaker, the Voter Registration Act of 1977 (H.R. 5400) has been reported out of the House Administration Committee and soon will be before us. As it is now written, H.R. 5400 would require the States to eliminate preregistration requirements for Federal elections. Instead of having to register in advance, an individual would be permitted to register at his polling place on election day. The voter would only be required to sign an affidavit certifying he meets the legal requirements and produce some form of identification, such as a driver's license, to establish his place of residence, or an affidavit from another voter. Such legislation will open the door to fraudulent registration and voting—and every stolen vote dilutes the strength of one honestly and thoughtfully cast. Apparently, this concern is shared by Mr. Craig Donsanto, head of the election unit of the Justice Department's Criminal Division. In an in-house memorandum recently written by Mr. Donsanto, he says:

I oppose the concept embodied in H.R. 5400 as a dangerous relaxation of what precious few safeguards presently exist against abuse of the franchise.

He continues:

The experience of the Criminal Division in enforcing the Federal election laws indicates that there is a tremendous potential for fraud in H.R. 5400.

The memorandum goes on to describe deficiencies within the bill which point to fraud. I urge my colleagues to read Craig Donsanto's memorandum and to study the statistics in the latest Gallup poll which indicate that 55 percent of the American people are opposed to "walk-in" voter registration. The issue will be before us in a matter of weeks: GALLUP POLL—MOST AMERICANS OPPOSE EASY REGISTRATION

The Gallup Poll asked people's opinion of the proposal "that registration not be required in elections for national office if a person can produce proper identification, such as a driver's license, on Election Day."

Results released on May 8:

| (In percentage) |          |         |            |
|-----------------|----------|---------|------------|
|                 | In Favor | Opposed | No Opinion |
| Nationwide      | 40       | 55      | 5          |
| Democrats       | 43       | 53      | 4          |
| Republicans     | 30       | 67      | 3          |
| Independents    | 44       | 49      | 7          |

## COMMENTS ON H.R. 5400 TESTIMONY BY ATTORNEY GENERAL

At your request, we have reviewed the testimony which the White House has apparently suggested that the Attorney General give before the House Administration Committee on April 6 during hearings on H.R. 5400. This bill is the Administration's proposal to do away with pre-election registration requirements which the vast majority of the 50 states presently impose as a prerequisite to the exercise of the federal franchise, and substitute in their place a system permitting otherwise locally-eligible electors to register at the polls on the day of an election.

### I. THE BILL

We emphasize at the outset that this Division has not had any input into this bill. We have not even seen a copy of the bill, and our comments thereon have never been sought.

The proposed legislation, from sources available to us, would appear to supercede state and local voter registration procedures with a uniform procedure applicable to all contests for Federal office. The Federal procedure under H.R. 5400 would permit an individual who is otherwise qualified to vote under the state law to register to vote at the polls on the day of an election. To prevent abuses of this relaxed registration procedure, H.R. 5400 would create a new Federal felony to punish those who wilfully or fraudulently cast ballots under its provisions, add a level of administrative sanctions to be enforced by the Federal Election Commission, and permit local poll officials to require electors seeking the franchise by virtue of these relaxed provisions either to produce some identification before being permitted to vote, or to execute affidavits attesting to the fact that they meet local voting requirements.

If these preconditions are met, H.R. 5400 would require local voting officials to extend the federal franchise notwithstanding an elector's failure to comply with state registration laws.

### II. THE PROPOSED TESTIMONY

The testimony which it is suggested the Attorney General give on this bill is highly commendatory of its purpose of facilitating the exercise of the franchise, critical of present state registration laws as "outmoded and unnecessary", and strongly in favor of H.R. 5400's enactment.

### III. DISCUSSION

Personally, based on our enforcement experience in the election law field, I do not share these observations and conclusions. I oppose the concept embodied in H.R. 5400 as a dangerous relaxation of what precious few safeguards presently exist against abuse of the franchise. Most certainly, I would not recommend that the Attorney General support this legislation in the proposed glowing terms without expressing some caveats based on enforcement experience.

#### A. Function of preregistration

Voter registration statutes presently on the books of the vast majority of the states usually require that a prospective voter present himself at the appropriate registration office at least 30 days prior to the election in which he wishes to vote, and there provide pertinent data concerning himself and his residence in the election district. He is also customarily required to provide information about where he may have been registered to vote previously to enable the prior registration to be purged before the new one becomes effective, and to provide a sample of his signature which can be used at the polls during the election as a control to assure that the registrant and the person who seeks to vote in his name are the same person.

These requirements serve at least two crit-

ical functions in preserving the integrity of our elective system:

First, the fact that a prospective voter is required to appear in person and to provide pertinent information about his qualification to vote at least 30 days before an election provides local election officials with ample time to check the veracity of his claim to the franchise to assure that previous registrations he may have had are voided before the election takes place. This in turn insures that a registrant is indeed qualified to vote in the place where he is seeking the franchise, and that he is permitted only to vote in that one place. Secondly, by providing for a "control" sample of the registrant's signature, registration laws enable many states to protect themselves against vote fraud by additionally requiring a voter to sign a roster at the polling station itself. The signature which the registrant executes on election day at the polls can easily be checked against the control on his permanent voter registration card, which in many places is the sole viable method of insuring that the person seeking to vote is indeed the same person whose registration the local election board has previously approved and accepted.

#### B. Effect of repeal of preregistration laws

Abolition of pre-election registration will, for all intents and purposes, prevent the states from protecting themselves against individuals who may seek to vote at several locations where they are known (a factor which becomes all the more critical with the continuing increase in the mobility of our population), as well as prevent them from assuring that a voter is indeed qualified to vote before he casts his ballot. At the same time, the elimination of the "control" signature which usually appears on a voter registration card will deprive precinct officials of an objective standard by which to judge the qualifications of persons presenting themselves to vote, while at the same time making proof of election fraud in a criminal case substantially more difficult.

In this latter regard, this Division has had substantial experience over the years in prosecuting election fraud cases under applicable Federal statutes presently on the books. This in turn has demonstrated to us graphically the importance of having a pre-registration and verified "control" signature against which to compare the signature of individuals presenting themselves to vote at the polls on election day. On the basis of such comparisons, 25 election officials have been indicted during the past few weeks in the Eastern District of Louisiana for forging the signatures of "no-shows" on the election day rosters which Louisiana law requires voters sign before they obtain a ballot. Similar comparisons between "controls" and the signatures appearing on election day rosters have long been used as the principal method of proving election fraud cases in Chicago, Illinois.

#### C. H.R. 5400's alternative safeguards

In the place of the protection which pre-election registration provides as a guard against election fraud, H.R. 5400 offers four purported safeguards. We feel that all are inadequate.

The requirement that persons seeking to vote without prior registration, produce some form of identification at the polls, or perhaps swear to the factual predicate for the franchise under local law, is essentially meaningless. Even with the pre-election registration which most states require today, election fraud is widespread in both State and Federal elections. With the stakes as high as the power of the elective offices in dispute, it would not be unreasonable that those bent on corrupting the system would

be able to find false identification, and would be willing to lie on whatever affidavits they are asked to sign. Moreover, once possessed with what we suggest is easily obtained false identification, a person could successfully wander from precinct to precinct and cast as many ballots as he dares on election day, with election officials being powerless to stop him provided he was willing to execute the required affidavit. Even assuming that subsequent inquiry was able to establish that such an individual used the related procedures accorded by H.R. 5400 to defraud his fellow citizens of an election fairly conducted on the "one man-one vote" principle, the fraudulent votes would have already been met and the damage done, to the detriment of the precious balance on which our democratic elective system is based.

The addition of a new Federal felony which specifically provides for fairly serious penalties for those persons who would seek to abuse the lenient provisions of H.R. 5400 are of little foreseeable help. Federal law presently contains numerous statutes, most of which are felonies, directed at protecting the system against voter fraud. Under 18 U.S.C. 241, it is a ten year felony to conspire to stuff ballot boxes or to commit other varieties of election frauds directed at depriving the public of a fair and impartial election, *U.S. v. Classic*, 313 U.S. 299 (1941). This Section has recently been extended to include election frauds directed at corrupting only State or local elections, where the defendants involved are themselves election officials of some sort, *U.S. v. Anderson*, 481 F. 2d 685 (4th Cir., 1974). Under 18 U.S.C. 242 it is a misdemeanor to deprive the electorate of a fairly-conducted election under color of official right; under 42 U.S.C. 1973(i) (c), it is a 5 year felony to provide certain types of false information concerning one's residence to a voter registrar for the purpose of qualifying to vote in an election where Federal candidates will be on the ballot; and under 42 U.S.C. 1973(i) (e), which was enacted last year, it is a 5 year felony to vote more than once in an election where there are Federal candidates on the ballot. This impressive stable of statutes has been the source of numerous prosecutions lately, especially in states like Illinois and Louisiana where State laws require voters not only to pre-register but also to sign rosters at the polls. At the present time, the Criminal Division has active investigations involving this sort of offense before grand juries in Tennessee, Illinois, Louisiana, and Virginia. Complaints involving isolated instances of fraudulent registrations and multiple votes have been so numerous since 42 U.S.C. 1973(i) (c) and 1973(i) (e) were enacted that the Division has had to routinely defer such matters to the States, all of which to our knowledge have their own extensive and intricate network of criminal statutes which seek to protect against election irregularities. Clearly, if all of these statutes, many of which carry substantial penalties, have been unsuccessful in deterring those bent on corrupting the elective system through vote fraud, one more such statute will not help much. Quite the contrary, our not insubstantial experience in this area has demonstrated that the type of person who is most apt to commit election fraud feels that he is "above" the system, that he will not be caught or punished, and is thus not deterred in the slightest by the presence on the books of facially awesome criminal statutes.

#### IV. THE FEDERAL ELECTION COMMISSION DOES NOT BELONG IN THE ENFORCEMENT MACHINERY OF LEGISLATION UNDER H.R. 5400

I feel that anyone who seeks to corrupt our democratic system in this manner should be subject to nothing short of criminal prosecution. Also, I have reservations as to whether the subject of ballot security and election fraud falls logically within the

FEC's present mandate over the financial disclosure provisions of the Federal Election Campaign Act. Moreover, the FEC's small and underfinanced staff is singularly ill-equipped to take on the awesome responsibilities for the preservation of ballot security which H.R. 5400 contemplates for it. And finally, the parallel civil and criminal proceedings which are bound to arise from the efforts of FEC and this Division to simultaneously fulfill our respective enforcement mandates under the Act are bound to create conflicts which will prove detrimental to overall law enforcement in this critical area.

#### V. CONCLUSION

While we naturally support the fundamental objective of making it easier for citizens to exercise their federal franchise, we would have preferred that a method be devised which would minimize the opportunity for electoral fraud while at the same time minimizing the opportunity for citizen participation in the electoral process. If we had more opportunity for consideration of the general concept and, particularly H.R. 5400, presumably we could make some more constructive comments. Having received this package yesterday afternoon without even a copy of the bill, we have done our best to indicate some of our concerns. I assume that the Administration as a matter of policy is going to support the concept embodied in H.R. 5400. However, if the Attorney General testifies on this bill, he should, in my judgment, qualify his support thereof with the caveat that despite the favorable experience in several states, the experience of the Criminal Division in enforcing the federal election laws indicates that there is a tremendous potential for fraud in H.R. 5400.

#### TRIBUTE TO BERNICE JUST, FRIEND AND JOURNALIST

#### HON. ROBERT McCLORY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, June 3, 1977

Mr. McCLORY. Mr. Speaker, the retirement of Bernice Just as columnist for the News-Sun, a daily newspaper published in Waukegan, Ill., in my congressional district, marks a milestone in a career in journalism which deserves appropriate public notice.

Mr. Speaker, recently I wrote a letter to Bernice on the occasion of her forthcoming retirement and expressed my personal concept of her briefly and sincerely.

In my message of affection and respect I stated at that time, as follows:

MAY 16, 1977.

Mrs. WILLIAM L. JUST,  
2325 Corona,  
Waukegan, Ill.

DEAR BERNICE: Your retirement from active journalism with the News-Sun brings to my mind many cherished memories of experiences with you and your family during the entire time I have been in Lake County.

Obviously, without the need to be an active member of the Fourth Estate, you have brought special honor to yourself and to the News-Sun and to our community through your literary and journalistic talents. Your personality has always come through your written and spoken words revealing such qualities as compassion, understanding, love and faith—as pillars undergirding your strong views in behalf of humanity and justice.

I am confident that your energies will be

directed along useful and constructive channels as you enter a new phase of your active and productive life.

The love and good wishes which both Doris and I are undertaking to express in this way are with you wherever you go and in all that you do.

Sincerely yours,

ROBERT McCLORY,  
Member of Congress.

Mr. Speaker, a retirement tea is being held in Bernice Just's honor on Sunday, June 12 in the First Christian Church of Gurnee. It is with regret that I find myself unable to attend personally. However, I know that my good wishes and those of my colleagues may be expressed through these remarks in the CONGRESSIONAL RECORD. Accordingly, I reiterate the words I expressed in my recent letter together with this public expression of respect, affection, and good wishes.

#### KOREAN UNCERTAINTY

#### HON. GOODLOE E. BYRON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Friday, June 3, 1977

Mr. BYRON. Mr. Speaker, the Frederick News-Post recently published an editorial which sheds some light on the present situation in South Korea.

I think this editorial should remind us that history is capable of repeating itself if we are short of memory and determination. I feel this article will be of interest to other Members of Congress who also have vivid memories of the Korean War. It reminds us that the 1950 invasion of South Korea by North Korea never really ended and it has only been through a strong American commitment that a minimal peace has been maintained there for the last 24 years.

As the writer of this editorial so perceptively points out, recent history has not shown us that the North Koreans have had a change of heart. I therefore include the editorial in the RECORD at this time:

#### KOREAN UNCERTAINTY

It is difficult to see what is to be gained by President Carter's plan to withdraw American troops from South Korea over the next four or five years, except for some possible savings in the defense budget that would quickly be swallowed up elsewhere.

Only the U.S. military presence in Korea, currently at some 38,000 combat-ready men, has kept the peace there for the past 24 years, a peace punctuated by recurring "incidents" along the 38th parallel truce line.

For once we are in agreement with the generals, one of whom was so opposed to the plan that he publicly differed with his Commander-in-Chief. American withdrawal could lead to another war with North Korea, warned Maj. Gen. John K. Singlaub, chief of staff of U.S. forces in Korea. For his pains, he was recalled home and "reassigned."

Singlaub is no Douglas MacArthur, of course, and South Korea is far stronger militarily than it was in 1950. But it was the mistaken belief of the North Koreans in 1950 that the United States no longer considered South Korea to be within its sphere of concern—a belief encouraged by our own State Department—which helped bring

about the invasion and the war that has never really ended.

In the absence of any evidence that the North Koreans have abandoned the dream of completing their frustrated conquest of the South—every indication, in fact, points to the contrary—we could well be inviting history to repeat itself.

# RESTORATION OF CONGRESSIONAL MEDAL OF HONOR TO DR. MARY EDWARDS WALKER

**HON. LINDY BOGGS**

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Friday, June 3, 1977

Mrs. BOGGS. Mr. Speaker, I rise today to call the attention of my colleagues in the House to a sad anniversary being observed today. Exactly 60 years ago Dr. Mary Edwards Walker was stripped of the Congressional Medal of Honor.

The first and only woman to receive this prestigious award, Dr. Walker was originally cited for her bravery during the Civil War when she served as a Union Army surgeon on the battlefield and in military post hospitals. Captured by the Confederates, she continued her merciful ministrations to the sick and wounded. On January 24, 1866, the Congressional Medal of Honor was presented to "Dr. Mary" as she was affectionately called by the men whom she treated.

On June 3, 1917, when Dr. Walker was in her 84th year, the honor was revoked. Her name was removed from the roll of recipients. In Washington, a medal review board took the adverse action on the limp claim that nothing was found "in the records to show the specific act or acts for which the decoration was originally awarded." The board left unexplained why, if the medal was unearned, it took a half century to find that out and strike her name off the list.

During the decades following the Civil War, Dr. Mary Walker was a well-known figure who championed many causes before their time had come: She wore pants for comfort and economy; she spoke out against the use of liquor and tobacco; she advocated uniform divorce laws. All during her adulthood Dr. Walker was a voice for women's suffrage, her efforts in this movement spanning about 70 years. She died the year before the 19th amendment gave women the vote in 1920.

Though her Congressional Medal of Honor was nullified in 1917, Dr. Walker spunkily refused to give up the medal. Pinning it on her coat with pride, she stormed off to the Capitol to win such support as she could muster for keeping her name on the Medal of Honor roll. Tragically, she slipped and fell on the Capitol steps, receiving injuries that lingered and resulted in her death 2 years later.

Nothing was done about restoring the honor to her, and the case of Dr. Mary Edwards Walker drifted into limbo.

Because of the continuing interest of her family and historians in Dr. Mary Walker's case, our distinguished colleague, Les Aspin, has introduced House

Joint Resolution 136, which would restore this honor to Dr. Mary Walker posthumously. This resolution has been referred to the House Committee on Armed Services, and I urge all of you to support this valiant effort to bring Dr. Walker's memory the recognition it deserves.

# WGMS EDITORIAL ON HUMAN RIGHTS

**HON. ROBERT H. MICHEL**

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, June 3, 1977

Mr. MICHEL. Mr. Speaker, I want to bring to your attention an editorial recently broadcast by Jerry R. Lyman, general manager of radio station WGMS. Mr. Lyman's informative and enlightening editorials, strongly supporting economic and political freedom, are well known throughout the Washington area and his latest deserves the attention of every American. Mr. Lyman addresses current attitudes toward Cuba and Vietnam and presents a compelling case for taking a close, hard look at the political conditions in those countries before our Nation begins "normalizing relations" with them.

It is good to know that someone in the media has the insight and the courage to remind us that communism destroys human freedom. That is a simple truth, Mr. Speaker, but one that often seems to be forgotten. I am glad that Mr. Lyman has brought the facts about Cuba and Vietnam to our attention. At this point I want to insert in the RECORD WGMS editorial No. 22, broadcast May 25, 1977:

Two recent overtures by the Carter administration should be of great concern to all Americans who have supported the President's stance on human rights and serve, in a way, to contradict that stance.

Specifically, we are referring to the desire of the President and certain Members of Congress to (1) open talks with Cuba on normalizing relations and (2) consider aid to Vietnam. Both of the decisions are a disappointment to all who have applauded the President's hard-line stance in negotiations with the Soviets.

In the case of Cuba, not only has there been a record of persecution and violation of human rights by the Castro regime: but in addition, Cuban agents are stirring up trouble in Latin America while Cuban troops, by their very presence, are violating the rights of Africans to self-determine their fates in Angola, Zaire, and now Ethiopia. We cannot allow Castro, as a Soviet puppet, to continue this unlawful intrusion into other areas of the world. By sending businessmen, politicians, and sports teams to Cuba, we are in effect overlooking these atrocities.

In Vietnam tyranny, torture, and genocide exist to an extent equal to the days of Hitler and Nazi Germany. Mrs. Le Thi Ahn, a former Vietnamese patriot, ignored by much of the American media, writes of concentration camps with 300,000 political prisoners located in malaria-infested jungles, and of over 20,000 suicides since the Communist takeover—suicides to avoid torture and imprisonment. Another report tells of the massacre of 150 former south Vietnamese officers en route to a "re-education camp". The officers, blindfolded, were in U.S. trucks

on their way to the camp when the tank and armored car driving alongside suddenly opened fire on the truck. The wounded were dispatched in place.

Last week, the House voted 288 to 119 to approve a proposal by Representative John Ashbrook of Ohio to bar any trade or financial aid to Cuba or Vietnam. We support the proposal and congratulate those who voted for it.

If we are to support human rights, then let's support those rights everywhere. Let's not negotiate, deal, and talk about renewing relations with any country that subjects its people to torture or cruel oppression. We have nothing to gain through relations with these two countries; and we should not allow one dollar to pass through their governments, for it will only be used to further deny people of their human rights, or possibly even their lives.

# TRIBUTE TO ST. JOHN THE BAPTIST CHURCH ON THE OCCASION OF ITS 150TH ANNIVERSARY

**HON. WILLIAM F. WALSH**

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, June 3, 1977

Mr. WALSH. Mr. Speaker, at the end of this coming week, parishioners, clergy, and community neighbors of St. John the Baptist Church in Syracuse, N.Y., will gather for a 3-day festival to commemorate the sesquicentennial of the founding of the church.

One hundred and fifty years ago, Syracuse was known as Salina, a small village clustered around salt-producing springs and brine wells—a unique resource that provided the cornerstone for industry and the development of a city.

Paralleling the growth of our community is the rich tradition of St. John the Baptist, mother church of catholicism in Onondaga County, which first opened its doors in 1827.

As Syracuse has grown, so has the parish of St. John the Baptist. From humble beginnings in the first church structure, with only monthly visits by a missionary priest, St. John's expanded into the present edifice—a Syracuse landmark—in 1871. Elementary and secondary religious education has continued since 1861 under the tutelage of the Sisters of St. Joseph of Carondelet.

Through the years, 17 pastors have guided the spiritual life of the parish, and each made his own significant contribution to the church and to the community. One of them, Most Rev. David F. Cunningham, went on to become a bishop of the Diocese of Syracuse.

I would like to share with you my tribute to the people of St. John the Baptist, and their present pastor, Rev. Msgr. Charles H. Eckermann—an educator, spiritual leader, and friend to all who know him.

My tribute on their 150th anniversary could not be better expressed than in the words of former pastor, Rev. Msgr. Charles F. McEvoy, who said,

The modern church of St. John the Baptist from 1827 has had a long and honorable existence. In years, it is old; in spirit, it is young; for it is vivified by the doctrines of Christ which are old yet ever new.

# THE VIOLATION OF HUMAN RIGHTS IN SLOVAKIA

**HON. LUCIEN N. NEDZI**

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, June 3, 1977

Mr. NEDZI. Mr. Speaker, the people of Eastern Europe, frustrated by governments they did not choose, have understandable reasons to despair.

Again and again, however, they have surprised the world with examples of personal commitment and courage. Such was the case recently with charter 77, a Czechoslovakian human rights manifesto.

Americans of Eastern European origin are invaluable allies in the struggle for human dignity. In this regard, the Slovak community of southeastern Michigan is tireless in support of its brethren.

They assembled once more a few weeks ago to celebrate Slovak Independence Day. Two resolutions were adopted, addressed to the President of the United States and the Secretary-General of the United Nations.

The resolutions deserve our attention, and, under leave to extend my remarks, they are set forth below:

## RESOLUTION TO THE PRESIDENT OF THE UNITED STATES OF AMERICA

President JIMMY CARTER,  
The White House,  
Washington, D.C.

DEAR MR. PRESIDENT: On the occasion of Slovak Independence Day Commemoration, we Slovak Americans in the Detroit Metropolitan area send you greetings, and thank you for your public commitment to defend human rights, no matter where they are being violated. For this, Mr. President, you have our admiration and unqualified support.

Mr. President, we also take this opportunity to inform you that in Slovakia, the land of our forefathers, human rights are continuously violated, especially the freedoms of religion, education, speech and political beliefs. These are the same violations enumerated in Charter 77 of which, we are sure, you are well informed.

Last, but not least, Mr. President, we ask you to direct our Secretary of State, Mr. Cyrus Vance, to intervene on behalf of Rev. Stefan Javorsky, a Catholic priest, recently jailed for administering his priestly duties, and Mr. Pavol Carnogursky, a Catholic intellectual who is awaiting political trial because he expressed his religious views in a letter to his bishop.

We hope, Mr. President, this resolution will merit your consideration.

Detroit, April 24, 1977.

## RESOLUTION TO THE SECRETARY GENERAL OF THE UNITED NATIONS

The Honorable KURT WALDHEIM,  
Secretary General of the United Nations,  
New York, N.Y.

MR. SECRETARY GENERAL: On August 26, 1972, the Slovak Community of Metropolitan Detroit passed a resolution in which we asked you the following:

To ask the government of the Soviet Union to remove its military forces from Slovakia.

To place the present situation of Slovakia on the agenda of the Security Council of the United Nations, so as to guarantee a free and democratic election by which the Slovak nation would be able to govern its own

affairs and its own destiny as a free and democratic republic.

It is a great tragedy, Mr. Secretary, that the Soviet forces still occupy Slovakia. Again, we urge you to place the cause of Slovakia on the agenda of the Security Council of the United Nations, and the gross violation of human rights in Slovakia on the agenda of the Human Rights Commission of the United Nations.

Detroit, Michigan, April 24, 1977.

## TRUTH IN LENDING REFORM AND SIMPLIFICATION ACT

**HON. BENJAMIN S. ROSENTHAL**

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, June 3, 1977

Mr. ROSENTHAL. Mr. Speaker, on June 10, 1977, I will introduce the Truth in Lending Reform and Simplification Act. This legislation would amend the Truth in Lending Act to enhance consumer protection and make the act less costly for lenders to comply with and for Government agencies to enforce.

The Truth in Lending Act is unquestionably one of the most important of all consumer protection statutes. However, it has been criticized by consumers, creditors and regulators almost from its inception.

Consumers complain that truth-in-lending disclosure statements—though a welcome improvement over the days before the Truth in Lending Act—are becoming increasingly complicated and difficult to understand.

From creditors, complaints are heard about the difficulty of keeping up-to-date with regulations and interpretations, the high cost of obtaining adequate counsel to design complying disclosure statements, and the fear of substantial civil penalties that could arise from a relatively minor violation of almost every truth-in-lending regulation.

There is no doubt the regulatory complexity of the Truth in Lending Act is a burden on borrowers and lenders alike. Since 1969, truth-in-lending regulations including statutory appendices have grown to over 100 pages in length. In addition the Federal Reserve has issued over 1,100 interpretative statements and numerous official staff opinions. Despite new regulations and clarifying interpretations, there have been over 6,000 civil suits challenging various aspects of the Truth in Lending Act and Federal Reserve regulations.

To stem the growth of regulations and litigations, the Federal Reserve has made a number of simplifying recommendations. Many of their recommendations deserve implementation and are incorporated in the legislation I will introduce next week.

The Truth in Lending Reform and Simplification Act is the result of over 10 months of study by the House Government Operations Subcommittee on Commerce, Consumer and Monetary Affairs, which I chair. If enacted, this legislation would:

Lower compliance and litigation costs

by reducing the number of disclosure items to which civil liability is associated;

Provide enforcement agencies with a flexible enforcement capability in the form of civil penalty and cease-and-desist order authority; and

Enhance consumer protection by requiring lenders to rebate any overcharges resulting from inaccurate truth-in-lending disclosures made to borrowers.

Truth-in-lending reform is an issue that needs prompt congressional attention. I urge other Members of Congress to join me in sponsoring the Truth in Lending Reform and Simplification Act.

Mr. Speaker, I am including below a section-by-section analysis of the Truth in Lending Reform and Simplification Act.

## TRUTH IN LENDING REFORM AND SIMPLIFICATION ACT—SECTION-BY-SECTION ANALYSIS

Section 1. The Act is cited as the Truth in Lending Reform and Simplification Act.

Section 2. Agricultural credit.—Would amend section 103(h), 104(1) and 104(5) to exempt credit transactions which are primarily for agricultural purposes. Agricultural credit is primarily commercial in nature. Including it under the Truth in Lending Act has resulted in numerous problems that have not contributed to consumer protection and may have made arranging farm credit more difficult.

Section 3. Credit Insurance.—Would amend section 106(b) of the Act to provide borrowers thirty days to cancel credit insurance coverage and receive a full refund of all premium charges.

Several studies indicate that some creditors may be misleading consumers to believe that credit insurance is necessary to obtain loans despite disclosures to the contrary. Amending 106(b) to allow for cancellation and refund has been recommended by the Federal Reserve Board to provide further disincentive against creditor misrepresentations concerning credit insurance.

Section 4. Finance charge itemization.—Would amend sections 128(a)(6) and 129(a)(4) to make clear that finance charges which consist of only one element need not be itemized.

In addition, the proposed amendments would repeal section 106(d) which permits certain types of charges such as taxes to be excluded from the finance charge if separately itemized. Disclosure in the truth-in-lending statement of charges not included in the finance charge and not related to the extension of credit, is a requirement that is not necessary for the protection of consumers and does not facilitate effective credit shopping. The costs of regulation writing and creditor compliance can be reduced by elimination of this provision without ill effect on consumers. The proposed repeal of section 106(d) would result in more understandable disclosure statements, and where competitive conditions exist, the compliance cost reduction may result in lower consumer borrowing rates.

Section 5. Civil penalty and cease-and-desist order authority.—Would amend section 108 of the Truth in Lending Act to authorize truth-in-lending enforcement agencies to levy civil penalties of not more than \$1,000 per day for each day a truth-in-lending violation continues and to issue cease-and-desist and corrective orders.

The Truth in Lending Act authorizes Federal enforcing agencies to use any statutory authority available to them to bring about compliance with the Act. In the case of Federal banking agencies, however, the powers contained in enabling legislation and the Federal Institutions Supervisory Act appear

to be inadequate. The proposed civil penalty and cease-and-desist order authority would provide all enforcement agencies with a flexible capability to bring about enforcement with the Act.

**Section 6. Borrower notification.**—Would amend section 108 to require, when an enforcement agency discovers an apparent violation of the Act, that the agency notify the creditor and order them to notify affected borrowers that the agency has found an apparent violation and of the consumer's rights under this title. In addition, if the creditor fails to notify the borrower within thirty days after receiving the agency's notice and order, the proposed amendment would require the agency itself to notify the consumer of the apparent violation and of his rights under the Act.

The evidence from areas where borrower notification of individual violations is routine, indicates that creditors are stimulated to scrutinize carefully their own lending practices by the prospect of disclosure. Additionally there is evidence that disclosure to adversely affected consumers and the attendant improvement in internal review procedures by creditors may actually reduce the overall costs of enforcing the Act.

**Section 7. Annual reports.**—Would amend section 114 of the Truth in Lending Act, section 18(f) (5) of the Federal Trade Commission Act, and section 707 of the Equal Credit Opportunity Act, to allow the Federal Reserve Board to submit the annual reports for these statutes as part of the Board's general annual report so long as the reports are submitted on or before June 1.

**Section 8. Model forms and clauses.**—Would amend Chapter 1 of the Truth in Lending Act to require the Federal Reserve Board to issue model forms and clauses for common consumer credit transactions. In addition, the amendment would alter 130(f) of the Act to provide that proper use of these model forms would constitute a defense in civil actions involving the disclosure statement.

Issuance of model forms and clauses will greatly aid creditors by eliminating a major source of compliance uncertainty, reducing compliance costs, and by reducing a type of civil litigation that does not contribute to consumer protection.

**Section 9. State exemption.**—Would amend section 123 of the Act to require Federal enforcement agencies with jurisdiction over federally chartered depository institutions to establish procedures to enable State enforcement agencies to demonstrate their ability to enforce the Act with respect to federally chartered creditors and to allow State examiners to enter a national bank for purposes of enforcing the Act.

The Truth in Lending Act provides that a State may apply to the Federal Reserve Board for an exemption of State-regulated transactions, provided the transactions are subject to requirements substantially similar to those imposed by the Act and for which there is adequate provision for enforcement. The Federal Reserve Board has refused to exempt the transactions of federally chartered institutions until "appropriate arrangements have been made" between a State and the relevant Federal agency to assure enforcement capability. States desiring exemption, however, have been unable to demonstrate their enforcement capabilities with respect to federally chartered institutions because the Federal agencies have refused to allow State examiners to enter such institutions.

The proposed amendments to section 123 would require the Office of the Comptroller of the Currency, the Federal Home Loan Bank Board, and the National Credit Union Administration, to establish procedures for enabling a State to demonstrate its truth-in-lending enforcement capabilities and, when these capabilities are adequate, enter into an agreement with the State allowing

access to those federally chartered institutions.

**Section 10. Rescission rights.**—Would amend section 125(a) to substitute "dwelling" for "residence" thereby making clear that rescission rights apply only to transactions in which the creditor is taking a security interest in real property containing the borrower's home, and not to security interests covering vacant lots.

**Section 11. Open end credit plans.**—Would repeal sections 127(a)(5) and 127(b)(7) which call for disclosure of an "average effective annual percentage rate of return" in certain open end credit plans. These sections have rarely, if ever, been used by creditors and account for an entire section Regulation Z. Such a repeal would simplify the Act without diminishing in any way the consumer protection it affords.

**Section 12. Creditor identification.**—Would amend sections 127(a), 128(a), and 129(a), to require the creditor to disclose its complete name and address. The Act does not at present require the creditor to identify itself. This is an essential item of information from the standpoint of consumer communication with creditors and truth-in-lending enforcement.

**Section 13. Default charges.**—Would amend sections 128(a)(9) and 129(a)(7) to make clear that these provisions do not require disclosure of non-monetary penalties such as a creditor's right of acceleration upon default.

There has been substantial litigation involving disclosure of non-monetary default penalties. This litigation has not contributed to consumer protection nor does the disclosure of non-monetary default penalties appear to facilitate effective credit shopping. The proposed amendment in no way affects the responsibility of creditors to disclose monetary default charges but would reduce litigation and compliance costs which may contribute to high consumer loan rates.

**Section 14. Security interests.**—Would amend sections 128(a)(10) and 129(a)(8) to eliminate the need for creditors to disclose the type of security interest taken by a creditor. The proposed amendments would not eliminate the creditor's responsibility to identify the property in which the security interest is being taken.

The disclosure of the type of security interest being taken is ordinarily expressed in complex legal terms that provide little useful information or benefit to the consumer. The requirement, however, has been the source of considerable litigation that may contribute to higher compliance costs from which consumers derive no benefit.

Security interest litigation has dealt with the type of security interest and not the identity of the securing property. Consequently, the requirement to identify the security property would be retained.

**Section 15. Limited civil liability.**—Would amend 130(a) to limit civil liability in consumer credit transactions to the failure to disclose or disclose accurately: the amount financed; the finance charge; the annual percentage rate; the cost of and the borrower's ability to refuse to purchase optional credit life, accident, or health insurance; the number, amount and due dates of periods of payments scheduled to repay the indebtedness; monetary default, delinquency, or similar charges; the existence of a security interest and the identity of the securing property; and the consumer's rescission rights. In addition the proposed amendment would alter 130(b) to provide that in the event of a disclosure violation involving the amount financed or the repayment schedule, if the creditor notifies the borrower of the error within thirty days of discovering the error or of being notified of it by an enforcement agency but before any action is taken by the borrower, the creditor would have no liability

beyond providing the borrower with accurate disclosure statements. As for finance charge and annual percentage rate violations, the creditor can again avoid civil liability if notice and adjustments in appropriate accounts are made within thirty days. Similarly, credit insurance and rescission notice violations can be rectified without incurring civil liability if notice and an offer to cancel and refund the insurance premiums paid or to rescind the transactions, are provided within thirty days of learning of the violation and before the borrower initiates an action against the creditor.

At present large sums of money are paid to attorneys to interpret Regulation Z and draft complex disclosure statements in an effort to avoid incurring civil penalties. Additionally, Federal enforcement agencies have been reluctant to disclose violations to affected consumers for fear of precipitating extensive litigation over violations which in no way impaired the consumer's ability to shop for credit. Limiting civil liability to those disclosure items that are essential for effective credit shopping will reduce compliance costs arising from excessive creditor efforts to avoid civil liability, eliminate agency reluctance to disclose individual violations, and simplify disclosure statements making them more useful in credit shopping.

**Section 16. Limitation on civil actions.**—Would amend section 130(e) of the Truth in Lending Act to extend the statute of limitations for civil violations of the Act from one year to three years.

**Section 17. Set-off rights.**—Would amend section 130(h) of the Act to make clear that this section, which prohibits a borrower from offsetting truth-in-lending damages against a debt owed unless a court has found a truth-in-lending violation, does not prohibit a borrower from raising a creditor's violation by way of recoupment or similar doctrine where permitted by State law.

**Section 18. Effective date.**—The Act would take effect on the date of its enactment.

#### EDITORIAL COMMENT OPPOSING AGENCY FOR CONSUMER PROTECTION

HON. GEORGE H. MAHON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, June 3, 1977

Mr. MAHON. Mr. Speaker, we are all interested in protecting the consumer. One way to protect him is to protect him from undue harassment and regulation by Federal agencies. We now have on the statute books a wide assortment of legislation designed to protect the consumer and the citizen generally.

In light of the circumstances, I wish to express my opposition to the creation of what has been called the Agency for Consumer Protection, also the Agency for Consumer Advocacy.

I have been pleased to note editorial comments from newspapers in my congressional district in opposition to the Agency for Consumer Protection. I wish to quote briefly from a couple of hard hitting editorials.

The *Avalanche-Journal of Lubbock, Tex.*, May 3, 1977, condemns the proposed Agency and suggests the following:

If the existing agencies aren't doing their jobs in the public interest, shake them up (or, better still in some cases, eliminate

them) until the job's done right but, for heaven's sake, don't throw another monkey wrench into the nation's economic and marketplace affairs.

The Plainview, Tex., Daily Herald, of April 20, 1977, in discussing the Agency, declares:

One thing is probably sure. The \$15 million annual budget that has been envisioned will only be chicken feed after a year or two. The history of existing agencies teaches that if it teaches nothing else. And who will pay? Everyone, of course, but particularly that average taxpayer otherwise known as a "consumer".

We have had more than enough of indefensible and impractical actions by Federal agencies. It is urgent that the trend toward loss of confidence in the Federal Government be halted.

#### BEHIND THE ENERGY FRAUD

#### HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Friday, June 3, 1977

Mr. McDONALD. Mr. Speaker, since we are today in the process of creating yet another Government agency to deal with the Government-created energy shortage, it cannot be too strongly emphasized that this is the exact opposite of what is needed to solve the problem.

Energy resources are not scarce—access to them has merely been blocked by the Government. The solution is to remove the Government controls and allow the market to alleviate the shortages by increasing production.

An excellent summary of this point is made by John F. McManus in a news column entitled "Behind the Energy Fraud." This column—the Birch Log—is a weekly news feature of the John Birch Society subscribed to by over 140 newspapers. This particular article appeared in the Boston Globe of May 5, 1977.

The article follows:

#### BEHIND THE ENERGY FRAUD

There are only two basic ways to confront a shortage. The first way is to produce more goods, and the second is to accept a reduction in consumption.

Under normal conditions, any shortage will quickly result in a voluntary redirection of effort in order to fill the need. The promise of economic reward is the only stimulus required. That promise is so compelling, in fact, that it will even lead to the creation of substitute products, some of which turn out to be more practical and even more economical than those they replace.

Shortages in a free society are always looked upon as opportunities. As a result, they are always short-lived and relatively inconsequential. But when free men are deprived of the ability to deal with shortages either by producing or by improvising, then shortages worsen and become the rule, not the exception.

#### IS ENERGY REALLY SCARCE?

The United States is supposed to be in the grip of an energy shortage. Yet various experts in the field insist that our nation is sitting on a huge sea of petroleum and natural gas. Thomas P. Medders, Jr., president of the Independent Petroleum Association

of America, told a Senate Committee in 1972 that our recoverable resources "are in the order of 100 years' supply at present rates of U.S. consumption of both oil and gas." A 1972 Senate Interior Committee Report reviewed numerous projections of recoverable oil and concluded that Mr. Medders had significantly underestimated our potential reserves.

Besides oil and natural gas, the U.S. is richly blessed with coal deposits. The most conservative estimate indicates that we have a 400-year supply at present rates of consumption. "We've got coal coming out our ears," says Bureau of Mines chief Dr. Thomas Falkie. And we lead the world in the use of nuclear power and in nuclear technology.

The truth is that the widely publicized shortage is contrived, artificial, and as phony as a nine-dollar bill.

#### GOVERNMENT CREATED THE SHORTAGE

What's going on is deadly serious. Government, mostly in the name of over-protecting birds, fish, air, and water, has so impeded the workings of the free enterprise system that a shortage of vital fuels has resulted. Laws, edicts, executive orders, and judicial decrees have restricted domestic drilling, blocked off-shore drilling, delayed the Alaska pipeline, mandated wasteful anti-pollution devices on autos, and put a price ceiling on natural gas that has inhibited production. When coal and nuclear substitutes were offered by the free enterprise system, government outlawed much of the use of coal and is now harassing nuclear power producers to an early death.

In any discussion of "the energy crisis" by national leaders, we the people get blamed, not the government. It is we who must cut consumption, and because we won't do so voluntarily, we must be forced to do so with taxes, restrictions, and controls. The government, which created the problem, now insists that a huge increase in its power is the solution.

The free enterprise way to handle a shortage is to produce more goods. The controlled society way, the Communist or Socialist way, is to increase taxes, controls, and restrictions, all of which lead to less production—and to total government.

The next time someone tries to tell you that America's leaders have brought about the energy crisis deliberately in order to make the U.S. a Communist or Socialist state, please listen carefully. Your help is needed to put an end to this sinister scheme.

#### PERSONAL EXPLANATION

#### HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Friday, June 3, 1977

Mr. MAZZOLI. Mr. Speaker, because of previous commitments in my district, I was absent on June 1, 1977, and missed three rollcall votes. Had I been present:

I would have voted "yes" on roll No. 294 to amend the bill H.R. 6970, the Marine Mammal Protection Act Amendment to assess a fee of \$32 for each porpoise killed in purse-seine fishing for tuna.

I would have voted "yes" on roll No. 295, final passage of H.R. 6970, the Marine Mammal Protection Act Amendments; and

I would have voted "yes" on roll No. 296, final passage of H.R. 6967, Peace Corps Authorization for fiscal year 1978.

#### MISS DOROTHY RINGLEIN

#### HON. DALE E. KILDEE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, June 3, 1977

Mr. KILDEE. Mr. Speaker, I should like to call to the attention of the Members of the House, the retirement of a truly master educator, Miss Dorothy Ringlein, of my congressional district. I have known Miss Ringlein all of my life. The Flint area community has truly been enriched by her services at Bentley High School. Miss Ringlein certainly has made our community a better place in which to live.

Mr. Speaker, I respectfully request that the Flint Journal article, "Bentley High Just Won't Be The Same," be printed at this point in the Record:

MISS RINGLEIN IS RETIRING—BENTLEY HIGH SCHOOL WON'T BE THE SAME

(By Alice Lethbridge)

Bentley High School without Miss Ringlein?

After 34 years as a teacher and as Bentley's only full-time librarian, Miss Dorothy Ringlein is retiring. Except for her first year at Dye High School, she has spent her entire career at Bentley.

Those who worked with her, those who were her students, parents of her students and members of the Bentley community, say they will find it difficult to fill the place she has carved through a lifetime of dedication.

Dedication for Miss Ringlein has always meant enthusiasm—giving more than 100 per cent at whatever the challenge, according to those who know her.

In her early years, it was not uncommon for her to entertain an entire class at her home as a treat for work on a school project. Sometimes, they put on a comic style show at a school carnival, using clothes from trunks in the Ringlein attic.

There was one time when a young man in her class made a smashing appearance, clothed in a long, velvet formal coat with a satin-lined hood.

There was always the promise of fun along with work, when Miss Ringlein was the instigator.

Many were the PTA programs she organized during her years as a teacher. Parents of Bentley students in those years recognized the kind of teacher she was and stood behind her. One was the late Mrs. Myrtle Wightman, who had children and grandchildren in the Bentley system.

"Dorothy Ringlein is one in a million," she said. "We're fortunate to have someone like her and everybody at Bentley knows it."

There are many cases of families with more than one generation who were taught by Miss Ringlein. Mrs. Wightman's son Donald, a graduate in 1953, has had two children finish there, and one will graduate next year.

Donald's wife, Carol, is a Bentley grad of 1956. Her sister, Billie, and brother-in-law, Fred Gussie, are from 1960 and 1966 respectively. Their two daughters are in Bentley Elementary.

Mrs. Dolores Denz Allen and her sister, Rosemary Denz Simpson, were Bentley graduates of 1958 and 1959. Mrs. Allen has three children in the system.

"We all liked and respected Miss Ringlein very much. We're proud of her for holding onto standards of education and discipline," Mrs. Allen said.

Although she expressed the wish to retire without any fanfare or "flowery speeches," Miss Ringlein isn't going to get away with

that. Many persons in the Bentley area, having heard of her retirement, called the school and asked what was being planned in her honor.

She agreed to an informal reception after the baccalaureate exercises Sunday. The reception will be from 3 to 5 p.m. in the high school library. All residents of the community have been invited.

The word is getting around to her friends and former associates at the school. A Bentley graduate living in Pinconning has already sent word she's coming especially to see Miss Ringlein. She is Dianne Schott, Class of 1964.

Miss Ringlein is a graduate of old St. Mary High School, Class of 1938, and of Nazareth College, where she majored in French.

After teaching at Bentley for 25 years, she became the first full-time librarian and has served in that position for 19 years.

She's also organist for the choir of St. Mary Church and has been organist at various times at St. Joseph Hospital chapel and Our Lady of Guadalupe Catholic Church. She was the accompanist for the Knights of Columbus Choir for many years.

World travel has been one of her chief hobbies, and she's been in many parts of the world. Marycatherine McCarthy, librarian at Central High School, and an occasional tour companion, once remarked that Dorothy made friends wherever she went, whether golfers in Venice or tour guides in Ireland.

She corresponds with many friends abroad and has exchanged visits with them.

It's being said among those who have watched the way she served Bentley over the years, "They'll never replace Miss Ringlein, Not with just one person, anyway."

What they mean is that few educators remain who give of themselves and their time the way Miss Ringlein did, in evening hours, over weekends and during summer "vacations." She often had a niece or nephew along to help with work she couldn't bear to let wait.

She is the daughter of Mrs. Jennie Ringlein and the late William Ringlein. Her family consists of one sister, Mrs. Carolyn Studer, three brothers, Donald, Robert and Dennis, all of Flint, and nieces and nephews.

Her retirement is an early one. But after all those years of playing "Pomp and Circumstance" for her students, she'll be saying goodbye to Bentley High this year, too.

## THE PORNOGRAPHY PLAGUE

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, June 3, 1977

Mr. MICHEL. Mr. Speaker, recent reports in the media concerning exploitation of children by pornographers have shocked the Nation. The Chicago Tribune has been running front page stories for weeks about the child-pornography rings that infest our Nation.

Once more, then, we ask ourselves the question: In a free society, what are the choices of citizens when confronted by pornography? I recently came across an article that offers a starting point for the beginning of a national discussion of this issue. William A. Stanmeyer, the writer, reaches the conclusion that society is not helpless against pornography and that curtailment of anti-laws against pornography are not "the first small step" on a road to censorship of all publications.

For too long the argument has been made that the first amendment forbids citizens from doing anything about the publication, advertising, sale and display of pornographic material. This "absolutist" approach is, in my view, wrong. I believe democracy is strong enough and the American people wise enough to devise ways in which freedom of the press can be defended while, at the same time, pornography is either stopped or made less of a public nuisance than it is.

One need not endorse the specific approach of the point of view of the author of this article to appreciate the intelligence and aversion to pornography that informs every line.

At this point, I introduce into the RECORD "A Parent's Case Against Porn," published in the National Observer, May 16, 1977:

### A PARENT'S CASE AGAINST PORN

(By William A. Stanmeyer)

Pornography exploits. Pornography is exploitation. Pornography teaches exploitation. Yet we have otherwise serious lawyers and writers urging that society have no laws to protect its citizens from the harm that a vast majority of citizens correctly perceive will flow from the pornographic flood. Presumably this defense of moral pollution stems from misunderstanding what pornography is, or blindness to the harm it does, or mistake as to the impact control will have on freedom of speech, or confusion as to law's legitimate role in protecting public morality.

The public wants the law to restrain pornography. Most "intellectuals" do not. The purpose of this article is to remind the intellectuals why the public is right.

In a Feb. 26 article about children in pornographic films, The Observer quoted a description of such a movie.

"The film shows the first communion of five girls. A motorcycle gang comes in and crucifies the priest . . . in a very bloody way, [and then] they rape the five girls."

This summary scarcely captures the film's savagery or suggests its emotive impact. It does not give the blood and gore up close. It omits the fright and shame of the children, the leer of the attackers, the details of violence against a tortured man and defiled little girls. Indeed, a detailed account of the film would doubtless be obscene; readers would be outraged, saying, "He didn't have to say all that to make his point."

Exactly. Neither did the film producer.

In defining obscenity, the Supreme Court has said that the basic guidelines are "(a) whether the average person, applying contemporary community standards, would find that the work, taken as a whole, appeals to the prurient interest; (b) whether the work depicts or describes, in a patently offensive way, sexual conduct specifically defined by the applicable state law; and (c) whether the work, taken as a whole, lacks serious literary, artistic, political, or scientific value." This is a definition, a workable one; as precise as such phrases as "due process," "the public interest," or "reasonable man"—standards the law uses daily.

Some writers insist such a definition will bring repression of Shakespeare or the Bible. This view suggests there is no difference between art and trash—and it says a good deal about their critical faculties and disdain for the public's common sense, not to mention their unfamiliarity with Shakespeare and the Bible.

### A DEGRADING PICTURE

Pornography debases sex. It reduces the protagonist to a chemical urge and his 'oil

to a function or an organ. She becomes a chattel, a robot, a toy for a moment's fun.

As D. H. Lawrence wrote in *Sex, Literature, and Censorship*: "Pornography is the attempt to insult sex, to do dirt on it. . . . The insult to the human body, the insult to a vital human relationship! Ugly and cheap they make the human nudity, ugly and degraded they make the sexual act, trivial and cheap and nasty."

Contrary to what its purveyors say, pornography is not "telling the truth about sex." Just the opposite. It says: About sex there is nothing private, noble, or personal. It robs man of his dignity. Its message is: *Man is garbage.*

Obscenity presents a graphic, degrading picture of human life and invites the viewer to wallow in it. It plunges him into imaginative preoccupation with autoerotic fantasies wherein he entertains himself by violently and/or sexually feeding, vicariously, on the helplessness or willing vulnerability of a no-longer-human animal.

"Civil libertarians" would have us believe the only "real" harm the law can guard against is direct, immediate, and physical. This unconscious positivism blinds them to other real harms—psychological, attitudinal, moral—that cannot be calibrated but do deeply affect individual lives and, collectively, can debase the citizenry's spiritual environment.

To say that a book, magazine, or play never corrupted anyone is to say that reading or watching a play never improved anyone. Irving Kristol has pointed out what a curious position this is for college professors: Denying that education can improve anyone, they deny the reason for their own professional lives.

Pornography educates. It teaches: Human beings are mere animals. . . . the highest value is immediate pleasure. . . . other people may be used and then discarded.

When mingled with violence, pornography depicts the protagonist harming for the sake of harming. . . . and enjoying it. Why would anyone want to watch a violent sacrilege such as the crucifixion of a priest and the rape of children? For entertainment. Why want to watch someone else performing sexual intercourse, save to plagiarize his pleasure through one's own autoerotic fantasy? A person, especially a minor, frequenting such self-debasing "entertainments" will learn that this is what life is all about, that life is not about anything of value.

Civilized society cannot afford to be neutral toward such a perception of life. For education to civility is an effort to make of man something more than a creature of elemental passions and sensations. To civilize is to help people internalize respect for others, sharpen their sense of reality, grasp the difference between the decent and the indecent, desire the noble and eschew the ignoble, control their passions, do what is right even when it costs, stand in awe and wonder at such ultimate mysteries as the utter uniqueness of every other person, love, sex, suffering, and death.

### AN ATTACK ON CIVILIZATION

Because obscenity rejects each of these educational goals, it is an attack on civilization. By capitulating to obscenity, civilized society denies there is any difference between civilization and barbarism. It is reasonable to assume that a depraved moral outlook can translate into depraved conduct—i.e., more crime. Concern over excessive television violence is well-founded.

The Founding Fathers were not absolutists. They upheld legal sanctions against libel, indecent speech and conduct, profanity, and other abuses of free speech. They knew the difference between liberty and license. They knew freedom can be abused. They did not deem free speech to be solely a question of "rights" of the speaker. They also considered

the purpose of speech, which was to foster the politically and morally Good Society.

It is not always easy to decide what conduct is "reasonable," what process is "due," what material is pornographic. But we must try. What must be balanced is not merely a publisher's asserted "rights" against a prosecutor's zeal, but also the harm to society from a few unwarranted obscenity convictions against the harm to society if every newsstand, TV screen, and even schoolbook panders a thousand pictures of perversion.

The absolutists say we cannot draw any line anywhere. This is patent nonsense. In a democracy, why should the minority who cannot distinguish between art and trash dictate the education—through magazines, television, and schoolbooks—of the children of the majority, who can tell the difference?

To say the law has no business promoting morality is to exhibit amazing ignorance of Anglo-American history. Nearly every branch of law assumes the existence of a standard of moral good and evil. Besides physical crimes such as murder and theft, the law proscribes "sharp" business practices, "unfair" political campaigning, racial discrimination. Civil-law notions of "fault" in tort and "fiduciary" obligations draw their substance from moral concepts.

The objection drawn from the Prohibition Era is not apt. The law should promote temperance, not abstinence; decency, not sanctity. The law should not—and certainly our laws against pornography do not—try to "make" people be virtuous, but only make it harder to be utterly vicious.

Society is more than an aggregate of individuals. Besides the pornographer's private "right," there is the public right to a decent social environment. As a parent of four little children, I have a Constitutional right—recognized by the Supreme Court since 1925—to train my children to their higher obligations. To rear decent children requires that public entertainments—magazines, movies, TV, etc.—not be utterly indecent. The pornographer arrogates the "right" to teach my children to be indecent. Why should a few pornographer dictate the sociomoral environment of the children of millions of parents?

The law guides future generations as they grow into its precursive patterns. The law expresses to the young their elders' experienced judgment about right and wrong, a distillation of the mature community's experience and history. To remove all legal control of pornography is to teach the young that their elders do not know right from wrong; that we do not care how our young entertain—that is, educate—themselves; that civilization and barbarism are the same.

It is capacious to object that "some people will do it anyway," so that in moral matters, having failed to obtain 100 per cent compliance, the law should abdicate. This is also true of laws against shoplifting and speeding. The law expresses a standard that most people respect. Without law, the marginal person would be adrift. The fact that some people break the Ten Commandments is not a theological argument for their repeal. Nor is the fact that some people break laws that promote a basic moral standard a legal argument for their repeal.

To the absurd assertion that laws proscribing the raunchiest of sex magazines will lead to censorship of Time and Bonfires of National Geographic, I answer: This didn't happen in the past, when there was more censorship. The Supreme Court would not permit it. The alternative of "anything goes" is far more likely to lead to school-gate bookstores glutted with picture books of homosexual rape and child torture.

Some say, "The best way to deal with pornography is to let it run its course; once sated, people will get bored with it." This is somewhat like saying the best way to deal with the filth in Lake Erie is to let Lake Erie fill up till it can't take any more. Why should

parents have to let their children's moral environment get so corrupt that by comparison Sodom and Gomorrah resemble a Trapist monastery?

The salient issue is, May we draw a legal line somewhere? Or must we draw no lines? Must we tolerate everything, no matter how depraved, how sick? The public's answer is, We will draw a line, because we have the right to rear decent children in a decent society; and children or no, decent adults have a right to a decent society. And the public is right.

#### SOLAR ENERGY NEEDED NOW

#### HON. JOSEPH S. AMMERMAN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, June 3, 1977

Mr. AMMERMAN. Mr. Speaker, one of the major features of President Carter's energy program is its realization that solar heating technology exists now and can be used to make a significant contribution to the Nation's energy needs now.

One of the newspapers in my district, the News Herald in Franklin, Pa., had a perceptive editorial on the subject which I wanted to call to your attention:

#### SOLAR FUTURE IS NOW

The future of solar energy is now.

Contrary to the popular impression that harnessing the heat of the sun is one of those "exotic" energy sources whose development is many years away, a veritable boom is taking place in the solar energy field.

A recent estimate by the federal Energy Research and Development Administration (ERDA) indicates that some 5,000 homes in the United States are now heated completely or in part by solar energy units. Two years ago, there were just 183 such homes.

In addition, approximately 5,000 new solar hot water heaters are in operation, plus uncounted thousands of solar swimming pools.

The boom is barely beginning. According to one expert, the number of buildings heated by solar is doubling every six or eight months. "It's exploding."

In his energy message, President Carter expressed hope that the number of solar homes would jump to 2.5 million in the near future, spurred by his proposed tax credit to homeowners and businesses converting to solar.

Last year, the Department of Housing and Urban Development spent \$4 million to encourage construction of nearly 1,500 solar homes. Lending institutions are also financing an increasing number of solar homes, not all of them in sunny parts of the country by any means.

A typical homeowner on Long Island, for example, can reduce his hot water heating bill by 50 percent with a solar system.

Hundreds of companies are becoming active in the field, ranging from giants like Grumman, General Motors and General Electric to small ones like Mor-Flo Industries of Cleveland and Universal Solar Energy of Miami.

A spokesman for Mor-Flo, which also makes gas and electric water heaters, predicts that solar water heaters will have sales of \$893 million within five years, \$2.4 billion within 10 years and \$4.1 billion in 15 years.

This is only a small part of the action. Nationally, says the founder of Universal Solar Energy, solar heating and cooling will become a \$50 billion industry in the foreseeable future.

With so many different solar collectors now available, costing from several hundred to a couple thousand dollars—investments that can be recovered in a few years even if the prices of conventional fuels don't continue to rise—the question is why we still think of solar energy as "sometime in the future."

One reason, suggests Joseph G. Gavin, president of Grumman Corp., may be the name. Solar energy sounds like space technology, something exotic, complicated and expensive. Actually, anyone reasonably handy with tools can build a solar collector from materials readily available from a local lumber yard.

Another reason for the misperception, he says, is that most publicity about solar energy has to do with future-oriented research projects being conducted by such agencies as ERDA and NASA. Solar energy is also wrapped up in the idea of "energy independence," which is asking more of it than it will ever be able to deliver.

But while more research is certainly needed, and while solar energy will never account for more than a small, though significant, percentage of our total energy needs, the country is overlooking the opportunity to use what we have right now, says Gavin.

Solar energy requires no invention, no new government agencies, no new installation or servicing skills, no new manufacturing or distribution methods.

All it requires is for individual homeowners who are fed up with the rising cost of fuel to realize that they can become not just energy consumers but energy producers—now.

#### CLEAN AIR FOR NONSMOKERS

#### HON. JAMES L. OBERSTAR

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Friday, June 3, 1977

Mr. OBERSTAR. Mr. Speaker, Congress has long recognized its responsibility to stop air pollution. The Federal Government has put emission controls on automobiles, banned certain aerosol repellants, and established standards for air quality. But while we have worked to clean up our outdoor air, Congress has totally neglected the pollution of our indoor air by cigarettes, cigars, and pipes.

The 150 million Americans who do not smoke have a right to breathe clean indoor air protected from the toxic gases of tobacco smoke. Over 30 States have recognized this right by passing laws regulating smoking in public places. My own State of Minnesota has one of the most advanced laws in the Nation with broad, effective coverage. This right must also be protected by the Federal Government. Therefore I am cosponsoring H.R. 7170, the Federal Nonsmokers Protection Act of 1977, and urge my colleagues to work for its prompt passage.

The "nonsmokers rights" issue has gained prominence in the last few years as more evidence shows that tobacco smoke is not only annoying, but actually hazardous to the health of nonsmokers. Many more toxic substances enter the air around a smoker than he ever inhales. Twice as much tar and nicotine, five times as much carbon monoxide, and 50 times as much ammonia enters the air from the tip of a burning cigarette than is ever inhaled by the smoker himself.

Tobacco smoke is indeed an indoor air pollutant; while the Federal Air Quality Standards limit carbon monoxide in outdoor air to an average of 9 ppm (parts per million), the air inhaled by persons sitting next to a smoker may exceed 90 ppm. Even in a well-ventilated room, seven cigarettes smoked in an hour can raise the carbon monoxide level to 20 ppm. Many Americans with heart and lung conditions or allergies must avoid places such as restaurants, offices, and public meetings because the tobacco smoke in these places aggravates their physical problems.

Nonsmokers have begun to realize that it is not impolite to ask someone to refrain from smoking; it is no more impolite than asking someone to stop standing on your foot. A few smokers take offense at these requests, feeling they have a right to smoke wherever and whenever they want. Others are simply not aware that their habit may be discomforting or even harmful to others. Laws which set aside designated smoking areas resolve those kinds of problems. Nonsmokers are assured clean air in their area, while those in the designated smoking areas can pursue their enjoyment, assured that their smoke is bothering no one else.

Despite the dire predictions of the tobacco industry, nonsmoking laws have worked quite well. Under the Minnesota Clean Indoor Air Act, one of the most comprehensive nonsmokers protection laws in the Nation, smoking is allowed only in designated areas in restaurants, retail stores, offices, schools, hospitals, nursing homes, auditoriums, arenas, and meeting rooms. The reaction to the act has been overwhelmingly favorable. A poll of 433 students at the University of Minnesota showed that 94 percent of the nonsmokers and 88 percent of the smokers approved the act. Enforcement is not always easy, but as the author of the act, Representative Phyllis Kahn, states:

Nonsmokers are much less timid about standing up for their rights when they know they have a law behind them.

For several years now, smokers and nonsmokers have been separated in airplanes, buses, and trains. H.R. 7170 would continue to protect nonsmoking passengers by limiting smoking to designated areas in airports, bus stations, and train stations. Many passengers spend hours waiting for a plane, train, or bus. Their right to clean air is as important while waiting as it is while actually travelling.

H.R. 7170 also places restrictions on smoking in Federal buildings. This is important for the health of both Federal employees who work in these buildings and Americans who must do business or attend hearings there.

The time has come for a rational discussion of nonsmokers' rights. Nonsmokers are not "zealots," unless we are prepared to believe that it is fanatical to want to breathe clean air. Neither are nonsmokers looking for the abolition of smoking; they are simply trying to find a way to accommodate smokers without giving up their own right to good health. The Federal Nonsmokers Protection Act is a reasonable approach toward that goal. I urge my colleagues to read, discuss, and support H.R. 7170.

## REVIEW OF ESEA TITLE I EVALUATION STUDIES

HON. ALBERT H. QUIE

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Friday, June 3, 1977

Mr. QUIE. Mr. Speaker, over the years there has been a great deal of concern over whether or not the programs funded by title I of the Elementary and Secondary Education Act have resulted in better educational programs at the local level. Recently, at my request, the Planning and Evaluation in the Department of Health, Education, and Welfare, prepared a paper reviewing the evaluation studies of title I from the very beginning through the latest ones released last fall. The conclusion of the review, prepared by Dr. Gerry Hendrickson, is that evidence now does clearly show that children enrolled in title I programs are making significant advancements.

This paper was presented at the Annual Conference of the American Educational Research Association in April of this year. I commend it to my colleagues who are interested in the effectiveness of Federal programs:

### REVIEW OF TITLE I EVALUATION STUDIES

Gerry Lynn Hendrickson

The Elementary and Secondary Education Act (ESEA) of 1965 was the first piece of social legislation to require evaluation. The evaluation requirements of Title I were added at the insistence of Senator Robert Kennedy who wanted to provide a mechanism for informing parents and communities on how well their program was working. This information, he hoped, would let parents know if a change was needed and would give them ammunition to press for reform. The evaluation requirement Senator Kennedy drew up consisted of a system whereby the districts collect data and submit it to the States who in turn aggregate district data and submit it to OE. Early legislation also required the Commissioner to report to Congress on the effectiveness of the program as a whole.<sup>1</sup>

Thus, early legislation embodied two distinctly, if subtly, different purposes for evaluation: to provide for accountability at the local level and to provide a nationally valid assessment of the program. Although these purposes are certainly not mutually exclusive, in practice it has been difficult to serve both with one evaluation. For example, for the first purpose it is sufficient to have the district employ any reasonable testing and evaluation procedure that is understandable to the layman; for the second, some standardization is necessary. Standardization, however, works against giving local agencies the flexibility they need to design their own evaluation systems. The basic conflict, implicit in the earliest legislation, is still with us. We are still wrestling with the problem of what evaluation strategy is appropriate for what purpose, and whether one evaluation can be made to serve multiple purposes.

The studies reviewed in the remainder of this paper were undertaken for the purpose of providing national assessments of the effectiveness of Title I, although other purposes may have been served as well. The studies relied on two basic data collection strategies. One strategy called for aggregation of data from the Kennedy's system, i.e., local data passed to the States and aggregated there; State data sent to OE in the form of State Annual Evaluation Reports and aggregated across States. The problem with this

strategy is that only a handful of states produce data comparable enough and correct enough to warrant aggregation. Reliance on this strategy does, however, allow in theory for one evaluation system to serve both local and national needs. The second strategy calls for federally sponsored data collection efforts from nationally representative samples. There have been several national data collection efforts of varying design and success. Most have used local data; one has relied on national testing. Problems with the independent federally sponsored evaluations are that they are expensive and usually take years to complete. Furthermore, local and national needs have not always been served by the same evaluations. The studies reviewed here are organized according to which of the two strategies they adhered to. The aggregations of State Annual Evaluation Reports will be discussed first followed by federal sponsored evaluations.

### AGGREGATION OF STATE ANNUAL EVALUATION REPORTS

There have been three major attempts to aggregate data from State Annual Evaluation Reports:

#### Fiscal years covered, study, and office responsible

1969-1970: AIR (Wargo, Tallmadge, Lipe and Morris, 1972) ESEA Title I: An Analysis and Synthesis of Evaluation Data from fiscal year 1965 through 1970; OPBE.

1971-1974: RMC (Gamel, Tallmadge, Wood, and Binkley, 1975) State ESEA Title I Reports: Review and Analysis of Past Reports and Development of Model Reporting Format; OPBE.

1969-1974: SRI (Thomas and Pelavin, 1976) Patterns in ESEA Title I Reading Achievement; ASE.

All these studies base their findings on reading achievement data for a given school year contained in State reports, and all present data in the same way: average monthly gain in grade-level equivalents. By definition the average (50th percentile) child gains one month for every month in school, and this "month-for-month" criterion has become the unofficial goal for disadvantaged students.

All three studies reported basically the same findings: that Title I participants, with few exceptions, meet or exceed the month-for-month standard within a given school year, although there is variability in average monthly gain. Furthermore, all found that children in the upper grades were farther behind than children in the lower grades. Generally, by the third grade, the Title I children were scoring at or below grade level on the pretest and, with each successive year, were falling farther and farther behind.<sup>2</sup> It is important to note that this is cross-sectional, not longitudinal, data. However, even though different children were tested at each grade level, the findings seem paradoxical. In trying to resolve the conflict, researchers have discovered some very important features of both the grade-level equivalent metric and the Title I program. Three explanations for the paradox have been offered: the gains during the school year are real, but they are not sustained over the summer (Thomas and Pelavin, 1976; Pelavin and David, 1977); the gains are real but the children are removed from the program as soon as they begin to make progress (GAO, 1975); the gains are not real, but rather an artifact of the grade-level equivalent metric (Gamel, et al., 1975).

A word about the confidence we can place in this data is in order. Because sampling and reporting procedures testing dates and the tests themselves vary across states, usually only a handful of states use procedures comparable enough to warrant aggregation. Hence the meaningfulness of aggregated figures can always be questioned. The early reports (Wargo, et al., 1972; Gamel, et al., 1975) were able to aggregate data from only

Footnotes at end of article.

a handful of states (from two to six States for the years 1969 through 1973, for 9 states in 1974). Both reports stress that the conclusions must be tentative because of the smallness of the sample and problems with the data. On the other hand, even though they were aggregating data from the same years, Thomas and Pelavin (1976) were able to increase the sample considerably by going back to the states to request missing data. They feel that greater confidence can be placed in their data.

#### FEDERALLY SPONSORED EVALUATION

For several reasons—chief among them, the severe disenchantment caused by the quality of data in the State Annual Evaluation Reports—several Federally-sponsored evaluations have been carried out independently of them, the major ones being:

#### *School years covered, study, and office responsible*

1965-66 and 1966-67: TEMPO (Survey and analysis of results by TEMPO, case studies by Mosback and others); ASPE.

1967-68: FY 1968 Survey of Compensatory Education (U.S. DHEW); BESE.

1968-69: FY 1969 Survey of Compensatory Education (Glass, 1970); BESE.

1965-70: AIR (Wargo, Tallmadge, Michaels, Lipe and Morris, 1972) review of Title I evaluations conducted from 1965 through 1970; OPBE.

1972-73: ETS Study of Compensatory Reading Projects (full report by Trisman, Waller and Wilder, 1975; Technical Summary by OE, 1976); OPBE.

1. TEMPO—Dismayed at the quality of achievement data in the first State Annual Evaluation Reports, HEW launched the first independent national evaluation of Title I, popularly called the TEMPO study. (TEMPO, 1968; Mosbeck, et al., n.d.). This study reviewed locally collected data in eleven Title I districts and returned the first negative findings: No evidence of widespread enhanced reading achievement associated with the first full year of Title I. The impact of these findings was enormous. There had been such high hopes for Title I; few were prepared to have them dashed.

2. *The National Survey of Compensatory Education*.—The national surveys began in 1968 and continued for three years.<sup>3</sup> Like TEMPO, these surveys relied on locally-collected data; unlike TEMPO the surveys attempted to get data from a large enough sample of districts to be a valid representation of the entire nation. These Surveys of Compensatory Education, then, represented the first attempt to gather nationally representative data which might present a more accurate picture of Title I's effect than that provided by the State's Annual Evaluation Reports. Unfortunately, this goal was not achieved. Achievement data were obtained from only 9 percent of the sample in FY 1968, from only 7.5 percent in FY 1969, and were limited to reading results. The data that were collected were difficult to analyze because of differences across districts in tests used, interval between pre- and post-testing, and test metrics. Despite the problems, the data were analyzed and the results published. The findings from both years were similar: children gained less during the period between pre- and post-testing than the more advantaged non-Title I children (who were near the national average) and fell farther and farther behind the non-Title I children and national norms.

#### *The study of compensatory reading projects*

The Study of Compensatory Reading Projects was radically different from its predecessor studies. OE decided that the scores from a hodgepodge of tests given at different times and submitted for an unpredictable number of children each year simply could not be

used to get a national picture of the effectiveness of Title I. OE decided, therefore, not to rely on locally furnished data, but, instead, to select and test children on the same test given at the same time. This decision had tremendous impact. It enabled OE to produce data far more representative and of far better quality than anything collected in the past. It also marked the first evaluation mainly for national purposes, with reduced emphasis on local needs.

Another factor which must have considerable bearing is that this study looked at reading gains in projects (either Title I or other compensatory education projects) whose goal was to improve reading. Previous studies assessed the effect in producing reading gain in a potpourri of projects, some of which had reading improvement as an explicit goal; others of which probably did not.

The reading test scores collected were analyzed in a variety of ways, and the results were slightly different, depending on the analysis. The unconditional analyses yielded results showing that compensatory education students (who are at the 22nd percentile for all grades) are not falling farther behind students not in these programs (who are at or near the 50th percentile) and, in fact, are catching up, particularly in the second grade. On the other hand, the conditional analysis—curvilinear covariance analysis—shows, as does the preceding group of analyses, that the compensatory education students are not falling farther behind students not in these programs. However, unlike the preceding group, it does not show that compensatory students are catching up. The debate over the appropriateness of analytic techniques and meaning of results will continue for some time. The contractors' report (Trisman, et al., 1975) was reluctant to draw conclusions; OE's Technical Summary (1976) gave a positive interpretation. However, despite this ambiguity, this study produced positive (although only slightly positive) findings for Title I within a given school year on the national level.

Once again, the question of confidence in the results arises. The superior data collection and analysis techniques inspire far more confidence than those used in past studies. On the other hand, this study has not been free of methodological problems. For example, for some subtests and some groups of children, there was a pronounced ceiling effect for the comparison group. In addition, although the sample approximates representativeness, it is not a truly national probability sample of compensatory reading projects. However, these methodological problems are certainly less severe than those encountered in any of the previous studies.

#### *Trends and conclusions*

Up until 1975 reports on the effectiveness of Title I as a whole were uniformly pessimistic. Aggregation of data in the States' Annual Evaluation Reports (Wargo et al., 1972; Gamel et al., 1975) always highlighted problems with the data and the finding that Title I children were falling farther and farther behind their peers, although the generally found month-for-month or better gains were mentioned. National evaluations also showed (e.g., the FY 1968 and FY 1969 Surveys of Compensatory Education), for the most part, Title I children losing ground, while the non-Title I children were gaining ground.

Two recently completed studies seem to be presenting positive findings for Title I. One, an aggregation of data in the State Annual Evaluation Reports, showed Title I children meeting or exceeding month-for-month gains (Thomas and Pelavin, 1976). The other, using data collected from a cross section of children in compensatory reading programs, showed Title I children not falling farther and farther behind their more advantaged peers and, according to some

analyses, actually catching up in some grades.<sup>4</sup>

How do we interpret all this? Do these results represent a trend? Is Title I, some ten years after enactment, beginning to have an effect? It is tempting to conclude that Title I is beginning to "work" . . . that is, money is getting to participants in the form of suitable programs, teachers are learning appropriate techniques for dealing with disadvantaged students and all these things working together are translating into achievement gains for Title I children. However, we cannot infer a trend from studies reviewed here. The older reports were based on scattered, non-random data; in no case was anything like a sample of projects representative of Title I as a whole available either from State Annual Evaluation Reports or independent Federally sponsored evaluations. This fact alone precludes drawing any conclusion about trends. However, the question of reliability of the data and confidence we can place in it aside, there are interesting differences in the results over time in the studies based on State reports and those based on Federally sponsored evaluations. The most recently completed aggregation of State Reports (Thomas and Pelavin, 1976) presents results similar to those of the previous studies of the same type. However, in the former reports (Wargo et al., 1972; Gamel et al., 1975), the fact that the children were falling behind was highlighted; the month-for-month gains were reported but problems with the data were judged to be so severe as to prevent the authors from placing confidence in the conclusions. On the most recent report (Thomas and Pelavin, 1976) the finding that Title I children meet or exceed month-for-month gains is highlighted. Problems with the data were at least partially overcome by going back to the States and asking for more information and by a clever system of cross-checking results over several samples. The difference is more in the interpretation of the results and the confidence researchers feel can be placed on the data than in the actual data.

In contrast, the data from the most recent Federally sponsored evaluation (Trisman et al., 1975) does indicate different results than the older studies of the same type (TEMPO, the 1968 and 1969 Surveys of Compensatory Education). Data from the older studies when aggregated and analyzed did yield negative results. However, data collection techniques were so poor and the quality of the data so bad, that no confidence could be placed in it, as the authors of these reports recognized and stated. The recent study by Trisman et al. (1975) shows Title I children at least not falling behind and for some analyses and in some grades actually catching up within a given school year. These findings represent the first positive results from an independent national evaluation. Furthermore, by choosing a sample that was close to being nationally representative and by using nationwide data from the same test, the authors could begin to be more confident in their findings. What the foregoing implies is that a weak sampling base and poor data collection techniques prevent us from assessing trends. In short, Title I may have improved over time; it may have always been effective and we may just now have sophisticated enough evaluation techniques to pick this up; we just do not know.

While we do not have the data we need to discern a trend over time, we can make statements about the effectiveness of Title I in recent years. The statements must be made cautiously because methodological problems persist even in the recent studies, especially the study aggregating data from state reports. Despite those problems, the recent studies, particularly the recent federally sponsored evaluation (Trisman et al., 1975) do for the first time justify cautious

<sup>3</sup>Footnotes at end of article.

optimism in the ability of Title I to raise the reading achievement of disadvantaged children with a given school year. Documenting patterns of growth over time and looking into ways to sustain growth produced within a given school year are important questions for future inquiry.

## FOOTNOTES

<sup>1</sup> The reporting responsibilities of OE were unspecified in the 1965 legislation. The 1967 amendments added a requirement for an annual report to Congress on program effectiveness.

<sup>2</sup> Two smaller studies merit mention here. The Planar Corporation (1972) analyzed data from State reports for 1962 and their findings were very much in line with those of the RMC and SRI studies. GAO (1975) covered the school year 1972-73 and reported different findings. However, GAO made a serious error in analysis. A reanalysis of the GAO data yielded considerably more positive results, and results very much in line with the four other studies.

<sup>3</sup> These data for Title I children were compiled and published as the FY 1963 and FY 1969 Surveys of Compensatory Education. Data for FY 1970 were collected but not published.

<sup>4</sup> Gain score analysis, analysis of residual gains, examination of point biserial correlation between students' compensatory/non-compensatory status and total test score.

<sup>5</sup> A third recently completed study by GAO reports that the majority of Title I children are not meeting the month-for-month criterion; however, improper data analysis led them to this faulty conclusion. A reanalysis of the GAO study shows the same month-for-month gains for Title I children (see the Appendix), as reported in the other studies.

## ALBERT RAINS SPEECH CONTEST

## HON. TOM BEVILL

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Friday, June 3, 1977

Mr. BEVILL. Mr. Speaker, the Albert Rains Speech Contest for young orators has become an annual part of the academic year at Snead State Junior College in Boaz, Ala.

As many of the House Members will recognize, the contest is named in honor of one of our former colleagues. Albert Rains served in Congress from 1945 until 1965, when he retired. During his tenure in the House, Albert gained the reputation as one of the best orators in Congress. It is in tribute to that oratorical ability that the Snead State contest is named.

The winners in this year's contest all reside in the Fourth Congressional District, which I am privileged to represent. All of the winning speeches deal with energy and after looking over the speech texts, it is evident that many hours of preparation went into the finished products.

Ms. Karen Dothard of Arab, Ala., took top honors in this year's contest while second place went to Ms. Anita Dover of Crossville, Ala. Mrs. Carol Holt of Albertville, Ala., was the third place recipient.

If there are no objections, I would like to share these three outstanding speeches with the full House:

## OIL

(By Karen Dothard)

While most of us are looking at the energy crisis with a dread of what it holds for our future, there are some people who are looking at it as a quick way to wealth and power. Most of us are feeling an increasing pinch on our pocketbook but there are some who can't find anything to do with all of the wealth they are scraping into their fat bank accounts. There has to be someone who benefits during this time of crisis and these people definitely have an advantage over those of us who don't have an oil well in our own back yard.

Some time has passed since the Arab oil producing countries blackmailed the world into accepting a four hundred percent increase in crude oil prices. A flow of about thirty billion dollars has come out of the pockets of American consumers and into the coffers of multinational oil companies and Arab Sheikdoms. The embargo, production cutbacks, and price increases have hit the American living standards hard, and have driven many nations to economic difficulties.

The Resource Series, article number one states that the United States depends on oil for about one half its energy needs. Imports of oil and petroleum products amounted to more than one third of the United States use by 1973 (4 years ago). Since 1970 with demand rising, the United States, a major producer of crude oil, has depended to a growing degree on imports. The main sources have been Canada, Nigeria, Venezuela, Iran, and Indonesia, as well as Saudi Arabia, the Arab Persian Gulf Sheikdoms, and the North African Arab countries.

These oil exporting countries are definitely aware of our increasing need for their oil. The 1977 World Book Encyclopedia yearbook reports that at a December 16 meeting of the Organization of Petroleum Exporting Countries their previously solid stance on oil prices was broken. Eleven members announced a ten percent rise in the price of oil on January 1, 1977, but Saudi Arabia and the United Arab Emirates set only a five percent increase for the first six months of 1977. The Saudis also showed their advantage by hinting that they would increase oil production, a move that might undercut the other OPEC producers.

Saudi Arabia is one of the main sponges soaking up money from each of us who buys gas for our car or uses gas in the many other ways connected with day-to-day living. It is the world's leading oil exporting nation. It has by far the largest reserves of oil and gas, with proven recoverable reserves of 165 billion barrels compared with 80 billion for Russia, and 36 billion for the United States. The Arabs are definitely aware of their oil dominance over other nations. Recently Sheikh Yamani, Saudi Arabia's Minister of Petroleum and Mineral Resources quietly understated that the shortage in energy supply has reduced to some extent the power of the industrial nations, and is creating a new relationship between them and the owners of raw materials. In other words our growing dependence on oil imports is making us putty in the hands of these rich oil exporting nations.

American oil companies located in foreign countries are slowly being taken over by the governments of these countries as they become aware of the opportunities of the energy crisis. As reported by the 1977 Yearbook, on January 1, Venezuela assumed full control of its vast oil industry in the largest single take-over of American property in history. In July, Saudi Arabia made public their plans to take over the remaining forty percent United States interest in Aramco which is the Arabian American oil company.

This is the most important oil property in the world, owned by Standard Oil Company of California, Texaco Incorporated. The Exxon Corporation, and the Mobile Oil Corporation.

You may not realize this, but Russia has now awakened to the advantages of the energy crisis. The Russians are shipping a record amount of crude oil to the west, while holding back the growth of both domestic consumption and exports to its East European allies. Yearbook 1977 states that the flow of Russian crude oil to the West went up forty percent to four hundred eighty thousand barrels a day.

These countries are jumping at the chance of a quick huge profit handed to them by the energy crisis. The AFL-CIO American Federationist points out the sudden sharp rise of the price of crude oil. At the whole-some level, the price of crude oil fifty seven point five percent in 1974, while refined petroleum product prices exploding to fifty seven point two percent higher. These developments show that someone is clearly making continuing profits.

Even though American owned oil companies on foreign soil are slowly being taken over by foreign countries, they are still out for every penny they can squeeze out of us. These American companies own giant tankers which fly foreign flags to avoid United States registration, regulation, and American wages. These big five oil companies: Exxon, Texaco, Mobil, Gulf, and Standard Oil of California, are multinational giants that exercise unbelievable power over the United States economy and helped to enforce the Arab Oil embargo in 1974. An example of this came when Exxon, part owner of Aramco, broke its contract to provide oil to the United States Sixth Fleet stationed in the Mediterranean, apparently on orders from the Saudi Arabian government. This Example points out the patriotism shown by these American owned oil companies to their mother country. They definitely feel that the beloved dollar is more important than the well being of the United States. This example should show these American oil companies have an overwhelming love of money. Twenty-two large oil companies, according to the Treasury Department repeated combined after tax profits of nine point two billion dollars in 1973.

It is obvious that we as American citizens and victims of the energy crisis, are padding the bank accounts of oil producers whether they are foreign or American owned. If our economy becomes increasingly drained by our need for petroleum imports, we are putting the well being of our country into the hands of those foreign countries who are well aware of their growing advantages of the energy crisis. In my opinion, if we don't find some other source of energy soon, we are headed for a serious economic downfall in the United States.

## ENERGY CRISIS

(By Anita Kay Dover)

Since the birth of the nation, energy and the U.S. have been almost synonymous terms. When you think of the U.S., you think of energy. When you look around at our super-highways, hermetically sealed buildings, and our shopping malls enclosed in artificial climate, they seem almost designed to squander away energy in the unconscious belief that it can never run out. This kind of thinking is detrimental to our nation and it must be changed. While President Carter's energy campaign has convinced some that the energy crisis is real, many people still take it lightly.

Oil is probably the biggest factor in the energy debate. This is not surprising, because the U.S. depends on oil for about half

of its energy needs. In the May 2, 1977 issue of U.S. News & World Report there is a projection of oil demand and production in the U.S. It estimates that unless the U.S. acts to curb consumption, oil demand will be 18.3 million barrels a day this year. The figure will rise to 20.7 million barrels a day in 1980, and 25.6 in 1985. Yet U.S. oil production is estimated to be only 9.6 million barrels a day this year, will rise to only 10 million in 1980, and will stay at that level through 1985. Incidentally, in recent weeks oil production in the U.S. is the lowest it has been in eleven years.

Also, on a worldwide basis, U.S. proved reserves of crude oil have fallen from about one-third of the world's total to only five percent last year.

Our nation is depending on imported oil more and more. Last month, the nation imported almost half of its petroleum, leaving the economy dangerously vulnerable to embargos or price gouging by foreign suppliers. Last year, overall, we imported over forty percent of the total U.S. demand for oil, and the Federal Energy Administration, along with most experts, say that we may be importing fifty percent of our oil needs in just three years.

Recently the American Petroleum Institute did studies of several different forecasts put out by industries, businesses, and private research firms. Here is what they found.

All the projections, regardless of their assumptions show imports of six to twelve million barrels per day in 1990. In other words, the best we can hope for is a slight reduction. But if demand projections are understated or if the economy grows faster than projected, imports could be higher—as much as seventy percent higher.

Recently the CIA also did an assessment of near term supplies of oil. On April 25th, Rear Admiral Stansfield Turner, the CIA director, stated in congressional testimony the agency's study of Soviet oil production. The study forecast that Soviet production could peak as early as next year or as late as the early 1980's. The CIA said that water flooding, used by the USSR to boost production, will soon begin to drown out some big fields.

As a result, the Russians who now supply all their own oil and export a million barrels a day to Eastern Europe may need to buy 3.5 to 4.5 million barrels a day by 1985, the CIA reported. This could create a worldwide oil shortage in the mid 1980's.

The U.S. relies heavily upon mideastern oil, and we seem to think it will never run out. Says Thornton F. Bradshaw, President of the Atlantic Richfield Company "It's true that we are almost hopelessly dependent upon foreign oil, but it goes far beyond that. We have always looked upon foreign oil, particularly Mideastern oil, as being almost infinite. This is not true, Mideastern oil will start to decline in the early 1990's".

Electricity is a fuel source many of us take for granted. We do not think of it running out as gas or oil can, but there are indications that electricity, too, may soon be in shortage.

Because of record-breaking interest rate and soaring fuel costs, power companies have slashed operating and construction budgets to find a way out. In 1974 almost half of the 350,000 megawatts of capacity that utilities planned to build were cancelled or postponed. Two-thirds of the cancellations were nuclear plants, which offer the cheapest electricity in the long run. These cancellations are laying the groundwork for future energy shortages.

Of the fifteen largest utilities, eleven have announced cutbacks, for example, Consumer's Power Company cancelled a \$1.4 billion nuclear plant, Pennsylvania Power and Light cut \$1.3 billion from its 1974-1983 construction budget; and Southern Company

slashed \$1.7 billion from its 1975-1977 budget. The Federal Reserve's policy of tight money and high interest rates in 1969 and 1970 and 1973-1974 plus skyrocketing costs of oil and coal pushed the utility industries long term debt to more than \$60 billion, double what it was in 1967. The National Economic Research Association warned that "If the present trend continues, we could have widespread brownouts and blackouts within four years".

Many people point to promising future energy sources such as solar, thermo-nuclear fusion, geothermal, and coal derived fuels as solutions to the energy crisis. But that is exactly what these sources are, visions of the future, and there is no certainty that they will be available when reserves of gas and oil go into steep decline.

Nuclear energy was once heralded as the answer to the energy problem. But now the forecasters themselves aren't as optimistic as they used to be. Nuclear supply estimates have been out in half for 1980, and by forty-percent for 1985 as compared with projections in the early 1970's.

Solar energy seems to be a more promising energy source for the future. Its true that today you can buy the technology for hot water and heating your home right off the shelf. And in some areas of the country it is marginally economic, but according to Thornton F. Bradshaw, president of the Atlantic Richfield Company, this kind of source, even if pushed very, very hard over the next ten to thirty years will account for only a small part of our needs.

Photovoltaic cells, or solar cells that turn sunlight directly into electricity seem an attractive prospect. But these have not begun to appear on roof tops yet simply because of the cost. The type cell used on the space vehicles cost from \$200 to \$600 per watt of generating capacity. Some kinds have dropped to twenty to thirty dollars per watt but that is still way too expensive for practical purposes.

Another factor to consider in the energy problem is our changing weather conditions. Climatologists agree that the winter of 1977 will be the rule and not the exception for future winters. This may cause demand for energy to rise even higher than the forecaster predicts. This could be critical in the energy crisis.

Most of us tend not to be concerned about something that does not affect us directly. If we can go down to the gas station and fill our tanks any time we want, that's all the energy crisis we care about. But gas and oil are running out, nuclear energy is not expanding nearly rapidly enough, and other sources, according to the American Petroleum Institute, will not show significant contribution for another ten to fifteen years. We can't sit back and rely on technology to develop new sources. We must act now to conserve energy, before it's too late.

#### COAL

(By Linda Carol Holt)

Everyone realizes we have just survived the coldest winter in fifty years. Paul Harvey reported people in New York froze to death in their snowbound automobiles.

In January of this year I moved from 80° sunny Saint Petersburg, Florida to Albertville, Alabama where it was 1° below zero. My large farm-type home was heated by coal being burned in one small fireplace.

While rejuvenating the fire with chunks of coal, one afternoon I heard a news report of miners trapped in a collapsed mine. I began to realize that mine weren't the only hands that had touched this coal. How many others had? After thinking of the men responsible for my winter's warmth, I considered if some man somewhere might not have been crushed in a mine or given his life for my coal.

In the 1951 Statistical Review, the last

figures available to me, I found in Alabama 18 men had died and 885 men in the U.S. of coal mine related deaths. In comparison the rates for on the job deaths in nuclear power plants or oil fields is small.

General Electric Company says new mines opening will increase 48.6% with an added 60,000 workers by 1985. This means an increase in employment which America needs now but there are drawbacks.

According to U.S. News and World, April 25, 1977, mining is one of the most dangerous occupations. Also, black lung disease is a major health problem with 75% of retired miners suffering from it and collecting \$1 billion in compensation. Another drawback, because 100 million tons were mined in 1973 this required miners to go deeper to better veins. Also, the mining industry is plagued by wildcat strikes, causing a loss of 2 million man days in 1976. At \$3 an hour for an eight hour day that results in \$24 million lost! Unless the United Mine Workers are stabilized experts fear the union will be able to demand outrageous wages and cripple the nation with a strike.

Other than black lung or union strikes there is the problem of clean air. Coal from the eastern U.S. is high in sulphur so "scrubbers" have to be used to decrease the amount of sulphur. This will add 18-35% to the cost of building and operating electric-generating plants supplied by coal. This also produces high acid sludge, which like radioactive waste is difficult with which to dispose.

There are advantages to the high-sulphur of the east as compared to the low-sulphur of the west. The high-sulphur cost \$14 a ton compared to \$30 for low-sulphur. And also, high-sulphur requires 1/2 the coal for the same amount of heat as low-sulphur.

Let me explain that; high-sulphur coal comes from the east and is 1/2 the cost for twice as much heat as compared to western coal which is twice the cost but produces 1/2 the heat.

But western coal is good because it lies close to the surface and can be strip mined easily. Western coal comes closer to meeting clean air standards without "scrubbers" as eastern coal requires.

It may be true that western coal is easy to get to but farmers and cattlemen complain that even though mine companies try to restore the land, due to little rainfall in Wyoming, Montana and the Dakotas that it is difficult to restore it. And they complain that the quality of grazing land is lessened after strip mining as far as nutrition is concerned.

The U.S. News and World Report, April 25, 1977 says like the gold mines of California years ago, "boom towns" spring up with mobile homes taking over every vacant lot and a rise in crime and alcoholism. But unemployment in the cities fosters crime and alcoholism doesn't it? U.S. News and World Report also says by 1985 the industry will spend \$23 billion for new mines, opening at a rate of 30 a year, employing 60,000 people. That answers two problems—energy and unemployment. Not just mining employees but construction employees will benefit also.

General Electric says another way that mining would decrease unemployment is the railroad will have to spend \$3 billion for 140,000 new coal carrier cars, and 900 new engines by 1985. To upgrade railroad tracks would cost another \$5 billion.

Going back to Alabama, which is eighth in the nation in coal production, it is estimated that Alabama has 1.03 billion tons of reserve coal. Alabama consumed 28 1/4 million tons in 1973.

Coal is located in 22 of the 35 counties in Alabama with Marshall, Etowah, and Cherokee to mention only a few.

An article written by the Energy Management Board entitled Coal in Alabama says Alabama coal meets clean air standards with

0.4 to 4.1% of sulphur content. When I moved here in January I visited Gadsden and that steel plant did not have clean air. Employees there say that is a common occurrence. How do those people of that town tolerate it when we have such fresh air on Sand Mountain in Albertville.

It is unfair to complain about air quality around steel plants and not say that iron and steel plants pay over \$300 million for clean air programs.

Again, Alabama being eighth in coal production in the U.S. contributes 3.5% of the U.S. coal. Coal is produced by 25 of the 50 states with the top eight producing 87% of the U.S. coal.

Alabama's coal is 37.6% underground with 62.2% having to be strip mined. Even though Alabama is eighth we must import 1/2 of our coal from the other 7 top states.

Many don't realize it but coal is a large industry in Alabama. In 1972-73 one million tons of coal were exported through Mobile, Alabama, not all just Alabama coal.

In a break down of coal consumption there are three major users. In Alabama 61 1/2% of the coal goes for electric power, 28 1/2% to coke users like steel plants. The third major use of coal is household. Thinking to yourself right quick what percentage would you say is consumed for household use in Alabama? With Alabama being quite a rural state, I was surprised to learn only 1.4% of the state used coal for home use.

Alabama already has a head start on the nation as far as using coal for electric power generating. Alabama used coal for 3/4 of the electric power with the U.S. only using 1/2 of their electric power plants for coal.

In closing, James Liverman, environmental expert at the Federal Energy Research and Development Administration says coal poses a worse threat to the environment than atomic energy. He suggests coal only be used until solar or other energy sources can be worked out.

After being aware of boom towns, air pollution, wildcat strikes and black lung problems, I tend to agree.

#### HATCH ATTACK

**HON. ROBERT J. LAGOMARSINO**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, June 3, 1977

Mr. LAGOMARSINO. Mr. Speaker, I would like to bring to the attention of my colleagues the following editorial from the Press Courier entitled: "Clearing View of Hatch Attack." I know many of the Members of the House of Representatives especially those like myself, who are opposed to the present legislation, will appreciate the points made in this editorial:

#### CLEARING VIEW OF HATCH ATTACK

The last-minute delay in expected House passage this week of a bill to remove restrictions on federal workers' political activities is further evidence that its sponsors are determined to ram through the politicizing of the Civil Service without compromise or modification.

Sponsors pulled back from the final vote after the House approved an amendment decreeing that no employee organization could use dues or assessments for political purposes and could not force its members to vote a certain way. Sponsors said the amendment left the bill in "confusion."

Actually, what appears to be occurring at the 11th hour—paced by growing disenchantment among Democratic supporters—is a clearing of the confusion that has masked

the quiet, persistent effort by the AFL-CIO and federal employee unions to repeal the Hatch Act. We confess to not having detected early a potential threat in this effort to the nation's political process.

But passage of the bill by Rep. William Clay, D-Mo., to repeal the Hatch Act not only would politicize the Civil Service but would undermine the merit system and subject Congress and the American people to intimidating and intolerable political pressures by an army of nearly three million federal employees.

Despite the current smokescreen about restoring lost citizenship rights to federal employees, the historic fact is that the Hatch Act was enacted originally to protect workers from political coercion by their supervisors. It was passed in 1939 to deal with one of the few scandals of the New Deal—widespread efforts by federal bureaucrats to organize federal employees behind Democratic candidates in Kentucky and Tennessee.

Because of the Hatch Act, civil servants have since refused political solicitations with the commonly understood comment: "I can't—I'm Hatched." This protection is one reason so many government workers have shown no enthusiasm for the repeal move.

The Clay bill would "encourage" federal employees to enter the political arena, to raise campaign funds and to run for office. It would even grant leave to federal employees seeking election. While supervisors would be prohibited from soliciting or coercing lower-level employees, the bill says nothing about union pressure on members who are civil servants.

Such bullying could be an even greater problem than supervisory coercion; hence, the amendment this week that brought to a halt to the sponsors' voting maneuvers.

The Hatch Act finds itself under siege for one primary reason: Organized labor correctly sees the act as a roadblock against mass unionization of the Civil Service and expanded clout at all levels of government. Labor's rationalization is that it champions the political rights of government workers, but government workers for years have made it clear they are indifferent, if not opposed, to such deliverance.

Washington attorney, author and political scientist John R. Bolton clearly and correctly points out that the Hatch Act is basically a civil libertarian idea. Through this law, the government restrains itself, not the individuals in its employ. And, by such restraint, the government in classic First Amendment terms acts to protect the free and voluntary political activity of private citizens.

A similar bill to repeal the Hatch Act's political protections sailed through Congress last year. Only President Ford's veto prevented it from becoming a law. Now, with the explicit support of the Carter administration and an overwhelmingly Democratic Congress, the odds favor the killing of the Hatch Act and the distortion of the nation's political process.

Some erosion of Democratic support in Congress has begun to appear, but it will require fully aroused public opinion to preserve the Hatch Act's protection of citizens' free choice in political activity.

#### WHEN TRADE WITH THE SOVIET UNION BECOMES AID TO THE SOVIET MILITARY ESTABLISHMENT

**HON. JACK F. KEMP**

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, June 3, 1977

Mr. KEMP. Mr. Speaker, several weeks ago WPIX-TV in New York City broke

the story that the Soviet Union was negotiating the purchase from Control Data Corp., a U.S. firm, of a Cyber 76 computer, one of the world's most sophisticated. The columnists, Jack Anderson and Les Whitten, elaborated on this disclosure in a column on May 24.

No example could better demonstrate the risk the United States is taking in trading in highly sophisticated technology with the Soviet Union, which remains today our largest and most potential adversary.

This multi-million-dollar machine "could be turned against us to track U.S. missiles, planes, and submarines. It is also capable of decoding sensitive U.S. intelligence transmissions." It can be used for navigation and weapons guidance in modern missiles, aircraft, tanks, high performance satellite-based surveillance systems, ABM defense systems, and submarines.

The Cyber 76 is the brain center of the Pentagon, the U.S. Air Force, the National Security Agency, and the National Aeronautics and Space Administration. The Energy Research and Development Agency has 15 Cyber 76s, described as the backbone of our nuclear research. Moreover the Cyber series is also used by the North American Defense Command.

The Soviets have supposedly assured Control Data officials that the computer will be used for peaceful purposes, including weather surveillance. These assurances are unconvincing to me. Control over the computer rests on two factors, operation and maintenance. Control Data says its supervisors will handle control of operations, and that it will govern maintenance. The inference is that the Soviets would not be able to operate or obtain the parts for repair except through Control Data. That flies in the face of everything we know about computer operations and international trade. If Soviet technicians are taught to run the equipment, it follows by logic that at some point in time a group of those technicians will know how to operate the equipment independent of Control Data supervision. Inasmuch as Cyber 76 systems are found in many places throughout the world, the Soviets could easily obtain spare parts through third parties without the knowledge of Control Data.

This disclosure follows on another: That a Vermont corporation several years ago sold instruments to the Soviets which permitted them to make improvements in their intercontinental ballistic missile warhead delivery systems in 1 year which could not have been made otherwise for 5 to 7 years. That is about all one can say, that has been in the press; the information on the specifics associated with the sale have never been declassified.

These two examples show how trade can easily become aid. When you are working with friends, with allies, you do not have to worry about this point. But when you are working with the largest potential adversary of the United States, these unanswered or unanswerable questions have to be resolved in favor of us, not them. Yet classified records, which even WPIX-TV and Jack Anderson were unable to get, show the former Secretary

of State pushed for both sales. On one occasion, he overruled Defense Department objections; on the other, he went around the Department altogether.

I cannot tell you why. I do not know why. But I have to assume it was because he thought the benefits outweighed the risks. I do not, and here is why.

First, trade with Communist countries, by relieving them of domestic economic and subsequent political burdens, discourage internal reform of the Government and of the economy. We will never engender a free enterprise economy in those countries, when our economic system continues to bail out their malfunctioning state-controlled economies.

Second, certain types of nonstrategic trade, if under specified conditions, could be in our best interests. Such conditions would include obtaining concessions in behalf of human rights. But computers are not nonstrategic goods.

Third, American businessmen are not starved for world markets.

Fourth, the Communists seek to buy prototypes for copying purposes. This is probably what they will do with the Cyber 76. Study it, and then duplicate it many times over. They are notorious for disregarding patent treaties.

Fifth, trade should be on terms which strengthen the U.S. dollar. Yet the Communists refuse to pay in gold; they refuse to even pay cash. In the famous grain deal of several years ago, the United States loaned them the money to buy the grain. They borrowed the money at 2-percent interest. The Americans borrowed the money to loan them; we borrowed it at 6 percent. The difference, 4 percent, constituted an outright expense to the American taxpayer to subsidize the Communists.

Sixth, and central to my points this afternoon, indiscriminate trade may jeopardize the security of the United States. There must be no trade in commodities which can be put to military use. And some trade in nonstrategic goods can become strategic, depending on how the Soviets use it, and we have no real control over that use. For example, nothing is more humanitarian than food. Food for hungry people in the Soviet Union would find support across America, but that same food in the stomachs of Soviet troops become strategic. If there were severe food shortages in the Soviet Union today, and we sent them food, which do you think would be fed first, the soldiers or the peasants?

The Carter administration has to come

to grips with this question immediately. The Department of Commerce may take final action in a matter of days. The two previous administrations were bound by what their Secretary of State pledged and did. The Carter administration is not. And if it does not put a stop to these kinds of sales, we will unwittingly prove what the Soviet Union's founder, Lenin, predicted: "When we get ready to hang the capitalists, they will sell us the rope."

I have joined with a number of my colleagues in a letter to President Carter, asking him to stop this transaction. With the obvious intransigence of the Soviets on strategic arms limitations and with news reports reaching the West over the past week of renewed crackdowns on human rights advocates in the Soviet Union, I do not see any reason why we should bend over backward to sell them this dangerous piece of equipment.

The Anderson-Whitten column follows:

[From the Washington Post, May 24, 1977]

#### A SUPERCOMPUTER FOR THE SOVIETS

(By Jack Anderson and Les Whitten)

Control Data is preparing to sell the Soviets a \$13 million electronic brain, which could be turned against us to track U.S. missiles, planes and submarines. It is also capable of decoding sensitive U.S. intelligence transmissions.

The miracle machine is the Cyber 76, which will soon be on its way to the Soviet Union unless there is a last-minute stop order. It not only will be the largest computer ever delivered behind the Iron Curtain, but it is more than a decade ahead of the Soviets' own computer technology. It operates at least 20 times faster than anything the Soviets produce.

A top-secret, interagency study warns tersely that the Soviets can convert the Cyber 76 to military use. Not only can it be used for tracking and decoding, but it could also improve the production of nuclear warheads, multiple-headed missiles, aircraft and other military hardware.

There is no sure safeguard to prevent this, the study declares. An intelligence source put it more bluntly. "For a few bucks," he told us, "we're willing to give the Soviets the means to destroy us. We're becoming our own executioners."

Government officials, citing the strict secrecy, refused to show us a copy of the study. But sources with access to the original draft have told us of its warnings. They fear it may be softened in order to make the computer deal more palatable.

Control Data executives, in repeated meetings with U.S. officials, have insisted that the Cyber 76 will be used by the Soviets strictly to study the weather. The company kept hammering at Washington to get an export license. Final Commerce Department approval of the deal, according to our sources,

was imminent until our inquiries caused some hesitation.

The sale of computers to Russia was pushed originally by ex-Secretary of State Henry A. Kissinger. Eager to promote détente, he overruled military objections to earlier computer sales. Now that the Soviets have already received lesser computers, they will be enraged if the Cyber 76 is withheld from them, say our sources.

One high official source, talking to us in confidence, related how a mysterious Soviet official showed up in the United States a few years ago. The Central Intelligence Agency immediately spotted him as a man with a purpose. He had come here, the CIA warned, to seek strategic U.S. computers.

The State Department, under Kissinger, persuaded the CIA to soften its warning and to pass off the visitor as merely the house guest of Soviet Ambassador Anatoli F. Dobrynin.

This helped lead to computer sales not only to Russia but also to China and Hungary. In return for these sophisticated computers, according to an International Trade Commission report, the Soviets have offered the U.S. "horses, asses and mules" at favored prices. Russia's famous vodka will also be sold to the United States at a tariff of \$1.25 a gallon, instead of the present \$5.

Frustrated U.S. officials complain that the Soviets are getting the best of the deal. They have gained strategic advances from the computers that have already been delivered, these officials assert. But the Cyber 76 would give them a technological boost that no amount of vodka could justify, they say.

The secret study declares categorically that the wonder machine both could and would be misused by the Kremlin for military purposes. Those officials who favor the sale contend, however, that the Soviets will use the Cyber 76 to increase their participation in a world meteorological network. The result, they say, would be better international weather data, larger crops and fewer unexpected natural disasters.

A spokesman for Control Data assured our reporter John Schuber that the computer can be set up in Moscow in a way to prevent any misuse. Any diversion to military use, he said, could be detected immediately. Then Control Data would pull out its technicians and refuse parts to the Soviets, thus crippling the electronic monster.

But other computer experts told our reporter Tony Capaccio that Control Data's arguments are spurious. One former Control Data executive, referring to the alleged safeguards, said derisively: "That's a joke." Other experts agreed that the Soviets could train their own technicians, and eventually locate parts from other countries.

Footnote: At the Commerce Department, spokesman confirmed that the secret study disclosed "some problems" relating to safeguards against the misuse of the Cyber 76. But the draft report, said the spokesman, wasn't final.

## HOUSE OF REPRESENTATIVES—Monday, June 6, 1977

The House met at 12 o'clock noon.

Reverend Mr. Charles A. Mallon, permanent deacon, St. Matthias Church, Lanham, Md., offered the following prayer:

*To you, Lord, I offer my prayer; in You, my God, I trust. Save me from the shame of defeat; don't let my enemies gloat over me! Defeat does not come to those who trust in You, but to those who are quick to rebel against You.—Psalms 25: 1-3.*

Almighty Father receive from us glory, honor, and praise. We turn to You, Father, with recognition of Your supreme majesty and ask Your intercession for this Nation and all the nations of the world. We are Your people, You are our God.

Help us, Father, to direct our efforts both now and in future days that we might enter into Your kingdom. For without Your guidance we cannot discern that which is fruitful.

Bless us then with Your eternal light and unending life that we might become one with You, and one with each other.

We ask this through Christ our Lord. Amen.

#### THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

#### CONSENT CALENDAR

The SPEAKER. This is Consent Calendar day. The Clerk will call the first bill on the Consent Calendar.

#### PREEMPTION OF STATE LAWS INCONSISTENT WITH FEDERAL EMPLOYEE HEALTH BENEFITS PROGRAM

The Clerk called the bill (H.R. 2931) to amend chapter 89 of title 5, United States Code, to establish uniformity in Federal employee health benefits and coverage provided pursuant to contracts made under such chapter by preempting State or local laws pertaining to such benefits and coverage which are inconsistent with such contracts.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. BADHAM. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

#### SURVIVOR ANNUITIES

The Clerk called the bill (H.R. 3447) to amend chapter 83 of title 5, United States Code, to grant an annuitant the right to elect within 1 year after remarriage whether such annuitant's new spouse shall be entitled, if otherwise qualified, to a survivor annuity, and to eliminate the annuity reduction made by an unmarried annuitant to provide a survivor annuity to an individual having an insurable interest in cases where such individual predeceases the annuitant.

There being no objection, the Clerk read the bill, as follows:

H.R. 3447

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That (a) section 8339(j) of title 5, United States Code, is amended by striking out the second and third sentences and inserting in lieu thereof the following: "An annuity which is reduced under this subsection or any similar prior provision of law shall, for each full month during which a retired employee or Member is not married (or is remarried if there is no election in effect under the following sentence), be recomputed and paid as if the annuity had not been so reduced. Upon remarriage the retired employee or Member may irrevocably elect during such marriage, in a signed writing received in the Commission within 1 year after such remarriage, a reduction in his annuity for the purpose of allowing an annuity for his spouse in the event such spouse survives him. Such reduction shall be equal to the reduction in effect immediately before the dissolution of the previous marriage, and shall be effective the first day of the first month beginning 1 year after the date of remarriage."

(b) Section 8341(b)(1) of title 5, United States Code, is amended by striking out "unless the employee or Member" and all that

follows, and inserting in lieu thereof the following: "unless the employee or Member has notified the Commission in writing at the time of retirement that he does not desire any spouse surviving him to receive his annuity, or in the case of remarriage, he did not file an election under the third sentence of section 8339(j) of this title."

(c) The second sentence of section 8339(k)(2) of title 5, United States Code, is amended to read as follows: "The reduced annuity shall be effective the first day of the first month beginning 1 year after the date of marriage."

SEC. 2. Section 8339(k)(1) of title 5, United States Code, is amended by adding at the end thereof the following: "An annuity which is reduced under this paragraph or any similar prior provision of law shall, effective the first day of the month following the death of the individual named under this paragraph, be recomputed and paid as if the annuity had not been so reduced."

SEC. 3. The Civil Service Commission shall, on an annual basis, inform each annuitant of such annuitant's rights of election under sections 8339(j) and 8339(k)(2) of title 5, United States Code.

SEC. 4. (a) This Act shall take effect—

(1) the first day of the first month which begins on or after the date of the enactment of this Act, or

(2) October 1, 1977, whichever is later

(b) Except as provided under subsection (c) of this section, the amendments made by the first section and section 2 of this Act shall apply with respect to annuities which commence before, on, or after the effective date of this Act, but no monetary benefit by reason of such amendments shall accrue for any period before such effective date.

(c) The amendments made by the first section of this Act shall not affect the eligibility of any individual to a survivor annuity under section 8341(b) of title 5, United States Code, or the reduction therefor under section 8339(j) of such title, in the case of an annuitant who remarried before the effective date of this Act, unless the annuitant notifies the Civil Service Commission in a signed writing received in the Commission within one year after the effective date of this Act that such annuitant does not desire the spouse of the annuitant to receive a survivor annuity in the event of the annuitant's death. Such notification shall take effect the first day of the first month after it is received in the Commission.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

#### EXTENDING CERTAIN OIL AND GAS LEASES BY A PERIOD SUFFICIENT TO ALLOW THE DRILLING OF AN ULTRADEEP WELL

The Clerk called the bill (H.R. 2502) to extend certain oil and gas leases by a period sufficient to allow the drilling of an ultra-deep well.

Mr. BADHAM. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

The SPEAKER. This concludes the call of the Consent Calendar.

#### MAIL TO THE PORTLAND TRAIL BLAZERS

(Mr. DUNCAN of Oregon asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DUNCAN of Oregon. Mr. Speaker, if we can pause for a moment or two from our consideration of such mundane matters as energy, taxes, unemployment and inflation, I would like to direct the attention of the House to the more relevant subject of tragedies and triumphs. On behalf of my friends from Philadelphia, I want to publicly acknowledge and offer my condolences for the tragedy that struck them in the Northwest yesterday. The Philadelphia 76ers, despite a gallant effort, lost the NBA championship to the Portland Trail Blazers as they had also lost the last three games, some not so gallantly.

My sorrow is, of course, tempered by the knowledge that the better team won and the heady exultation of the triumph of the Trail Blazers. All year, the Blazers have been the team to watch—and it has been difficult to watch them as the Washington Post usually acknowledged their presence only by a single line buried deep in the sports page and usually that line said "results not available."

But Portland has been watching them—and savoring each victory. Chicago and Denver and Los Angeles and now Philadelphia will never forget them. The Post—finally—banned their victory on the front page. And 25,000 people surged through the streets of Portland yesterday—not trashing and protesting as in past years—but cheering newfound heroes. Heroes who gave their best and who, by their example, will draw the best from all who share their triumph. We may even hope that a new age of heroes is upon us as we all begin to trust and rely on each other as the Blazers did throughout the season.

Walton has come into his own. He was great—but so were each of his teammates. The end was a homespun homily. A young team from distant Portland stressing the homely virtues of courage, discipline, sportsmanship, unselfishness and teamwork overcame the brilliance of the superstars led by the great "Doctor" from Philadelphia who challenged even to the last second.

Once again Oregon leads the Nation. Surely my colleagues on appropriations will now acknowledge what I have casually suggested to them from time to time. Oregon is truly a magnificent State and Oregonians magnificent people.

#### APPOINTMENT OF CONFEREES ON H.R. 6370, AUTHORIZING APPROPRIATIONS TO INTERNATIONAL TRADE COMMISSION, FISCAL YEAR 1978

Mr. VANIK. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 6370), an act to authorize appropriations to the International Trade Commission for fiscal year 1978, to provide for the Presidential ap-

pointment of the chairman and vice chairman of the Commission, to provide for greater efficiency in the administration of the Commission, and for other purposes, with Senate amendments thereto, disagree to the Senate amendments, and request a conference with the Senate thereon.

The SPEAKER. Is there objection to the request of the gentleman from Ohio? The Chair hears none, and appoints the following conferees: Messrs. ULLMAN, VANIK, GIBBONS, ROSTENKOWSKI, JONES of Oklahoma, CONABLE, and STEIGER.

#### ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair would like to make an announcement about the electronic voting system. The Chair has been informed that the board displaying each Member's name behind the Chair and the boards displaying the bill number and vote totals to the left and right of the Chair are not working today. However, all voting stations are operating; and the Chair has directed all vote monitoring stations to be staffed with personnel so any member may go to any monitor and verify his or her vote. Members may also verify their votes—as they should on any vote, by reinserting their card at the same or another voting station.

The Chair therefore directs that the vote be taken by electronic device. Members interested in the progress of the vote may inquire at the vote monitoring stations.

#### ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. Pursuant to the provisions of clause 3(b) of rule 27, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 4 of rule 15.

After all motions to suspend the rules have been entertained and debated and after those motions, to be determined by "nonrecord" votes have been disposed of, the Chair will then put the question on each motion on which the further proceedings were postponed.

#### AMENDING THE FEDERAL CROP INSURANCE ACT

Mr. JONES of Tennessee. Mr. Speaker, I move to suspend the rules and pass the Senate bill (S. 955) to amend the Federal Crop Insurance Act.

The Clerk read as follows:

S. 955

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 504(a) of the Federal Crop Insurance Act (52 Stat. 72, as amended; 7 U.S.C. 1504 (a)) is amended to read as follows:*

"SEC. 504. (a) The Corporation shall have a capital stock of \$150,000,000 subscribed by the United States of America, payment for which shall, with the approval of the Secretary of Agriculture, be subject to call in whole or in part by the Board of Directors of the Corporation."

The SPEAKER. Is a second demanded? Mr. MADIGAN. Mr. Speaker, I demand a second.

The SPEAKER. Without objection, a second will be considered as ordered. There was no objection.

The SPEAKER. The gentleman from Tennessee (Mr. JONES) will be recognized for 20 minutes, and the gentleman from Illinois (Mr. MADIGAN) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Tennessee, Mr. JONES.

Mr. JONES of Tennessee. Mr. Speaker, I yield myself 20 minutes.

Mr. Speaker, S. 955 would increase the capital stock in the Federal Crop Insurance Corporation by \$50 million. It comes at a time when the capital position of the Corporation is being seriously threatened by severe crop losses in 1976 and potentially serious losses this year, in addition to the gradual use of capital stock funds and the premium reserve to pay certain administrative costs. This bill is an emergency measure to shore up the Corporation's capital situation until Congress has the opportunity to consider a major revision of the Federal Crop Insurance Act. The Committee on Agriculture will begin consideration of such a revision in a few weeks.

Mr. LONG of Maryland. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER. The Chair does not recognize the gentleman from Maryland for that purpose at this particular time.

Mr. JONES of Tennessee. Mr. Speaker, on May 20 I received a letter I had requested from the manager of the Federal Crop Insurance Corporation showing the dire circumstances in which they found themselves. This information indicated a capital position of about \$1 million at the end of the fiscal year and this, of course, is based on estimates of crop losses in which there is obviously much room for error. It would not be prudent for Congress to let the capital position deteriorate further because the Corporation has no authority to borrow and their only recourse would be to stop indemnity payments to farmers. The Corporation's estimates show cash disbursements for the 1977 crop year will be over \$91 million. Unless we adopt the provisions of S. 955, they would be unable to meet \$47 million of these payments. The Senate passed this measure April 25 and our supplemental appropriations bill has appropriated the money contingent upon passage of this authorization. I think the important points to remember are:

First, that unless this bill is passed, the Crop Insurance Corporation may not be able to make indemnity payments to farmers who have already purchased insurance;

Second, this bill does not change the crop insurance program—about which many of you have deceived complaints;

Third, that the Agriculture Committee will soon begin a revision of the crop insurance program to provide for a nationwide multiperil program;

Fourth, that the funds have already been appropriated in our supplemental appropriations act.

This measure has the full support of

the administration and, in fact, resulted from an executive communication from Secretary Bergland. I conclude by urging my colleagues to support this emergency legislation.

Mr. Speaker, I reserve the remainder of my time.

Mr. MADIGAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of S. 955. I cosponsored H.R. 4194, the House version of S. 955, with our esteemed chairman of the Subcommittee on Conservation and Credit, Mr. JONES of Tennessee. Mr. JONES, in my opinion, has explained the bill quite comprehensively.

Both Mr. JONES (H.R. 6198) and I (H.R. 5011) have introduced bills which will substantially overhaul the Federal crop insurance program. This bill will provide an interim funding solution until we can address the longer term solution to the crop insurance problem.

If the appropriation, which has remained the same for some years, had more realistically reflected the actual costs, there would be no need for this bill. However, while the amount appropriated to cover administrative costs has remained the same, the total administrative cost for fiscal year 1977 will be nearly \$22 million or \$10 million in excess of the \$12 million appropriated expressly for that purpose. Meanwhile, the capital of the Federal Crop Insurance Corporation has been utilized over the last 20 years to meet farmers' indemnity claims and administrative and operating costs not covered by appropriations. Unforeseen indemnity payments in excess of premiums in fiscal year 1976 and in prospect for fiscal year 1977 have eroded the capital of the Corporation even further.

There was strong support for this bill in the committee and on the Senate side, where the bill was passed April 25, 1977. The legislation was requested by the Department of Agriculture, which strongly supports the bill.

I urge your support of S. 955 today.

Mr. JONES of Tennessee. Mr. Speaker, I yield such time as he may consume to the gentleman from California (Mr. PANETTA).

Mr. PANETTA. Mr. Speaker, as a member of the subcommittee I rise in strong support of this legislation. It is extremely important for us at the present time, because of the drought problems in the West, to be able to acquire appropriate crop insurance coverage. This bill will give that to us. For this reason I respectfully request and hope that the Congress will pass this legislation.

Mr. WAMPLER. Mr. Speaker, I rise in support of S. 955, a bill which would amend the Federal Crop Insurance Act to increase to \$150 million, from \$100 million, the capital stock of the Federal Crop Insurance Corporation.

The emergency nature of this legislation is due primarily to factors over which we have no control; namely, acts of God. As my colleagues will recall, this past winter it was literally colder in Florida than it was in Alaska. We suffered a very severe winter in Virginia as

well. The drought in the Midwest has spread to the west coast so that water is being rationed in some areas.

Because of the unusual weather we have been experiencing, losses on 1976-77 crops have placed an even greater strain on the resources of the Federal Crop Insurance Corporation. Earlier this year, Secretary of Agriculture Bob Bergland requested that Congress increase the capital stock of the FCIC to meet the greater than expected increase in indemnity claims, as well as to meet the Corporation's administrative and operating expenses not covered by appropriations.

Responding to the Secretary's request, the Senate and House Appropriations Committees agreed to a provision in H.R. 4877, the supplemental appropriations bill, which provided \$50 million in capital stock of the FCIC, contingent upon this legislation being enacted.

Subsequently, this authorizing legislation was introduced in the House. Later, S. 955 passed the Senate on April 25, and the bill is now before us today.

Mr. Speaker, I would like to compliment my colleagues, the gentleman from Tennessee (Mr. JONES) and the gentleman from Illinois (Mr. MADIGAN) for their constructive action on this emergency legislation. As they have indicated earlier, further hearings are expected in order to overhaul and update the FCIC program. At that time, we should also have a more accurate assessment of the losses on 1977 crops insured under FCIC.

Mr. Speaker, I urge the House to support the bill before us.

Mr. JONES of Tennessee. Mr. Speaker, I have no further requests for time.

The SPEAKER. The question is on the motion offered by the gentleman from Tennessee (Mr. JONES) that the House suspend the rules and pass the Senate bill, S. 955.

The question was taken.

Mr. THONE. Mr. Speaker, on that I demand the yeas and nays.

The SPEAKER. Pursuant to the provisions of clause 3(b) of rule XXVII, and the prior announcement of the Chair, further proceedings on this motion will be postponed.

#### GENERAL LEAVE

Mr. JONES of Tennessee. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the Senate bill (S. 955) just under consideration.

The SPEAKER. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

#### SOIL AND WATER RESOURCES CONSERVATION ACT OF 1977

Mr. JONES of Tennessee. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 75) to provide for furthering the conservation, protection, and enhancement of the Nation's land, water, and related resources for sustained use, and for other purposes, as amended.

The Clerk read the bill, as follows:

#### H.R. 75

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Soil and Water Resources Conservation Act of 1977".*

#### FINDINGS

##### SEC. 2. The Congress finds that:

(1) There is a growing demand on the soil, water, and related resources of the Nation to meet present and future needs.

(2) The Congress, in its concern for sustained use of the resource base, created the Soil Conservation Service of the United States Department of Agriculture which possesses information, technical expertise, and a delivery system for providing assistance to land users with respect to conservation and use of soils; plants; woodlands; watershed protection and flood prevention; the conservation, development, utilization, and disposal of water; animal husbandry; fish and wildlife management; recreation; community development; and related resource uses.

(3) Resource appraisal is basic to effective soil and water conservation. Since individual and governmental decisions concerning soil and water resources often transcend administrative boundaries and affect other programs and decisions, a coordinated appraisal and program framework are essential.

#### DEFINITIONS

##### SEC. 3. As used in this Act:

(1) The term "Secretary" means the Secretary of Agriculture.

(2) The term "soil, water, and related resources" means those resources which come within the scope of the programs administered and participated in by the Secretary of Agriculture through the Soil Conservation Service.

(3) The term "soil and water conservation program" means a framework for attaining the purposes of this Act.

#### DECLARATIONS OF POLICY AND PURPOSE: PROMOTION THEREOF

SEC. 4. (a) In order to further the conservation of soil, water, and related resources, it is declared to be the policy of the United States and purpose of this Act that the conduct of programs administered by the Secretary of Agriculture for the conservation of such resources shall be responsive to the long-term needs of the Nation, as determined under the provisions of this Act.

(b) Recognizing that the arrangements under which the Federal Government cooperates with State soil and water conservation agencies and other appropriate State natural resource agencies such as those concerned with forestry and fish and wildlife and, through conservation districts, with other local units of government and land users, have effectively aided in the protection and improvement of the Nation's basic resources, including the restoration and maintenance of resources damaged by improper use, it is declared to be the policy of the United States that these arrangements and similar cooperative arrangements should be utilized to the fullest extent practicable to achieve the purpose of this Act consistent with the roles and responsibilities of the non-Federal agencies, land owners and land users.

(c) The Secretary shall promote the attainment of the policies and purposes expressed in this Act by—

(1) appraising on a continuing basis the soil, water, and related resources of the Nation;

(2) developing and updating periodically a program for furthering the conservation, protection, and enhancement of the soil, water, and related resources of the Nation consistent with the roles and program responsibilities of other Federal agencies and State and local governments; and

(3) providing to Congress and the public,

through reports, the information developed pursuant to paragraphs (1) and (2) of this subsection, and by providing Congress with an annual evaluation report as provided in section 7.

#### APPRAISAL

SEC. 5. (a) In recognition of the importance of and need for obtaining and maintaining information on the current status of soil, water, and related resources, the Secretary is authorized and directed to carry out a continuing appraisal of the soil, water, and related resources of the Nation. The appraisal shall include, but not be limited to—

(1) data on the quality and quantity of soil, water, and related resources, including fish and wildlife habitats;

(2) data on the capability and limitations of those resources for meeting current and projected demands on the resource base;

(3) data on the changes that have occurred in the status and condition of those resources resulting from various past uses, including the impact of farming technologies, techniques, and practices;

(4) data on current Federal and State laws, policies, programs, rights, regulations, ownerships, and their trends and other considerations relating to the use, development, and conservation of soil, water, and related resources;

(5) data on the costs and benefits of alternative soil and water conservation practices; and

(6) data on alternative irrigation techniques regarding their costs, benefits, and impact on soil and water conservation, crop production, and environmental factors.

(b) The appraisal shall utilize data collected under this Act and pertinent data and information collected by the Department of Agriculture and other Federal, State, and local agencies and organizations. The Secretary shall establish an integrated system capable of using combinations of resource data to determine the quality and capabilities for alternative uses of the resource base and to identify areas of local, State, and National concerns and related roles pertaining to soil and water conservation, resource use and development, and environmental improvement.

(c) The appraisal shall be made in cooperation with conservation districts, State soil and water conservation agencies, and other appropriate citizen groups, and local and State agencies under such procedures as the Secretary may prescribe to insure public participation.

(d) The appraisal shall be completed by December 31, 1979, and at each five-year interval thereafter during the period this Act is in effect.

#### SOIL AND WATER CONSERVATION PROGRAM

SEC. 6. (a) The Secretary is hereby authorized and directed to develop in cooperation with and participation by the public through conservation districts, State and national organizations and agencies, and other appropriate means, a national soil and water conservation program (hereinafter called the "program") to be used as a guide in carrying out the activities of the Soil Conservation Service which assist landowners and land users, at their request, in furthering soil and water conservation on the private and non-Federal lands of the Nation. The program shall set forth direction for future soil and water conservation efforts of the United States Department of Agriculture based on the current soil, water, and related resource appraisal developed in accordance with section 5 of this Act, taking into consideration both the long- and short-term needs of the Nation, the landowners, and the land users, and the roles and responsibilities of Federal, State, and local governments in such conservation efforts. The program shall also include but not be limited to—

(1) analysis of the Nation's soil, water, and related resource problems;

(2) analysis of existing Federal, State, and local government authorities and adjustments needed;

(3) an evaluation of the effectiveness of the soil and water conservation ongoing programs and the overall progress being achieved by Federal, State, and local programs and the landowners and land users in meeting the soil and water conservation objectives of this Act;

(4) identification and evaluation of alternative methods for the conservation, protection, environmental improvement, and enhancement of soil and water resources, in the context of alternative time frames, and a recommendation of the preferred alternatives and the extent to which they are being implemented;

(5) investigation and analysis of the practicability, desirability, and feasibility of collecting organic waste materials, including manure, crop and food wastes, industrial organic waste, municipal sewage sludge, logging and wood-manufacturing residues, and any other organic refuse, composting, or similarly treating such materials, transporting and placing such materials onto the land to improve soil tilth and fertility. The analysis shall include the projected cost of such collection, transportation, and placement in accordance with sound locally approved soil and water conservation practices;

(6) analysis of the Federal and non-Federal inputs required to implement the program;

(7) analysis of costs and benefits of alternative soil and water conservation practices; and

(8) investigation and analysis of alternative irrigation techniques regarding their costs, benefits, and impact on soil and water conservation, crop production, and environmental factors.

(b) The program plan shall be completed not later than December 31, 1979, and be updated at each five-year interval thereafter during the period this Act is in effect.

#### REPORT TO CONGRESS

SEC. 7. (a) On the first day Congress convenes in 1980 and at each five-year interval thereafter during the period this Act is in effect the President shall transmit to the Speaker of the House of Representatives and the President of the Senate, the appraisal and the program as required by sections 5 and 6 of this Act, together with a detailed statement of policy regarding soil and water conservation activities of the United States Department of Agriculture.

(b) The Secretary, during budget preparation for fiscal year 1982 and annually thereafter during the period this Act is in effect, shall prepare and transmit to the Congress, through the President, a report to accompany the budget which evaluates the program's effectiveness in attaining the purposes of this Act. The report, prepared in concise summary form with appropriate detailed appendices, shall contain pertinent data from the current resource appraisal required to be prepared by section 5 of this Act, shall set forth the progress in implementing the program required to be developed by section 6 of this Act, and shall contain appropriate measurements of pertinent costs and benefits. The evaluation shall assess the balance between economic factors and environmental quality factors. The report shall also indicate plans for implementing action and recommendations for new legislation where warranted.

#### AUTHORIZATION FOR APPROPRIATIONS

SEC. 8. There are authorized to be appropriated such funds as may be necessary to carry out the purposes of this Act.

#### EFFECTIVE DATE

SEC. 9. In the implementation of this Act, the Secretary shall utilize information and data available from other Federal, State, and local governments, and private organizations and he shall coordinate his actions with the resource appraisal and planning efforts of other Federal agencies and avoid unnecessary duplication and overlap of planning and program efforts.

SEC. 10. The provisions of this Act shall take effect on October 1, 1977 and shall terminate on December 31, 1981.

**THE SPEAKER.** Is a second demanded?

**Mr. MADIGAN.** Mr. Speaker, I demand a second.

**The SPEAKER.** Without objection, a second will be considered as ordered.

There was no objection.

**The SPEAKER.** The gentleman from Tennessee (Mr. JONES) and the gentleman from Illinois (Mr. MADIGAN) are recognized for 20 minutes each.

**Mr. JONES of Tennessee.** Mr. Speaker, I yield myself such time as I may consume.

**Mr. Speaker,** I want to make a few comments regarding the need for this legislation, H.R. 75, Soil and Water Resources Conservation Act. Then I would like to recognize the distinguished gentleman from Texas (Mr. DE LA GARZA) the prime sponsor of this legislation.

H.R. 75 recognizes that our land and water resources are under tremendous pressure. We are still experiencing significant population growth and, in addition to a new shift in the U.S. population from urban areas back to the countryside for the first time since the days when our country was young and expanding to the West. There is pressure for increased production of food products; there is pressure for increased land to be devoted to recreation use and for protection of the environment; there is tremendous pressure from urbanization, industrialization, highways, and other development.

We also know that while urbanization tends to usurp prime agricultural lands there has been no net acreage loss devoted to agriculture because of reclamation. However, we do not know the quality of these reclaimed areas. Many of us suspect that our soil erosion problems have been getting progressively worse in recent years under intensive cultivation. While I am quite sure this is the case, we need an objective evaluation of the situation.

This bill will primarily provide us a resource appraisal which is necessary to make wise and effective decisions regarding land and water conservation. More than \$500 million is now being expended annually by the Department of Agriculture for soil and water conservation programs and, in addition, nearly \$200 million is expended annually by State and local governments. We know that the amount of money which can be expended on even this worthwhile endeavor is subject to limitations and this bill is an effort to help us coordinate our programs and decisionmaking. It will provide us with the most accurate, current and comprehensive data obtainable on the status of land and water resources.

We must remember that despite the

dedicated efforts of people involved in conservation over the past 40 years, our data base is far from complete. Our best estimates are that about only 40 percent of the Nation's cropland and 30 percent of its range and pasture lands are adequately conserved or protected. After four decades, it is time to reevaluate where we are and where we are going. This bill will provide us with the information on which we can base intelligent decisions and requires the administration to put forward a long-range program to help meet our soil and water conservation needs.

**Mr. MADIGAN.** Mr. Speaker, I yield myself such time as I may consume.

**Mr. Speaker,** I believe the following brief explanation taken from the report (No. 95-344) accompanying this bill provides a good summary of what H.R. 75 is intended to accomplish.

H.R. 75 would establish a mechanism for making long-range policy to encourage the wise and orderly development of the nation's soil and water resources. The bill—

(1) requires the Secretary of Agriculture to prepare an appraisal of the nation's soil, water, and related resources not later than December 31, 1979, and at each five-year interval thereafter during which this Act is in effect.

(2) requires the Secretary to develop a National Soil and Water Conservation Program not later than December 31, 1979, and to update it at each five-year interval thereafter during which this Act is in effect. The program is to set forth the direction for future soil and water conservation efforts of the U.S. Department of Agriculture; and shall include but not be limited to—(A) an analysis of existing Federal, State and local government authorities and adjustments needed with respect thereto; (B) an evaluation of the effectiveness of ongoing soil and water conservation programs and the progress being achieved by Federal, State and local programs and the land owners and users in meeting the conservation objectives of this Act; (C) an identification and evaluation of, and recommendations relating to, alternative methods (within alternative time frames) for the conservation, protection, environmental improvement and enhancement of soil and water resources and the extent to which they are being implemented; (D) an analysis of costs and benefits of alternative soil and water conservation practices; (E) an investigation and analysis of alternative irrigation techniques regarding their costs, benefits, and impact on soil and water conservation, crop production, and environmental factors; and (F) an analysis of the practicability, desirability, and feasibility of collecting organic waste materials from a variety of origins, treating these wastes, and transporting them to farms and rural areas where they would be used to improve soil fertility. The analysis is to include the projected costs of such a program.

(3) requires submission to Congress of the appraisal report and the program, together with a detailed statement of policy regarding soil and water conservation activities of the U.S. Department of Agriculture. The material is to be transmitted on the first day Congress convenes in 1980 and at each five-year interval thereafter during which this Act is in effect.

(4) requires that, during budget preparation for fiscal year 1982 and annually thereafter during which time this Act is in effect, the Secretary shall prepare and transmit to the Congress, through the President, an annual report evaluating the program's effectiveness in carrying out the purposes of the Act.

Mr. Speaker, this bill has been amended substantially since it was first introduced, so as to meet the objections of the Department of Justice and some of the objections of the Department of Agriculture. It is not clear if they now support the bill.

The Department of Justice, in a letter dated April 20, 1977, objected to provisions in the bill which provided for a legislative veto of policies established by the President for the Soil Conservation Service. In response to that objection, the committee amended H.R. 75 so as to eliminate the constitutional problem in the bill as viewed by the Department of Justice. Some of the USDA's amendments were adopted and others were not. I am sure that the floor manager on the other side of the aisle can state what the position of USDA is on this bill as reported by the committee.

I would like also to commend Mr. KELLY of Florida, who added a sunset provision to this bill, requiring that it be looked at again by the Congress in 1981.

This bill was reported by the committee, a quorum being present, by voice vote on May 12, 1977. It is commended to you for your serious consideration.

Mr. BAUMAN. Mr. Speaker, will the gentleman yield?

Mr. MADIGAN. I yield to the gentleman from Maryland.

Mr. BAUMAN. Mr. Speaker, in reading section 6 of the bill, it appears that the plan that is to be developed by the Department of Agriculture is to be used only as a guide to carry out soil conservation activities.

Could the gentleman tell us whether or not there was any testimony or consideration that these funds would be withheld if local landowners or State and local governments refused to cooperate in this Federal plan? In other words, is this bill a form of Federal land use planning?

Mr. MADIGAN. Mr. Speaker, it is my understanding that it is not to be used for Federal land use planning, but that is not in any way a clear understanding.

Mr. Speaker, I would yield to the gentleman from Texas (Mr. DE LA GARZA) if the gentleman would like to reply.

Mr. DE LA GARZA. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, in my area, I personally would not favor or advocate any form or manner of land use. This bill has the No. 1 prerequisite that we are doing the study, we are doing the accumulation of facts, we are doing the planning; but none of this can be implemented on any person's land, unless it is at the request of the landowner. That is the point, that it guarantees that nothing could be done on a person's land, unless it be done at the request of the landowner.

Mr. BAUMAN. Is it also the understanding of the gentleman from Texas that no soil conservation funds will be withheld as a method of force to make the landowners comply with this plan?

Mr. DE LA GARZA. I do not know that this is clearly in the legislation at all, but certainly there is no implication that this would be considered—as legis-

lative history—that there is no indication, there is no intent. In section 6(a) of the bill we say, “\* \* \* to be used as a guide in carrying out the activities of the Soil Conservation Service which assists landowners and land users, at their request, in furthering soil and water conservation.”

This would be considered as a legislative history. It would be clear that unless a landowner requests their intervention or assistance, it would not be given. I do not know that there would be any opportunity for penalties or sanctions of any kind, and certainly that is not the intent of the legislation.

Mr. BAUMAN. I thank the gentleman.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. MADIGAN. I yield to the gentleman from California.

Mr. ROUSSELOT. I appreciate the gentleman yielding to me.

I was pleased to see that this act contains a sunset provision which terminates the act on December 31, 1981. Was there much discussion on this Kelly amendment in the committee, or was there any opposition to the sunset proposal?

Mr. MADIGAN. No, there was no opposition to the amendment at all.

Mr. ROUSSELOT. I am pleased to learn that, because we had such a discussion the other day on the floor in relation to the new energy agency bill. I am glad to see various committees now automatically include this in legislation, which they present to us. I think it is a good precedent. I compliment the subcommittee chairman, the author of the bill and the others who participated in making sure that we have this sunset provision.

Since there was no opposition to it in committee, we now have firmly established the precedent and cannot be criticized for including the concept in other acts that come to the floor.

Mr. MADIGAN. I thank the gentleman from California for his contribution.

Mr. Speaker, I yield back the balance of my time.

Mr. JONES of Tennessee. Mr. Speaker, I yield such time as he may consume to my colleague, the gentleman from Texas (Mr. DE LA GARZA), who is actually the author of the bill.

Mr. DE LA GARZA. Mr. Speaker, I introduced H.R. 75, the Soil and Water Resources Conservation Act of 1977, on January 4, 1977. This bill is aimed at providing for wise and orderly planning for the conservation of our soil, water, and related resources, as well as for a sustained national effort toward that end.

The bill, H.R. 75, would establish a mechanism for making long-range policy to encourage the wise and orderly development of the Nation's soil and water resources. The bill:

First. Requires the Secretary of Agriculture to conduct an appraisal of the Nation's soil, water and related resources not later than December 31, 1979, and at each 5-year interval thereafter during which time this act is in effect.

Second. Requires the Secretary to develop a national soil and water conser-

vation program not later than December 31, 1979, and to update it at each 5-year interval thereafter during which time this act is in effect.

Third. Requires submission to Congress of the appraisal report and the program together with a detailed statement of policy regarding soil and water conservation activities of the U.S. Department of Agriculture. The material is to be transmitted on the first day the Congress convenes in 1980 and at each 5-year interval thereafter.

Fourth. Requires that, during the budget preparation for fiscal year 1982 and annually thereafter during the time this act is in effect, the Secretary shall prepare and transmit to the Congress, through the President, an annual report evaluating the program's effectiveness in carrying out the purposes of the act.

Some of the major changes recommended by the administration which were accepted by the committee included:

First. Giving the Secretary of Agriculture flexibility in administering the soil and water conservation programs of the Department.

Second. Amending the bill to comply with the administration's concern with respect to the constraints on the President's flexibility of formulating and presenting his budget.

An amendment was also adopted which inserted in the act a termination date of 1981. This was used by the author in order to give us oversight. The Senate has already passed a companion bill, S. 106.

As you recall, last year Congress passed this bill unanimously by both Houses and it was signed and then vetoed by the President. I say this because I was informed by the White House that the bill had been signed by the President which, of course, made me quite happy. Then, on the following day, I was informed the bill had been vetoed.

We appreciate very much the fact that this administration generally supports this legislation.

Finally, H.R. 75 is not, nor is it intended to be, a land use control bill. I personally oppose, and my area opposes, any form of land use legislation. Any assistance rendered by and/or through the Soil Conservation Service under this legislation must always be “at the request of the landowner.” This is what the bill says—this is the legislative intent, and that is the legislative intent of the author.

Mr. Speaker, I appreciate the able assistance of the chairman of the subcommittee, Mr. JONES, and his staff and urge my colleagues to support this very worthwhile piece of legislation which is long overdue in order that we might have, as I said at the beginning, a wise and orderly planning for the conservation of our soil, water, and related agricultural resources.

Mr. JONES of Tennessee. Mr. Speaker, I yield such time as he may consume to the gentleman from California (Mr. PANETTA).

Mr. PANETTA. Mr. Speaker, I rise in support of H.R. 75, the Soil and Water Resources Conservation Act of 1977, and

congratulate my colleagues on the Agricultural Committee for their prompt action regarding this important piece of legislation.

As a representative from the State of California, which is currently suffering severe hardships as a result of the drought in the West, I am well aware of the pressing need to have an accurate assessment of all of our available soil, water and related resources. Resource appraisal is basic to effective soil and water conservation. And in these times of serious shortages, conservation must be one of our only real alternatives. In addition, the importance of improving the quality of our resources in order to maximize what we have continues to increase. Greater demands on our soil and water resources to meet the needs of a growing population and spreading urbanization have placed our resources in the very real danger of overuse and possible depletion. We must recognize the fact that our environment can no longer be taken for granted. The quantity of our natural resources is not infinite, the quality is not constant.

The enactment by Congress of H.R. 75, which will provide for long term, comprehensive planning regarding the availability and usage of our natural resources will demonstrate that the 95th Congress is committed to new efforts in the areas of soil and water conservation, and will provide us with the information we need to evaluate the Nation's present and future resource needs.

I would like to point out two sections of the bill of which I am particularly proud since they are the result of amendments I offered in the subcommittee. Section 5(a) (5) and (6) direct the Secretary to collect data on the costs and benefits of alternative soil and water conservation practices, as well as data on alternative irrigation techniques with regard to soil and water conservation, crop production, and environmental factors. It is my belief that both provisions will greatly enhance our ability to make more informed decisions concerning the direction of conservation policy for the future.

Mr. WAMPLER. Mr. Speaker, I wish to urge my colleagues to give H.R. 75 their serious consideration. I believe there is a need for some sound planning in the area of soil and water resources. I consider that to be the case in my own State of Virginia, and I am sure it is true in many States.

For instance, more should be done in the area of cost-benefit analysis in considering alternative systems or practices involving conservation of soil and water resources.

I am disturbed that we do not know exactly what the position of the Department of Agriculture and the administration with respect to this bill as reported by the committee. Inasmuch as the Department's approval of H.R. 75 was conditioned upon the adoption of its proposed amendments—and not all of those amendments were adopted by the committee—we unfortunately do not know what the position of the Department is with respect to H.R. 75 as reported. I

should add that at least that is as I understand the situation as it rested shortly before we took this matter up on the floor. Maybe there is some late word from the administration which I am unaware of at this time.

I also wish to caution my colleagues that this is not intended to be a land use bill. Nor, in my opinion, do those of us on this side of the aisle wish to see it used or implemented in any way as Federal regulation of land use.

Fortunately, Mr. Kelly added a sunset provision to this bill in committee, which will terminate its existence December 31, 1981. In my opinion, by that time we in the House will have had an opportunity to see how this program is being administered. If it is being administered so as to benefit farmers and rural areas, I feel confident it will be extended. If it is being maladministered, the Congress will hopefully in its wisdom not extend this legislation.

Gentleman, this bill has many good features, so give it your fair and considered attention. I support it. And, I understand it is supported by the Department of Agriculture and the soil and water conservation districts in my own State of Virginia.

The SPEAKER. The question is on the motion offered by the gentleman from Tennessee (Mr. JONES) that the House suspend the rules and pass the bill H.R. 75, as amended.

The question was taken.

Mr. ROUSSELOT. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER. Pursuant to clause 3, rule XXVII, and the Chair's prior announcement, further proceedings on this vote will be postponed.

#### PERMISSION FOR SUBCOMMITTEE ON GOVERNMENT INFORMATION AND INDIVIDUAL RIGHTS OF COMMITTEE ON GOVERNMENT OPERATIONS TO SIT TODAY DURING 5-MINUTE RULE

Mr. PREYER. Mr. Speaker, I ask unanimous consent that the Subcommittee on Government Information and Individual Rights of the Committee on Government Operations be permitted to sit during the 5-minute rule today, Monday, June 6, 1977, at 2 p.m., if the House is meeting under the 5-minute rule at that time, in order to conduct an investigative hearing at which Attorney General Griffin Bell will appear.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina?

Mr. ROUSSELOT. Mr. Speaker, reserving the right to object—and I will not object—can the gentleman assure us that it is primarily for testimony by the Attorney General, and that there will be no attempts to mark up any bills of which Members do not have previous notice?

Mr. PREYER. I can assure the gentleman of that. It will be with regard to that witness, and there will be no markup.

Mr. ROUSSELOT. I thank the gentleman, and I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

#### DEFERRAL OF WHEAT REFERENDUM

Mr. FOLEY. Mr. Speaker, I move to suspend the rules and pass the Senate bill (S. 1240) to extend the time of conducting the referendum with respect to the national marketing quota for wheat for the marketing year beginning June 1, 1978.

The Clerk read as follows:

S. 1240

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 336 of the Agricultural Adjustment Act of 1938 (52 Stat. 55, as amended; 7 U.S.C. 1336) is amended by striking out the last four sentences and inserting in lieu thereof a new sentence as follows: "Notwithstanding any other provision hereof, the referendum with respect to the national marketing quota for wheat for the marketing year beginning June 1, 1978, may be conducted not later than the earlier of the following: (1) thirty days after adjournment sine die of the first session of the Ninety-fifth Congress, or (2) October 15, 1977."*

The SPEAKER. Is a second demanded?

Mr. THONE. Mr. Speaker, I demand a second.

The SPEAKER. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER. The gentleman from Washington (Mr. FOLEY) is recognized for 20 minutes, and the gentleman from Nebraska (Mr. THONE) is recognized for 20 minutes.

The Chair recognizes the gentleman from Washington (Mr. FOLEY).

Mr. FOLEY. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I bring to the House the bill (S. 1240) which would permit the Secretary of Agriculture to defer the wheat marketing quota referendum for the 1978 crop from August 1 of this year until 30 days after Congress adjourns or October 15, 1977, whichever is earlier. This bill passed the Senate by a unanimous voice vote on April 25 and was favorably reported by the Committee on Agriculture by a unanimous voice vote. The administration has urged that the Congress act promptly on the legislation. It must be enacted promptly if it is to fulfill its purpose of avoiding the cost of preparing for and conducting a national referendum which will, in all likelihood, be rendered unnecessary by omnibus farm legislation soon to come before the House.

The Agricultural Adjustment Act requires that whenever the Secretary of Agriculture determines that the total supply of wheat in the next succeeding marketing year will likely be excessive, he must proclaim that a national marketing quota for wheat shall be in effect for that year. Secretary of Agriculture Bob Bergland has determined that the total supply of wheat in the 1978 marketing year will likely be excessive; and he has proclaimed a 1978 national wheat

marketing quota of 1,905 million bushels. The Agricultural Adjustment Act also requires the Secretary, when he proclaims a national marketing quota for wheat, to conduct a referendum not later than August 1 to determine whether producers favor or oppose marketing quotas. The Department of Agriculture estimates the total cost of preparing for and conducting the referendum at over \$1 million.

Since 1965, provisions contained in periodic omnibus farm legislation have rendered it unnecessary for the Secretary to conduct this referendum. The Senate and House of Representatives are presently considering new legislation (S. 275 and H.R. 7171) for the 1978 and subsequent crops of wheat which, if enacted, will again obviate the need for a referendum. Therefore, S. 1240 is needed to permit deferral of the wheat referendum and the associated costs until after Congress acts on the pending farm legislation in this session. However, unless we act promptly the Department must begin preparations for the referendum which will be costly.

I urge my colleagues to support this legislation in order that we may save up to \$1 million which otherwise will be spent needlessly.

Mr. THONE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of S. 1240. S. 1240 would permit the wheat marketing quota referendum for the 1978 crop to be deferred until 30 days after the adjournment of Congress or October 15, 1977, whichever is earlier. Congress is presently considering new legislation which would suspend marketing quotas for the 1978 and subsequent crops.

The Senate has passed a farm bill, S. 275, and the House undoubtedly will take up its version of the farm bill (H.R. 7171) in July.

If the new legislation suspending marketing quotas is enacted, a referendum would not be required. It is, therefore, in the interest of economy and only logical that S. 1240, which would defer the referendum, be passed by the House.

This bill is strongly recommended for enactment by the Department of Agriculture. According to the Congressional Budget Office and the Department of Agriculture, a minimum of \$85,000 would be saved if this bill is enacted into law, and it could result in a much more significant cost saving of \$977,000 if S. 1240 is not enacted or unnecessarily delayed; inasmuch as a costly referendum could be held which would be made meaningless by the enactment of the farm bill.

The bill was unanimously reported by voice vote by the committee on May 23, 1977.

I urge your support of S. 1240.

Mr. FOLEY. Mr. Speaker, I yield myself 2 additional minutes.

Mr. Speaker, I would like to make one other point. First of all, however, I want to thank the gentleman from Nebraska (Mr. THONE) and members of the minority who have cooperated fully in

bringing this matter to the floor of the House promptly. This action is urgently required for the economy and to avoid the expenditure of unnecessary funds.

Mr. Speaker, I do want to make clear for the record that in the remote and most implausible situation that we do not enact farm legislation which would carry the deferral forward, this bill, S. 1240, does not remove the authority to conduct the wheat referendum, but would merely extend it to a later time, either October 15 or the time of the sine die adjournment of the 95th Congress, 1st session.

Mr. WAMPLER. Mr. Speaker, it is a distinct pleasure to speak in support of, and urge House passage of, S. 1240—a bill to extend the time of conducting the referendum with respect to the national marketing quota for wheat for the marketing year beginning June 1, 1978. I say this because we seldom have an opportunity to vote to save nearly \$1 million on the taxpayers' money.

H.R. 7171, the omnibus farm bill reported by the House Committee on Agriculture and scheduled for consideration later this month or early in July, would suspend wheat marketing quotas and eliminate the need for a referendum such as that deferred by S. 1240. Thus, I strongly recommend that this bill be passed, for I believe it will avoid a waste of \$1 million by the Federal Government if this bill is enacted into law.

Since the other body has already acted, S. 1240 can be promptly forwarded to the President for his signature if the House will act on it favorably today.

The SPEAKER. The question is on the motion offered by the gentleman from Washington (Mr. FOLEY) that the House suspend the rules and pass the Senate bill S. 1240.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the Senate bill was passed.

A motion to reconsider was laid on the table.

#### GENERAL LEAVE

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the Senate bill just passed.

The SPEAKER. Is there objection to the request of the gentleman from Washington?

There was no objection.

#### FEDERAL ENERGY ADMINISTRATION AUTHORIZATION ACT OF 1977

Mr. DINGELL. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 6794) to amend the Federal Energy Administration Act of 1974 to extend the duration of authorities under such act, to authorize appropriations for the Federal Energy Administration for the 1978 fiscal year, and for other purposes.

The Clerk read as follows:

H.R. 6794

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

#### SHORT TITLE

SECTION 1. This Act may be cited as the "Federal Energy Administration Authorization Act of 1977".

GENERAL AUTHORIZATION OF APPROPRIATIONS  
SEC. 2. Section 29 of the Federal Energy Administration Act of 1974 (15 U.S.C. 761 note) is amended to read as follows:

#### "AUTHORIZATION OF APPROPRIATIONS

"SEC. 29. (a) There are authorized to be appropriated to the Federal Energy Administration the following sums:

"(1) subject to the restrictions specified in subsection (b), to carry out the functions identified as assigned to Executive Direction and Administration of the Federal Energy Administration as of January 1, 1977—

"(A) for the fiscal year ending September 30, 1977, not to exceed \$35,627,000; and  
"(B) for the fiscal year ending September 30, 1978, not to exceed \$41,017,000.

"(2) to carry out the functions identified as assigned to the Office of Energy Information and Analysis as of January 1, 1977—

"(A) for the fiscal year ending September 30, 1977, not to exceed \$34,971,000; and  
"(B) for the fiscal year ending September 30, 1978, not to exceed \$43,544,000.

"(3) to carry out the functions identified as assigned to the Office of Regulatory Programs as of January 1, 1977—

"(A) for the fiscal year ending September 30, 1977, not to exceed \$62,459,000; and  
"(B) for the fiscal year ending September 30, 1978, not to exceed \$62,459,000.

"(4) to carry out the functions identified as assigned to the Office of Conservation and Environment as of January 1, 1977 (other than functions described in part A and part D of title IV of the Energy Conservation and Production Act, parts B and C of title III of the Energy Policy and Conservation Act and, for the fiscal year ending September 30, 1977, functions described in title II of the Energy Conservation and Production Act and in paragraph (7) of this subsection)—

"(A) for the fiscal year ending September 30, 1977, not to exceed \$38,603,000; and

"(B) for the fiscal year ending September 30, 1978, not to exceed \$46,908,000.

"(5) to carry out the functions identified as assigned to the Office of Energy Resource Development as of January 1, 1977—

"(A) for the fiscal year ending September 30, 1977, not to exceed \$16,934,000; and

"(B) for the fiscal year ending September 30, 1978, not to exceed \$26,017,000.

"(6) to carry out the functions identified as assigned to the Office of International Energy Affairs as of January 1, 1977—

"(A) for the fiscal year ending September 30, 1977, not to exceed \$1,921,000; and

"(B) for the fiscal year ending September 30, 1978, not to exceed \$1,846,000.

"(7) subject to the restriction specified in subsection (c), to carry out a program to develop the policies, plans, implementation strategies, and program definitions for promoting accelerated utilization and widespread commercialization of solar energy and to provide overall coordination of Federal solar energy commercialization activities, for the fiscal year ending September 30, 1977, not to exceed \$2,500,000.

"(8) for the purpose of permitting public use of the Project Independence Evaluation System pursuant to section 31 of this Act, not to exceed the aggregate amount of the fees estimated to be charged for such use.

"(b) The following restrictions shall apply

to the authorization of appropriations specified in paragraph (1) of subsection (a)—

"(1) amounts to carry out the functions identified as assigned to the Office of Communication and Public Affairs as of January 1, 1977, shall not exceed \$2,112,000 for the fiscal year ending September 30, 1977; and

"(2) no amounts authorized to be appropriated in such paragraph may be used to carry out the functions identified as assigned to the Office of Nuclear Affairs as of January 1, 1976.

"(c) No amounts authorized to be appropriated in paragraphs (5) (B) and (7) of subsection (a) may be used to carry out solar energy research, development, or demonstration activities.

"(d) Subject to the provisions of any other law enacted after the date of the enactment of this subsection, if any function for which funds are authorized to be appropriated by this section is transferred by or pursuant to any such provision of law to any department, agency, or office, the unexpended balances of appropriations, authorizations, allocations, and other funds, held, used, arising from, available to, or to be made available in connection with such function shall be transferred to such department, agency, or office, but shall continue to be subject to any restriction to which they were subject before such transfer."

#### ENERGY CONSERVATION PROGRAM FOR CONSUMER PRODUCTS OTHER THAN AUTOMOBILES

SEC. 3. (a) Section 339(c)(2) of the Energy Policy and Conservation Act (42 U.S.C. 6309(c)(2)) is amended by striking out "\$700,000" and inserting in lieu thereof "\$2,500,000".

(b) Section 339(c)(3) of the Energy Policy and Conservation Act (42 U.S.C. 6309(c)(3)) is amended by striking out "\$700,000" and inserting in lieu thereof "\$1,800,000".

#### STRATEGIC PETROLEUM RESERVE

SEC. 4. Section 166 of the Energy Policy and Conservation Act (42 U.S.C. 6246) is amended by striking out "and" at the end of paragraph (1), by striking out the period in paragraph (2) and inserting in lieu thereof "; and", and by adding at the end thereof the following new paragraph:

"(3) such funds for the fiscal year ending September 30, 1978, not to exceed \$500,000,000, as are necessary to permit the acquisition and storage of petroleum products in the Strategic Petroleum Reserve, in accordance with the storage schedule set forth in the Strategic Petroleum Reserve Plan then in effect in excess of the minimum volume specified in section 154(a), but not in excess of 500,000,000 barrels."

#### ENERGY CONSERVATION AND RENEWABLE-RESOURCE OBLIGATION GUARANTEES

SEC. 5. Section 451(g) of the Energy Conservation and Production Act (42 U.S.C. 6881(g)) is amended by adding at the end thereof the following new paragraph:

"(3) There is authorized to be appropriated to carry out the provisions of this part, including administrative costs, but not for the payment of amounts to be paid under subsection (f)—

"(A) for the fiscal year ending September 30, 1977, not to exceed \$1,836,000; and

"(B) for the fiscal year ending September 30, 1978, not to exceed \$4,950,000."

#### FEDERAL ENERGY ADMINISTRATION ACT EXTENSION

SEC. 6. The second sentence of section 30 of the Federal Energy Administration Act of 1974 (15 U.S.C. 761 note) is amended to read as follows: "This Act shall terminate September 30, 1978."

#### EXTENSION OF COAL CONVERSION AND ALLOCATION AUTHORITY

SEC. 7. Paragraph (1) of section 2(f) of the Energy Supply and Environmental Co-

ordination Act of 1974 (15 U.S.C. 792(f)(1)) is amended by striking out "shall expire at midnight, June 30, 1977" and inserting in lieu thereof "shall expire at midnight, December 31, 1978".

#### AUTHORITY AND RESPONSIBILITY OF GENERAL COUNSEL

SEC. 8. Section 7 of the Federal Energy Administration Act of 1974 (15 U.S.C. 766) is amended by adding at the end thereof the following new subsection:

"(1) Effective beginning July 1, 1977, amounts authorized to be appropriated under this Act or any other Act shall not be available for the payment of salaries and other expenses with respect to any office of regional counsel of the Administration unless such office is under the direct supervision and control of the General Counsel of the Administration."

#### USE OF COMMERCIAL STANDARDS

SEC. 9. Part A of the Federal Energy Administration Act of 1974 (15 U.S.C. 761 et seq.) is amended by adding at the end thereof the following new section:

##### "USE OF COMMERCIAL STANDARDS"

"SEC. 32. (a) If any proposed rule by the Administrator contains any commercial standards, or specifically authorizes or requires the use of any such standards, then any general notice of the proposed rule-making shall—

"(1) identify, by name, the organization which promulgated such standards; and

"(2) state whether or not, in the judgment of the Administrator, such organization complied with the requirements of subsection (b) in the promulgation of such standards.

"(b) An organization complies with the requirements of this subsection in promulgating any commercial standards if—

"(1) it gives interested persons adequate notice of the proposed promulgation of the standards and an opportunity to participate in the promulgation process through the presentation of their views in hearings or meetings which are open to the public;

"(2) the membership of the organization at the time of the promulgation of the standards is sufficiently balanced so as to allow for the effective representation of all interested persons;

"(3) before promulgating such standards, it makes available to the public any records of proceedings of the organization, and any documents, letters, memorandums, and materials, relating to such standards; and

"(4) it has procedures allowing interested persons to—

"(A) obtain a reconsideration of any action taken by the organization relating to the promulgation of such standards, and

"(B) obtain a review of the standards (including a review of the basis or adequacy of such standards).

"(c) The Administrator shall not incorporate within any rule, nor prescribe any rule specifically authorizing or requiring the use of, any commercial standards unless he has consulted with the Attorney General and the Chairman of the Federal Trade Commission concerning the impact of such standards on competition and neither such individual recommends against such incorporation or use.

"(d) The foregoing provisions of this section shall not apply with respect to rules prescribed by the Administrator which relate to the procurement activities of the Administration.

"(e) Not later than 90 days after the date of the enactment of this section, the Administrator shall prescribe, by rule, guidelines or criteria which set forth the extent to which, and the terms and conditions under

which, employees of the Administration may participate in their official capacity in the activities of any organization (which is not a Federal entity) which relate to the promulgation of commercial standards. Such guidelines and criteria may allow for such participation if it is in the public interest and relates to the purposes of this Act, but in no event may such employees who are participating in their official capacity be allowed under such guidelines or criteria to vote on any matter relating to commercial standards.

"(f) As used in this section, the term 'commercial standards' means—

"(1) specifications of materials;

"(2) methods of testing;

"(3) criteria for adequate performance or operation;

"(4) model codes;

"(5) classification of components;

"(6) delineation of procedures or definition of terms;

"(7) measurement of quantity or quality for evaluating or referring to materials, products, systems, services, or practices; or

"(8) similar rules, procedures, requirements, or standards;

which are promulgated by any organization which is not a Federal entity. For purposes of the preceding sentence, any revision by any such organization of any such rule, procedure, requirement, or standard shall be considered to be the same as the promulgation of such standard."

#### CONFLICT OF INTEREST

SEC. 10. Part A of the Federal Energy Administration Act of 1974 (15 U.S.C. 761 et seq.), as amended by this Act, is amended by adding at the end thereof the following:

##### "ORGANIZATIONAL CONFLICTS"

"SEC. 33. (a) The Administrator shall, by rule, require any person proposing to enter into a contract, agreement, or other arrangement, whether by competitive bid or negotiation, under this Act or any other law administered by him for the conduct of research, development, evaluation activities, or for technical and management support services, to provide the Administrator, prior to entering into any such contract, agreement, or arrangement, with all relevant information, as determined by the Administrator, bearing on whether that person has a possible conflict of interest with respect to—

"(1) being able to render impartial, technically sound, or objective assistance or advice in light of other activities or relationships with other persons, or

"(2) being given an unfair competitive advantage. Such person shall insure, in accordance with regulations prescribed by the Administrator, compliance with this section by any subcontractor (other than a supply subcontractor) of such person in the case of any subcontract of more than \$10,000.

"(b) The Administrator shall not enter into any such contract, agreement, or arrangement unless he finds, after evaluating all information provided under subsection (a) and any other information otherwise available to him that—

"(1) it is unlikely that a conflict of interest would exist, or

"(2) such conflict has been avoided after appropriate conditions have been included in such contract, agreement, or arrangement;

except that if he determines that such conflict of interest exists and that such conflict of interest cannot be avoided by including appropriate conditions therein, the Administrator may enter into such contract, agreement, or arrangement, if he determines that it is in the best interests of the United States to do so and includes appropriate conditions

in such contract, agreement, or arrangement to mitigate such conflict.

"(c) The Administrator shall publish rules for the implementation of this section, in accordance with section 553 of title 5, United States Code (without regard to subsection (a) (2) thereof) as soon as practicable after the date of the enactment of this section, but in no event later than 120 days after such date."

The SPEAKER. Is a second demanded? Mr. BROWN of Ohio, Mr. Speaker, I demand a second.

The SPEAKER. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER. The gentleman from Michigan (Mr. DINGELL) will be recognized for 20 minutes, and the gentleman from Ohio (Mr. BROWN) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Michigan (Mr. DINGELL).

Mr. DINGELL. Mr. Speaker, I yield myself 4 minutes.

Mr. Speaker, the measure we take up this afternoon, the Federal Energy Administration Authorization Act of 1977, is a multipurpose act to accomplish several objectives:

It will extend the duration of the FEA Authorization Act of 1974 from its present expiration date of June 30, 1977 until September 30, 1978; it will extend section 2(f) of the Energy Supply and Environmental Coordination Act of 1974—that is, those provisions to bring about mandatory conversion of certain energy facilities from natural gas and oil to coal; it will authorize the appropriations needed by the FEA in fiscal year 1978 and supplementally for the remainder of fiscal year 1977; and it will authorize the acquisition and storage of additional petroleum products for the strategic petroleum reserve.

In addition, the act seeks to improve the operation of the FEA in three key areas: It provides a new section in the law designed to identify whether conflicts by FEA contractors and subcontractors exist or are likely to exist; it imposes limits on the powers of FEA regional counsels who until recently have been inclined to act with virtual autonomy; and it sets forth a general policy for the FEA concerning the development and use of industry-developed commercial standards.

The authorization of funds for the FEA has been increased by 10 percent over that requested by the administration. This was designed to provide flexibility to the FEA during any reorganization resulting from its inclusion in the proposed Department of Energy—which the House of Representatives approved last week. The increase will also provide adequate funds for a pay raise should one be approved for this coming October.

The authorization contained in this legislation for the next fiscal year is \$1,443,000—a rather large sum, as these matters go. The bulk of this authorization, however, represents funds designated to acquire crude oil for the strategic reserve program. These funds, \$1,210,000 in all, are required to build this

program up from the level of 150 million barrels to 250 million barrels by the end of the next calendar year. The administration has sent up its proposed amendment to the strategic reserve program to accelerate the acquisition of crude oil, and I have heard no one suggest that this is not a timely and appropriate action. Enactment of this legislation will bring us a long stride in the direction of accomplishing this desirable objective.

In summary, this bill which was unanimously approved by the full committee not only provides the funds for the operation of the FEA in fiscal years 1977 and 1978, it also proposes improvements in the FEA programs and provides for its integration into the Department of Energy, when and as that Department is created.

Mr. BROWN of Ohio. Mr. Speaker, I yield myself 4 minutes.

Mr. Speaker, I rise in support of H.R. 6794, the FEA Authorization Act of 1977. This bill is one of the few noncontroversial measures reported by the Energy and Power Subcommittee.

The legislation contains five major provisions. First, the bill provides \$221 million in operational funds for the FEA for fiscal year 1978. Second, the bill authorizes \$500 million for fiscal year 1978 for the acquisition and storage of oil supplies in order to fill the strategic petroleum reserve established under the Energy Policy and Conservation Act, EPCA. Third, H.R. 6794 extends the FEA until September 1, 1978, in case the Department of Energy bill should not become law. Fourth, the coal conversion authority under the Energy Supply and Environmental Coordination Act, ESECA, is extended through December 31, 1978. Presently, the authority of the FEA Administrator to order conversion of major fuel burning installations from natural gas or oil to coal would expire on June 30, 1977.

Finally, section 9 of H.R. 6794 provides that if the FEA uses any commercial standard developed by a private organization in any proposed rule, the FEA must identify the organization promulgating the standard and state whether the organization complied with certain procedures enumerated in section 9(b) in establishing the standard. Such procedures include that the organization provide an opportunity for interested parties to participate in the development of the standards prior to the decision by the organization on the standards, and that the organization's membership be balanced as to allow for participation from within by "interested parties." The FEA may use such standards, even if the procedures of section 9(b) were not used by the private organization.

Although I support this legislation, I feel obligated to point out to my colleagues two provisions of some concern. First, the \$221 million authorization for operations is \$39 million more than the administration requested. The justification given for the increase is that it would provide flexibility for: First, the presumed incorporation of the FEA into the proposed Department of Energy; and

second, the cost-of-living pay increase for Federal employees due in October. Although providing such flexibility should eliminate the need for a supplemental authorization for the FEA and thus simplify the appropriations process for the FEA, it is my hope that the Appropriations Committee and the Members of the House will scrutinize closely the need for the additional sum of money.

Second, the section 9 provisions on commercial standards development raises the potential that private organizations might be deterred from establishing self-governing commercial standards. Currently, several organizations in the energy field provide a useful public service by self-policing their respective industries through the establishment and observation of health, safety, and efficiency standards. To the extent that section 9 restrains private organizations from establishing their own standards, the public is the loser.

Although I am somewhat concerned about these two matters, I nevertheless support this legislation and urge my colleagues to vote for its passage.

Mr. DINGELL. Mr. Speaker, I yield myself 1 additional minute.

Mr. Speaker, counsel has just advised me that I misspoke myself, and I have a unanimous consent request at this time, with respect to which I have just advised the minority.

I ask unanimous consent that the figure at page 6, line 13, be changed from "\$500,000,000" to "\$1,210,000,000".

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

Mr. BROWN of Ohio. Reserving the right to object, Mr. Speaker, the reason for that change, as I understand, is because the administration would like to enlarge the purchases for the strategic energy reserve; is that correct?

Mr. DINGELL. Mr. Speaker, if the gentleman will yield, the gentleman is totally correct.

Mr. BROWN of Ohio. The petroleum reserve, is that correct?

Mr. DINGELL. The answer to that question is, "yes," the gentleman is entirely correct.

Mr. BROWN of Ohio. And as I understand, the further reason is that we must authorize that money even though it may not be expended until after the new fiscal year begins in order for the administration to write contracts for the purchase of that petroleum, even though it may not have to pay for the petroleum until later, when the contract is fulfilled; is that not correct?

Mr. DINGELL. Mr. Speaker, will the gentleman yield?

Mr. BROWN of Ohio. I am happy to yield to the gentleman from Michigan.

Mr. DINGELL. Mr. Speaker, the answer to the question posed by the gentleman from Ohio (Mr. BROWN) is "Yes." The gentleman is correct. That is precisely the reason that this is done.

Mr. BROWN of Ohio. Might I say further that I believe it is in our national

interest to fill that strategic petroleum reserve as early as possible for two reasons: First, the petroleum is unlikely to be any less expensive in the future, so we may be getting as many gallons of oil for our dollar as can be gotten at any time. Second, the sooner we have that strategic petroleum reserve filled the better off we will be to deal with any possible embargo or loss of supply from the foreign imports that, unfortunately, the country has grown extremely dependent upon, exceeding 45 percent of our total crude in the United States.

Mr. DINGELL. If the gentleman from Ohio will yield still further, the answer to that question again is yes. The gentleman from Ohio is entirely correct. And that is precisely the reason therefor.

Mr. BROWN of Ohio. Finally, Mr. Speaker, I might say that I understand that the gentleman from Michigan, the chairman of our subcommittee, Mr. DINGELL, and I, as the ranking minority member, and the gentleman from West Virginia (Mr. SLACK), the chairman of the full committee, were not apprised of the desire of the administration to expand its purchases for the strategic petroleum reserve until after the legislation had cleared the subcommittee on energy and power and had cleared the full committee, and that the gentleman from Michigan (Mr. DINGELL) is circulating a letter to the members of the Committee on Interstate and Foreign Commerce asking any member, should they object, to contact the staff, and to do so before we came to the floor with this legislation under suspension of the rules. I would assume that the gentleman from Michigan has received no such objections.

Mr. DINGELL. Mr. Speaker, will the gentleman yield further?

Mr. BROWN of Ohio. I will be glad to yield further to the gentleman from Michigan.

Mr. DINGELL. Mr. Speaker, the answer is that the gentleman from Ohio is again correct. A copy of the letter the gentleman referred to will be offered for the record under unanimous consent at the appropriate time. The gentleman from Michigan does advise the gentleman from Ohio that I have received no objection, and further I wish to state that this is urgently necessary to correct the problem we found with regard to the failure of the administration to submit the information with regard to their real needs of completing the strategic petroleum reserve in a timely fashion, and the gentleman from Ohio is again correct.

Mr. SYMMS. Mr. Speaker, will the gentleman yield?

Mr. BROWN of Ohio. I yield to the gentleman from Idaho.

Mr. SYMMS. Mr. Speaker, I would ask the gentleman from Ohio (Mr. BROWN) if it is a fact that, in other words, the information that the House has before it is wrong by nearly half a billion dollars; is that correct?

Mr. BROWN of Ohio. The information

which the House now has before it is accurate. The information which was printed in the bill, as I understand, is not correct, because, as we have tried to explain, the administration asked for the modification after the legislation had passed the subcommittee and the full committee.

Mr. SYMMS. Will the gentleman yield further?

Mr. BROWN of Ohio. I will be glad to yield further to the gentleman from Idaho.

Mr. SYMMS. In other words, on page 6, line 13, where it says: "not to exceed \$500,000,000."

That is being changed to \$1½ billion; is that correct?

Mr. DINGELL. Mr. Speaker, if the gentleman from Ohio will yield, I believe the figure is \$1,210,000,000.

Mr. SYMMS. The information that has been published to the Members is that we are passing a bill out that is supposed to be somewhere in the neighborhood of \$700 million, or close to \$800 million, and that really that is inaccurate?

Mr. BROWN of Ohio. The information is not inaccurate with reference to the legislation as it came from the full committee. The unanimous consent request was made by the gentleman from Michigan, and, under the reservation of objection, through which we are now discussing the matter, in order to modify the legislation in such a way that it can reflect the request of the administration for going ahead with the contracts for purchases for the strategic petroleum reserve, which Congress had previously approved, but to do it early, so that we can save money through those purchases, and, second, get this strategic petroleum reserve in place as soon as possible.

Mr. SYMMS. Mr. Speaker, will the gentleman yield further?

Mr. BROWN of Ohio. I yield to the gentleman from Idaho.

Mr. SYMMS. I thank the gentleman for yielding.

In other words, we are amending the legislation here under a Suspension Calendar; are we not?

Mr. BROWN of Ohio. Under the unanimous consent request of the gentleman from Michigan (Mr. DINGELL)—assuming we get unanimous consent—the legislation would be modified to the extent described, and the money, of course, would have to be appropriated for the purpose of the early contracts, and the expenditures which would have to be made in connection with those contracts by the Committee on Appropriations.

Mr. STAGGERS. Mr. Speaker, will the gentleman yield?

Mr. BROWN of Ohio. I yield to the chairman of the full committee, the gentleman from West Virginia (Mr. STAGGERS).

Mr. STAGGERS. I thank the gentleman for yielding.

I have listened to the gentleman's explanation. I think he was very accurate and fair in his explanation of the bill.

Mr. Speaker, today the House of Rep-

resentatives considers legislative action to provide funding for the Federal Energy Administration for fiscal year 1978. The bill before us, which was unanimously approved by the Committee on Interstate and Foreign Commerce, addresses a number of issues relating to the FEA budget.

These issues include moneys for the administration's requested increase in the strategic petroleum reserve program; extension of the Federal Energy Administration Act of 1974, authorization of appropriations for the FEA programs in fiscal year 1978; extension of section 2 (f) of the Energy Supply and Environmental Coordination Act of 1974; and added provisions for the improvement of FEA program management.

Additionally, this legislation will establish an increased authorization for the strategic petroleum reserve. These funds have been requested by the FEA for the purpose of acquiring petroleum products in order to increase the volume of the reserves from the presently authorized 150 million barrels to 250 million barrels by December 1978.

I urge prompt passage of this legislation in order that the FEA can continue its present plans and programs.

Mr. BROWN of Ohio. Mr. Speaker, I think one other point should be made clear which we have not made clear in this discussion on the reservation, and that is that the Federal Energy Administration submitted Energy Action 12 some weeks ago which had the veto provision for the House of Representatives to prohibit its going into effect. That veto provision has not yet been exercised by the House, and is unlikely to be exercised. Energy Action 12 provides for the accelerated purchase of petroleum for the strategic petroleum reserves. So what we are faced with is that the subdivision of Energy Action 12 came after the legislation was passed out of the Committee on Interstate and Foreign Commerce. So we have been in kind of a Catch 22 situation here, and the way to deal with it, it was felt, in the most expeditious way and with the least printing and with the least time taken for the House of Representatives to have scheduled debate, and so forth, was the vehicle elected by the gentleman from Michigan (Mr. DINGELL); that is, to circulate a letter to the Committee on Interstate and Foreign Commerce, and then to ask for unanimous consent under this provision today.

Mr. STAGGERS. Mr. Speaker, will the gentleman yield once more?

Mr. BROWN of Ohio. I yield to the gentleman from West Virginia.

Mr. STAGGERS. I would like to commend the gentleman from Ohio, especially for his complete, detailed explanation of this question. I think it is very sensible, and I urge the House to pass this bill because I think it is urgently needed and will save this country a lot of money.

Mr. VOLKMER. Mr. Speaker, will the gentleman yield?

Mr. BROWN of Ohio. I yield to the gentleman from Missouri.

Mr. VOLKMER. I thank the gentleman for yielding.

I would like to inquire of either of the two gentlemen here, in the first place—since I am not a member of the committee and know very little about it, but we are talking about a little bit of money here—is this foreign oil or domestic oil?

Mr. BROWN of Ohio. I yield to the gentleman from Michigan (Mr. DINGELL) for a response.

Mr. DINGELL. I thank the gentleman for yielding.

The answer is that it will probably be foreign oil, since any additional oil which comes into the country will be procured from abroad; and since we are authorizing a very large additional acquisition of oil by this country for the purpose of completing our strategic oil storage program to protect our Nation against cut off of oil supplies from abroad, it will have to be foreign oil. But the way it will be done, if the gentleman from Ohio will permit me, will be by the issuance of additional entitlements overall so that the cost to the taxpayer will be at about the prevailing rates of all the different categories of oil which are being sold in the United States.

Mr. BROWN of Ohio. If I may reclaim my time, I will say to the gentleman from Michigan I think that modifies the response he gave to some extent that it will probably be both foreign and domestic oil on the basis that the price will come out to be in effect the composite price which is now being paid.

So I think if Members want to know what the oil is physically, it may very well be that it is both foreign and domestic oil which will be purchased for this purpose of filling up the strategic oil reserves, so we will have them in case we either get embargoes or have our foreign supplies shut off.

Mr. VOLKMER. This will be crude which is just put in domes or cavities somewhere and stored?

Mr. BROWN of Ohio. It will be stored in the event we face a national emergency of some sort.

Mr. VOLKMER. Where will it be stored?

Mr. DINGELL. Mr. Speaker, if the gentleman will yield, it will be stored in salt domes which are presently being located.

Mr. BROWN of Ohio. I think most of those salt domes are in the State of Louisiana.

Mr. VOLKMER. I thank the gentleman very much.

Mr. BROWN of Ohio. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

Mr. SYMMS. Mr. Speaker, reserving the right to object, I would like to address the committee and point out here we are in the House asked to add \$1 billion when only within the last month in my district in Caldwell, Idaho, the FEA officials have been there harassing the local petroleum jobbers, and accus-

ing them of hoarding oil products in order to fill up their supply tanks in order to be ahead of the game in case there should be a shortage of oil products in the future. So on the one hand we are saying that we will take \$1 billion of the taxpayers' money to store petroleum, and do it by unanimous consent on the floor of the House without even having the Representatives have a chance to vote on it and then the FEA is harassing the people in our districts for trying to do the same thing—store oil—without using the Government's money, so, for that reason I object.

The SPEAKER. Objection is heard.

#### PARLIAMENTARY INQUIRY

Mr. BROWN of Ohio. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. BROWN of Ohio. Mr. Speaker, as I understand it, the gentleman from Michigan is constrained by the rules of the House from offering an amendment to the legislation before us. Would it be in order for the suspension legislation to be withdrawn and resubmitted with the new figure?

The SPEAKER. That can be done only by unanimous consent, since a second has been ordered.

Mr. BROWN of Ohio. That could be done by unanimous consent, Mr. Speaker.

The SPEAKER. By unanimous consent.

Mr. DINGELL. Mr. Speaker, I ask unanimous consent that I be permitted to withdraw the motion.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

Mr. SYMMS. Mr. Speaker, I object.

The SPEAKER. The Chair hears objection from the gentleman from Idaho.

The question is on the motion offered by the gentleman from Michigan (Mr. DINGELL) that the House suspend the rules and pass the bill H.R. 6794.

The question was taken.

Mr. SYMMS. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER. Pursuant to the provisions of clause 3(b) or rule XXVII, and prior announcement of the Chair, further proceedings on this motion will be postponed.

#### AMENDING TITLE 4 OF THE UNITED STATES CODE TO MAKE IT CLEAR THAT MEMBERS OF CONGRESS MAY NOT, FOR PURPOSES OF STATE INCOME TAX LAWS, BE TREATED AS RESIDENTS OF ANY STATE OTHER THAN THE STATE FROM WHICH THEY WERE ELECTED

Mr. DANIELSON. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 6893) to amend title 4 of the United States Code to make it clear that Members of Congress may not, for purposes of State income tax laws, be treated as residents of any State other

than the State from which they were elected.

The Clerk read as follows:

H.R. 6893

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) chapter 4 of title 4 of the United States Code is amended by adding at the end thereof the following new section:*

"§ 113. Residence of Members of Congress for State income tax laws

"(a) No State, or political subdivision thereof, in which a Member of Congress maintains a place of abode for purposes of attending sessions of Congress may, for purposes of any income tax (as defined in section 110(c) of this title) levied by such State or political subdivision thereof—

"(1) treat such Member as a resident or domiciliary of such State or political subdivision thereof; or

"(2) treat any compensation paid by the United States to such Member as income for services performed within, or from sources within, such State or political subdivision thereof,

unless such Member represents such State or a district in such State.

"(b) For purposes of subsection (a)—

"(1) the term 'Member of Congress' includes the delegates from the District of Columbia, Guam, and the Virgin Islands, and the Resident Commissioner from Puerto Rico; and

"(2) the term 'State' includes the District of Columbia."

(b) The table of sections for such chapter 4 is amended by adding at the end thereof the following new item:

"113. Residence of Members of Congress for State income tax laws."

The SPEAKER. Is a second demanded?

Mr. KINDNESS. Mr. Speaker, I demand a second.

Mr. BAUMAN. Mr. Speaker, may I inquire is the gentleman from Ohio opposed to the legislation?

Mr. KINDNESS. I am, Mr. Speaker.

The SPEAKER. The gentleman from Ohio qualifies.

Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER. The gentleman from California (Mr. DANIELSON) and the gentleman from Ohio (Mr. KINDNESS) will be recognized for 20 minutes each.

The Chair now recognizes the gentleman from California (Mr. DANIELSON).

Mr. DANIELSON. Mr. Speaker, the bill, H.R. 6893, is designed to take care of an inequity in the imposition of State income tax upon certain Members of Congress.

The bill is very simple and in its operating portion simply reads:

No State, or political subdivision thereof in which a Member of Congress maintains a place of abode for purposes of attending sessions of Congress may, for purposes of any income tax (as defined in section 110(c) of this title) levied by such State or political subdivision thereof—

"(1) treat such Member as a resident or domiciliary of such State or political subdivision thereof; or

"(2) treat any compensation paid by the United States to such Member as income for

services performed within, or from sources within, such State or political subdivision thereof, unless such Member represents such State or a district in such State.

Mr. Speaker, the thrust of this bill very specifically would relate to the current situation in which the State of Maryland is wont to impose an income tax upon the congressional salaries of Members of Congress who maintain a place of abode in the State of Maryland while they are attending sessions of the Congress.

I want to point out that the important difference here is this: Members of Congress are required by the Constitution to be inhabitants of the State from which they are elected. This is a constitutional and fundamental requirement which cannot be ignored. It is a practical and obvious matter that people from far reaches of the United States who are elected to the Congress to represent their districts here must establish and maintain a place of abode somewhere in the vicinity of Washington in order to be available for the daily sessions of the Congress and to meet their constitutional responsibilities as Members of Congress.

I want to point out that in doing so they do not give up their domicile or place of residence or their home State or the district in which they are elected. They may not do so under the Constitution, as I see it. As a practical matter, they could not do so, or they would not be returned to Congress.

The law is eminently clear that a person does not lose his domicile simply because he moves for some temporary reason. The domicile remains the same as it was before the move, unless he couples the move with an intent permanently to remain away from his original domicile.

The definition of the word "residence" is an extension upon the domicile and often applies to a person who spends 6 months or more in other than his place of domicile.

In my opinion, and in that of my colleagues, it is clear that an abode, which is an even more temporary residence, is certainly not a domicile and does not qualify as such, but happens to be the place in which from necessity a person must sometimes abide, such as a Member of Congress must have an abode near Washington in order to discharge his duties as a Member of Congress.

Now, there is an offset under the Maryland law, it is true. Maryland provides that if one has to pay income tax within the State of Maryland, it may offset against it the amount of any income tax paid to the State of his original residence. However, that does not cover the entire amount of the tax. For example, in the State of Maryland, counties and local governments have an income tax which is included along with and collected by the State of Maryland and no offset is allowed for this county-type of income tax.

I would like to point out also, Mr. Speaker, that there is ample precedent in the law to support the equitable position which will be brought into being by

this bill. For example, in 1942, responding to the needs of our country, the Congress passed and the President signed the Soldiers and Sailors Civil Relief Act of 1942, which is still in full force and effect. It has been amended from time to time, but it is still in full force and effect.

The Soldiers' and Sailors' Civil Relief Act provides that a member of the military services is not to be deemed to have lost a residence or domicile in any State, territory, possession, or in their political subdivisions, or in the District of Columbia solely by reason of being absent therefrom in compliance with military or naval orders. It further provides that a serviceman shall not be deemed for taxation purposes to have acquired a residence or domicile or to have become a resident in any other State, territory, possession, or political subdivision or in the District of Columbia solely by reason of being absent on that basis from his original residence or domicile.

That law was sustained by the United States Supreme Court in the case of *Dameron v. Brodhead*, 345 U.S. 322, in the year 1953. The statement of the Court in that case observed that the provisions of the Soldiers' and Sailors' Civil Relief Act do not affect the above powers of the States to tax. However, the Court pointed out that the statute merely states that the taxable domicile of servicemen is not to be changed by military assignments. The Court explicitly stated that in so providing, the statute represented activity within the Federal power.

I respectfully submit, Mr. Speaker, that the constitutional necessity of Members of Congress to attend the Congress in Washington during the sessions of the Congress is exactly parallel to that cited in the Soldiers' and Sailors' Civil Relief Act. I urge strongly that the bill be adopted.

I want to point out that it is inconsistent, as well as unfair, to characterize a Member of Congress as a resident for tax purposes of another jurisdiction simply because a Member of Congress is required to be present within Washington during the sessions of the Congress.

Mr. Speaker, the bill H.R. 6893 would add a new section 113 to title 4 of the United States Code concerning the incidence of State income tax laws on Members of Congress and providing that such taxes may not be levied against such a Member as a "resident" or "domiciliary" of a State in which he maintains a place of abode away from his home State for the purpose of attending sessions of Congress nor in such an instance shall his congressional salary be treated "as income for service performed within, or from sources within such State or political subdivision thereof".

Accordingly, Mr. Speaker, the bill provides that no State or its political subdivision in which a Member of Congress maintains a place of abode for purposes of attending sessions of Congress may for State or subdivision income tax purposes treat the Member as a resident or domiciliary or treat any income paid by the United States as income for services

performed within or from sources within that State or political subdivision thereof unless such Member represents such State or a district of such State. The District of Columbia is included since the term "State" is defined as including the District of Columbia.

The bill also provides equal treatment for Delegates from the District of Columbia, Guam, and the Virgin Islands and the Resident Commissioner from Puerto Rico.

In order to attend the sessions of the Congress, Members of Congress who reside in States other than those neighboring Washington, D.C., must maintain an abode near the U.S. Capitol. This, of course, is in the Washington metropolitan area and this means the District of Columbia and adjoining areas in Virginia and Maryland.

The bill would provide for a uniform statutory standard to be applied to Members of Congress who must attend sessions of Congress and maintain a place of abode in the Washington area. While the incidence of income tax is not uniform due to differing tax laws this bill would settle the question. It is in fact consistent with the provisions presently contained in the laws of Virginia and the District of Columbia which provide an exemption to Members of Congress from State or District income taxes. (D.C. Code § 47-1551c, Virginia Code, sec. 58-151(e) (1) (i).) The District of Columbia Code exempts from the term "resident" "any elective officer of the Government of the United States \* \* \*" and a similar exclusion applies to the term "employee."

The Maryland law contains no such exclusion and provides for an income tax on substantially all income of "residents" of Maryland as defined in its income tax law.

The enactment of this bill will provide for uniform tax treatment of Members in this situation. It is expressly provided that it will not affect the tax obligations of Members who maintain places of abode in States or districts which they represent in Congress.

The effect of the provisions of this bill would be very similar to that that has been provided for years to servicemen under the Soldiers' and Sailors' Civil Relief Act. Section 514 of that act was added to the law by section 17 of the act of October 6, 1942 (56 Stat. 777) and was again amended in 1944 and 1962, which is classified to the United States Code as section 574 of title 50, appendix, provides that for purposes of taxation, a member of the military services is not to be deemed to have lost a residence or domicile in any State, territory, possession, or in their political subdivisions, or in the District of Columbia solely by reason of being absent therefrom in compliance with military or naval orders.

It is further provided that a serviceman shall not be deemed for taxation purposes to have acquired a residence or domicile or to have become a resident in any other State, territory, possession, or political subdivision or in the District of Columbia solely by reason of being absent on that basis from his original residence or domicile. It is also expressly provided

in the Soldiers' and Sailors' Civil Relief Act of 1940 that the serviceman's compensation for military or naval service is not to be deemed income for service performed within or from sources within the other State, territory, possession, or district. These provisions of the Soldiers' and Sailors' Civil Relief Act concerning residence for tax purposes were considered by the Supreme Court in the case of *Dameron v. Brodhead*, 345 U.S. 322 (1953). The Court upheld the right of a member of the Air Force assigned to duty in Colorado to assert his residence in Louisiana as a bar to tax liability for State taxes in Colorado. The statement of the Court in that case observed that the provisions of the Soldiers' and Sailors' Civil Relief Act do not affect the above powers of the States to tax. The Court pointed out that the statute merely states that the taxable domicile of servicemen is not to be changed by military assignments. The Court explicitly stated that in so providing, the statute represented activity within the Federal power.

Clearly, this is what the bill, H.R. 6893, would provide for Members of Congress. It provides that when an individual is elected to serve in the Congress and his duties require his attendance in Washington to attend the sessions of Congress and to discharge his responsibilities as an elected Representative of a State or a district within a State, the Member shall not be held to have acquired a new residence for tax purposes under a State other than the State from which he was elected. This, of course, would only apply during his term of office. Here again, the case of *Dameron* against *Brodhead* is instructive because the Court in that case noted that similar provisions of the Soldiers' and Sailors' Civil Relief Act "saved the sole right of taxation to the State of original residence." The Court further noted that other than this, the statute does not alter the benefits and burdens of our system of dual federalism during the individual's service. This bill, H.R. 6893, provides for such an effect in that it makes it clear that the Member will not be relieved of his tax obligations as regards the State from which the Member was elected.

In order to discharge the constitutionally required duties of a Member of Congress, most Members must maintain abodes away from their home States. As a representative of people in his home State, he must maintain continuous contact with those people and periodically stand for election as a resident of his State. It is inconsistent as well as unfair to characterize him as a resident for tax purposes of another jurisdiction because of his required presence in the Washington area.

The Congress is more than a Federal agency or instrumentality in that it is a Federal branch of the Government created by the Constitution. The Constitution provides that the Senate and House are to be composed of Members elected by the people of the several States. In the last Congress, the Senate report noted that it is possible that a tax on the

incomes of Senators and Representatives could be interpreted as a tax on the Congress. It could also be noted that the threat of multiple taxation of this sort could be a very real deterrent to service in the Congress to those who might seek election as well as to those already elected. The bill provides a realistic and balanced means to meet the problem. In the language of the case of *Dameron* against *Brodhead*, it saves the sole right of taxation to the State of the Member's residence, that is the State from which the Member is elected.

In view of the circumstances referred to above, the committee recommends that the bill be considered favorably.

Mr. BAUMAN. Mr. Speaker, will the gentleman yield for a question?

Mr. DANIELSON. I yield to the gentleman from Maryland.

Mr. BAUMAN. Aside from the general argument—in which the gentleman might get some differing opinions from Maryland Members—at this time a number of requests for payment have been made by the comptroller of the State of Maryland to Members of Congress who still maintain their residences in the State—temporary residences, as the gentleman would say. Is it the gentleman's understanding that if this legislation is enacted in its present form, all these pending requests for payment will be in fact null and void, and therefore it has a retroactive effect if it is passed?

Mr. DANIELSON. The question of retroactive effect is not covered by the express language of the bill. Being somewhat familiar with the manner in which our courts arrive at decisions, I am reluctant to state what the effect of the bill would be beyond the four corners of the bill itself. The bill does not contain retroactive language, per se.

Mr. BAUMAN. But there have been no actual judicial proceedings filed regarding any of these claims. I think they are all in the form of letter requests for payment on back taxes. I would assume, if this is enacted into Federal law, that none of these legal actions would lie on the part of the State.

Mr. DANIELSON. I am sure the gentleman's assumption will appear in the Record.

Mr. BAUMAN. I am not endorsing the bill; I am just asking a question.

Mr. DANIELSON. I do not know the answer to that, but I can state positively that there is no per se retroactive language in the bill.

Mr. RHODES. Mr. Speaker, will the gentleman yield?

Mr. DANIELSON. I yield to the distinguished minority leader.

Mr. RHODES. I wonder if the gentleman from California would agree with me, however, that the thrust of the bill is to define the status of Members of Congress, and the definition of the status is not the definition only today, but the definition as it would have been a week ago or a month ago or 10 years ago. In other words, this is actually an interpretation of the status that Members have always had under the Constitution. Is that a correct statement?

Mr. DANIELSON. I fully endorse the minority leader's position. What we are trying to do is to clear up an ambiguity here, and to emphasize that our compulsory change of place of abode when we come to Washington does not change our residence; it does not change our domicile; it does not fly in the face of the constitutional requirement that Members of Congress must be inhabitants of the State from which they are elected.

Mr. KINDNESS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, last year there was very little debate, actually, on a comparable measure which reached the House floor on July 20, 1976. There were some constructive suggestions made as alternatives to this sort of approach, however. One of the most obvious actions that might be taken by a Member of Congress living in the State of Maryland, rather than voting for the passage of this measure, would be to move out of the State of Maryland. However, that is an incomplete statement of the subject.

Mr. RHODES. Mr. Speaker, will the gentleman yield at that point?

Mr. KINDNESS. I yield to the gentleman from Arizona (Mr. RHODES).

Mr. RHODES. I thank the gentleman for yielding.

Mr. Speaker, as a Member who lives in Maryland, I have thought of that alternative. But would not the gentleman agree with me that if this legislation fails and Maryland does actually go ahead and takes whatever legal steps are necessary to tax the income of Members of Congress, that actually the pressure on the State of Virginia and the District of Columbia to do the same would probably be well nigh irresistible?

Certainly if I were a member of the legislature of the State of Virginia, and Maryland was taxing income of Members of Congress who have homes in that State, I as a member of the legislature of the State of Virginia would certainly do my best to make sure that Virginia taxed that income. So are we not really in fact talking about all of the Members of the House of Representatives when we discuss this legislation?

Mr. KINDNESS. The distinguished minority leader states the very point I was about to make next, as a matter of fact. We are faced with the problem—and that is a very good point that was made—of what would happen in other jurisdictions were this type of legislation not to be enacted. But nonetheless, we have a question here of whether it is a poor exercise of the State's legislative discretion, if you will, to attempt to tax the earnings of people who do not actually have a residence within their State. Such poor exercise of legislative judgment on the part of the State of Maryland, however, does not, it seems to me, give to the Congress of the United States an appropriate basis for creating a special class of citizens abiding within the State of Maryland.

As was pointed out in the veto message of President Ford, dated August 3, 1976, for the bill that was passed by both

Houses in the last Congress, Senate 2447, the President stated at that time:

However, it is one thing for a taxing jurisdiction voluntarily to exempt Members of Congress from its income tax laws and quite another for Congress to mandate a Federal exemption on a State income tax system. I believe such Federal interference is particularly objectionable where, as is the case in Maryland, a portion of the income tax is collected on behalf of counties to pay for local public services which all residents use and enjoy.

That brings me back to "residence" or "abiding." And in fact there is not a very good historical basis for taxing place of abode, that is, taxing income earned by somebody who maintains a place of abode in a particular State or jurisdiction. That is where the poor tax policy on the part of the State of Maryland arises, perhaps; but, nevertheless, that is their jurisdiction to determine and not the jurisdiction of the legislative branch of the Federal Government.

I would, therefore, urge, as I urged on July 20, 1976, we oppose the passage of this measure. There are alternatives which could be considered, one of which, of course, would be for Congress to afford relief, under the Federal income tax law, for the added burden created by States, such as the State of Maryland, on the basis of abode.

Mr. RONCALIO. Mr. Speaker, will the gentleman yield?

Mr. KINDNESS. I yield to the gentleman from Wyoming (Mr. RONCALIO).

Mr. RONCALIO. Mr. Speaker, I have been following the debate and I had not planned to participate, except when I heard the gentleman state Maryland may feel a justification for taxing earned income of a Member because he partakes of services required to live there. My wife and I paid the State of Virginia just under \$30,000 in property taxes in the last 6 years.

Is that tax not morally levied against property owners for one family homes so it may be used for services offered to citizens who live there? Does that not pay the fee for fire and police protection, without having also the burden of taxes levied upon my income?

Mr. KINDNESS. Mr. Speaker, I appreciate the gentleman's comments, and I can only say that the gentleman points out the frustration of taxpayers all over the United States who feel that paying income taxes and property taxes at the Federal, State, and local levels is an unfair tax burden, and that the total tax burden is far too great. We here in the Congress have more to do with the reason for that frustration than any other legislative body at the State or local levels.

We have allowed the tax burden on the American taxpayer to become so great, through the double process of inflation and the progressive scale of income tax rates, that all over the country people are saying to themselves, "Gee, my property taxes are too high in combination with the burden the Federal Government places on me."

So I certainly understand the point the gentleman is making. But there are

two types of taxes involved, a property tax and an income tax. Everyone else living in Virginia pays a property tax, too, and if the State of Virginia chose to try to enact an income tax on Members of Congress, that would add to the burden.

Mr. RONCALIO. Mr. Speaker, the gentleman, of course, recognizes that if we make a Member of Congress a resident of Virginia or a resident of Maryland, he can no longer serve in the Congress. I am a resident of the State of Wyoming, and it has been long established that any Member must be a resident of the State he represents. We cannot refute the Constitution.

Mr. KINDNESS. Mr. Speaker, the gentleman misunderstands what the position of the State of Maryland is. The State of Maryland does not call Members of Congress residents; it refers to Members of Congress as having a place of abode, or abiding, in the State of Maryland. That is where the rub comes in.

Mr. BAUMAN. Mr. Speaker, will the gentleman yield?

Mr. KINDNESS. I yield to the gentleman from Maryland.

Mr. BAUMAN. Mr. Speaker, I just want to say to the gentleman from Ohio (Mr. KINDNESS) that I concur in his opposition to the legislation.

In the gentleman's remarks he referred to the legislation as creating a special class of citizens. It is a special-interest bill in the sense that it does exempt from income tax the 100 or more Members who live in Maryland.

The gentleman correctly states the position that the Legislature of Maryland is the forum in which the exemption should have been granted. Far be it from me, having served in that legislature for 3 years, to ever attempt to defend the actions of the Legislature of Maryland one way or the other.

I will say, however, that since the Maryland General Assembly has not made a policy decision to give an income tax exemption to Members of Congress, it seems wrong for this Congress to arrogate that function unto itself. In fact, with the current sessions of Congress running all year, many of the Members who live in Maryland do use the many services provided by county governments and the State government. The State makes a claim on income simply to finance those services, and it allows reciprocity with other States that levy the same types of taxes in a Member's home State.

What this bill does do in a certain number of cases, as I understand it, is to prevent some Members from having to pay any income tax because their own States do not have an income tax.

So, Mr. Speaker, I do think as a matter of equity we ought to allow this decision on taxation to be made by the State of Maryland, as the gentleman has indicated, and we should not do it here in Congress where many Members stand to benefit from this bill.

Mr. JOHNSON of Colorado. Mr. Speaker, will the gentleman yield?

Mr. KINDNESS. I yield to the gentleman from Colorado.

Mr. JOHNSON of Colorado. Mr. Speaker, as the gentleman knows, there are some States that do not have reciprocity with the State of Maryland. I believe Arizona is one, and Colorado is another one.

There used to be a fine Republican principle that was contained in the statement, "Taxation without representation is reprehensible."

It seems to me the gentleman is adopting the position that those of us who do not have the right to participate in Maryland politics, because we are residents of other States, are still subject to the tax imposed by taxing authorities under laws of the State of Maryland, and it does not seem to me, all constitutional principles aside, that those of us who are precluded from participating in the politics of the State of Maryland—I might say, thankfully so, in my own case—are denied representation.

Mr. Speaker, this is a principle that the gentleman from Ohio (Mr. KINDNESS) ought to consider before he opposes this legislation.

Mr. KINDNESS. Mr. Speaker, I would like to say to the gentleman that I have considered it.

Mr. BAUMAN. Mr. Speaker, will the gentleman yield for a response?

Mr. KINDNESS. I yield to the gentleman from Maryland.

Mr. BAUMAN. Mr. Speaker, I will say to the gentleman from Colorado (Mr. JOHNSON) that I do not know in what jurisdiction he lives, but indeed he is doubly represented. He has his own able representation through his vote, and if he tells me where he lives, I will tell him in private whether his Maryland political representation is able or not.

Mr. BROWN of Ohio. Mr. Speaker, will the gentleman yield?

Mr. KINDNESS. I yield to the gentleman from Ohio.

Mr. BROWN of Ohio. Mr. Speaker, I might say to the gentleman from Maryland (Mr. BAUMAN) that his argument that we use the services of the great State of Maryland in our homes in Maryland and do not pay for those services adequately through the rather immense property taxes that we pay in Maryland, and that we should pay an additional tax, tends to persuade me as a Member of this Congress that since there are Maryland residents who come into the city of Washington, D.C. and use the public highways and facilities of this city, perhaps the commuter tax makes sense after all. Perhaps we should tax those commuters who come in from Maryland so as to support the city of Washington and the District of Columbia.

Is that what the gentleman of Maryland is trying to persuade me to vote for?

Mr. BAUMAN. If the gentleman will yield, Mr. Speaker, I do not support a commuter tax but if the gentleman is willing to vote for a bigger tax on his own salary so that the District of Columbia can also tax him as a commuter from Ohio that is fine with me; but equity would require that Congressmen

get no special treatment by the District of Columbia or Maryland.

Mr. BROWN of Ohio. Mr. Speaker, could I ask the gentleman from Maryland (Mr. BAUMAN) if that is what he is trying to persuade me to vote for?

Mr. BAUMAN. The gentleman from Maryland would never really try to persuade the able gentleman from Ohio because he does not possess the considerable power required to do that.

Mr. BROWN of Ohio. Mr. Speaker, if I could persuade the gentleman from Maryland, perhaps I could get him to back off from his position.

Mr. KINDNESS. Mr. Speaker, if I might reclaim my time, I believe the debate is deteriorating at this point.

Mr. Speaker, I would again urge the Members of the House to reject this concept on the same basis on which it was vetoed by the then President Ford on August 3 of 1976, because it does deal with a special classification or categorization of Members of Congress in derogation of the principle of States' rights, which, I would point out to the gentleman from Colorado, has long been a very acceptable concept to Republicans also.

Mr. Speaker, I think those of us on the minority side of the aisle have both of those considerations to take into account. Therefore, I would urge that it is more important for us to maintain a balance between the Federal Government and the States, each having its appropriate place, even though the States might exercise their judgment in a way that seems very unpleasant to those of us who are here and subject to the consequences.

Mr. Speaker, I have no further requests for time on this side.

Mr. DANIELSON. Mr. Speaker, I yield 2 minutes to the gentleman from Wyoming (Mr. RONCALIO).

Mr. RONCALIO. Mr. Speaker, I thank the gentleman for yielding.

I suppose that tomorrow we will again find items in both of Washington's newspapers about the special perquisites of Members of Congress.

Mr. Speaker, I am reminded of the comment of Tom Rees, one of our former Members, last week in the Washington Star about how he misses the so-called "perks" he had up here as a Member.

Mr. Speaker, all too often we are faulted for so-called "perquisites," but we actually suffer a 7-day work burden damn rarely attributed to us by the so-called advocacy journalism of today.

Mr. Speaker, what right does Virginia have to tax my salary when I am compelled to live there in order to fulfill my constitutional duties to the people of Wyoming?

Virginia and Maryland should thank the Creator for the existence of the Federal largesse which makes for such a high quality of life for so many of America's people in the Washington metropolitan area.

Mr. Speaker, for 1 year recently I was the chairman of the Subcommittee on Public Buildings and Grounds. There was rarely a week that went by without some entity of Maryland, Baltimore, or Ger-

mantown or some place else in Maryland asking for a site for another multi-million-dollar building for another Federal payroll located some place in Maryland.

Mr. Speaker, in exasperation I would like to see the Capital moved to some place like Colorado one of these years. That would take care of the Maryland and Virginia tax problem.

Mr. JOHNSON of Colorado. Mr. Speaker, will the gentleman yield?

Mr. DANIELSON. I yield to the gentleman from Colorado.

Mr. JOHNSON of Colorado. Mr. Speaker, I want to say that Colorado probably does not want the Federal Capital out there. Perhaps Wyoming does, but I do not want the gentleman from Wyoming (Mr. RONCALIO) foisting it on Colorado.

Mr. DANIELSON. Mr. Speaker, I want the gentleman from Colorado (Mr. JOHNSON) to know that we are thinking of moving social security out to Colorado.

Mr. Speaker, to prevent any misconception, this bill does not, will not, and cannot absolve any Member of Congress from paying income tax in his own State. Nobody is relieved of the obligation of paying income tax. The only thing anyone will be relieved of is the obligation of paying it in some States of which they are not a domiciliary.

Mr. MAZZOLI. Mr. Speaker I rise in opposition to H.R. 6893.

Less than 1 year ago on July 20, 1976, the House passed an identical measure that had already passed the other body. On that day I managed to persuade only 83 of my colleagues to join me in opposing the bill. I hope to be more successful today.

In an article on June 15, 1976, the Wall Street Journal noted the quiet progress of last year's bill through the House and characterized it as one of those "self-serving actions" that, despite the scandals, are the real cause of our low esteem in the eyes of the general public.

Further, there is a cynical attitude abroad in the land to the effect that once the "heat dies down" the code of ethics and our other hard-won reforms will fall into disuse. Enactment of this bill can only serve to fuel that cynical attitude.

Currently, this bill would only affect the Members who reside in Maryland. In a gesture of southern hospitality, the State of Virginia has exempted Members by its own actions. In a somewhat different gesture, the Congress has written District of Columbia tax laws to "protect" Members who reside in the District.

Some have argued that this legislation is needed to prevent double taxation of Members of Congress who must live in Maryland when Congress is in session while maintaining a residence in their home State.

I will point out, however, that the State of Maryland has reciprocity arrangements with many other States so that a Member of Congress receives a credit on his Maryland income tax obligation for the income tax that is paid in other States.

As for Members of Congress who come

from States that have not established reciprocity with Maryland, special efforts should be made to develop such reciprocity agreements between the two States. The problem is not properly addressed by legislation that would establish a special class of residents of Maryland and exempt this class from all State and local income taxation.

The SPEAKER pro tempore (Mr. McFALL). The question is on the motion offered by the gentleman from California (Mr. DANIELSON) that the House suspend the rules and pass the bill H.R. 6893.

The question was taken.

Mr. BAUMAN. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 3 of rule XXVII, and the Chair's prior announcement, further proceedings on this motion will be postponed.

#### GENERAL LEAVE

Mr. DANIELSON. Mr. Speaker, I ask unanimous consent that I may be permitted to revise and extend my remarks in addition to the comments heretofore made, and further, Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just under consideration, H.R. 6893.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

#### TO EXTEND THE TIME FOR COMMENCING ACTIONS ON BEHALF OF AN INDIAN TRIBE, BAND, OR GROUP

Mr. DANIELSON. Mr. Speaker, I move to suspend the rules and pass the Senate bill S 1377 to extend the time for commencing actions on behalf of an Indian tribe, band, or group, which is at the Speaker's desk, which is an identical bill in every respect to H.R. 5023.

The Clerk read as follows:

S. 1377

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled That (a) the third proviso in section 2415 a of title 28 United States Code is amended by deleting the words "more than eleven years after the right of action accrued" therein, and substituting the words "after December 31, 1981" in their place

(b) The proviso in section 2415 b of title 28 United States Code is amended by deleting the words "within eleven years after the right of action accrues" therein, and substituting the words "on or before December 31, 1981" in their place

The SPEAKER pro tempore. Is a second demanded?

Mr. COHEN. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from California (Mr. DANIELSON) and the gentleman from Maine (Mr. COHEN) will be recognized for 20 minutes each.

The Chair recognizes the gentleman from California (Mr. DANIELSON).

Mr. DANIELSON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, in the course of this debate, if I should mention H.R. 5023 instead of S. 1377, I hope all of the Members will realize that I really am referring to the Senate bill, inasmuch as they are identical.

Mr. Speaker, under one provision of title 28, United States Code, back in 1966, a law was passed which provided a 6-year statute of limitations for actions brought by the United States on behalf of Indian tribes and other Indian groups with respect to money claims which they might have against various States and persons. In 1972, as that first statute of limitations was about to expire, the Congress passed an extension extending that statute of limitation for, in effect, another 5 years. Those 5 years would expire on July 18 of this year, 6 weeks from now.

Mr. Speaker, the bill before us, S. 1377, extends that period of limitation until December 31, 1981, 4 years from the end of the present calendar year. That is all that the bill does within its four corners. It is a rather tremendously important bill and I beg that my colleagues will listen carefully to the debate hereon.

Mr. Speaker, at the present time there are pending quite a large number of lawsuits in which Indian tribes and groups assert a claim or claims to money damages arising out of many aspects of our coexistence here in the United States since the founding of our Nation.

The bill before us I wish to point out, first of all, relates only to money damages. This bill does not relate to actions involving title to real estate, except incidentally, but the incidental effect is rather broad.

Among actions for money damage would be actions for money damage resulting from trespass and, in those situations in which it is deemed that trespass occur, of course the title of the person asserting the action is in issue because there can be no trespass if you do not have some type of proprietary right to the land on which trespass is being made.

It is quite important that we take action on this bill and do it immediately. The reason is simply this: With only 6 weeks remaining in the period of limitations, I am informed, and I believe and I therefore assert that there is a vast number of lawsuits which are about to be launched, and which counsel would have to file within the next 6 weeks if this period of limitation is not extended. On the other hand, if there is an extension of the period of limitations, there will be adequate time for the persons concerned to negotiate, debate, and work out their respective claims and, hopefully, to resolve these claims without the need for expensive, protracted, and sometimes unnecessary lawsuits.

I should like to point out in addition that the previous administration of President Ford was cognizant of this problem, and the present administration of President Carter is also very well aware of it. President Carter has appointed a Judge Gunther of Georgia to act as a sort of mediator, to try to negotiate these claims and to prevent them from becoming items of protracted, bitter, expensive, and unpredictable litigation. He cannot possibly complete his work and his report to the President and have some type of action taken on it before July 18, 1977. Therefore, it is critical that this period of limitations be extended.

Mr. Speaker, I reserve the remainder of my time.

Mr. COHEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of S. 1377, which would extend the statute of limitations on actions for money damages brought by the United States, in its capacity as trustee, on behalf of Indian tribes, bands, or other Indian groups (28 U.S.C. 2415 (a); (b)). These claims may be based either upon contract or tort liability, and must have accrued prior to July 18, 1966.

This legislation is of particular importance to my constituents, and indeed all the citizens of the State of Maine. This is so because, included among the eligible claims affected by this statute are those currently being asserted by the Passamaquoddy and Penobscot Tribes against Maine and its residents. The scope of the original claims made by these two tribes is staggering—some 12.5 million acres of land in the central and northern portions of the State, covering some 60 percent of Maine's total land area. They charge that their ancestors transferred the disputed land under 1794 treaties that were never actually ratified by the Congress. Thus, they say, those transactions are void and valid title still rests with the Indian tribes.

Over 350,000 citizens of Maine reside within the area originally claimed by the Passamaquoddy and Penobscot, with its estimated value exceeding \$20 billion. While it now appears certain that the extent of these claims will be reduced somewhat, estimates are that even the revised claims will cover some 5 to 8 million acres and directly affect some 75,000 to 90,000 residents of Maine.

What is the significance of H.R. 5023, in the context of all this? When this general statute of limitations was first enacted in 1966, it had long been presupposed that the trust relationship it reflects—between the United States and certain Indian tribes—did not apply to Indians located within the Original Thirteen States. Then, in 1975, the U.S. District Court for the District of Maine decided that the Indian Nonintercourse Act of 1970 gave rise to the same "special trust relationship" with respect to the Passamaquoddy, and other similarly situated eastern tribes. *Joint Tribal Council of the Passamaquoddy Tribe, et*

*al. v. Morton*, 388 F. Supp. 619, 663 (1975).

Pursuant to the exercise of that trust responsibility, the Solicitor of the Interior Department has since recommended that the Justice Department file suit on behalf of the two Indian tribes under 28 U.S.C. section 2415. So, unless the statute of limitations is extended, the Justice Department would be required to file such a suit against the State of Maine by July 18, 1977. While such an action is legally logical in the face of an evaporating statute of limitations, it would be "premature" in the context of the informal, private negotiations now going on.

Due to the unique nature of this problem and in response to requests from some of the affected parties, President Carter appointed a former Georgia Supreme Court justice, William Gunter, as his special representative to study the problem and make recommendations with regard to a settlement. Most of the affected parties feel that it would be unfortunate if the suit was filed by the United States against Maine. Prior to the completion of these negotiations, Judge Gunter has indicated that he expects to have a proposal ready later this month or, at the latest, early July. His ability to bring about a settlement acceptable to all the parties should not be wittingly, or unwittingly, undercut.

So, the passage of H.R. 5023 would have a direct and important impact on the Maine situation. By removing a July 18, 1977, deadline, it would allow time for a fair and equitable resolution of these claims to be worked out, through uninterrupted private negotiation. Furthermore, if H.R. 5023 is passed, the United States might well avoid long, tedious, and expensive litigation: litigation which faces the possible prospect of a congressional reversal following its completion. In short, H.R. 5023 would eliminate the necessity of the Justice Department filing a suit before the President's special representative has had an opportunity to propose a possible settlement.

If the statute of limitations is not extended, on the other hand, then the Justice Department will have no choice but to file a suit on behalf of these Indians against the State of Maine. In fact, if the statute is not extended and the Justice Department failed to sue, then the United States would be the most likely to be subject to liability for breach of trust.

The mere filing of such a suit could have a disastrous impact on the economic and social fabric of the State of Maine. The deep uncertainty already raised by these Indian claims could easily be translated into total chaos, if the United States takes such a formal action. Both the State and local units of government will have extreme difficulties in selling bonds and otherwise raising revenue for needed capital improvements and carrying on the everyday business of government. Banks, would no longer be willing to finance home loans or mortgages. Investment and commercial development,

already arrested, will virtually come to a halt. Title to all the property in the claimed area would become indefinitely clouded, thereby preventing the orderly sale or transfer of property by individuals whose sole major investment is their own home. New homebuilding and the entire construction industry will be adversely affected, with all the usual recurring impact on unemployment levels.

So, a further extension of the statute of limitations is urged by both the Justice Department and the Department of the Interior. As introduced, H.R. 5023 would have extended the limitations period an additional 10 years. However, based upon administration recommendations, the Judiciary Committee amended the bill to limit the extension period to December 31, 1981. On May 27, the Senate passed its version (S. 1377) of this measure, containing this same amendment, and thereby reducing the extension period to 4½ years.

One final point—S. 1377 is obviously not a final, long-term solution to the problems of Indian claims, whether in Maine or elsewhere. Rather, its passage will alleviate a form of procedural pressure which now overhangs the situation in my State and impedes progress toward a settlement. And definite resolution of that situation will await a final decision by Congress. Hopefully, the President's special representative will recommend a solution acceptable to all sides. But it is Congress that ultimately will have to approve the terms of any settlement.

Indian claims such as those asserted by the Passamaquoddy and Penobscot are based on "aboriginal title." Their rights to these lands are ancient but, nevertheless, are limited. They are, at best, the "beneficial owners" of lands held by the United States. There is no question but that the Congress of the United States has the right to extinguish aboriginal title, *Tee-Hit-Ton Indians v. United States*, 348 U.S. 272 (1954); *Johnson v. McIntosh*, 21 U.S. (8 Wheat.) 54 (1823). I do not suggest this as the sole means of settlement, but it should be recognized that this power might be utilized as one element of an overall settlement. As an alternative, it is also clear from caselaw, that the Congress has the power to retroactively ratify the treaties in question. See: *Seneca Nation of Indians v. United States*, 173 Ct. Cl. 912 (1965). But any equitable, fair solution of this problem should also recognize the rights of the Indians. The Maine delegation has introduced legislation (H.R. 4169) which, while extinguishing the claims of the Passamaquoddy and Penobscot Tribes to lands within the boundaries of the State of Maine, also preserves their legal rights to seek monetary compensation either in the courts or through a negotiated settlement.

I would emphasize that this is not a problem limited solely to Maine. The manner in which Congress approaches this situation should be from a national perspective. H.R. 5023 is only a beginning in the process of dealing with Indian claims, but it is a valid and needed precedent.

Mr. KINDNESS. Mr. Speaker, will the gentleman yield?

Mr. COHEN. I yield to the gentleman from Ohio.

Mr. KINDNESS. Mr. Speaker, I thank the gentleman from Maine for yielding.

Mr. Speaker, I associate myself with the gentleman's remarks and particularly with those relating to the procedures by which the bill comes before the House under a suspension of the rules. There had originally been expressed before the committee and the subcommittee the hope, including that of the gentleman speaking now, that there would be opportunity for an amendment on the House floor as to the date of the extension. It does seem a bit long and increases the time of exposure to additional lawsuits by, I believe, an unnecessarily long period of time.

Mr. FOLEY. Mr. Speaker, will the gentleman yield?

Mr. COHEN. I yield to the gentleman from Washington.

Mr. FOLEY. Mr. Speaker, I thank the gentleman and I think the gentleman can suggest to the House an easy procedure by which appropriate amendments can be considered to this bill as they should be. That can be done by the very simple and proper expedient of defeating the bill on suspension. Such an action would not in any way prohibit the Committee on the Judiciary from seeking a rule in the normal manner to bring the bill back to the House under a rule with opportunity for amendment. I agree with the gentleman that the bill excessively extends the statute of limitations and I hope they will help to bring about a "no" vote so that this bill can be handled in the usual manner under a rule.

Mr. DANIELSON. Mr. Chairman, I yield 2 minutes to the gentleman from Oklahoma (Mr. RISENHOOVER).

Mr. RISENHOOVER. Mr. Speaker, H.R. 5023 simply extends for 4½ years the time that Indians—and the Government which holds their trust—have to file claims concerning land which Indians once owned.

In a lawful and orderly fashion, our courts have considered scores of claims by thousands of Indians. Yet, there may be more than 1,000 such cases which still deserve a day in court. This bill gives the Interior and Justice Departments more time to provide opportunity for review of these unresolved cases.

In my original bill, I sought an additional 21 years to make certain that our Government had fully considered all Indian land claims—many which date back to the 18th and 19th centuries.

However, the Committee on the Judiciary—in its timely and wise review of the situation—was told by the administration that all of the cases could be processed by the end of 1981. Therefore, the compromise deadline was struck and future Congresses can decide if more time is needed after 1981.

The need for the 4½ year extension is dramatized by the question of ownership of the Arkansas River Bed and banks in Oklahoma.

Recently, the U.S. Supreme Court held that the Arkansas River from Muskogee,

Oklahoma to the Arkansas border is owned by the Cherokee, Chickasaw, and Choctaw Nations. However, to date, the claim of ownership of the same Arkansas River bed and banks upstream from Muskogee to the Kansas border has not even been filed with the courts.

I am told that the latter claim—which involves the Kaw, Ponca, Otoe, Pawnee, Osage, and Creek Indians—may not finally be prepared by the Interior Department and presented to Justice for filing within the next year. If the statute of limitations—the July 18 deadline—is not extended, our Government will have failed to keep the trust of these Indians. Surely, if we owe court review to the Cherokees, Chickasaws, and Choctaw—then the same right should be accorded those Indians upstream.

In this—and those 1,000 other cases—failure to enact this bill would be a simple matter of justice denied; of trust betrayed.

You may ask: Why have not these issues been previously resolved?

I can tell they are complicated and costly cases to prepare. Frankly, in years past, the Bureau of Indian Affairs and Interior Department have not had the necessary funds and manpower to fill their trust responsibilities. In recent years, Congress has been increasingly generous and responsive in providing funds. Additionally, many tribes only recently have become aware of their tort and contract remedies. However, the leaders of the six groups of Indians claiming ownership of the Arkansas River from Muskogee to Kansas tell me that money appropriated this fiscal year to prepare their case has been tied up for 8 months by the bureaucracy. Certainly, that money should be released and the case should come to point. And I use this forum to urge immediate forward action by the BIA.

This bill, H.R. 5023, does not address the merit of this or any of these cases. The issue of payment for trespass should and will, rightfully, be decided by our courts. Beyond question, each and every Indian with a reasonable claim to their ancestral land should have the matter considered and, if there is adequate merit to the claim, they should enjoy judicial review.

Therefore, failure to enact this bill would permanently deprive thousands of Indians such consideration—something that has already been accorded to thousands of other Indians in the past. I believe in equal protection under the law. In a large sense, I salute our Government and our courts for acting to redress old wrongs which Indians suffered. Today, we have an opportunity to make certain that all of these matters are fully aired and that meritorious claims have ample time for court review.

Most respectfully and firmly, I urge my colleagues to approve this legislation and ask that the other body and the President join our affirmative action with the sensitivity and dispatch which we now are taking.

Mr. DANIELSON. Mr. Speaker, I yield such time as he may consume, up to 8

minutes, to the gentleman from Washington (Mr. FOLEY).

Mr. FOLEY. Mr. Speaker, it is my belief that some of the most significant legal and constitutional issues which this or any other Congress has faced, will soon be before us. It will be the consideration of the issues raised by a multitude of Indian claims against the United States, against the States, and against individuals in support of alleged treaty and other obligations.

Mr. Speaker, I think we must soon show some willingness to look at the essential problem—to not continue to defer it through extending the statute of limitations. Indian tribes are the only groups in the United States that can have claims brought, centuries after those claims originally arose. They are the only entities in the United States that can sue the United States itself, simultaneously have the United States sue itself in its fiduciary capacity on behalf of the tribes and have the United States defend itself against the suit.

What the proposal asks for today is the extension of the authority of the United States to bring claims on behalf of Indians for another 4 years. In 1966, a term of 6 years was placed upon that authority. It was subsequently extended again for a total of 11 years. We are now faced with a request for another 4-year extension. I confidently predict that if this bill is passed that in December of 1981, or before, the Committee on the Judiciary will have another 4-year extension for us, if not a 21-year extension, as the gentleman from Oklahoma (Mr. RISENHOOVER) just indicated that he favors.

The question might be raised whether the United States should be continuing this antique aspect of a wardship with respect to representing tribal claims. Indian tribes have shown sufficient expertise and capacity to file and prosecute claims. They do it daily. It seems to me a rather strange circumstance for the United States to be throwing its full weight against the State of Maine or some other State trying to defend itself against what would be considered ridiculously exaggerated, inflated, and antiquated claims from any other source. But that is not the immediate problem presented by this bill.

The very minimum we should have from this House—the very minimum—is the right to have this kind of issue come before us on a regular calendar, first processed through the Committee on Rules in the regular manner, so that additional amendments can be offered.

The Committee on the Judiciary has known for years this termination date would arrive, yet they put this bill to extend the statute of limitations on the Suspension Calendar at the last minute and then plead an emergency exists. The issues presented by this bill are important enough to have a rule. They are important enough to have this House fully explore and fully amend the bill under a rule.

I hope whatever our position is on this bill, we will join in defeating the suspension, if for no other reason than to give

the proper use to the suspension calendar, which in this case, I suggest, is an inappropriate use. The suspension calendar was designed to have bills brought before the House over which there was little or no controversy, and where no amendments were anticipated.

This is not the case in this bill. I will personally ask for a vote on the bill, and I hope Members will join in rejecting a suspension of the rules.

Mr. DANIELSON. Mr. Speaker, I yield 1 minute to the gentleman from Wyoming (Mr. RONCALIO).

Mr. RONCALIO. Mr. Speaker, I rise in support of this bill and hope we do, indeed, pass it on the Suspension Calendar.

Five years ago in the Committee on the Interior, we listened to this precise argument against extending for a 5-year period the life of the Indian Claims Commission, knowing full well in those 5 years that all claims would not be settled.

There are aboriginal claims. I notice that the word "aboriginal" was omitted from the plea made by my friend from Washington. These are aboriginal claims made to the land we live on, and they have a right to be heard and a right to be adjudicated on the basis of legal determinations in a court of law, and not in a political forum as we have now.

The SPEAKER pro tempore (Mr. WRIGHT). The time of the gentleman from Wyoming has expired.

Mr. DANIELSON. Mr. Speaker, I yield 1 additional minute to the gentleman from Wyoming.

Mr. FOLEY. Mr. Speaker, will the gentleman yield?

Mr. RONCALIO. I yield to the gentleman from Washington.

Mr. FOLEY. The gentleman knows that this bill does not in any way affect the right of tribes to bring claims. It only extends the statute of limitations for the authority of the United States to bring claims on behalf of the tribes. Is that not correct?

Mr. RONCALIO. That may be correct, but when one only has one guardian to speak for one, then that is the one agency that needs the time. In the case of the Arapahos and the Shoshones, the only litigant who can sue for them is the United States of America.

Mr. FOLEY. The gentleman will agree that we have already extended this authority once since 1966. If we pass this bill, we will again extend for 4 years this special statute of limitations—a total extension of 15 years rather than the original 6 years contemplated.

Mr. RONCALIO. I agree with that. I only say this: I believe passage now is preferable to the alternative if this is not passed.

Mr. DANIELSON. I thank the gentleman for his comments and his support of the bill. I recognize that this is probably not an ideal solution to a very difficult problem, but it is a practical, conscientious and serious approach to what could be tragic in some areas of the United States. I urge support for the bill, and I reserve the balance of my time.

Mr. COHEN. Mr. Speaker, I would simply like to indicate that I sympathize

with the gentleman from Washington (Mr. FOLEY) in the arguments he has presented, but I would like to come to the defense of the gentleman from California (Mr. DANIELSON) just for a moment.

He received this request only 2 or 3 weeks ago as to the statute of limitations. The Judiciary Committee had nothing before it prior to the Justice Department coming in at the last moment, because of the negotiations going on now with the two tribes in the State of Maine. Justice Gunter came into the picture only recently to provide some sort of recommendation, so it was not that the Judiciary Committee was being dilatory.

I agree entirely that in 1981 chances are that someone is going to come back in and request a further extension. My position is that we have got to come to grips with these Indian claims. That is why I filed a bill, and the Maine delegation in the House and Senate filed a bill, to extinguish these claims to land, to provide a mechanism for removing clouds on titles to property throughout the country and to find an equitable means of resolving the issue that would permit a monetary recovery.

There have been no hearings held, and we are up against the wall. If the Justice Department does not get the extension, they will file a lawsuit and they will unravel the economic fabric of the States of Maine, Massachusetts, and a number of other States, and all other claims they now have pending in the Interior Department they might file immediately in order to protect themselves. So, under the circumstances, while I am not enthusiastic about this particular measure, I think it has to be adopted.

Mr. FOLEY. Mr. Speaker, will the gentleman yield?

Mr. COHEN. I yield to the gentleman from Washington.

Mr. FOLEY. If my remarks carried with them any criticism of the distinguished gentleman from California (Mr. DANIELSON) or the Committee on the Judiciary, I regret them and retract them. I have the highest admiration for both the gentleman from California and the committee on which he serves. But I do think that all committees which realize that bills are expiring or authority is expiring, should make some effort to insure that legislation is recommended by the departments of Government in sufficient time for the committee to consider and report legislation through the normal channels.

I personally do not believe that the suspension calendar should be used to bring bills to the floor that are controversial, and where at the same time it is plain that there is immediate urgency, for consideration under the suspension calendar. Under normal circumstances, I do not think that is the appropriate use of the suspension calendar. If this is an emergency bill, there is nothing to prevent a rule being granted by the Rules Committee before the expiration date. That is why I hope Members will vote against this bill.

Mr. COHEN. The gentleman from California was concerned with the July 18 date, specifically what the consequences might be if we did not get a rule and get this matter passed in the Senate and the House. The Senate has already accepted it.

It is the same measure that is before the House now. I can assure the Members that is the only motivation of the gentleman from California.

Mr. RISENHOOVER. Mr. Speaker, will the gentleman yield?

Mr. COHEN. I yield to the gentleman from Oklahoma (Mr. RISENHOOVER).

Mr. RISENHOOVER. I thank the gentleman for yielding.

Mr. Speaker, I cannot disagree with what the gentleman from Washington says. I, too, am concerned with what will happen on July 18 if we do not enact this legislation.

But let me ask the gentleman this question: In the gentleman's opinion, would enactment of this 1377 jeopardize the legislation that the gentleman envisions, legislation which he has already introduced, that is to be heard by the Indian Affairs Subcommittee? Will this jeopardize that legislation?

Mr. COHEN. I will say to the gentleman that it will in no way jeopardize that legislation that I have submitted to the Interior Committee. I see the chairman of the subcommittee is on the floor. I would be happy to engage in colloquy with the gentleman. The reason we have not had hearings on this issue is because President Carter appointed Mr. Gunther to see if he could serve as a catalyst and make recommendations. He is to make a recommendation by the end of June or the first of July if possible. I am confident that once that recommendation is made, legislation will be submitted by the various delegations of the States affected and that hearings will be properly held before the subcommittee. And also I will consider filing legislation that could come before the Judiciary Committee if we have to provide alternative types of remedies. But I am sure that is why the gentleman from Wyoming is withholding.

Mr. RONCALIO. Mr. Speaker, will the gentleman yield?

Mr. COHEN. I yield to the gentleman from Wyoming (Mr. RONCALIO).

Mr. RONCALIO. I thank the gentleman for yielding.

Mr. Speaker, I commend the gentleman for his expert statement of the facts surrounding the present proposition. Speaker O'NEILL, the majority leader, the gentleman from Texas (Mr. WRIGHT), and the chairman, the gentleman from Arizona (Mr. UDALL), have all three concurred that this is the time to allow the discussions to go ahead.

After those negotiations, then if necessary the House Indian Affairs Committee will come into action on the legislation.

Mr. COHEN. Mr. Speaker, let me just indicate that no one is more distressed than myself or the people of the State of Maine with the present situation. In all of these years since 1794, the Justice Department had taken the position that

the State of Maine had the responsibility of dealing with those tribes. The State of Maine accepted that responsibility and dealt with the Indian tribes. Suddenly, in 1975, the Justice Department is coming back under court order and saying they have to assume responsibility for all of the tribes in the country and are now bringing the full weight of the Federal Government against the State of Maine.

I must say that I am in great sympathy with the statement of the gentleman from Washington (Mr. FOLEY) about what this means. It is difficult enough when the tribes bring these suits, but to put the full weight of the Federal Government behind them is indeed awesome. I have great reservation about this matter, but under the circumstances I feel we have to adopt it.

Mr. Speaker, I yield 2 minutes to the gentleman from California (Mr. WIGGINS).

Mr. WIGGINS. Mr. Speaker, there are very few domestic problems of the magnitude of this one. The issue of Indian land claims is applicable to vast areas of North America. It certainly is not confined to the State of Maine or even to the Northeast. I have thought a lot about the proper resolution of this question, and the only decision I have reached at this point is that we accomplish nothing by delay. Sooner or later this issue has to be confronted, and I for one am presently persuaded that we best confront it early.

It has to be brought to a head, and I would think that a no vote on this bill will bring it to a head. It will cause the United States to file actions promptly. The pendency of such claims affecting millions of acres will surely cause the political arms of Government to move for a final resolution of this issue.

The argument is that such actions will cloud titles throughout the Northeast. I do not believe that the Department of Justice is going to record its penders over an entire State. I think they are much too prudent to do anything as radical as that.

It is important that this Government decides where it stands vis-a-vis the Indian claims. I would like to get on with it. I would like to have a decision made, Mr. Speaker, and the way to expedite the moment of decision is to vote "no" on this suspension.

Mr. COHEN. Mr. Speaker, in response to the remarks of the gentleman from California (Mr. WIGGINS), I would simply indicate that I, too, would think prudence would prevent the Justice Department from filing such a suit.

However, they have filed several different briefs with the Federal District Court in Maine indicating that indeed they do have the intent of filing such a suit, and absent some sort of resolution between the parties or through the administration, the Department will have no choice but to file that suit on or before July 18 of this year.

Mr. DANIELSON. Mr. Speaker, I yield myself such time as I may consume.

Mr. DANIELSON. Mr. Speaker, I am

about to conclude my side of this argument. I think that all the parties on both sides of the aisle have participated in a rather heated and, I hope, helpful debate.

From the point of view, I hope, of less heat and more light, I would like to say that the most responsible position we could take at this time in this situation is to vote for the bill.

When I hear arguments to the effect: "Well, what do we care? Let us just go ahead; it isn't going to hurt anyone." I am reminded that when I started practicing law, I went to work for a very competent trial lawyer who won far more than his share of cases.

I remember one time we had a tough, sticky, situation, and I briefed the law very carefully. I told him, "Look, we don't have to do this and so. I am sure we can win if we do something else."

He said, "Look, George, you may be entirely right, but who the heck wants to test an electric chair?"

Mr. Speaker, that is precisely what we will be doing here if we do not pass this bill. Let us not try to test an electric chair. Let us not bring chaos to the States of Maine, Massachusetts, Connecticut, Georgia, and the Carolinas and everywhere else.

Mr. Speaker, I urge the passage of the bill.

Mr. Speaker, the bill S. 1377 and the bill H.R. 5023, as amended by the Judiciary Committee, amends section 2415 of title 28, United States Code, to extend to December 31, 1981, the time for the United States to file tort or contract actions in behalf of Indians which accrued prior to July 18, 1966.

Both the Department of the Interior and the Department of Justice have recommended the enactment of the bill as amended by the committee and as passed by the Senate.

On July 18, 1966, section 2415 of title 28 was enacted into law and it for the first time imposed a statute of limitations on tort or contract suits brought by the United States. This statute of limitations also applied to actions brought by the United States as trustee for Indians. In 1972, the Congress extended the limitations period to July 18, 1977, for actions for monetary damages brought by the United States in behalf of Indians.

The difficulties of identifying and processing these claims are such that the Department of the Interior has recommended that the statute of limitations be extended until December 31, 1981, for this specific group of claims. The committee amendment would extend the limitation to that date.

The Office of the Solicitor of the Department of the Interior estimates that there could be many pre-1966 claims as yet unidentified or still being asserted that now would have to be filed by July 18. Nationwide the unprocessed cases could amount to well over 1,000. The major reason why the previous 5-year extension was insufficient is that many tribes have only become aware of their tort and contract remedies in the last few years and thus have not, until recently, had adequate procedures to document claims. Therefore, hundreds of

pre-1966 claims are still being researched and identified and cannot all be filed by July 1977.

In 1972, when this committee reported the bill H.R. 13825 providing for the previous 5-year extension for commencing actions on behalf of Indian tribes, bands or groups—House Report No. 92-1267, 92d Congress, 2d session—it was observed that the claims which accrued prior to July 18, 1966 include a number of complicated matters, and further that the identification of the claims and the development of their factual and legal basis were difficult. This problem still exists.

The Department advised the committee that it found it difficult to estimate the number which remain unprocessed. As an example, the Department's Field Solicitor's Office in Phoenix, Ariz., has developed approximately 35 claims in their geographical area which they will attempt to process by July 18, 1977. The Twin Cities' field solicitor's office, covering Minnesota, Iowa, and Wisconsin, has developed 167 cases. The Office of the Solicitor estimates that there could be many pre-1966 claims as yet unidentified or still being asserted that would have to be filed by July 18. Nationwide the unprocessed cases could amount to well over 1,000. The committee has been advised that many tribes have only become aware of their tort and contract remedies in the last few years and thus have not, until recently, had adequate procedures to document claims as they arose. Further, the Department of the Interior has not, until recently, had adequate procedures to document claims as they arose. Therefore, hundreds of the pre-1966 claims are still being researched and identified and cannot all be filed by July 1977.

The Justice Department sues on behalf of Indian tribes only at the request of the Solicitor of the Department of the Interior. The Justice Department has pointed out that while a few of the matters already referred to it by Interior might be affected if the current July 18, 1977 limit in the present statute were not changed, the greater problem is with those claims which have not yet been unearthed by the Department of the Interior or which have not been investigated to the extent that they can be referred to the Justice Department for litigation.

The conclusion of the Department of Justice is that an extension of the statute until December 31, 1981, when coupled with an effort by the Department of the Interior to find and investigate these claims, would be a fitting and appropriate action in view of the Government's traditional role of guardian and trustee for the Indian.

In testimony before the Senate Select Committee on Indian Affairs with reference to the Senate Bill, S. 1377, there was a discussion of a number of matters now pending in the Department of Justice which could be affected by an expiration of the statute of limitations. These include the claims of the Maine Passamaquoddy and Penobscot Indians based upon violations of the Indian Trade and Intercourse Act.

Information submitted to the Subcommittee on Administrative Law and Governmental Relations in connection with its consideration of H.R. 5023 referred to the problems which could arise if the Government were requested to file a suit covering these particular claims in order to meet the July 18, 1977, deadline.

At a hearing before the Senate Committee on Indian Affairs on May 12, 1977, the Governor of Maine, the Honorable James B. Long, and the Honorable Joseph E. Brennan, attorney general of the State of Maine, testified concerning the complexities of the Maine litigation. Attorney General Brennan stated that the position of the State of Maine is that an extension of the statute would offer more opportunity to find a possible solution to the matter without litigation. He, too, noted that the present deadline of July 18, 1977, is so close that without an extension, a protective lawsuit, with all the problems it could create, may be unavoidable.

In its report to the committee on the bill, the Department of Justice referred to the relationship of this bill to the claims by the Indians of the State of Maine and indicated that the passage of the bill would obviate a need for a special bill to deal with the limitations problem as to those particular claims. In this connection, the Department of Justice stated:

The Department of Justice at one time intended to submit a bill to extend the statute of limitations for those claims which the United States may assert on behalf of the Indians of the State of Maine arising out of trespasses on their ancestral aboriginal landholdings. H.R. 5023 addresses on a broader scale the same problem and the passage by the Congress of H.R. 5023 would render unnecessary the passage of legislation specifically for the benefit of the Maine Indians.

As I have stated, the Department of Justice recommends enactment of the bill providing for an extension to December 31, 1981.

There is a clearly defined need for the amendment provided in this bill, and prompt congressional action is necessary. It is recommended that the bill be considered favorably.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. DANIELSON) that the House suspend the rules and pass the Senate bill S. 1377.

The question was taken.

Mr. FOLEY. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Pursuant to the provisions of clause 3(b) of rule XXVII and the Chair's prior announcement, further proceedings on this motion will be postponed.

The point of no quorum is considered to be withdrawn.

#### GENERAL LEAVE

Mr. DANIELSON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just under consideration.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

#### INDIAN CLAIMS COMMISSION AUTHORIZATION FOR FISCAL YEAR 1978

Mr. DANIELSON. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 4585) to authorize appropriations for the Indian Claims Commission for fiscal year 1978; to facilitate the transfer of cases from the Indian Claims Commission to the U.S. Court of Claims; and for other purposes, as amended.

The Clerk read as follows:

H.R. 4585

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That there is authorized to be appropriated to carry out the provisions of the Indian Claims Commission Act (25 U.S.C. 70), during fiscal year 1978, not to exceed \$2,250,000.*

SEC. 2. The Act entitled "An Act to create an Indian Claims Commission, to provide for the powers, duties, and functions thereof, and for other purposes," approved August 13, 1946 (60 Stat. 1049), as amended, is further amended by adding thereto the following new section:

#### "CASES TRANSFERRED TO THE UNITED STATES COURT OF CLAIMS

"SEC. 29. (a) The powers of the Commission set forth in the first paragraph of section 15 of this Act, relative to fees and expenses for any attorney or attorneys for any tribe, band, or other identifiable group of Indians, shall be exercised by the United States Court of Claims with respect to any case transferred pursuant to this Act, as amended.

"(b) The powers of the Commission set forth in section 14 of this Act, relating to information from governmental departments and official records as evidence, may be exercised by the United States Court of Claims with respect to any case transferred pursuant to this Act, as amended.

"(c) Final judgments rendered by the United States Court of Claims on cases transferred to it pursuant to this Act, as amended, shall be paid in the same manner as other judgments of the court in accordance with the provisions of section 2517 and 2518 of title 28, United States Code.

"(d) Cases transferred to the United States Court of Claims pursuant to this Act, as amended, shall be thereafter subject to review by the Supreme Court in accordance with the provisions of section 1255 of title 28, United States Code: *Provided*, That any decision of the Commission rendered in a case prior to its transfer, which could have been appealed pursuant to the provisions of section 20 of this Act, as amended, shall be appealable to the Court of Claims subject to such provisions: *Provided further*, That such provisions shall not otherwise be applicable to transferred cases.

"(e) The provisions of the Act of November 4, 1963 (77 Stat. 301), as amended, shall continue and shall be in effect with respect to all cases transferred to the United States Court of Claims pursuant to this Act, as amended."

SEC. 3. Subsection (a) of section 792 of title 28, United States Code is amended to read as follows:

"(a) The Court of Claims may appoint sixteen commissioners who shall be subject to removal by the court and shall devote all their time to the duties of the office. The Court shall designate one of the commissioners to serve at the will of the court as chief commissioner."

The SPEAKER pro tempore. Is a second demanded?

Mr. KINDNESS. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from California (Mr. DANIELSON) will be recognized for 20 minutes, and the gentleman from Ohio (Mr. KINDNESS) will be recognized for 20 minutes.

The Chair recognizes the gentleman from California (Mr. DANIELSON).

Mr. DANIELSON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this bill, H.R. 4585, had a dual referral to the Committee on Interior and Insular Affairs and then to the Committee on the Judiciary. I shall address myself to the entire bill if I do not see some member from the Committee on Interior and Insular Affairs who wishes to pick up his share of the debate.

The first point I would like to make—and this is one to which I urge every Member to listen—is that although this bill deals with Indians and with Indian claims, it is not the same bill as the one that was just before the House. It just happens that both bills deal with Indians and Indian affairs.

Mr. Speaker, the first portion of the bill—and I have had a signal from a member of the Committee on Interior and Insular Affairs that this is appropriate—authorizes an appropriation of \$2,250,000 to the Indian Claims Commission to carry out its work during fiscal year 1978. That is all that is done in that section.

Mr. Speaker, I would like to point out that the Indian Claims Commission, which was set up some years ago for the purpose of handling Indian claims, still is in operation; but it will not be in operation after September of 1978, a little over a year from now. Under existing law, that is it. This authorization is intended to take care of the expenses of the Indian Claims Commission pending that time.

Mr. Speaker, the second portion of the bill is the portion that was referred to and was actually within the jurisdiction of the Committee on the Judiciary. It relates to the Court of Claims.

Heretofore, Mr. Speaker, we have had an Indian Claims Commission which has had the function of hearing many claims by Indians, generally based upon accounting procedures, based upon claims that they thought they had against the authorities which were handling their affairs. A few years ago provision was made by law to phase out the work of the Indian Claims Commission, and to turn over its remaining cases to the Court of Claims. For many years the United States of America has had a Court of Claims to handle claims against the United States, and it has great expertise in the field.

Since the work of the Indian Claims Commission was diminishing down to that hard nut of almost unresolvable cases at the bottom of its docket, it was

thought that it was time to abolish the Commission and to turn its cases over to the Court of Claims for handling along with all of the others.

Mr. Speaker, at the present time 21 cases have been turned over to the Court of Claims. I understand that there remain 113 cases on the docket of the Indian Claims Commission, of which they anticipate they can conclude approximately 50 claims themselves, but will probably have to turn over the remainder, or about 63 claims, to the Court of Claims in September of 1978.

Mr. Speaker, I have a copy of the docket. I will not burden the RECORD with it, but it has claims that go back pretty far; and they obviously are the ones that have been difficult to handle.

Mr. Speaker, in connection with turning these cases over to the Court of Claims, provision is made in this bill to authorize the Court of Claims to have one—I repeat, one—additional Commissioner. They presently have some 15 Commissioners. They have a rather broad jurisdiction which has been gradually increased over the years. They are behind in their docket; but, although the request was for three additional Commissioners, we could find no compelling justification to increase the number by three. Therefore, we held it down to one, which I feel is a responsible number.

Within the bill Members will note that we also struck some rather generous language which would enable the court to appoint such deputies and clerks as they saw fit. As far as we are concerned, the number of personnel they might need on their payroll and the manner in which they obtain them are already provided for by law. If they wish additional staff personnel, they can go ahead and obtain them in the regular manner.

In a nutshell, Mr. Speaker, what this bill does is, one, authorize an appropriation of \$2,250,000 to finance the Indian Claims Commission during the remainder of its life, which will be until September 1978; and, two, authorize one additional Commissioner to assist in taking care of the Commission's increasing workload.

Mr. Speaker, the bill, H.R. 4585, authorizes appropriations of not to exceed \$2,250,000 in fiscal year 1978 to carry out the provisions of the Indian Claims Commission Act and adds a new section, 29, to the Indian Claims Commission Act to confer upon the Court of Claims the powers of the Commission as to attorneys' fees and expenses as to Commission cases transferred to the court. Similarly, the section would authorize the court to exercise the powers of the Commission as to information from Government agencies with respect to such cases.

The new section provides that judgment in transferred cases would be paid in the same manner as other cases decided by the Court of Claims, and that transferred cases are to be subject to review by the Supreme Court in the same manner as other Court of Claims cases. Section 3 of the amended bill would amend section 792(a) of title 28 to au-

thorize the Court of Claims to appoint one additional commissioner in addition to those presently authorized.

The Indian Claims Commission was established by the act of August 13, 1946 (60 Stat. 1049; 25 U.S.C. 70 et seq.), as amended, for the purpose of finally hearing and deciding all Indian tribal claims which accrued before August 13, 1946.

By August 13, 1951, the Commission had docketed 370 claims. Through severance and redocketing, it has had before it 615 dockets. As of September 30, 1976, 200 dockets had been finally dismissed; 274 had resulted in final money judgments totaling more than \$628 million; and 141 remained to be completed.

The 1946 statute required the Commission to complete its work within 10 years. Since that time, Congress has extended this time limit on five separate occasions. The Commission now consists of 5 commissioners and a staff of 37.

When Congress extended the life of the Commission in 1972, it required that an annual appropriation authorization be enacted in order that the Committee on Interior and Insular Affairs could exercise closer oversight on the Commission progress. Section 1 of the bill authorizes such appropriations for fiscal year 1978.

The act of October 8, 1976, Public Law 94-465, extended the life of the Commission from April 10, 1977, to September 30, 1978. The act provided that the Commission, by December 1976, certify and transfer to the Court of Claims any cases which it felt it could not complete by September 30, 1978. Pursuant to this provision, the Commission has transferred 19 cases. In addition, all cases not completed by September 30, 1978, must be transferred to the Court of Claims.

Public Law 94-465 provides that the Court of Claims shall adjudicate the transferred cases in accordance with section 2 of the Indian Claims Commission Act, but no reference was made to several other provisions of the Indian Claims Commission Act which should be made applicable, as well as to other amendments which would be desirable with respect to the transferred cases. The amendments in this bill make the necessary amendments of the Indian Claims Commission Act and provide for this authority to be exercised by the Court of Claims as to the cases transferred to it.

Section 15 of the Indian Claims Commission Act (25 U.S.C. 70n), provides that unless the amount of the fees to be paid the attorneys for the Indians is included in an approved contract, the amount of fees shall be fixed by the Commission and the Commission to fix all reasonable expenses incurred in the prosecution of a claim. The committee recommends that the section be amended by inserting on line 7, page 2, between "fees" and "for" the words "and expenses." This would conform the language to the provisions of present section 14 which do refer to expenses. The proposed section 29(a), together with the amendment stated above, will enable the court to exercise that needed authority in the transferred cases.

Section 14 of the act (25 U.S.C. 70m) deals with the authority of the Commis-

sion to obtain information from governmental departments and also provides for the use of official records as evidence. While the court now has general call authority as to governmental agencies (28 U.S.C. 2507), section 14 has a somewhat broader call authority and in addition includes specific evidentiary rules concerning Government documents, rules which may well be needed because of the special nature of the Indian Claims. Section 29(b) added by section 2 of the bill would provide for these considerations in the transferred cases.

Section 22 of the act (25 U.S.C. 70u) provides that, after the Indian Claims Commission reports its final determination, the report shall have the effect of a final judgment of the Court of Claims. While in all probability that special provision would not be applicable to the transferred cases, in order to avoid any doubt or confusion on the vital point of the status of judgments in those cases, proposed section 29(c) would provide that judgments in the transferred cases shall be paid in the same manner as other judgments of the court.

Section 20 of the act (25 U.S.C. 70s), relating to review by the Supreme Court of decisions rendered by the Court of Claims on appeals from the Indian Claims Commission, provides that a determination on questions of law by the court shall be subject to review by the Supreme Court. Like the judgment section, doubt exists as to the application of this section. To eliminate any question, proposed section 29(d) would have the transferred cases subject to review by the Supreme Court in accordance with the law for other decisions of the court. This proposed section also preserves a party's appeal rights to the Court of Claims with respect to pretransfer Commission decisions in those cases where a Commission's decision would have been appealable under section 20 of the act if no transfer had late taken place.

Proposed section 29(e) in the bill as introduced would have authorized the Court of Claims to appoint additional staff including trial commissioners. The committee amendment would strike subsection (e) from the proposed section 29, and designate subsection (f) as (e). Instead, in adding a new section 3 to the bill, the committee amendment would provide for an amendment to increase by one the number of commissioners of the Court of Claims authorized in section 792 (a) of title 28. The committee has concluded that since the new commissioner would have the same responsibilities and be appointed on the same basis as other commissioners, the authority should properly be contained in the appropriate section of title 28, section 792, which provides the basic statutory authority for the appointment of commissioners. Similarly, the committee amendment strikes the special authority for other court personnel. It is felt that authority for employing such personnel are provided for under existing law. As a practical matter it is difficult to provide at this time an exact estimate of the additional per-

sonnel which will be needed to comply with the desire of the Congress that these transferred cases be processed as expeditiously as possible.

The committee has concluded that the actual need for personnel can best be determined after the cases have been transferred and the court considered has begun. However, the committee concluded that the need for an additional commissioner has been established. The burden of handling the transferred cases will fall on the commissioners who serve as the trial judges of the court. Presently, they are called upon to conduct trials and file reports in 18 other categories of litigation.

As of this date, the court has received 21 cases on transfer. The committee has been advised that present indications are that of the approximately 116 cases still remaining at the Commission, as many as 50 will eventually be received by the court through September 30, 1978. All of these cases have been pending for 25 years or more since the time within which to file with the Commission expired August 13, 1951. Also, many relate to events which occurred as far back as the mid-1880's. Experience has shown that old cases, particularly those in the Indian area, are extremely difficult to dispose of. Based on the limited exposure thus far in the already transferred cases, it appears that many will require lengthy trials with voluminous records relating to the Government's alleged mismanagement of a variety of Indian resources as well as the customary treaty claims.

During recent years, the Congress has extended the jurisdiction of the Court of Claims. Examples are claims pursuant to the Federal Fire Prevention and Control Act of 1974 and declaratory judgment jurisdiction under the Tax Reform Act of 1976 with regard to certain tax exempt organizations. The one of greatest impact, however, has been the transfer in 1971, of jurisdiction over cases filed pursuant to the Renegotiation Act of 1951, as amended, from the Tax Court of the Court of Claims. Ninety such cases were immediately received on transfer. Since that date to the present time, 151 renegotiation cases have been filed with 100 such cases pending as of this date. Despite the fact that these cases require substantial trial work, they have been handled without requesting additional trial commissioners. However, the workload of the present 15 commissioners is now such that they cannot be expected to take on the Indian claims without added help. This is particularly so in view of the desire of all concerned that those claims which have been pending for so many years be expedited.

Sections 70n-1 through 70n-7 of the act (25 U.S.C.), which were first added in 1963 (77 Stat. 301), all relate to the establishment of a fund from which loans may be made by the Secretary of Interior to Indian tribes and bands for their use in obtaining expert assistance, exclusive of attorneys, for the preparation and trial of these cases. Here again there is some question as to the appli-

cation of the loan fund to the transferred cases. Section 29(f) of the Bill would eliminate any doubt by providing that the fund shall be in effect with respect to all transferred cases.

The committee favorably recommends the bill, H.R. 4585, with the amendments recommended to section 29 and by the amendment to section 792(a) of title 28 providing for the authority to appoint an additional commissioner.

Mr. Speaker, I yield such time as he may consume to the gentleman from Wyoming (Mr. RONCALIO).

Mr. RONCALIO. Mr. Speaker, H.R. 4585 is a rather simple bill. First, it authorizes the appropriation of \$2,250,000 for the expenses of the Indian Claims Commission for fiscal year 1978. Fiscal year 1978 will be the last year of life for the Indian Claims Commission. As amended in the last Congress, the Commission is due to expire on September 30, 1978.

\$2,250,000 represents a substantial increase in authorization as compared to the fiscal year 1977. The increase is \$600,000. However, most of this additional increase is necessitated by the extraordinary, one-time costs of termination of the Commission.

Second, the bill amends the Indian Claims Commission Act to facilitate the transfer of cases from the Commission to the U.S. Court of Claims. As amended, the Indian Claims Commission Act provides that certain cases pending before the Commission will be transferred to the court prior to the expiration of the Commission, in the discretion of the Commission. In addition, all unfinished cases will be transferred on September 30, 1978, when the Commission expires.

During hearings on this legislation and on the legislation enacted in the 94th Congress, the chief judge of the Court of Claims urged the committee to amend the Indian Claims Commission Act to confer upon the Court of Claims certain powers of the Commission in order to facilitate the disposition of the transferred cases. Section 2 of the bill adopts those amendments.

One of those amendments, as reported by the Interior Committee would have added three additional trial commissioners to the Court of Claims to assist in handling the increased burden.

As the bill was jointly referred to the Judiciary Committee, that committee also reported the bill with amendments. In their version, they only allowed for one additional trial commissioner. In the interests of insuring that the authorization of appropriation for the Commission for fiscal year 1978 is not delayed the Interior Committee has agreed to accept the Judiciary Committee version and I urge its enactment.

Mr. KINDNESS. Mr. Speaker, I yield such time as he may consume to the gentleman from California (Mr. MOORHEAD).

Mr. MOORHEAD of California. Mr. Speaker, this is an uncontroversial piece of legislation to bring to its final chap-

ter a fairly useless Indian Claims Commission.

This piece of bureaucracy has done very little to bring to a conclusion the claims that it has had before it in recent years, and this bill transfers its functions to the Court of Claims, which is more capable of going forward toward a solution of the claims that have been filed.

The bill gives to the Indian Claims Commission enough money to complete its operations and transfers the functions that it has over to the Court of Claims.

As the chairman of the subcommittee, the gentleman from California (Mr. DANIELSON) has stated earlier, there was a request in the legislation that we have three additional judges on the Court of Claims, but we feel that that problem can be handled as the caseload goes forward with the Court of Claims in the future. It should be taken care of by legislation that is separate and apart from this legislation. So, at the present time, there is one additional judge on the Court of Claims that will be created here, but that is all.

I ask for an aye vote on the legislation. Mr. KINDNESS. Mr. Speaker, I yield such time as he may consume to the gentleman from Colorado (Mr. JOHNSON).

Mr. JOHNSON of Colorado. Mr. Speaker, I rise in support of H.R. 4585.

This small piece of legislation marks the final passage in the story of one of the most unique tribunals in American history. The bill authorizes funds to operate the Indian Claims Commission in its 32d and last year. The authorization covers the necessary costs of closing the Commission down as of September 30, 1978, and for transferring to the Court of Claims those cases not completed by that date.

The Indian Claims Commission was established by Congress in 1946 for the purpose of adjudicating all claims, both legal and moral, of American Indian tribes against the U.S. Government. Prior to its creation, Indian claims were permitted only by special acts of Congress. The Claims Commission Act gave the tribes 5 years to file their claims and the Commission another 5 years to hear them all. However, this original time frame proved unrealistic. The more than 600 claims filed posed an extraordinary array of novel and difficult questions of law and fact. The nature of the claims, coupled with the extensive appellate rights and procedures established to hear them, guaranteed that litigation and final settlements would take decades.

Four times Congress acknowledged the need for more time and extended the life of the Commission for 5-year periods. The last time, in 1972, Congress provided for the Commission to terminate in April 1977, and for all remaining unfinished cases to be transferred to the U.S. Court of Claims for completion.

Last year the House rejected a further 3-year extension adopted by the Interior Committee but later agreed to a compromise year-and-a-half extension, to September 30, 1978. The conference report on that legislation emphatically de-

clared congressional opposition to any further extensions. Therefore, H.R. 4585 should be the last authorization bill for the Indian Claims Commission.

At this time it is appropriate to take a brief look at the record of the Commission after 30 years' existence. As of April 1 of this year, the Commission had completed work on 500 of the 615 claims filed before it. All of the remaining cases were in various stages of litigation, and hopefully less than 60 of these cases will remain unfinished by the dissolution date and will have to be transferred to the U.S. Court of Claims for completion.

Basically, the claims were of two kinds: land claims, which eventually involved some 1.7 billion of the 1.9 billion acres of the contiguous 48 States, and accounting claims, in which the United States, as trustee, has had to account for its stewardship of Indian property. Together, these claims have involved literally thousands of transactions dating back to the founding of the Republic.

To date the Commission has awarded some \$655 million to tribal plaintiffs in 279 dockets. Another 200 dockets have been dismissed without award. Presumably, the final tally of awards will be somewhere in the neighborhood of \$750 to \$850 million. The total cost of operating the Commission for 32 years will total less than \$16 million, an average of \$500,000 per year, and less than the cost of a single modern fighter plane.

Mr. Speaker, the significance of the Indian Claims Commission goes far beyond the process of adjudicating a unique body of claims and awarding money damages to the successful plaintiffs. There can be no question that the Indian Claims Commission has been making a vital contribution to American historical knowledge.

The litigation of cases extending over 170 years of this Nation's history have required extensive use of expert scholars to document as best as possible the full story of this country's dealings with its First Citizens. The work of the numerous and voluminous expert witnesses introduced in Indian Claims Commission cases and reports compiled by historians, anthropologists, geographers, and other scholars, has made it possible for the teaching of a much more complete version of the story of this country and especially the crucial role played by the American Indians. This knowledge benefits all Americans.

For American Indians, apart from receiving a measure of much-delayed justice, the Commission has provided an accurate, relatively complete and unbiased "official history" of the Indian tribes of the United States. This is significant considering that American Indians have been generally ignored or given less attention in history written and taught by non-Indians who control and administer the affairs of the states in which the Indians live.

The Indian Claims Commission has provided all Americans with a very well-documented history of the American Indian and his place in American history

while in the process of settling for once and all time the Indians' ancient claims against the United States.

For this reason, I think the Commission deserves credit for a job well done. I urge the speedy approval of H.R. 4585.

Mr. KINDNESS. Mr. Speaker, I yield such time as he may consume to the gentleman from Kansas (Mr. SKUBITZ).

Mr. SKUBITZ. Mr. Speaker, I thank the gentleman for yielding to me.

Mr. Speaker, I rise in support of H.R. 4585. This bill authorizes funds for the expenses of the Indian Claims Commission in fiscal year 1978. It also amends the Indian Claims Commission Act of 1946 to facilitate the transfer and subsequent disposition of unfinished cases from the Commission to the U.S. Court of Claims upon its expiration of September 30, 1978.

The \$2,250,000 authorization is \$600,000 higher than the amount authorized for the fiscal year 1977. However, this substantial increase is needed to cover the costs of closing down the 32-year-old Commission currently consisting of five commissioners and a staff of 37. These expenses include an estimated \$185,000 in lump sum leave payments, \$141,000 in severance pay, and \$50,000 in history and final report costs.

As reported by the Interior Committee, section 2 of H.R. 4585 confers certain authorities on the court of claims with respect to the cases to be transferred to it by the Commission. Our colleagues on the Judiciary Committee, who have jurisdiction over the operation of the court of claims and to whom this bill was sequentially referred, have amended this section. I have no objections to those amendments.

Mr. Speaker, the conference report which accompanied last year's authorization for the Indian Claims Commission was adopted by a vote of 379 to 13. That report included an emphatic declaration of the adamant opposition to any further extension of the Commission beyond the September 30, 1978, dissolution date. I am pleased to state that H.R. 4585 is entirely consistent with that declaration.

The Subcommittee on Indian Affairs and Public Lands and the full Committee on Interior and Insular Affairs approved the bill by unanimous voice votes. I now urge the House to do the same.

Mr. KINDNESS. Mr. Speaker, I would urge my colleagues to provide their affirmative vote for H.R. 4585.

Mr. Speaker, I also wish to associate myself with the remarks of the chairman of the subcommittee, the gentleman from California (Mr. DANIELSON) and with those of the ranking minority member on the subcommittee, the gentleman from California (Mr. MOOREHEAD).

Mr. DANIELSON. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore (Mr. WRIGHT). The question is on the motion offered by the gentleman from California (Mr. DANIELSON) that the House

suspend the rules and pass the bill H.R. 4585, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

#### GENERAL LEAVE

Mr. DANIELSON. Mr. Speaker, I ask unanimous consent that I may be permitted to revise and extend my remarks with respect to the bill just passed, and that the revision shall follow my colloquy.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. DANIELSON. Mr. Speaker, further I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks with respect to the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

#### EXTENDING CERTAIN OIL AND GAS LEASES BY A PERIOD SUFFICIENT TO ALLOW THE DRILLING OF AN ULTRADEEP WELL

Mr. KAZEN. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2502) to extend certain oil and gas leases by a period sufficient to allow the drilling of an ultra-deep well, as amended.

The Clerk read as follows:

H.R. 2502

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior is authorized and directed to extend any lease issued pursuant to section 17 of the Act of February 20, 1920, as amended (30 U.S.C. 226), and which was committed to the cooperative or unit plan known as the Unit Agreement for the Development of the Pacific Creek Unit II Area covering certain leases owned by Rainbow Resources Group as of January 26, 1977, in the State of Wyoming, and which would otherwise terminate prior to July 23, 1981, until July 23, 1981, and so long thereafter as oil and gas is produced in paying quantities: *Provided, however,* That (a) the provisions of this Act shall not apply to any lease which has been assigned in whole or in part between the twenty-sixth day of January 1977, and the effective date of this Act; (b) any such lease which is assigned in whole or in part prior to the twenty-third day of July 1981 shall automatically terminate by operation of law and no longer be of any force or effect unless any such lease is assigned to one or more members of the Rainbow Resources Group or, alternatively, to the heirs or devisees in the case of the death of an individual owner; (c) all provisions restricting the assignment of leases as contained in paragraphs (a) and (b) shall cease as of July 23, 1981; (d) except as specifically modified herein as to such leases, all other provisions of the Act of February 20, 1920, as amended (41 Stat. 443, 30 U.S.C. 181, et seq.), shall be applicable as to such leases.*

SEC. 2. Notwithstanding any provision of any such lease, or provision of law or regulation to the contrary, from and after the

twenty-third day of July 1977, the annual rental provided for in the leases described in section 1 of this Act shall be the sum of \$5 per acre for the period July 23, 1977, through July 23, 1978, and \$2 per annum thereafter.

SEC. 3. The Secretary of the Interior is authorized and directed to specify terms and conditions for the diligent and prudent exploration and development of such leases, or the unit to which such leases have been committed, including requirements for the commencement of drilling operations, which such conditions shall be deemed a part of the lease agreement for each such lease.

SEC. 4. If the Secretary of the Interior makes a determination that any of the terms and conditions imposed by him under the authority of section 3 of this Act for the prudent and diligent development of any such lease, or of a unit to which any such lease has been committed, have been violated, he shall give written notice of such violation to such lessee, or to the unit operator designated by such lessee, setting forth the nature of such violation and affording the lessee or designated unit operator a reasonable time in which to correct such violation. If such violation has not been corrected within the time stated in such notice, such lease shall immediately terminate and be of no further force or effect.

SEC. 5. Notwithstanding any provision of law to the contrary, if any lands covered by a lease described in section 1 of this Act have been, or hereafter are, committed to an approved cooperative or unit plan of development and any part, or all of such lands, are thereafter segregated or eliminated from such approved or prescribed plan, such lease shall terminate as to those lands so segregated or eliminated from such approved or prescribed plan.

SEC. 6. No lease subject to this Act shall be deemed to have been extended unless within thirty days after receiving written notice from the Secretary of the Interior of the terms and conditions to be imposed by him on such lease or leases pursuant to section 3 of this Act the record owner of such lease has agreed in writing to such conditions.

SEC. 7. If any lease described in section 1 of this Act has terminated by virtue of the provisions of the Act of February 25, 1920, as amended (41 Stat. 443; 30 U.S.C. 181, et seq.), prior to the date of the approval of this Act, the Secretary of the Interior is authorized and directed to reinstate such lease: *Provided, however,* That all of the provisions of this Act shall be fully applicable to such reinstated lease.

The SPEAKER pro tempore. Is a second demanded?

Mr. GOODLING. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Texas (Mr. KAZEN) and the gentleman from Pennsylvania (Mr. GOODLING) will be recognized for 20 minutes each.

The Chair now recognizes the gentleman from Texas (Mr. KAZEN).

Mr. KAZEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the purpose of H.R. 2502 is to extend certain oil and gas leases for Federal lands in Wyoming for a sufficient length of time to permit the drilling of an ultra-deep gas well. The bill would affect 17 leases.

The initial term of the leases was 10

years and all were issued between November 1, 1963 and June 1, 1967. All of the leases had been placed in a unit which had been approved by the Secretary of the Interior. The lessees explored the unit area to a depth of 20,500 feet. While some gas was discovered, the discovery was not sufficient for commercial production. The unit agreement was terminated as of July 23, 1975. The termination of the agreement served to extend the leases for an additional 2 years from the date of termination.

The Mineral Leasing Act provides that a lease may be extended beyond its primary term by production, or if actual drilling operations are commenced and being diligently prosecuted at the end of the primary term, the lease is extended during the period in which the drilling operations are being prosecuted.

If the lease is committed to a unit plan of development, production or drilling within the unit area will extend all of the leases committed to the unit.

Prior to March 1975, the Department of the Interior regulations defined the primary term of a lease to mean the initial term and all extensions of the initial term. Under that definition, because of the extension of the leases involved by virtue of dissolution of the unit agreement on July 23, 1975, it would only have been necessary for the lessees to have commenced drilling operations within a new unit and be diligently prosecuting them on July 23, 1977, to further extend the leases for the time required to complete a well.

However, in March 1975, the Department adopted new regulations which redefined "primary term" as only the initial 10-year term of the lease. Thereafter, the only way a lease in an extended term could be further extended was by actual production on the lease, or within a unit to which the lease has been committed.

The owners of the leases—Rainbow Resources Group—testified before the Subcommittee on Mines and Mining that it would require at least 3 years to complete the well which they planned to a depth of 25,000 feet. The period of extension of the leases which had been gained by the termination of the unit agreement in July 1975, was insufficient to permit the drilling of such an ultra-deep well.

Officials of Rainbow Resources Group also testified that they had invested approximately \$2 million in exploring the original unit and that the drilling of the ultra-deep well would require a further investment of between \$6 and \$7 million.

The testimony received by the subcommittee indicated that there may be a large gas field in the unit area which can only be developed at a depth of 25,000 feet or more.

The Committee on Interior and Insular Affairs approved an amendment in the nature of a substitute bill. The bill as amended requires payment of a rental of \$5 per acre for each lease during the first year of extension, and \$2 per acre for each year thereafter. The normal rental would be \$1 per acre during such periods.

The bill as amended also requires the Secretary of the Interior to impose conditions for the diligent and prudent development of the leases. The leases could not be assessed outside the Rainbow Resources Group before July 23, 1981, the period of additional extension, and the leases could only be extended beyond that date by actual production in commercial quantities.

Under the provisions of H.R. 2502, as originally drafted, the leases would have been extended until 1981 with the provision that the leases would terminate unless drilling operations were being conducted on a unit to which the leases had been committed, or oil or gas were being actually produced from a lease committed to such a unit. There were no special provisions to assure that the leases would be diligently developed prior to the expiration of the extended term provided for in the bill.

The bill as amended mandates the Secretary of the Interior to establish conditions for the diligent development of the leases. These conditions must be accepted by the lessees. The total area involved covers about 16,000 acres. The rental for the first year, therefore, would be approximately \$80,000.

The committee feels that the bill as amended would not establish an undesirable precedent. It is unlikely that anyone not seriously committed to a program of diligent development and to the increased rentals, which are provided for in the amendments, would be willing to accept the conditions the amendments establish.

Mr. Speaker, I reserve the remainder of my time.

Mr. JOHNSON of Colorado. Mr. Speaker, will the gentleman yield?

Mr. KAZEN. I yield to the gentleman from Colorado.

Mr. JOHNSON of Colorado. Mr. Speaker, the gentleman from Texas has explained the purpose of the bill quite clearly. I thank him for his leadership.

It seemed to me this was a very unfair situation which arose, and the gentleman from Wyoming agreed, although I believe he will seek his own time, but as a result of the change in regulations the situation was really untenable, and the subcommittee of which the gentleman is chairman I think acted with diligence and I think they are to be thanked and congratulated.

I want to bring to the attention of the House that the gentleman from Texas acted expeditiously and in a very efficient manner.

Mr. KAZEN. I thank the gentleman for his remarks.

Mr. RONCALIO. Mr. Speaker, will the gentleman yield?

Mr. KAZEN. I yield to the gentleman from Wyoming.

Mr. RONCALIO. Mr. Speaker, I would like to pay particular compliments to your friend and fellow Texan (Mr. KAZEN). He has been patient and worked with much ability. He has listened to and helped solve various problems which have arisen with respect to the legislation with which he so capably deals. I

want to pay tribute to him for his excellence in this work.

Mr. Speaker, this group will pay \$5 an acre rather than the old 50-cents fee under the 10-year lease or \$1 under the extension. So thanks to the committee amendment of the gentleman from Texas, we have arrived at a solution which I believe is better than the bill which the gentleman from Colorado and I originally introduced. The legislation is better now than when it went in. I thank the gentleman from Texas for that.

The SPEAKER pro tempore. The gentleman from Pennsylvania (Mr. GOODE), who demanded the second, I presume has yielded to the gentleman from Kansas (Mr. SKUBITZ), and the Chair now recognizes the gentleman from Kansas.

Mr. SKUBITZ. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 2502 which would extend certain Federal oil and gas leases for lands in the State of Wyoming to permit the drilling of an ultradeep gas well.

The Subcommittee on Mines and Mining held hearings on this legislation on March 29. Testimony heard at that hearing revealed that the Rainbow Resources Group, the owners of the leases designated in this bill, had applied to the Department of the Interior in 1975 for approval of a unit agreement and a waiver of the requirement for production prior to the end of the term of some of their leases in order to drill an ultradeep gas well to the depth of 25,000 feet. This well would ultimately cost about \$7 million and would require approximately 3 years to drill, a period much longer than that required for conventional wells.

The Department of the Interior, however, denied the application because of a change in regulations a few months prior to the submission of the application.

In the absence of this legislation, the leases involved will terminate next month and the well will not be drilled.

The members of the Interior Committee believe, in reporting this legislation, that the change in departmental regulations just prior to the application for a lease extension works an undue hardship on the owners of the leases. This legislation will permit the lessees to drill the ultradeep well under very strict terms and conditions set by the Secretary of the Interior.

I understand that the Department is opposed to enactment primarily because the bill would set a precedent. However, the circumstances of this case are so unique that there is very little likelihood that other leaseholders will be coming in asking for similar relief.

I support the bill and I commend the distinguished Chairman of the Indian Affairs and Public Lands Subcommittee (Mr. RONCALIO) for sponsoring the legislation.

Mr. RUPPE. Mr. Speaker, will the gentleman yield?

Mr. SKUBITZ. I yield to the gentleman from Michigan (Mr. RUPPE), the

ranking minority member of the subcommittee.

Mr. RUPPE. Mr. Speaker, I thank the gentleman from Kansas.

Mr. Speaker, I rise in support of the bill H.R. 2502. I would like to thank my colleague, the gentleman from Kansas, distinguished ranking minority member of the committee, for his kind remarks and also say that the two original sponsors of the bill and my colleague, the gentleman from Texas, have all worked very hard to make this a piece of legislation which I believe merits the support of the Members of this body.

The bill basically addresses a point of equity. The people who are involved have certainly intended to drill a very deep exploratory well to 25,000 feet. Because of a change in the Department of the Interior regulations they would be precluded from doing so without the passage of this legislation. I believe in fairness to those people and certainly, as my colleague, the gentleman from Wyoming, indicated, for the benefit of the United States as a whole, we should pass this legislation, which will enable them to test that deeper formation and carry out the purposes for which the lease was secured.

Mr. Speaker, I do support the legislation and urge its passage.

Mr. KAZEN. Mr. Speaker, I urge the passage of the bill.

Mr. Speaker, I want to commend my colleague, the gentleman from Michigan (Mr. RUPPE), the ranking minority member of the subcommittee, for the wonderful cooperation that he has given us in the process of this bill. As has been pointed out, this is the first bill out of this subcommittee this year and we are really proud of the work we did.

Mr. Speaker, I ask for the passage of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Texas (Mr. KAZEN) that the House suspend the rules and pass the bill H.R. 2502, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

#### AMENDING THE ACT OF APRIL 17, 1954, WHICH PRESERVED WITHIN MANASSAS NATIONAL BATTLEFIELD PARK, VA., IMPORTANT HISTORIC PROPERTIES RELATING TO THE BATTLE OF MANASSAS

Mr. PHILLIP BURTON. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2437) to amend the act of April 17, 1954, which preserved within Manassas National Battlefield Park, Va., important historic properties relating to the battles of Manassas, and for other purposes, as amended.

The Clerk read as follows:

H.R. 2437

Be it enacted by the Senate and House of Representatives of the United States of

*America in Congress assembled*, That the Act of April 17, 1954 (68 Stat. 56; 16 U.S.C. 429b), entitled "An Act to preserve within Manassas National Battlefield Park, Virginia, the most important historic properties relating to the battles of Manassas, and for other purposes", is amended as follows:

(1) Strike all after the enacting clause, and insert in lieu thereof "That, in order to establish satisfactory boundaries for the Manassas National Battlefield Park, in the Commonwealth of Virginia, and to contain within such boundaries the important historic lands relating to the two battles of Manassas, the boundaries of such battlefield hereafter shall encompass those lands generally depicted on the map entitled 'Boundary Map, Manassas National Battlefield Park', dated May 1977, and numbered 379-80004-D, which shall be on file and available for public inspection in the offices of the National Park Service, Department of the Interior. After advising the Committees on Interior and Insular Affairs of the United States House of Representatives and the Committee on Energy and Natural Resources of the United States Senate in writing, the Secretary of the Interior (hereinafter referred to as the 'Secretary') may make minor revisions in the boundary from time to time by publication in the Federal Register of a map or other boundary description, but the total area within the battlefield may not exceed four thousand nine hundred acres. The battlefield shall be administered in accordance with the Act of August 25, 1916 (39 Stat. 535; 16 U.S.C. 1 et seq.), as amended and supplemented, and the Act of August 21, 1935 (49 Stat. 666)."

(2) Add the following new sections:

"Sec. 2. (a) In order to effectuate the purposes of this Act, the Secretary is authorized to acquire by donation, purchase with donated or appropriated funds, or exchange, lands and interests therein, including scenic easements, which are located within the boundaries of the battlefield, except that property owned by the Commonwealth of Virginia or any political subdivision thereof may be acquired only by donation. The Secretary may not acquire the fee simple title to any lands identified on the map referred to in the first section of this Act as 'scenic easement' unless he determines that to do so is necessary or desirable in the public interest, and in such event he may acquire the fee simple title only with the consent of the owner."

"(b) The Secretary may negotiate and consummate arrangements with appropriate officials for the removal or rerouting of any road now within the park so as to reduce adverse impacts on park values."

"Sec. 3. (a) Subsequent to the date of enactment of this section, the owner of an improved property on the date of its acquisition by the Secretary may, as a condition of such acquisition, retain for himself and his heirs and assigns a right of use and occupancy of the improved property for non-commercial residential purposes for a definite term of not more than twenty-five years or, in lieu thereof, for a term ending at the death of the owner or the death of his spouse, whichever is later. The owner shall elect the terms to be reserved. Unless this property is wholly or partially donated to the United States, the Secretary shall pay the owner the fair market value of the property on the date of acquisition less the fair market value, on that date, of the right retained by the owner. A right retained pursuant to this section shall be subject to termination by the Secretary upon his determination that it is being exercised in a manner inconsistent with the purposes of this Act, and it shall terminate by operation of law upon the Secretary's notifying the holder of the right of such determination

and tendering to him an amount equal to the fair market value of that portion of the right which remains unexpired."

"(b) As used in this Act, the term 'improved property' means a detached, one-family dwelling, construction of which was begun before January 1, 1977, which is used for noncommercial residential purposes, together with not to exceed three acres of land on which the dwelling is situated and together with such additional lands or interests therein as the Secretary deems to be reasonably necessary for access thereto, such lands being in the same ownership as the dwelling, together with any structures accessory to the dwelling which are situated on such land."

"(c) Whenever an owner of improved property elects to remain a right of use and occupancy as provided in this section, such owner shall be deemed to have waived any benefits or rights accruing under sections 203, 204, 205, and 206 of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (84 Stat. 1894), and for the purposes of such sections such owner shall not be considered a displaced person as defined in section 101(6) of such Act."

"Sec. 4. From the appropriations authorized for fiscal year 1978 and succeeding fiscal years pursuant to the Land and Water Conservation Fund Act (78 Stat. 897), as amended, not more than \$8,500,000 may be expended for the acquisition of lands and interests in lands authorized to be acquired pursuant to the provisions of this Act."

"Sec. 5. For the purposes of this Act, except for the lands acquired pursuant to section 1, no other privately owned lands authorized subsequent to January 1, 1977, to be acquired for inclusion in the National Park System, shall qualify for the purpose of making any payments under the provisions of the Act of October 20, 1976 (90 Stat. 2662), unless hereafter authorized by law."

The SPEAKER pro tempore. Is a second demanded?

Mr. SKUBITZ. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from California (Mr. PHILLIP BURTON) and the gentleman from Kansas (Mr. SKUBITZ) will be recognized for 20 minutes each.

The Chair recognizes the gentleman from California (Mr. PHILLIP BURTON).

Mr. PHILLIP BURTON. Mr. Speaker, I yield such time as he may consume to the gentleman from Virginia (Mr. HARRIS).

Mr. HARRIS. Mr. Speaker, the House of Representatives today has an important opportunity to safeguard a slice of our Nation's history by approving H.R. 2437, my legislation to preserve certain properties on which the Civil War Battles of Manassas occurred. This bill would add approximately 1,800 acres in both Prince William and Fairfax Counties, Va., to the current Manassas National Battlefield Park, a national attraction just 30 miles from the Nation's Capital.

#### SUPPORT FOR PRESERVATION WIDESPREAD

Legislation to preserve the park's boundaries essentially identical to H.R. 2437 passed the House of Representatives

on September 29, 1976, as part of H.R. 14934, an omnibus national parks bill. This year's bill is cosponsored by five of my colleagues from Virginia—Congressman BUTLER, Congressman DAN DANIEL, Congressman FISHER, Congressman TRIBLE, and Congressman WHITEHURST. The bill was reported from the House Interior Committee by a unanimous vote with the Department of the Interior supporting expansion.

Support from organizations is wide ranging, including the American Legion and the Civil War Round Table Associates. Additionally, preservation of the park has been endorsed by the Virginia Division of the United Daughters of the Confederacy, the Prince William Federation of Civic Associations, the Prince William League for the Preservation of Natural Resources, and the Fairfax County Board of Supervisors.

I am pleased to share with my colleagues two editorials from community newspapers, the Manassas Journal Messenger and the Potomac News, which also lend their support to preserving these properties:

[From the Manassas (Va.) Journal Messenger]

Public projects should be administered in such a manner as to provide the maximum benefit for the general public. The subversion of plans for the expansion of the Manassas National Battlefield Park to be used as a medium for opposition to the Marriott Great America theme park were wisely avoided by Congressman Herbert E. Harris in his remarks before an obviously biased group of Park neighbors Sunday evening. In covering the meeting, this editorial writer could not help but notice that many of those present wished to embroil the Congressman's proposal in their continuing fight to drive Marriott out of their own back yard. Some even expressed concern that the Park's future plans might open too much of the Park's land to public access and the possibility that their heretofore untrammelled vistas might be tarnished by the sight of fellow Americans partaking of one of our great historical heritages.

As the one who first suggested that Mr. Harris consider the proposal for the expansion of the Battlefield Park after his predecessor's eleventh-hour attempt to get such legislation through Congress, this editorial writer finds much to commend in this new bill. The bill charts the way for future expansion without committing any tax funds to the acquisition of property or scenic easements. Instead of emphasizing condemnation and coercion on property owners, the bill maintains the right of choice for all concerned. It provides an opportunity for the National Park Service to assimilate a modest amount of additional acreage to assure reasonable protection for the historic investment contained in the present boundaries. As such, the proposal should stand on its merits for what it can do for the general public under the administration of the Park Service.

Similar planning should have been done many years ago, but since it had not been done, it is best that action in this direction begin now. The limited amount of taxable land which might be lost to the county tax rolls would be more than compensated by additional parkland within the county for which the taxpayers would not have to lay out one red cent for either acquisition or maintenance. In a county which is already overzoned and for which no reasonable master plan is likely to emerge, the expansion

of the Park should serve as a buffer against additional spot zoning. Even if Marriott's refiled zoning request for its self-contained project should be approved, an expanded Battlefield Park offers the best hope of eliminating peripheral development in the vicinity.

In spite of the temptation to lump the Marriott application and the Battlefield Park legislation into one neat package, the two must be considered separately. The current hodgepodge of development which has been permitted to occur in Prince William County points up the future difficulty which may be experienced in acquiring land for historical or recreational purposes. It also underscores the need for the county to halt the proliferation of spot zoning and ill-planned development by early institution of a meaningful master plan. Expansion of the Battlefield is a federal matter which deserves the support of Prince William County citizens. Controlling the county's other development is a local matter which must be handled by supervisors with enough gumption to construct a no-nonsense comprehensive plan and stick to it.

In the interim, county citizens would do well to express support for the proposal to expand the Manassas National Battlefield Park. The legislation proposed has the double advantage of being non-coercive and free of drain on the taxpayer dollar. It charts a course for the future by enabling the National Park Service to make its acquisitions of land and easements as time and money permit. It is legislation which stands a good chance of passage by the Congress and ultimate approval by the President. It is legislation for the future whose groundwork must be laid today. The project should be backed on its merits and for no other reason. Other controversies should be settled elsewhere by those charged with the responsibility of handling them. The public interest demands no less.

[From the Potomac News, July 18, 1975]

#### A GOOD MOVE

The efforts of Rep. Herb Harris to enlarge the boundaries of the Manassas National Battlefield Park deserve the keen and active support of Prince William County officials.

Harris last month introduced a bill to add approximately 1,500 acres to the 3,000-acre park in order to preserve several important historic areas. The initial response from the chambers of the County Board of Supervisors was negative, largely because of the loss in taxable acreage which would result. There were also suggestions in other quarters that the move would be damaging to the interests of the Great America theme park which the Marriott Corp. plans to develop on a tract adjoining the park.

There certainly would be lost taxable acreage. However, the enhancement to the park—Prince William's primary tourist attraction—could well offset this loss. Rep. Harris points out, Last year, an astounding 700,000 persons visited the park, and this year, the figure may approach one million. An expanded park would increase the potential for the future in terms of both tourist revenue for the area and jobs for local people.

Less tangible but equally important, or perhaps of primary importance is the preservation for future generations of the rural atmosphere and historic setting in which were fought two of the great battles of this nation's history. The majority of the 1,500 acres proposed for purchase remains in open space, some of it being farmed, though several pieces are being held for eventual commercial and residential development.

We quote from the congressman's explanation of his proposal:

"The addition of this land would greatly enhance the historical importance of the current park. For example, one of the sites

to be acquired is the opening scene of the second battle of Manassas, where Jackson made his decision to fight. Another parcel contains the only surviving building of the village of Groveton, the scene of intense fighting during the second battle. One piece of land is the site of Portici, General Johnston's headquarters during the first battle. And the historic Conrad House, used as a field hospital during both battles, is located on one piece of land. On one parcel stands an imposing woods of trees imbedded with the shrapnel of the Civil War battles."

The purchase proposal should in no way interfere with the Marriott Corp's theme park development, which already has all the land it needs. It could only increase the attractiveness of the area to tourists, and we would expect Marriott to lend its enthusiastic support to Rep. Harris' efforts. The Marriott people pointed out in hearings on their project that Great America should not breed a great amount of periphery commercialism, so little would be lost.

Indeed, the park's expansion should be able to draw solid bipartisan support. While Rep. Harris is a Democrat, his predecessor, Republican Stan Parris, introduced a park expansion bill as one of his last acts before leaving office.

#### SCENES OF HISTORIC CIVIL WAR ACTIONS

The Manassas National Battlefield Park preserves portions of the battlefields of the first and second battles of Bull Run, important engagements of the American Civil War. The acreage to be added by H.R. 2437 will round off and complement the current park and provide vitally needed protection of these areas.

These additions are of tremendous historical significance. The old Stone Bridge in Fairfax County is still standing intact and is where Union troops made a diversionary attack that began the first land battle of the war. One wooded area still has trees imbedded with Civil War shrapnel and is the site of the beginning skirmishes of the second battle and is the place where Gen. Stonewall Jackson made his decision to fight. Another parcel contains the only surviving building of the village of Groveton and another is the site of Portici, General Johnston's headquarters during the first battle. The historic Conrad House, used as a field hospital during both battles, is located on one piece of land included in the bill. The park is one of the few remaining in the Nation where visitors can view the natural terrain on which these engagements occurred. It is a major historical preserve within a half hour drive of the Nation's Capital and is expected to attract 1 million visitors this year.

#### PROVISIONS OF THE BILL

Under the legislation, the Secretary of the Interior could, if he chooses, acquire the designated lands by direct purchase and through scenic easements. The easements to be acquired will generally permit existing areas to be maintained in their current use. The bill contemplates that all purchases and easements would be on a voluntary, willing-buyer-willing-seller basis through negotiation. The bill permits the owner of improved residential property to retain a right of use and occupancy for a life term or up to 25 years, at his or her option. And the bill specifically provides that the lands acquired would qualify for the Payments in

Lieu of Taxes Act of 1976 for the purpose of making payments to local units of government.

#### ENACTMENT NEEDED NOW

Preserving these historical lands is needed now. Prince William County is one of the fastest growing counties in the Nation. From 1960 to 1970, the county's population doubled and its jumped from 111,000 in 1970 to 163,000 today. The completion of two interstate highways are adding growth pressures as are high housing costs in areas closer in to Washington, D.C. Development is encroaching on the park and several parcels bordering I-66 are zoned commercial. One property is for sale and another has been acquired by the National Parks Foundation and is being held for incorporation into the park. Most of the properties included in this bill are in agricultural or residential use and would be conducive to maintaining the historic scene significant to the strategy and tactics of the two battles.

#### CONTINUING THE PRESERVATION EFFORT

The same factors which led the honorable J. Howard Smith of Virginia in 1940 to take steps to preserve this part of our Nation's heritage are operative today: Congress must take the lead in protecting our precious historical lands and monuments before it is too late. One neighbor of the park puts it this way:

I can speak as one who has for seven years observed the solemnity and sacred dignity which attaches to the grounds and their preservation; the stately cedars and the rolling plains are there to be seen by present Americans and by untold millions of citizens yet unborn who may come and silently ponder the significance of this soil.

I urge my colleagues to take this step with me to preserve for all time this precious page in our Nation's history.

#### GENERAL LEAVE

Mr. PHILLIP BURTON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of the bill (H.R. 2437) now being considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. PHILLIP BURTON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 2437 would add some 1,800 acres to the Manassas National Battlefield Park in northern Virginia. This existing unit of the National Park System protects significant portions of two important battlefields of the American Civil War. The enactment of H.R. 2437 will permit a combination of fee simple title and scenic easements to be acquired which will better protect this historic area at a time when increasing region threatens to compromise the historic integrity of Manassas National Battlefield Park.

The bill contains standard provisions for legislation of this nature. A referenced map identifies the lands to be added to the battlefield park, and the Secretary of the Interior is authorized to

make minor boundary changes, subject to a maximum acreage restriction. Fixed term or lifetime rights of use and occupancy may be retained by owners of the properties to be acquired. Areas identified for scenic easement purchase may also be acquired in fee if the owner consents and the Secretary finds it desirable to do so. For land acquisition purposes, the Secretary may expend not more than \$8,500,000 from appropriations which may be made for this purpose from the amounts as authorized for the land and water conservation fund.

H.R. 2437 also contains a provision which will limit the application of the Payments in Lieu of Taxes Act of 1976 to lands which are henceforth authorized for addition to the National Park System. These new lands would not qualify for payments under the existing law, unless specifically authorized. The lands to be added to Manassas National Battlefield Park are included as qualifying for these payments. The effect of this section will simply be to permit the Congress, in each case where new lands are to be acquired, to exercise a specific judgment on the merits of permitting these payments. I am not opposed to the principle of these compensating payments, but I believe it is responsible to consider the decision to permit these payments in each case.

Mr. Speaker, I want to recognize the particular efforts of the gentleman from Virginia, Representative HERB HARRIS, who has put so much of his time and energy into this legislation. Representative HARRIS has studied the situation thoroughly, has met with affected property owners and historians to weigh all sides of this issue, and has succeeded in bringing this matter to the attention of the House. I also want to commend the gentlemen from Kansas, Representative JOE SKUBITZ and Representative KERR SEBELIUS, for their interest and assistance in this matter.

I urge my colleagues to join me in passing H.R. 2437 at this time.

Mr. BUTLER. Mr. Speaker, will the gentleman yield?

Mr. PHILLIP BURTON. I yield to the gentleman from Virginia.

Mr. BUTLER. Mr. Speaker, I have an interest in the legislation because I find myself a patron of it originally. I have the feeling that what has happened is that the most significant part of this bill is not in the title, but in section 5. It seems to me the effect of what we are doing in section 5 is to reverse action of the last Congress with reference to payment in lieu of taxes in all national parklands hereafter acquired. Would the gentleman say that is a fair characterization of what is happening?

Mr. PHILLIP BURTON. I think that is an overstatement. What section 5 contemplates doing and what its effect is, is not to disturb any parks authorized prior to the beginning of this Congress, but all those parks authorized from the commencement of this Congress must meet the individual scrutiny as to whether or not the in lieu tax provision should or should not apply.

Mr. SKUBITZ. Mr. Speaker, will the gentleman yield?

Mr. PHILLIP BURTON. I yield to the gentleman from Kansas.

Mr. SKUBITZ. Would it be fair to say that what we really did here is simply to say that in the future each park or each land will be judged on its merits, on a case-by-case basis?

Mr. PHILLIP BURTON. That is correct.

Mr. BUTLER. Mr. Speaker, if the gentleman will yield further, was not the theory of the payment in lieu that we are taking a property that normally produces taxes for the locality, and letting the Federal Government pick up part of the loss to the localities and the States? Is it logical, therefore, to say that the locality is not suffering for new land, park land acquisitions, but it does suffer from old parkland acquisitions?

Mr. PHILLIP BURTON. If the gentleman has observed, that there are instances where the Congress should recognize the impact on the local tax base, I would agree with that. And if the gentleman is inferring that there are instances where there is an abuse of the taxpayers' money by automatically granting it when the case has not been made, I would agree with that observation.

Mr. YOUNG of Alaska. Mr. Speaker, will the gentleman yield?

Mr. PHILLIP BURTON. I yield to the gentleman from Alaska.

Mr. YOUNG of Alaska. Mr. Speaker, I too have some interest in section 5. I am in the situation in Alaska where, having most lands public lands, being proposed to be put into parks and reservations—and I hope that the wisdom of this Congress will see that this does not happen—but within those public lands there are numerous developments, such as mineral activities, that are on the tax rolls. They would be precluded even if they were not included in the proposed new park—precluded from being taxed because they would not be able to get access out from their holdings.

I have discussed this with the gentleman from California personally, and I hope he understands my interest. Possibly, as the bill moves along through this House and through the other body, an amendment could be added that would justify or rectify that situation.

Mr. PHILLIP BURTON. I understand the remarks of the gentleman from Alaska.

Let me try to spell out what I believe to be the dominant attitude of our committee, or at least my own posture with reference to this. I think, in our responsibility as a matter of a national decision made by the Congress, to take lands from areas where the tax loss impact would be of significance, that we should continue the provisions of the in lieu tax act.

However, there are a number of pending proposals for urban park areas where the in-lieu-of-tax amount over the years is going to be a staggering sum. It was my hope to capture or recapture, if I could, the ability to deal with situations where we have a giant urban community that has come to Congress asking us to place an area into a park and at the

same time asking us to fund upward to \$50 million or \$100 million in lieu of taxes. It is in anticipation of that kind of situation that I thought it was vital that the Congress recapture this authority and make an ad hoc judgment for these massive urban suggestions.

When we come to the more sparsely populated communities, the smaller communities, it is my thought that we must err on the side of having the maintenance of the in-lieu-of-taxes provisions apply to those communities. But when we are talking about the sums of money which are involved in the number of proposals pending before my committee, there is no useful way to treat this issue other than for us to get a handle on it at the earliest possible moment.

Mr. YOUNG of Alaska. If the gentleman will yield further, I am glad to hear him speak about the sparsely populated areas. I can see where our large metropolitan areas now have lost some of their areas to slum areas, and we have been paying for it. I understand the gentleman's interest. I want to make sure the Western States are primarily protected in this matter.

Mr. JOHNSON of Colorado. Mr. Speaker, will the gentleman yield?

Mr. PHILLIP BURTON. I yield to the gentleman from Colorado (Mr. JOHNSON).

Mr. JOHNSON of Colorado. I thank the gentleman for yielding.

Mr. Speaker, the language refers specifically to privately owned land, and the gentleman from California was very aware of the problems of the Western States and the problems transferring from BLM or the Forest Service into a proposed wilderness area or park area, so the language was carefully drawn. An area which presently qualifies for payment in lieu of taxes, if it is transferred into a park system, will continue to qualify, simply because it is public land. As the gentleman pointed out, if there are parks that are to be created out of privately owned land, the area that is to be transferred into the park will not profit from this kind of an exchange, whereas those which presently qualify for payment in lieu of taxes will be protected as they are transferring from one public agency into another public agency.

I think the gentleman has drafted a very worthwhile and carefully drawn amendment, and I commend the gentleman for it.

Mr. PHILLIP BURTON. I thank the gentleman from Colorado (Mr. JOHNSON).

Mr. Speaker, the RECORD should reflect the specific refinement of our proposal was made by the gentleman from Colorado (Mr. JOHNSON), which perfected this proposal.

The long and short of it really is that we can either pretend that there is no limit to the amounts of money we can spend to acquire national parks or anticipate what is very clear, if the Members see the number of bills before my committee, bills being requested by local areas which have enormous tax bases. It would be my understanding that the burden will be on the enormous tax base

areas to justify inclusion, and, on the other hand, on the sparsely populated areas the burden will be on those who say we should depart from the existing law. My own predisposition is that they should be included.

I have no way of knowing how to manage our responsibilities during the course of this Congress because we are going to be making judgments which will entail millions and millions and millions of dollars which I feel will not be thoroughly understood when we go to the park establishment which will pay the tabs for years to come.

Mr. BUTLER. Mr. Speaker, will the gentleman yield?

Mr. PHILLIP BURTON. I yield to the gentleman from Virginia.

Mr. BUTLER. Mr. Speaker, I am reassured by the gentleman's representations. Certainly no area that I represent is of an urban character such as that with which the gentleman is concerned.

I would like to be clear as to where the boundaries are presently laid out for land that has not already been acquired. Is the payment-in-lieu-of-taxes provision still to be available in that situation? That is true, is it not?

Mr. PHILLIP BURTON. Mr. Speaker, that section only applied to the new areas authorized after the date of the commencement of this new Congress. That was the only way we could get a handle on what would otherwise be a very unmanageable financial situation costwise.

Mr. GOODLING. Mr. Speaker, will the gentleman yield?

Mr. PHILLIP BURTON. I yield to the gentleman from Pennsylvania.

Mr. GOODLING. Mr. Speaker, I would only ask that the gentleman and his committee perform the best oversight function possible on this whole situation.

I happen to represent the Gettysburg area. Our local taxpayers, our commissioners, and the representatives of our townships have been fighting against this continued practice of taking more land simply because the legislation says they can take it. Anyplace on which a Yankee or a rebel was supposed to have stepped, they have tried to buy. They do not only try to buy it, but they buy it for double, triple, and quadruple the price that represents the going price, making it impossible for a farmer to purchase any land. Then the Government turns right around and says, "You can live there for another 10, 15, or 20 years."

Not only that, but they have taken businesses that were poor businesses to start with, some that were going bankrupt. Many of these businesses have been sold to the Government at a favorable price, and then after the business has been sold they told them they could continue to stay there and operate.

So, Mr. Speaker, if the gentleman has the time, I hope he will look into situations such as these. It is getting to be a very expensive program, and we have a bad situation resulting in the Gettysburg area.

Mr. PHILLIP BURTON. Mr. Speaker,

I share the concern expressed by the gentleman from Pennsylvania (Mr. GOODLING). It is my intention and the intention of both the majority and the minority side of the committee to see that the American taxpayer gets full value received for any policy decisions recommended by our committee and adopted by the Congress.

Mr. GOODLING. Mr. Speaker, I thank the gentleman.

Mr. PHILLIP BURTON. Mr. Speaker, I have no further requests for time.

Mr. SKUBITZ. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I support this bill, H.R. 2437, which authorizes the expansion of the Manassas National Battlefield Park in Virginia, by approximately 1,800 acres in a combination of fee and easement purchases.

Suburban and commercial development is encroaching on the battlefield at a rapid rate. This bill is very timely for that reason, for in a very short time there will be no opportunity to secure additional lands on the periphery before they are committed to other uses. I should point out in that regard, that the Interior Department recommends that more lands be added to and protected by the park at this time than have been included in this bill.

Mr. Speaker, this bill has one other very important provision that will have effect on this area and all other future additions to the National Park System. This deals with payments in lieu of taxes provisions as related to Public Law 94-565, enacted late during the last Congress. That law provided that area of the National Park System, among other Federal lands, will be subject to payments in lieu of taxes being made relevant to them, to local governments. That legislation had some features which were controversial with some Members, and I, for one, strongly disagreed with the application of payments in lieu of taxes provisions to units of the National Park System.

The bill we are now considering, in section 5, authorizes payments in lieu of taxes for the expansion of Manassas authorized by this bill. Significantly, however, it goes on to preclude further payments in lieu of taxes benefits for all privately owned lands authorized for addition to the National Park System after January 1, 1977, unless specifically authorized by act of Congress.

Mr. Speaker, this is a good and important feature of this bill. It will permit the Congress, in the future, to scrutinize each new park area or addition on a case-by-case basis and to determine individually whether such payment benefits seem warranted.

In most cases, history has amply shown that parklands created have brought more increased economic benefit to the local communities than has been lost in taxes from those lands coming off the tax rolls. The payments in lieu of taxes benefits for some potential new park units, particularly in more developed or urban areas, can be extremely costly to the Federal Government, and should not be automatically applied without close scrutiny.

tiny and individual positive decision being made to apply them.

Mr. Speaker, I heartily support both this change in the payments in lieu of taxes provision as it affects the National Park System, and the provisions to enlarge the Manassas National Battlefield Park, and I urge the adoption of this bill by the Members of this body.

Mr. GOODLING. Mr. Speaker, will the gentleman yield?

Mr. SKUBITZ. I yield to the gentleman from Pennsylvania.

Mr. GOODLING. Mr. Speaker, I forgot to mention that there is one thing the committee could do for the Gettysburg Battlefield. We do not need more land. However, there are three original copies existing, I believe, of the Lincoln address delivered at Gettysburg. We surely could use one at Gettysburg, and I have introduced legislation along those lines.

Mr. SEBELIUS. Mr. Speaker, I want to express my support for the bill before us, H.R. 2437, which authorizes some expansion of the Manassas National Battlefield Park in Virginia.

A substantially similar bill passed the House the last night of session of the last Congress, but failed to receive action by the Senate.

This bill, as it now exists, has not been controversial. However, I want to point out that we very belatedly received, the evening before full committee markup, the Department of the Interior's position on this bill, and that position advocated that considerably more acreage be added on the periphery of the existing park. I am sorry that we did not have the benefit of this position in a more timely manner, so that the committee could have considered those proposed additions. I think that some or all of those additions might be meritorious.

Manassas National Battlefield Park is within commuting distance of Washington, and the growth of development in that area has been very rapid in recent years. The city of Manassas has grown up very near to the existing park. Some of the ground of the historic battlefields has already been lost to development, and this legislation may well constitute the last opportunity to preserve for all time, any remaining historic ground ever to be preserved. Peripheral development is moving in so rapidly that further legislative effort several years later will likely be too late, and would certainly result in the payment of greatly escalated land values.

In addition to those additional areas proposed by the Department to be added, some have contended that the undeveloped tract adjacent to the park owned by the Marriott Corp., the site of the controversial proposed "Great America" amusement theme park, should be added to the park. While I believe there is no responsible way at this late point that the Congress should take such action at this time to preempt those development decisions, I do feel that should this development decision be possibly later abandoned, that the National Park Service might appropriately be given the authority to have the first option to purchase this property.

Mr. Speaker, we have repeatedly suffered sad experiences in many of our historic areas, particularly in the East, where we have not set aside enough land soon enough, and we have lost it for all time to encroaching development. I hope that years from now we will not find that we have suffered the same fate here at Manassas.

This bill is certainly a big step in the right direction toward the proper protection of this important national historic resource, and I commend its approval by my colleagues.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. PHILLIP BURTON) that the House suspend the rules and pass the bill H.R. 2437, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended, and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

#### ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Debate has been concluded on all motions to suspend the rules.

Pursuant to clause 3(b)(3), rule XXVII, the Chair announces that the Chair will now put the question on each motion on which further proceedings were postponed in the order in which that motion was entertained.

Votes will be taken in the following order: S. 955, H.R. 75, H.R. 6794, H.R. 6893, and S. 1377.

The Chair will reduce to 5 minutes the time for any electronic votes after the first such vote in this series.

#### ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair would like to repeat a prior announcement about the electronic voting system. The Chair has been informed that the board displaying each Member's name behind the Chair and the boards displaying the bill number and vote totals to the left and right of the Chair are not working today. However, all voting stations are operating; and the Chair has directed all vote monitoring stations to be staffed with personnel so any Member may go to any monitor and verify his or her vote. Members may also verify their votes—as they should on any vote. By reinserting their card at the same or another voting station.

The Chair therefore directs that the vote be taken by electronic device. Members interested in the progress of the vote may inquire at the vote monitoring stations.

#### AMENDING THE FEDERAL CROP INSURANCE ACT

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and passing the Senate bill S. 955.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Tennessee (Mr. JONES) that the House suspend the rules and pass the Senate bill S. 955, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 377, nays 5, not voting 51, as follows:

[Roll No. 306]

YEAS—377

| Collins, Ill. | Koch          | Teague      |
| Dent          | Lloyd, Calif. | Thompson    |
| Devine        | McHugh        | Thornton    |
| Dornan        | McKinney      | Traxler     |
| Eckhardt      | Marlenee      | Tucker      |
| Flippo        | Mathis        | Wilson, Boh |
| Florio        | Metcalfe      | Wylder      |
| Goldwater     | Milford       | Young, Fla. |
| Hammerschmidt | Mineta        |             |
|               | Myers, Gary   |             |

The Clerk announced the following pairs:

Mr. Thompson with Mr. Armstrong.  
 Mr. Teague with Mr. Devine.  
 Mr. Tucker with Mr. Goldwater.  
 Mr. Badillo with Mr. Hansen.  
 Mr. Baldus with Mr. Kemp.  
 Mr. Flippo with Mr. Ashbrook.  
 Mr. Hawkins with Mr. McKinney.  
 Mr. Breaux with Mr. Hammerschmidt.  
 Mr. Jenrette with Mr. Marlenee.  
 Mr. Florio with Mr. Lloyd of California.  
 Mr. Koch with Mr. Cavanaugh.  
 Mr. McHugh with Mr. Milford.  
 Mr. Mineta with Mr. Pritchard.  
 Mr. Russo with Mr. Dornan.  
 Mr. Harkin with Mr. Gary A. Myers.  
 Mr. Alexander with Mrs. Pettis.  
 Mr. Dent with Mr. Holland.  
 Mrs. Collins of Illinois with Mr. Sawyer.  
 Mr. Thornton with Mr. Metcalfe.  
 Mr. Ichord with Mr. Sebellius.  
 Mr. Mathis with Mr. Steers.  
 Mr. Bevill with Mr. Roe.  
 Mr. Eckhardt with Mr. Hollenbeck.  
 Mr. Traxler with Mr. Bob Wilson.  
 Mr. Wylder with Mr. Young of Florida.

So (two-thirds having voted in favor

thereof) the rules were suspended and the Senate bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

#### ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair wishes to make an announcement. The Chair would like to repeat for the benefit of those who were not present earlier the announcement about the electronic voting. The board displaying the voters' names is not working and the totals on the left and the right of the Chair are not working; however, all voting stations are operating. The Chair has directed that all monitoring stations be manned by personnel, so that any Member may go to any monitoring station to verify his or her vote.

In addition to that, Members may also verify their votes by reinserting their cards in the same or another voting station.

#### ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to the provisions of clause 3(b)(3), rule XXVII, the Chair announces he will reduce to a minimum of 5 minutes the period of time within which a vote by electronic device may be taken on all the additional motions to suspend the rules on which the Chair has postponed further proceedings. The Chair will keep Members advised of the expiration of 5 minutes, so that all Members may have the opportunity to vote.

#### SOIL AND WATER RESOURCES CON- SERVATION ACT OF 1977

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and passing the bill, H.R. 75, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Tennessee (Mr. JONES) that the House suspend the rules and pass the bill, H.R. 75, as amended, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 365, nays 16, not voting 52, as follows:

[Roll No. 307]

The clerk announced the following pairs:

Mr. Thompson with Mr. Cavanaugh.  
Mr. Teague with Mr. Devine.  
Mr. Badillo with Mr. Goldwater.  
Mr. Koch with Mr. McKinney.  
Mr. Tucker with Mr. Hansen.  
Mr. Baldus with Mr. Marlenee.  
Mr. Flippo with Mrs. Pettis.  
Mr. Hawkins with Mr. Ashbrook.  
Mr. Breaux with Mr. Gary A. Myers.  
Mr. Jenrette with Mr. Hammerschmidt.  
Mr. Florio with Mr. Dornan.  
Mr. McHugh with Mr. Kemp.  
Mr. Eckhardt with Mr. Armstrong.  
Mr. Mineta with Mr. Roe.  
Mr. Russo with Mr. Holland.  
Mr. Harkin with Mr. Metcalfe.  
Mr. Alexander with Mr. Sawyer.  
Mr. Dent with Mr. Hollenbeck.  
Mrs. Collins of Illinois with Mr. Sebelius.  
Mr. Bevill with Mr. Bob Wilson.  
Mr. Milford with Mr. Young of Florida.  
Mr. Lloyd of California with Mr. Wylder.  
Mr. Mathis with Mr. Watkins.  
Mr. Ichord with Mr. Traxler.  
Mr. Thornton with Mr. Steers.

Mr. CONYERS changed his vote from "nay" to "yea."

So (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The title was amended so as to read: "A bill to provide for furthering the conservation, protection, and enhancement of the Nation's soil, water, and related resources for sustained use, and for other purposes."

A motion to reconsider was laid on the table.

Mr. JONES of Tennessee. Mr. Speaker, I ask unanimous consent that the Committee on Agriculture be discharged from the further consideration of the Senate bill (S. 106) to provide for furthering the conservation, protection, and enhancement of the Nation's land, water, and related resources for sustained use, and for other purposes, a similar bill to H.R. 75, as amended, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

The Clerk read the Senate bill, as follows:

## S. 106

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Land and Water Resources Conservation Act of 1977".

## FINDINGS

## SEC. 2. The Congress finds that—

(1) There is a growing demand on the land, water, and related resources of the Nation to meet present and future needs.

(2) The Congress, in its concern for sustained use of the resource base, created the Soil Conservation Service of the United States Department of Agriculture which possesses information, technical expertise, and a delivery system for providing assistance to land users with respect to conservation and use of soils; plants; woodlands; watersheds protection and flood prevention; the conservation, development, utilization, and disposal of water; animal husbandry; fish and wildlife management; recreation; community development; and related resource uses.

(3) Resource appraisal is basic to wise land and water conservation. Since individual and governmental decisions concerning land and water resources often transcend administrative boundaries and affect other programs and decisions, a coordinated appraisal and program framework are essential.

## DEFINITIONS

## SEC. 3. As used in this Act—

(1) The term "Secretary" means the Secretary of Agriculture.

(2) The term "land, water, and related resources" means those resources which come within the scope of the programs administered and participated in by the Secretary of Agriculture through the Soil Conservation Service.

(3) The term "land and water conservation program" means a framework for attaining the purposes of this Act.

## DECLARATIONS OF POLICY AND PURPOSE:

## PROMOTION THEREOF

SEC. 4. (a) In order to further the conservation of land, water, and related resources, it is declared to be the policy of the United States and purpose of the Act that the conduct of programs administered by the Secretary of Agriculture for the conservation of such resources shall be responsive to the long-term needs of the Nation, as determined under the provisions of this Act.

(b) Recognizing that the arrangements under which the Federal Government cooperates with State soil and water conservation agencies and other appropriate State natural resource agencies such as those concerned with forestry and fish and wildlife and, through conservation districts, with other local units of government and land users, have effectively aided in the protection and improvement of the Nation's basic resources, including the restoration and maintenance of resources damaged by improper use, it is declared to be the policy of the United States that these arrangements and similar cooperative arrangements should be utilized to the fullest extent practicable to achieve the purpose of this Act.

(c) The Secretary shall promote the attainment of the policies and purposes expressed in this Act by—

(1) appraising on a continuing basis the land, water, and related resources of the Nation;

(2) developing and updating periodically a program for furthering the conservation, protection, and enhancement of the land, water, and related resources of the Nation using all of the resources of the Department of Agriculture; and

(3) providing to Congress and the public, through reports, the information developed

pursuant to paragraphs (1) and (2) of this subsection, and by providing Congress with an annual evaluation report as provided in section 7.

## APPRAISAL

SEC. 5. (a) In recognition of the importance of and need for obtaining and maintaining information on the current status of land, water, and related resources, the Secretary is authorized and directed to carry out, through the Soil Conservation Service, a continuing appraisal of the land, water, and related resources of the Nation. The appraisal shall include, but not be limited to—

(1) data on the quality and quantity of land, water, and related resources;

(2) an analysis of the potential of those resources;

(3) a determination of the changes in the status and condition of those resources resulting from various uses; and

(4) a discussion of current laws, policies, programs, rights, regulations, ownerships, and other considerations associated with the land.

(b) The appraisal shall utilize data collected under this Act and pertinent data and current information collected by the Department of Agriculture and other Federal, State, and local agencies and organizations. The Secretary shall establish an integrated system capable of using combinations of resource data to determine the quality and potential for alternative uses of the resource base and to identify area of local, State, and national concerns pertaining to land conservation, resource use and development, and environmental improvement.

(c) The appraisal shall be made in cooperation with conservation districts and with State soil and water conservation agencies and other appropriate State agencies under such procedures as the Secretary may prescribe to insure public participation.

(d) A report of the appraisal shall be completed by December 31, 1979, and at each five-year interval thereafter.

## LAND AND WATER CONSERVATION PROGRAM

SEC. 6. (a) In order to establish a framework for achieving the national land and water policy and purpose of this Act, the Secretary is hereby authorized and directed to develop, through the Soil Conservation Service, in cooperation with and participation by the public through conservation districts, State and national organizations and agencies, and other appropriate means, a national land and water conservation program (hereinafter called the program) to assist landowners and land users, at their request, in furthering land and water conservation on the private and non-Federal lands of the Nation. The program shall set forth the direction for future soil and water conservation efforts based on the current land, water, and related resource appraisal developed in accordance with section 5 of this Act, taking into consideration both the long-term and short-term needs of the Nation, the landowners, and the land users. The program shall also include, but not be limited to—

(1) analysis of the Nation's land, water, and related resource problems;

(2) analysis of existing authorities and adjustments needed;

(3) an evaluation, based on a system to determine the effectiveness of the soil and water conservation ongoing programs and the progress being achieved in meeting the soil and water conservation objectives of this Act;

(4) identification and evaluation of alternative methods for the conservation, protection, environmental improvement, and enhancement of land and water resources, in the context of specific time frames, and a recommendation of the preferred alternative

using all appropriate authorities of the Department of Agriculture;

(5) investigation and analysis of the practicability, desirability, and feasibility of collecting organic waste materials, including manure, crop and food wastes, industrial organic waste, municipal sewage sludge, logging and food manufacturing residues, and any other organic refuse, composting, or similarly treating such materials, transporting and placing such materials onto the land to improve soil tilth and fertility. The analysis shall include the projected cost of collection, transportation, and placement in accordance with sound locally approved soil and water conservation practices; and

(6) analysis of the Federal and non-Federal inputs required to implement the program.

(b) The program plan shall be completed not later than December 31, 1979, and be updated at each five-year interval thereafter.

## REPORT TO CONGRESS

SEC. 7. (a) On the first day Congress convenes in 1980 and at each five-year interval thereafter, the President shall transmit to the Speaker of the House of Representatives and the President of the Senate the appraisal report and the program as required by sections 5 and 6 of this Act, together with a detailed statement of policy intended to be used in framing budget requests of the Administration for Soil Conservation Service activities. Following the transmission of such appraisal report, program, and statement of policy, the President shall, subject to other actions of the Congress, carry out programs already established by law in accordance with such statement of policy or any subsequent amendment or modification thereof approved by the Congress, unless, before the end of the first period of ninety calendar days of continuous session of Congress after the date on which the President of the Senate and the Speaker of the House are recipients of the transmission of such appraisal report, program, and statement of policy, either House adopts a resolution reported by the appropriate committee of jurisdiction disapproving the statement of policy. For the purpose of this subsection, the continuity of a session shall be deemed to be broken only by an adjournment sine die, and the days on which either House is not in session because of an adjournment of more than three days to a day certain shall be excluded in the computation of the ninety-day period. Notwithstanding any other provision of this Act, Congress may revise or modify the statement of policy transmitted by the President, and the revised or modified statement of policy shall be used in framing budget requests.

(b) Commencing with the fiscal budget for the year ending September 30, 1982, requests presented by the President to the Congress governing Soil Conservation Service activities shall express in qualitative and quantitative terms the extent to which the programs and policies projected under the budget meet the policies approved by the Congress in accordance with subsection (a) of this section. In any case in which such budget so represented recommends a course which fails to meet the policies so established, the President shall specifically set forth the reason or reasons for requesting the Congress to approve the lesser program or policies presented. Amounts appropriated to carry out the policies approved in accordance with subsection (a) of this section shall be expended in accordance with the Congressional Budget and Impoundment Control Act of 1974 (Public Law 93-344).

(c) The Secretary, during budget preparation for fiscal year 1982, and annually thereafter, shall prepare a report which evaluates the program's effectiveness in attaining the purposes of this Act. The report, prepared in

concise summary form with appropriate detailed appendices, shall contain pertinent data from the current resource appraisal required to be prepared by section 5 of this Act, shall set forth the progress in implementing the program required to be developed by section 6 of this Act, and shall contain appropriate measurements of pertinent costs and benefits. The evaluation shall assess the balance between economic factors and environmental quality factors. The report shall also indicate plans for implementing action and recommendations for new legislation where warranted.

#### AUTHORIZATION FOR APPROPRIATIONS

SEC. 8. There are authorized to be appropriated such funds as may be necessary to carry out the purposes of this Act.

#### AVOIDANCE OF DUPLICATION AND OVERLAP

SEC. 9. In carrying out this Act, the Secretary shall utilize information and data available from other Federal, State, and private organizations and shall avoid duplication and overlap of resource appraisal and program planning efforts of other Federal agencies.

#### EFFECTIVE DATE

SEC. 10. The provisions of this Act shall take effect on October 1, 1977.

#### MOTION OFFERED BY MR. JONES OF TENNESSEE

Mr. JONES of Tennessee. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. JONES of Tennessee moves to strike out all after the enacting clause of S. 106 and insert in lieu thereof the provisions of H.R. 75, as passed.

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

The title was amended so as to read: "A bill to provide for furthering the conservation, protection, and enhancement of the Nation's soil, water, and related resources for sustained use, and for other purposes."

A motion to reconsider was laid on the table.

A similar House bill (H.R. 75) was laid on the table.

#### GENERAL LEAVE

Mr. JONES of Tennessee. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

#### FEDERAL ENERGY ADMINISTRATION AUTHORIZATION ACT OF 1977

Mr. SPEAKER pro tempore. The unfinished business is the question of suspending the rules and passing the bill H.R. 6794.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Michigan (Mr. DINGELL) that the House suspend the rules and

pass the bill H.R. 6794, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 272, nays 111, not voting 50, as follows:

[Roll No. 308]

| Dornan        | McKinney      | Thompson    |
| Eckhardt      | Marlenee      | Thornton    |
| Flippo        | Mathis        | Traxler     |
| Florio        | Metcalfe      | Tucker      |
| Hammer-       | Milford       | Wilson, Bob |
| schmidt       | Mineta        | Wyder       |
| Hansen        | Myers, Gary   | Young, Fla. |

The Clerk announced the following pairs:

Mr. Thompson with Mr. Young of Florida.  
Mr. Dent with Mr. Steers.  
Mr. Teague with Mr. Roe.  
Mr. Florio with Mrs. Pettis.  
Mr. Breaux with Mr. Gary A. Myers.  
Mr. Milford with Mr. Kemp.  
Mr. Flippo with Mr. Hawkins.  
Mr. Baldus with Mr. McKinney.  
Mr. Mineta with Mr. Wyder.  
Mr. Russo with Mr. Hammerschmidt.  
Mr. Thornton with Mr. Skubitz.  
Mr. Traxler with Mr. Marlenee.  
Mr. Harkin with Mr. Bob Wilson.  
Mr. Tucker with Mr. Pritchard.  
Mr. Eckhardt with Mr. Jenrette.  
Mrs. Collins of Illinois with Mr. Ichord.  
Mr. Bevill with Mr. Hansen.  
Mr. Badillo with Mr. Sebelius.  
Mr. Koch with Mr. Hollenbeck.  
Mr. Alexander with Mr. Holland.  
Mr. Lloyd of California with Mr. Devine.  
Mr. McHugh with Mr. Sawyer.  
Mr. Metcalfe with Mr. Ashbrook.  
Mr. Mathis with Mr. Armstrong.

So (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Mr. DINGELL. Mr. Speaker, I ask

unanimous consent to take from the Speaker's table the Senate bill (S. 1468) to amend the Energy Supply and Environmental Coordination Act of 1974, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

Mr. SYMMS. Mr. Speaker, reserving the right to object, I do so for the purpose of asking the gentleman from Michigan (Mr. DINGELL) whether the language in the bill still reads "\$500 million" and not "\$1.2 billion."

Mr. DINGELL. Mr. Speaker, if the gentleman will yield, the answer to the question is that we do not substantively change any action taken earlier by the House, but simply call up the Senate bill for purposes of getting a vehicle with which to go to conference with the Senate.

Mr. SYMMS. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

MOTION OFFERED BY MR. DINGELL

Mr. DINGELL. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. DINGELL moves to strike out all after the enacting clause of S. 1468 and to insert in lieu thereof the provisions of H.R. 6794, as passed by the House.

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

The title was amended so as to read: "To amend the Federal Energy Administration Act of 1974 to extend the duration of authorities under such Act, to authorize appropriations for the Federal Energy Administration for the 1978 fiscal year, and for other purposes."

A motion to reconsider was laid on the table.

A similar House bill (H.R. 6794) was laid on the table.

#### AMENDING TITLE 4 OF THE UNITED STATES CODE TO MAKE IT CLEAR THAT MEMBERS OF CONGRESS MAY NOT, FOR PURPOSES OF STATE INCOME TAX LAWS, BE TREATED AS RESIDENTS OF ANY STATE OTHER THAN THE STATE FROM WHICH THEY WERE ELECTED

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and passing the bill H.R. 6893.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. DANIELSON) that the House suspend the rules and pass the bill H.R. 6893, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 294, nays 83,

answered "present" 7, not voting 49, as follows:

[Roll No. 309]

| Hansen        | Myers, Gary   |             |

The Clerk announced the following pairs:

On this vote:

Mr. Tucker and Mr. Florio for, with Mr. Steers against.

Mr. Badillo and Mr. Hawkins for, with Mr. Devine against.

Mr. Koch and Ms. Collins of Illinois for, with Mr. Hansen against.

Mr. Breaux and Mr. Thompson for, with Mr. Hollenbeck against.

Until further notice:

Mr. Jenrette with Mr. Gary A. Myers.

Mr. Ichord with Mrs. Pettis.

Mr. Eckhardt with Mr. Armstrong.

Mr. Flippo with Mr. Young of Texas.

Mr. Lloyd of California with Mr. Pritchard.

Mr. Mathis with Mr. Teague.

Mr. McHugh with Mr. Ashbrook.

Mr. Metcalfe with Mr. Bob Wilson.

Mr. Milford with Mr. Dornan.

Mr. Mineta with Mr. Hammerschmidt.

Mr. Baldus with Mr. Wylder.

Mr. Bevill with Mr. Marlenee.

Mr. Russo with Mr. McKinney.

Mr. Dent with Mr. Sawyer.

Mr. Harkin with Mr. Sebelius.

Mr. Traxler with Mr. Thornton.

Mr. Roe with Mr. Kemp.

Mr. Holland with Mr. Alexander.

Mr. LUKEN and Mr. MILLER of California changed their votes from "yea" to "nay."

So (two-thirds having voted in favor thereof), the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

# EXTENDING THE TIME FOR COMMENCING ACTIONS ON BEHALF OF AN INDIAN TRIBE, BAND, OR GROUP

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and passing the Senate bill S. 1377.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. DANIELSON) that the House suspend the rules and pass the Senate bill S. 1377.

The question was taken; and on a division (demanded by Mr. FOLEY) there were—ayes 162, noes 128.

Mr. MOTTL. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were refused.

So (two-thirds not having voted in favor thereof) the motion was rejected.

The SPEAKER pro tempore. That concludes the votes on the Suspension Calendar.

# PROVIDING FOR CONSIDERATION OF H.R. 6990, MILITARY CONSTRUCTION AUTHORIZATION ACT, 1978

Mr. DODD. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 602 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 602

*Resolved*, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 6990) to authorize certain construction at military installations, and for other purposes. After general debate, which shall be confined to the bill and shall continue not to exceed two hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Armed Services, the bill shall be read for amendment under the five-minute rule by titles instead of by sections. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER pro tempore. The gentleman from Connecticut (Mr. Dodd) is recognized for 1 hour.

Mr. DODD. Mr. Speaker, I yield 30 minutes to the gentleman from Mississippi (Mr. LOTT) for the purpose of debate only, pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 602 provides for the consideration of H.R. 6990, an act authorizing some \$3.5 billion in new military construction projects and related authority for fiscal 1978. This authorization would support our active Armed Forces, Reserve components, defense agencies, and military dependents housing construction programs for this fiscal period.

House Resolution 602 is a simple open

rule, providing for 2 hours of general debate and providing that the bill be read for amendment by titles instead of by sections.

Mr. Speaker, H.R. 6990 is a noncontroversial act which was reported by the Committee on Armed Services by a 28 to 0, rollcall vote. Despite its noncontroversiality, this measure is nevertheless of great importance to our Nation from both economic and defense perspectives.

This act authorizes some 432 new construction projects at 206 military installations in 39 States. These projects are essential to the abilities of our armed services to perform their defense missions, and thus to this country's overall capacity to maintain a strong defense posture.

In addition, these projects also would serve the beneficial purpose of stimulating local economic recovery through increasing employment in the construction trades nationwide.

While none of us likes to view military construction solely as public works programs, Mr. Speaker, I think we can all agree these building projects can contribute to the economic betterment of many sections of our Nation.

Included in H.R. 6990, for example, are construction projects for several States in the Northeast, where unemployment has taken its hardest toll.

The people of my own State of Connecticut have suffered a great amount because of unemployment, and our construction industry and economy are still not completely healthy.

That is why I am especially gratified that the Armed Services Subcommittee on Military Installations and Facilities, under the able leadership of our colleague from Michigan (Mr. NEDZI), saw fit to add two important construction projects for Naval facilities in Connecticut to this bill.

These two projects total \$4,050,000 and represent a \$3.1 million utilities improvements program at the Naval Submarine Base New London, in Groton, and a \$950,000 heating plant for the Naval Underwater Systems Center, in New London.

Besides being important military items because they will contribute to the smooth functioning of two major Naval submarine warfare installations, these projects will provide significant energy conservation benefits and operating efficiencies. All this should result in a further savings to taxpayers.

Lastly, Mr. Speaker, H.R. 6990 contains two significant initiatives by the Committee on Armed Services and its Subcommittee.

To allow the military to share equitably in the energy burden facing our Nation as a whole, the committee is recommending a \$161.1 million program for comprehensive energy conservation in military family housing.

Through a 2-year program to install utility meters in such housing to monitor, and thus control, energy consumption, the committee estimates this usage can be reduced by 23 percent for an annual savings of \$93 million.

The committee also included \$41.1 million to upgrade the physical security of seven chemical weapons storage sites in the United States.

The potential consequences of losing a chemical weapon to some terrorist element could be no less critical than the loss of a nuclear weapon, Mr. Speaker, and the committee should be complimented for acting on its concerns.

Mr. Speaker, in summary, the Military Construction Authorization Act, 1978 is an essential piece of legislation which should be passed by the full House.

I urge its passage and adoption of House Resolution 602, the rule to allow for its consideration.

Mr. LOTT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the gentleman from Connecticut has announced the terms of this resolution. It is a 2-hour, open rule providing for the consideration of H.R. 6990, the Military Construction Authorization Act of 1978. The bill is to be read by titles instead of by sections.

The Department of Defense originally requested \$3,576,517,000; but the authorizing committee has reduced this amount by \$67,957,000. During fiscal year 1978, the Department estimates that of the total authorized the cost will be \$1,068,015,000. These funds will provide support for the Armed Forces, Reserve components, defense agencies, and military housing.

Mr. Speaker, I support the adoption of this rule and the passage of the legislation.

Mr. DODD. Mr. Speaker, I have no further requests for time. I urge adoption of the resolution.

Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

# PERMISSION FOR COMMITTEE ON APPROPRIATIONS TO FILE PRIVILEGED REPORT

Mr. YATES. Mr. Speaker, I ask unanimous consent that the Committee on Appropriations may have until midnight tonight to file a privileged report on the Department of Interior and related agencies appropriation bill for fiscal year 1978.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. McDADE reserved all points of order on the bill.

# APPOINTMENT OF CONFEREES ON H.R. 6823, COAST GUARD AUTHORIZATION

Mr. MURPHY of New York. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 6823) to authorize appropriations for the U.S. Coast Guard for fiscal year

1978, and for other purposes, with a Senate amendment thereto, disagree to the Senate amendment, and request a conference with the Senate thereon.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York? The Chair hears none and appoints the following conferees: Messrs. MURPHY of New York, BIAGGI, STUDDS, OBERSTAR, Ms. MIKULSKI, and Messrs. RUPPE and TRENN.

#### MILITARY CONSTRUCTION AUTHORIZATION ACT, 1978

Mr. NEDZI. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 6990) to authorize certain construction at military installations, and for other purposes.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Michigan (Mr. NEDZI).

The motion was agreed to.

#### IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 6990, with Mr. MIKVA in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from Michigan (Mr. NEDZI) will be recognized for 30 minutes, and the gentleman from Virginia (Mr. WHITEHURST) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Michigan (Mr. NEDZI).

Mr. NEDZI. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, today the House Committee on Armed Services presents H.R. 6990, the military construction authorization bill for fiscal 1978.

The purpose of the bill is to provide new military construction authorization and related authority in support of the military departments and defense agencies.

At this point, Mr. Chairman, I want to thank the ranking member of the Subcommittee on Military Installations and Facilities, the distinguished gentleman from Virginia, the Honorable G. WILLIAM WHITEHURST, and all of the members of the subcommittee for their tireless efforts during the hearings and markup sessions on the bill. Without their diligence and the high degree of attendance, we could not be here to seek a vote on H.R. 6990.

We believe that H.R. 6990 is a good bill. It is a balanced measure that the House should support. It is not a bill for the Air Force, the Navy, the Army, the Marine Corps or the Defense Department; it is a committee bill that reflects the judgment and efforts of its members.

The Defense Department requested new authorization in the amount of \$3,576,517,000 for fiscal year 1978. This request is \$208 million, or 6 percent higher

than the \$3.4 billion requested in fiscal year 1977.

As submitted to the Congress, the construction program for fiscal year 1978 contained approximately 466 individual line item projects at approximately 280 military installations within the United States and overseas.

After extensive hearings in nine separate sessions and close review of each request project, the committee was able to determine those proposals that in its view could be deferred without impairing the operational effectiveness of the armed services.

We took the approach, Mr. Chairman, that we would not cut projects just for the sake of cutting, but would delete projects that we felt could be deferred without damaging our national security. In certain instances, we added projects where it was determined by testimony that the priority was great enough to support such action of the committee.

The committee, as a result, agreed upon a reduced total in the amount of \$3,508,560,000 in new authorizations which I would point out to the Members of the House is \$67,957,000 less than the total amount requested.

While it is not possible at this time to discuss each project, since there are some 466 of them, I would point out some of the significant items of interest to the Members.

Of particular importance is the major initiative the committee has developed that establishes a comprehensive energy conservation program for military family housing in the United States and its possessions. A two-step process is involved. First, the committee added \$161.1 million to implement a 2-year program to individually meter energy consumed in the 287,352 units in the United States, Puerto Rico and Guam. An additional \$83,000 is authorized for the 432 units of new construction authorized in this measure. Based upon available information the committee estimates this will reduce energy consumption in military housing by 23 percent, for an annual savings of \$93 million. Thus the cost of installing the meters will be recovered in less than 2 years.

The second step of the program directs the Secretary of Defense to establish reasonable energy consumption rates for military housing units and assess the occupants for any consumed amounts exceeding those rates. This should not be construed as a diminution of the serviceman's benefits. The service family still would be entitled to these utilities, but no longer could enjoy any excessive use of energy without having to pay for it.

Complementing this effort is the inclusion of \$15,300,000 in energy conservation projects at various installations. The committee believes that more emphasis will be placed in this program once the ongoing Department of Defense

The Committee is recommending \$16.5-base structure is completed. 750,000 in pollution abatement projects. The amount for air pollution abatement is \$3,614,000. For water pollution abatement, the total is \$13,136,000.

With the \$35,126,000 in previous authorization contained in the House-passed measure, H.R. 5502, the fiscal year 1977 supplemental military construction authorization bill, this new authorization will help to bring the Defense Establishment into compliance with environmental pollution control law and regulations.

A second major committee initiative adds \$41,179,000 to upgrade the physical security at seven chemical weapons storage sites in the United States. The committee felt that these special weapon sites should have the same high degree of protection against penetration as nuclear weapons sites for which \$82.8 million was requested and approved.

Also included in the bill is \$1,591,221,000 for military family housing, which is \$136,581,000 above the Department's request of \$1,454,640,000. Proposed construction of 432 new family housing units in this country and 4 units abroad accounts for nearly \$10.7 million of the total amount. The balance is to be used for maintaining and operating existing housing units, improvements to existing quarters, leasing costs, payments of principal and interest, homeowner's assistance and the committee's energy conservation initiatives.

In title VI, the Department requested an increase in the per square foot cost of barracks and bachelor officer quarters. The present cost limitations are \$39 and \$42 respectively. The Department's request for \$42 and \$45 per square foot, respectively, was approved.

In title VII, for guard and reserve force facilities, the committee approved the total amount requested, \$152,967,000.

Generally speaking, the bill emphasizes construction to improve the Army's readiness and enhance combat capability. The committee approved \$964,519,000 for the various Army projects. Most of this construction is directly related to improving readiness.

Modernization projects needed to support the operating forces of the Navy and to improve Marine Corps preparedness have been approved. The committee approved \$422,295,000 in Navy and Marine Corps construction projects.

For the Air Force, project emphasis has been placed upon force and deployment goals outlined in the Department's posture statement to the Congress, including depot plant modernization, airfield survivability measures in Europe and nuclear security improvements. The committee approved \$346,908,000 for the total Air Force program for fiscal year 1978.

People-oriented programs such as housing improvements, dental and medical facilities, and pollution abatement projects, as I mentioned previously, as continued, although at a somewhat reduced scale, because of the ongoing Department of Defense base structure the total program would add to an study.

The committee believes that the bill is very austere compared to prior year requests and that any sizable reduction in already growing backlog of new construction needed at our military installations.

This briefly, Mr. Chairman, is the committee's recommendation to the House. We are prepared to answer any Member's question regarding the committee's action and our recommendations. We believe our recommendation to the House is a good one and I recommend approval of H.R. 6990.

Mr. SKUBITZ. Mr. Chairman, will the gentleman yield?

Mr. NEDZI. I yield to the gentleman from Kansas (Mr. Skubitz).

Mr. SKUBITZ. Mr. Chairman, I rise in opposition to any move that would provide an authorization for the proposed Mississippi Army Ammunition Plant at Bay St. Louis, Miss.

On May 9 I addressed a letter to the chairman of the House Armed Services Committee expressing my opposition to construction of the proposed plant in Mississippi. I have asked unanimous consent to have that letter reprinted in the RECORD:

WASHINGTON, D.C.,  
May 9, 1977.

HON. MELVIN PRICE.

DEAR MR. CHAIRMAN: Tomorrow when the House Armed Services Committee has before it H.R. 6990, the Military Construction Authorization Act for Fiscal 1978, an effort may be made to amend the Subcommittee's bill to provide \$181.2 million in authorization for the proposed Mississippi Army Ammunition Plant. I cannot emphasize enough how emphatically I oppose the construction of this facility and it is my hope that you will oppose any amendment providing authorization for this Army and Senator Stennis boondoggle.

As you are well aware, numerous Army ammunition facilities throughout the United States have undergone plant closings or substantial reductions in their work forces because of the cessation of hostilities in southeast Asia and restrictions imposed on the stockpiling of munitions. Each Member of Congress, with the exception of the Mississippi delegation, should consider the proposed construction of this plant after so many nationwide closings—a slap in the face.

It is proposed that the Mississippi Army Ammunition Plant will produce the new 155 mm. M-483 Improved Conventional Munition (ICM) at a maximum of 120,000 rounds/month. In 1975 the cost of this plant was \$228.5 million, now it has been placed at \$397.8 million.

In my own Congressional District is the Kansas Army Ammunition Plant at Parsons, Kansas (KAAP). This plant will soon have the capability of loading, assembling and packing 42,000 rounds/month of the 155 mm. M-483 ICM. The Lone Star Army Ammunition Plant (LSAAP) at Texarkana, Texas, will have the same capability of these plants for this round can be doubled with only a total cost of \$30 million.

Construction of the Mississippi Army Ammunition Plant would have not only an adverse impact on KAAP and LSAAP, but it also would adversely affect industries in California, Massachusetts, and Louisiana which will have the responsibility of providing the metal parts for the 155 mm. M-483 ICM which are loaded, assembled, and packed at the Parsons and Texarkana facilities.

The Army proposal to construct the Mississippi Army Ammunition Plant has raised such serious doubts in my own mind that I have requested an official General Accounting Office inquiry into the Army's actions on the proposed Mississippi Army Ammunition Plant. I have directed both the GAO and my

personal staff to keep Mr. Paul Tsompanas of the Committee's staff fully informed on the progress and results of the GAO inquiry. Some of my reasons for requesting the inquiry are:

1. The Army's mobilization requirement for the round appears to be questionable.

2. I have received information that the Army may have established this mobilization requirement only to justify the construction of the Mississippi Army Ammunition Plant.

3. The Army has stated that it can double the loading, assembling and packing capabilities at Parsons and Texarkana for only \$30 million.

4. After comparing construction costs at Parsons and Bay St. Louis, there are serious doubts as to the validity of the Army's computations for constructing the facility at Bay St. Louis.

5. I have been informed that given the appropriate amount of lead time—private enterprise can produce the metal parts for the 155 mm. M-483 ICM cheaper than can be achieved at the Mississippi Army Ammunition Plant.

6. While the Army has said that construction of the Mississippi Army Ammunition Plant may not have an adverse effect on employment levels at KAAP and LSAAP, recent history would indicate that once the plant is constructed, KAAP and LSAAP will be "mothballed".

7. In view of the fact that the Congress is cutting the defense budget, it makes little sense to create new plants established on "ifs, ands, or buts".

The most compelling argument, though, to reject any proposal to authorize funding for the Mississippi Army Ammunition Plant in the House bill is that authorization for the facility is already contained in the Senate bill. Surely the most appropriate course to follow is to reject any authorization for the Mississippi Army Ammunition Plant until more is known from the GAO and then iron the matter out in conference.

With best wishes, I am,

Sincerely,

JOE SKUBITZ.

I do want to apologize to Senator STENNIS for calling the project a boondoggle. I have known him for many years and I know him to be a gentleman although I do think he is mistaken with regards to the need for this plant.

The Army has requested \$181.2 million for this project. The Armed Services Committee has wisely seen fit not to provide the authorization requested by the administration. This is due, in large part, to the leadership of Mr. NEDZI, Mr. PRICE, Mr. DAVIS, and Mr. ICHORD. I wish to applaud the efforts of these four gentlemen on the question of the Mississippi Army Ammunition Plant. Later I submitted a statement to the committee and I insert it in the RECORD at this point.

STATEMENT OF HON. JOE SKUBITZ BEFORE THE HOUSE ARMED SERVICES SUBCOMMITTEE

Mr. Chairman and Members of the Subcommittee: I appreciate the opportunity to appear here this morning to testify on H.R. 5692—the 1978 Military Construction Authorization Act. At the outset, I want to compliment the Members of the Subcommittee for your efforts to ensure our nation's security at a cost which has not been exorbitant to the American taxpayer.

I am here today because of a particular request for authorization of funds contained in this military construction bill. That request is one I oppose and I recommend that the Subcommittee delete the \$181.2 million

construction authorization for the proposed Mississippi Army Ammunition Plant at Bay St. Louis, Mississippi. The Bay St. Louis proposal is just as unsound this year as it was in 1975—the year the Congress rejected a similar proposal to construct a new facility. That was at the time most of the nation's Army Ammunition Plants either were having their work forces reduced substantially or were being closed completely.

The Army no doubt has told this Committee that the Bay St. Louis plant is needed to produce its new ammunition round, the 155 mm. M 483, Improved Conventional Munition (ICM) . . . That the 155's should be manufactured at the Bay St. Louis site because this is the most cost-effective location—at least as far as they have been able to determine. The Army has told you that this facility will be able to produce 120,000 rounds per month. And they will contend that because all the work on the round (the production of small metal parts and the loading, assembling, and packing process) will be done at the Bay St. Louis site—the American taxpayer will realize a great savings.

The only one of the Army's contentions with which I agree—is that they do need the 155's.

The Mississippi Army Ammunition Plant is not needed to produce the new round. Already two facilities in the United States facilities are the Kansas Army Ammunition Plant at Parsons, Kansas, which is in my Congressional District, and the Lone Star Army Ammunition Plant at Texarkana, Texas. Both of these facilities experienced substantial work force reductions two years ago. Most importantly, however—each will soon have the capability of producing 42,000 rounds per month of the 155 mm. M483, ICM.

The Army maintains that this production level is not high enough to meet its mobilization requirements. I am not in a position to speak to this point. However, I want it to be noted that the Bay St. Louis facility will have a maximum production capability of 120,000 rounds per month of the 155 mm. M 483 ICM—and this will be at a construction cost of at least \$397.8 million.

The Army's major contention in its proposal to produce the new round at Bay St. Louis is that this is the most cost-effective site.

On this issue, permit me to read from the House Report 94-517, the Report on the Department of Defense's appropriations bill for Fiscal 1976. The Appropriations Committee said on the question of the Bay St. Louis site, "The Committee believes that a more orderly program would result from upgrading old facilities or constructing new facilities near old facilities being phased out rather than constructing new facilities where no experienced personnel are available." And with this conclusion I am in agreement.

I can understand that the need for greater production of the 155 mm. M 483, ICM may be an overriding concern of the Members of this Subcommittee. Therefore, I want to suggest an alternate proposal which I believe the subcommittee should act upon.

Since two plants already have the capability of producing the 155 mm. M 483, ICM—the Kansas Army Ammunition Plant and the Lone Star Army Ammunition Plant, the Congress should act to double both of the plants' capabilities. This would bring the two plants to a combined production capability of 168,000 rounds per month. The total cost for this expansion would be approximately \$30 million as compared with the estimated \$397.8 million cost for the Bay St. Louis facility. And if additional production is needed this can easily be provided by the two plants now in production. Additionally, this expansion would take place where layoffs previously occurred—thus enabling experienced workers to be hired—an important

consideration as previously noted in the Appropriations Committee Report in the 94th Congress.

On May 17, representatives of the Defense Department and I met to discuss the need for the Mississippi plant, the cost of construction, whether the job could not be done more economically by enlarging existing facilities or reopening facilities that have been closed down. We discussed what the effect of the operation would be once the Mississippi plant went into production, and on plants now in production and loading shells when peacetime requirements were reduced.

I was not satisfied with the conference and on May 24 addressed the following letter to General Malley. To which I have not yet received a reply. I insert that letter in the RECORD:

WASHINGTON, D.C.,  
May 24, 1977.

Maj. Gen. ROBERT MALLEY,  
Director of Combat Support Systems, Office  
of the Deputy Chief of Staff for Research,  
Development and Acquisition, Department  
of Defense, Washington, D.C.

DEAR GENERAL MALLEY: I regret not being able to complete the briefing at my office on May 17. Hopefully, we can get together again as soon as I return from Kansas following the Congressional recess.

There were a number of points raised at our meeting—some of which were not made clear. Therefore, I would appreciate having your response to the following questions.

(1) There has been an apparent change in Army policy to provide for keeping as many ammunition plants as possible operating on at least one-shift per day basis. I understand the purpose of this "warm base" plan is to avoid the high costs involved in "mothballing" and then having to re-open plants for production. Additionally, the purpose, I understand, is to shorten the time it would take to gear-up for full production in the event of mobilization. Is this correct?

(2) Previously, I had been advised that the level of production of the 155 mm M-483 round required for mobilization was just over 200,000 rounds per month. Now, I am told that figure has risen to 438,000 rounds per month. Would you kindly advise me of the basis in fact for this more than one hundred percent increase? I recall you indicated it is because of a shift in primary focus from the former Southeast Asia war scenario to the current NATO scenario. An additional question then is, what has changed in the NATO scenario to demand this enormous increase in production? Didn't a NATO war scenario exist during the time of the war in Southeast Asia? Was the Defense Department negligent in making preparations for war involving the NATO countries during the time of fighting in Southeast Asia? After all, it would seem to me that the threat from the Soviet Union would have been the greatest while our attention and so many of our resources were focused in the Southeast Asia area. Is the increase in mobilization production requirements based on some commitment we made or plan to make to NATO to help meet their requirements?

(3) I recall that you stated that the number of 155 mm M-483 rounds to be produced and stockpiled (authorized acquisition objective) is four and one-half million. Further, I understood you to say that this production is for U.S. needs for a 180-day period of war plus the estimated needs of the

Koreans for one year. Is this statement correct? Now, if I am correct—you also indicated it could take as long as nine years to produce this amount. If the NATO demands are so pressing, why not operate the available production lines at the Parsons and Lone Star plants on a three shift per day basis rather than one shift per day, until the Mississippi plant is constructed—if it is to be constructed? If money to do so is not available—have you requested such funds of the Congress?

(4) I understand that both the Parsons and Lone Star plants are producing 155 mm M-483 shells on a one-shift per day basis now. Is this true and how many rounds per month are being produced at each plant?

(5) As I recollect—and if I'm wrong, please correct me—the Army's plans are to continue operating both the Parsons and Lone Star plants on at least a one-shift per day basis until such time as the AAO level is reached (4.5 million rounds)—which, according to your statement, could take up to nine years. Will there be a time when Parsons or Lone Star will go to two shifts per day? If so, when will that be and which plant could be expected to increase its production?

(6) If the Mississippi Army Ammunition Plant was authorized now to be built, how long would it take to complete the plant? My understanding is you stated it would be finished by 1983. Is this correct? When could it start producing the 155 mm M-483 shells? Would this plant also be operated in order to achieve the AAO level of production? If so, how many shifts per day? Would the Parsons and Lone Star plants both continue to operate at the same time?

(7) I understood you to say that the Bay St. Louis, Mississippi Plant would be operationally the most cost efficient at its mobilization production level. Further, that especially because of diversification, the Lone Star and Parsons facilities would be more competitive from a cost standpoint—at peacetime production levels. Am I correct in my understanding?

(8) So far as diversification is concerned, planned modernization/expansion projects for the Parsons facility are itemized in the Army's recent Information Paper dated May 3, 1977. Would you please advise me what other ammunition facilities have or will have the same production capability and what plans there are for production of these items at Parsons and other plants?

(9) We had time at our meeting to only briefly discuss a news release concerning the proposed construction at Lone Star of a metal parts production facility for the 105 mm shell. Am I correct that both Parsons and Lone Star are capable of loading, assembling and packing the same type of 105 mm shell? If so, what would be the effect so far as 105 mm shell production is concerned on the Parsons plant, which has no metal parts capability, if such a facility is constructed at Lone Star? I might add that it seems to me the Army should have come to me in the first place to explain their plans for constructing this new facility since it involves production of the 105 mm shell which is also loaded at Parsons. Instead, I had to learn about the Army's actions through the press.

(10) The proposed Mississippi plant would have a production capability of 120,000 rounds per month. What is the total estimated cost for the construction of this facility?

(11) The Army has previously informed me that the load, assemble and pack capability of the Parsons and Lone Star plants could be doubled—to provide an additional

84,000 rounds per month—at a total cost of \$30 million. What would be the cost of adding metal parts capability equal to this production level at these plants? Why would this not be more economical? Please provide me with a breakdown of your cost analysis in making a determination.

(12) You will recall that during our discussion I raised the point of the wage rates for certain construction workers being lower at Parsons, Kansas than at Bay St. Louis, Mississippi. You stated that the Army's figures had shown the opposite to be the case. Additionally, you said your staff had recomputed the construction costs of the proposed facility using the labor figures I had obtained—but that your final analysis was that it would still be less expensive to build the plant in Mississippi. However, I understand that after our meeting broke up—and I had returned to the House Floor—it was discovered by your staff that the wage rate figures used in your recomputation were the wrong Davis-Bacon rates. Hence, my question—is it not correct that the wage rates for skilled construction laborers are lower at Parsons than at Bay St. Louis? If not, would you kindly give me a breakdown of the wage figures upon which you are relying and the source of your information? Certainly, mistakes can easily be made when dealing with figures in determining construction and operating costs and so forth. I am sure, therefore, that you can readily understand my concern that if mistakes were made in determining wage costs—then there could also be mistakes which were made in calculating costs in other areas.

Thank you for your assistance in this matter.

Sincerely,

JOE SKUBITZ.

The Senate has provided \$181.5 million in authorization for this plant in its military construction bill. Also—because of questions I have raised—the House committee has seen fit to schedule special hearings on the question of constructing the Mississippi plant after the House enacts this bill, and before the House and Senate versions go to conference.

This will give ample time for a complete review of the Mississippi plant and any move which would now authorize funding for the project can only be labelled as a premature.

It is an issue which can be resolved between the conferees after the General Accounting Office report is received. I am sure that after the hearings are held it will be clearly shown that the best interests of our Nation will be served by providing for the production of the Army's 155 mm M-438—(improved conventional munition—at existing Army ammunition plants or those which have either been closed or have had their work forces reduced.

The question of the Bay St. Louis, Miss. site is not new to this body. It was an issue which was dealt with in 1975 by the Defense Appropriations Subcommittee. That committee clearly said that there was a serious question about the need for the Mississippi plant and, moreover, that if the need did exist, the need could best be filled by producing the new round at either an existing Army

ammunition facility or at one which had been closed.

The Army made a study which they maintain proves that the Mississippi site is the most cost effective—their arguments may or may not be legitimate—I am only one Congressman and I certainly do not have the resources to combat legions of accountants and experts which the Army has at its disposal. There are a few points, though, that I think should be made.

First of all, in 1975, the Army estimated the cost of the Mississippi plant to be almost \$229 million. Now the Army has come forward with an estimated cost for construction at this site of almost \$398 million. The Army has provided me with an explanation for this dramatic increase in the cost. They established point by point, the reasons for each increased cost discrepancy.

One of the points the Army put forth was that an, "old estimate was a very poor guesstimate."

What I fear, Mr. Chairman, is that this point which the Army has raised on one portion of their earlier study may apply to a good many other assumptions which they have established in calling for the establishment of the Mississippi plant.

I have requested that the General Accounting Office investigate fully whether or not the Mississippi site is the most cost effective.

One of the key points the Army has made in arguing for the Mississippi site is that because of the low wage rates in Mississippi, necessarily the production costs of the round will be much cheaper. But what the Army all too often fails to note is that these wage rates are based on statewide rates for the entire State of Mississippi as opposed to the actual Davis-Bacon rates for Bay St. Louis proper.

I will not argue that if one were to have an ammunition plant constructed in every Mississippi community and one constructed in every Kansas community, necessarily Kansas would pay a lower wage to all of its ammunition plant workers. Clearly, one might find that the rate for Mississippi as an average would be lower than Kansas as an average.

What we need to remember is that the facility will be constructed in Bay St. Louis, Miss.—which has a considerably higher wage level than the rest of the State of Mississippi and indeed Parsons, Kans.—which now has an Army ammunition plant capable of loading, assembling, and packing the 155 round.

Now there may be some Members who believe the only reason I am opposing construction of the Mississippi plant today is because of the existence of the Kansas Army Ammunition Plant at Parsons, Kans.—that is not the case.

I am opposing the Mississippi plant because I am interested in a fair return of the American taxpayers' dollars on their investment in Army ammunition plants.

The issue before us is clear. There is

considerable controversy between Members of the Mississippi delegation and Members of the Kansas delegation over the Bay St. Louis, Miss., Army Ammunition Plant, this controversy has arisen because the Army has provided insufficient information to warrant the construction of this facility which may well result in construction costs alone of almost half a billion dollars.

Until more information is presented to this House on the need for the Mississippi plant, it would be pennywise and pound-foolish of this body to authorize the expenditure of tax dollars for the Mississippi Army Ammunition Plant. I urge the rejection of any authorization for this plant.

Am I correct that the committee has determined to defer the Mississippi Army Ammunition Plant for the time being?

Mr. NEDZI. I am not sure that the word "defer" is correct. The committee simply did not authorize it.

Mr. SKUBITZ. If the gentleman will yield further, it did not authorize the construction of the plant; is this correct?

Mr. NEDZI. That is correct.

Mr. SKUBITZ. Mr. Chairman, I want to compliment the committee. I think it should hold hearings and should wait for the report from the General Accounting Office on this matter before it acts.

I thank the gentleman and I thank the committee.

Mr. MONTGOMERY. Mr. Chairman, will the gentleman yield?

Mr. NEDZI. I yield to the gentleman from Mississippi (Mr. MONTGOMERY).

Mr. MONTGOMERY. I thank the gentleman for yielding.

Mr. Chairman, I know there has been some controversy on the ammunition plant. It was recommended by the Army that it needed it to keep up with its mobilization requirements with the 155 millimeter shell. In the colloquy several weeks ago with the chairman of this subcommittee I believe the gentleman mentioned that the subcommittee would have hearings again and invite the Army back before the subcommittee before the conference of this military construction bill, to consider what other information the Army might have on the necessity of asking for this ammunition plant. Is that correct?

Mr. NEDZI. Mr. Chairman, it is the intention of the chairman of the subcommittee to do everything that is necessary in order to get a complete picture of our ammunition situation and the desirability of locating the plant in Mississippi or alternative facilities elsewhere.

Mr. MONTGOMERY. Mr. Chairman, I thank the gentleman.

I, of course, would be quite interested if the plant would come to Mississippi, but I think the key to it is this: whether or not the Army needs the ammunition. I am sure that is the spirit in which the subcommittee will consider this proposal.

Mr. NEDZI. Mr. Chairman, I concur in the gentleman's assessment.

Mr. Chairman, I yield such time as he

may consume to the chairman of the Committee on Armed Services, the gentleman from Illinois (Mr. PRICE).

Mr. PRICE. Mr. Chairman, it is a great pleasure for me to return to my duties as chairman of the Armed Services Committee. In so doing, I would like to express publicly my appreciation to our ranking Democratic Member, CHARLIE BENNETT, for the excellent job he did in chairing the committee during my absence. It fell to Mr. BENNETT to manage during this period the major piece of legislation the committee reports each year, the Defense Department appropriation authorization bill. A reading of the record bears out what many Members have told me privately which is that Mr. BENNETT did a splendid job in managing the bill. Mr. BENNETT managed the debate so that all Members who wished had an opportunity to be heard and he defended the committee's legislation with great skill.

He also during this time chaired a number of difficult hearings and provided the needed leadership in other areas of the committee's work.

I simply want to acknowledge publicly this contribution by a fine legislator that we are very proud of on the Armed Services Committee.

Mr. WHITEHURST. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in support of H.R. 6990.

First, Mr. Chairman, I want to say that all of us on this side of the aisle are grateful for the effective leadership of the gentleman from Michigan (Mr. NEDZI) in expediting the hearings on this bill and moving rapidly and effectively, yet giving every Member a chance to be heard on the provisions of the bill.

Mr. Chairman, I am pleased to rise in support of H.R. 6990, the Military Construction Authorization Act for fiscal year 1978.

This bill is limited to what we deem essential. Our committee has brought to the House a bill that provides not only necessary construction at military bases at home and abroad but at the same time recognizes the call for economy in the Federal budget. As the gentleman from Michigan noted, the bill is nearly \$68 million below the amount requested by the Defense Department.

Throughout hearings on this legislation, the committee impressed on the Department of Defense witnesses the need for putting these projects under contract as quickly as possible. This will help the unemployment situation and enable the Government to take advantage of a good bidding climate in the construction industry, which benefits every taxpayer.

I wholeheartedly endorse the committee initiative in H.R. 6990 to reduce the military's energy consumption by individually metering military family housing units in the United States, Puerto Rico, and Guam. This is indeed the most important nondefense aspect of the bill. It is the committee's opinion

that the Defense Department should set a guiding example in the national effort to conserve energy.

Mr. Chairman, there are many other things I could say about this legislation, but I will not take the time to do so now. We are prepared to answer any questions that the Members may have. We believe we have brought a good bill to the floor, and I urge the passage of H.R. 6990.

Mr. NEDZI. Mr. Chairman, I yield 5 minutes to the gentleman from California (Mr. LEGGETT).

Mr. LEGGETT. Mr. Chairman, I do not intend to offer an omnibus amendment to this bill; however, before we vote, I would like to insure that my colleagues are fully aware of the budget history behind this bill including related Senate action and justification. In addition, I would like to enter into the record a list of new projects added by the Senate but not included in the House version of this important authorization bill.

To begin with, early this year when the budget crunch was on, President Ford and Secretary of Defense Rumsfeld recommended a \$1 billion slash in new authorization for military construction programs. As a result, the total Ford request for military construction projects sent to Congress on January 18 amount-

ed to only \$2.7 billion—or nearly \$640 million less than the fiscal year 1977 authorization.

Upon assuming office, the Carter administration soon recognized a need to stimulate the economy in a number of public works areas. Unfortunately, this recognition did not materially change the emasculation in military construction programs for fiscal year 1978, as the Carter budget revisions only restored about \$310 million to the Ford request for military construction. The final Carter administration request for fiscal year 1978 totaled \$3,576,517,000 for new authority to construct 466 projects at 280 installations in 34 States and 15 foreign countries, and to operate and maintain the present inventory of military family housing.

On May 11, the House Committee on Armed Services filed its report on the Military Construction Authorization Act of 1978, to accompany H.R. 6990. This bill, as approved by the Committee on Armed Services, provides \$3,508,560,000 in new authorization—or \$67,957,000 below the amount requested in the already austere Carter budget for military construction in fiscal year 1978. A comparison of the Department of Defense request in the revised Carter budget and the changes affected by committee action is illustrated in table 1 below:

TABLE 2.—SUMMARY OF SENATE FLOOR ACTION

(In thousands of dollars)

|   | Army, title I | Navy, title II | Air Force, title III | Defense, title IV | Family housing title, V | Reserves, title VI | Total     |

| Adjustments.....                          | -199,117      | -35,580        | -18,803              | +25,529           |                         |                    | -229,547  |
| Energy projects.....                      | +25,336       | +30,479        | +41,416              |                   |                         |                    | +97,231   |
| Pollution projects.....                   | +52,640       | +32,950        | +27,377              |                   |                         |                    | +112,967  |
| Operational projects.....                 | +13,257       | +23,680        | +25,043              |                   |                         |                    | +61,980   |
| Chemical security projects.....           | +41,179       |                |                      |                   |                         |                    | +41,179   |
| Housing, minor construction projects..... |               |                |                      |                   | +65,000                 |                    | +65,000   |
| Revised total.....                        | 1,114,380     | 453,798        | 428,289              | 57,559            | 1,519,640               | 152,967            | 3,726,633 |

As evidenced by the foregoing figures, the Senate has made substantial additions in three priority areas: energy conservation, pollution abatement, and urgent operational projects. In all, about 250 new projects totaling slightly less than \$370 million were added on the recommendation of the Senate Committee on Armed Services. The committee's view was that even though President Carter had restored \$310 million in his revised budget submittal, the construction request was still very austere.

Moreover, the committee was also quite aware of the depressed state of the construction industry—where the jobless rate is two to three times the national average in many areas—and felt that military construction projects with short leadtimes would help improve overall employment in the same manner as the public works jobs bill. Indeed, in its report (S. Rept. 95-125), the Senate Committee on Armed Services estimated that these additional projects would create approximately 50,000 new jobs in the construction industry alone.

At this point, I would like to reassure my colleagues that the Senate Committee on Armed Services did not arbitrarily or capriciously gather up any and all

favorite projects that had not previously been selected. In evaluating and selecting these new projects to be added, the committee established two extremely valid criteria. First of all, before a project was even considered, it had to be capable of being placed under contract early in the fiscal year, preferably within the first 6 months. Second, the project had to be at a military installation which was not scheduled for either closure or significant reduction in the foreseeable future. The services were then asked to arrange unfunded projects which successfully met these criteria in order of priority in three categories: energy conservation, pollution abatement, and operational. In addition, a small number of projects were added back to improve upon the security of chemical weapons under the control of the Army. Finally, these lists were scrutinized very carefully by the committee to weed out those projects whose benefits to national security were deemed marginal.

These additional worthwhile projects—none of which are presently included in H.R. 6990—are listed below for your information. Each category is further segmented by appropriate service.

TABLE 1.—ORIGINAL DEPARTMENTAL REQUEST AS CONTAINED IN H.R. 5692 TOGETHER WITH THE COMMITTEE ACTION AS REFLECTED IN H.R. 6990

(In thousands of dollars)

| Title and service               | DOD request | Change by committee | Total amount approved by committee |
|---------------------------------|-------------|---------------------|------------------------------------|
| I. Army.....                    | 1,181,085   | -216,566            | 964,519                            |
| II. Navy.....                   | 402,269     | +20,026             | 422,295                            |
| III. Air Force.....             | 353,256     | -5,348              | 348,908                            |
| IV. Defense agencies.....       | 32,300      | -1,650              | 30,650                             |
| V. Military family housing..... | 1,454,640   | +136,581            | 1,591,221                          |
| VII. Guard/Reserves.....        | 152,967     | 0                   | 152,967                            |
| Total.....                      | 3,576,517   | -67,957             | 3,508,560                          |

I would now like to contrast the House record of reductions in the overall military construction program for fiscal year 1978 with the recently approved Senate bill (S. 1474). Essentially, the Senate authorization, which passed by voice vote on May 13, deleted \$229.5 million from the total Carter request for military construction while adding \$379 million. This amounts to a net increase of about \$150 million, bringing the total military construction authorization for fiscal year 1978 to \$3,726,663,000. A summary of the final Senate floor action is presented in table 2, as follows:

Senate additions, operational projects, Army

I have recently communicated with Members whose districts would be directly affected by these additional projects. I feel that these projects are not only necessary from a national security perspective, but that they are also compatible with our current efforts to stimulate the economy through job creation, especially in the bellweather construction industry.

Although some of our previous stimulative efforts are just now beginning to pay off in other areas, that does not mean that we have finally licked persistent unemployment in the United States. Indeed, a 6.9 percent rate is still unconscionably high by anybody's standards. Thus, if the economy in general and the construction industry in particular still needs a boost, why not channel some of that boost through the regular annual military construction program?

The final observation that I will offer today is that should the House conferees fully adopt the higher Senate version of the military construction authorization, we will still be under the first concurrent resolution targets in budget authority.

Therefore, I strongly urge each and every one of you to ask our conferees to positively respond to the continuing job needs of the country by approving the Senate additions in conference. Thank you.

Mr. NEDZI. Mr. Chairman, I look forward to reviewing the complete version of the profound statement of the gentleman from California (Mr. LEGGETT).

I yield 4 minutes to the gentleman from Georgia (Mr. BRINKLEY).

Mr. BRINKLEY. Mr. Chairman, I rise in support of H.R. 6900, the fiscal year 1978 military construction authorization bill.

This is a balanced measure designed to meet as many of the needs of the Armed Forces as possible within the fiscal and budgetary policy framework which has been established. As such, not all of the requirements can be met in 1 year and may necessarily be deferred for later consideration. It is at this point that I direct my remarks to one area in particular that is of great concern to me, namely, the requirement for dental care facilities for our military personnel.

Within the budgetary constraints under which the committee operated and in view of the ongoing Department of Defense base structure study, we approved over \$37 million in dental care facilities. These include a \$4.35 million medical/dental clinic for our naval forces at Pearl Harbor; a \$4.7 million base dental clinic at Lackland Air Force Base, Tex.; an \$8.8 million addition and alteration to the existing composite medical facility, including dental care facilities, at Tinker Air Force Base, Okla.; a \$7.3 million dispensary with dental treatment facilities at Bentwaters Royal Air Force Station, United Kingdom, and

\$11,898,000 for 252 dental treatment rooms at four Army installations, including Fort Hood, Tex.; Fort Bragg, N.C.; Fort Benning, Ga.; and Heidelberg, Germany.

Mr. Chairman, based upon testimony which the committee received during the hearings on the military construction bill, particularly of Army Dental Corps representatives, serious reservations have been raised about the quality of Armed Forces dental care. It became evident that these professionals are greatly concerned over the need for additional facilities and the need to strengthen program management, and the need to improve the retention rate of dental corps officers. General Bhaskar, in particular, the chief of the Army Dental Corps, stressed of utility and efficiency of physical plants—toward that end all administrative officers see patients.

He pointed out that all of the projects coming out at the OMB level would be less in terms of money, than one of the average sized hospitals for our military. He stressed the fact that administrative officers within the Army Dental Corps were all seeing patients. I wish to commend him and the Army Dental Corps for this.

Mr. Chairman, if I might have the attention of the chairman of the subcommittee, the gentleman from Michigan (Mr. NEDZI), I believe that it was through an inadvertent oversight that we did omit in the report the fact that we want the Military Establishment to consider carefully in next year's request the priority need for the completion of and the modernizing of the dental facilities across the board in the United States; is that correct?

Mr. NEDZI. Mr. Chairman, if the gentleman will yield, I am not certain that there was any agreement or understanding to include that in the report; however, I can assure the gentleman from Georgia that it certainly is the sentiment of the chairman and I believe the entire subcommittee, that the military proceed forthwith in developing plans for modernizing these facilities.

The CHAIRMAN. The time of the gentleman has expired.

Mr. NEDZI. I yield 2 additional minutes to the gentleman from Georgia.

Mr. BRINKLEY. Mr. Chairman, as I am sure the gentleman from Michigan knows, the budget was sent back down to the operating levels of the Army, Navy, and Air Force to reduce by almost one-half the projects proposed for the continental United States, and that in the lag more than 50 percent of the dental clinics were deleted. It was my understanding in the committee that there would be general accord toward asking the Department of Defense to review again those projects, and that, inadvertently, was omitted from the report.

Mr. NEDZI. Mr. Chairman, if the gentleman will yield, let me say that the staff has just corrected me and has advised me that the gentleman from Georgia is correct in that there was reference made toward including this in

the report and, inadvertently, it was dropped in the course of transmitting the report to the Printing Office.

Mr. BRINKLEY. I thank the chairman of the subcommittee.

Mr. NEDZI. Mr. Chairman, I yield 3 minutes to the gentleman from Hawaii (Mr. HEFTTEL).

Mr. HEFTTEL. Mr. Chairman, I thank my distinguished colleague, the gentleman from Michigan (Mr. NEDZI) for yielding me this time.

Mr. Chairman, I would like to bring to your attention a matter of great significance to the people of Hawaii and to the millions of visitors who come to our islands each year.

Funding is needed for a project proposed by the U.S. Navy for permanent shoreside facilities at the U.S.S. *Arizona* Memorial at Pearl Harbor. The battleship, U.S.S. *Arizona*, serves as a national cemetery for the 1,102 officers and enlisted men who lost their lives during the massive attack on Pearl Harbor on December 7, 1941.

These proposed facilities will include a museum, theater, lobby/waiting room, and supporting facilities which, in conjunction with the *Arizona* Memorial, will constitute a complete memorial complex. The National Park Service has agreed to manage and operate the *Arizona* Memorial when adequate shoreside facilities are built.

The *Arizona* Memorial was completed and dedicated on May 30, 1962. Since that time the number of visitors has rapidly increased from a little over 1,000 in 1962 to a probable 1.2 million by the year 1982. The current facilities are only temporary at this time and permanent facilities are desperately needed. They are unable to accommodate the many persons who visit the memorial each year.

Failure to provide these new facilities will severely deter future visitors to this important national shrine. The history and background of the attack on Pearl Harbor remain a matter of extreme historical interest, not only to the islanders, but also to the rest of our country.

A provision authorizing \$3.3 million for the construction of permanent shoreside visitor facilities at the U.S.S. *Arizona* Memorial in Pearl Harbor, Hawaii has been accepted by the other body.

Due to an unfortunate oversight, this provision was not considered by either the Subcommittee on Military Installations and Facilities or the full Armed Services Committee.

I would hope that the chairman of the subcommittee would accept the other body's provision in conference and I also invite a response from the ranking minority member of the subcommittee.

Mr. NEDZI. Mr. Chairman, I yield 3 minutes to the gentleman from Iowa (Mr. BEDELL).

Mr. BEDELL. Mr. Chairman, one of the items in today's military construction authorization bill, H.R. 6990, is funding for U.S. Army Reserve armories. I believe we can build these armories for less than we pay now and I want to inform the Congress of a proposal of mine

to demonstrate this which the Defense Department has just agreed to try.

In my district, the National Guard builds armories of the same size and mission as the Reserves but for a good deal less money. After a yearlong investigation, I find that the reason for this is due to the unnecessarily costly building materials that are demanded by the U.S. Army Corps of Engineers which supervises construction of these Reserve armories.

The corps admits this has been a problem in the past, but they now claim to have changed their specifications and that this will eliminate the problem. They still admit, however, to a \$6-per-square-foot discrepancy between their costs and those of the National Guard.

For some time now, I have advocated a pilot project whereby a Reserve armory is built following National Guard procedures to see once and for all just how much money we can save on these armories. My plan is to have one armory built this way and when it is done, compare it to a similar sized armory that was built the standard way. My belief is that we would then have a detailed example of how we could build these armories for less cost to the American taxpayer.

The Army Reserves have indicated their desire to try my pilot project plan and last Friday, so did the Defense Department. While there is no question now that we will have some sort of pilot project it is still not certain exactly what the nature of this pilot project will be and I think it is important for the Congress and Chairman Nedzi's subcommittee to follow this matter closely to make sure that we indeed have a meaningful comparison when the construction is over.

So there can be no misunderstanding in the future about what my intent is for this project, I want to state clearly that it is my desire to permit the architect to have the same discretion given him in other buildings, in terms of specifications and supervision.

I have no problem with the Reserves and the corps reviewing the architect's specifications as well as the construction itself, but I think it is vitally important that the architect not be given detailed specifications which limit his ability to operate as he would in other construction. I firmly believe that if the architect is given this discretion, he will be able to design a building which meets the needs of the Reserves at a minimum cost to the taxpayer.

Mr. Chairman, I enclose for the RECORD a copy of the correspondence I have had with the Army Reserves on this matter:

MAY 29, 1977.

Maj. Gen. HENRY MOHR,  
Chief Army Reserve, Department of the Army,  
Washington, D.C.

DEAR GENERAL MOHR: Thank you for your response to my request for a legal opinion regarding my idea for a pilot project to construct an Army Reserve Armory following procedures used in constructing National Guard Armories.

I think there has been a little confusion as to exactly what I had in mind for the project, so I would like to set it down on paper here and then ask you again if you would be kind enough to give me a written opinion of the plan.

The steps I envision would be as follows:

1. The Army Corps of Engineers hires an architect.
2. The architect, following the guidelines in NGB 415-90, designs his own plans and submits them for approval to the Corps.
3. The Corps then supervises bids and lets the construction contract.
4. The architect observes and inspects the construction. The Reserves and the Corps would make a final inspection with the architect, and periodic inspections at their discretion. But the architect would be the one who would be primarily responsible for observing construction.

Therefore, there would be no predesign study, site plan, or floor plans submitted by the Corps to the architect. In general, I would want to follow the procedure used by the National Guard, the only exception being that the Corps would let the construction contract and not the architect.

I would very much like to have your legal opinion and comments as to what problems this plan would entail.

Thank you for your assistance.

Sincerely,

BERKLEY BEDELL.

HON. BERKLEY BEDELL,  
House of Representatives  
Washington, D.C.

DEAR MR. BEDELL: Thank you for your letter of 20 May 1977 clarifying your thoughts concerning a pilot project to construct a U.S. Army Reserve Center by having the Corps of Engineers hire an architect to design and manage the construction operations of this test program.

Such a pilot project must follow the same standards and specifications that are now being used by the Corps at all of our projects. This will insure that we construct a facility that will meet the Army Reserve's training and readiness requirements while providing a basis for a valid comparison.

I agree with you that innovative programs such as you have suggested should be given a trial. The authority for such a procedure rests with the Office of the Secretary of Defense. Your proposal is now being staffed by that agency and you should receive their reply shortly on this matter.

Thank you again for your personal support of the Military Construction Army Reserve Program.

Sincerely,

HENRY MOHR,  
Major General, USA,  
Chief Army Reserve.

Mr. CHARLES H. WILSON of California. Mr. Chairman, will the gentleman yield?

Mr. BEDELL. I yield to the gentleman from California.

Mr. CHARLES H. WILSON of California. I thank the gentleman for yielding.

I would just state my agreement with the comments of the gentleman from Iowa about the excessive costs of construction under the management contracts that the Corps of Engineers have. We discovered during the past Congress that the Corps of Engineers were designing hospitals, one at Fort Campbell, Ky., for example, which was about 2½ times

what the cost would be to build a private hospital in a similar area where the construction costs were equivalent.

The Corps of Engineers has been very inadequate, in my opinion, in the work that they have done. I think the gentleman is making a great contribution if he can bring in something that is going to assist in this one area, just the National Guard armories. I would think that as a member of the subcommittee it is the intention of several of us to pursue this whole area of the Corps of Engineers and the excessive costs that the taxpayers are being asked to pay because, in my opinion, of what is very inadequate contract management.

Mr. BEDELL. I appreciate the gentleman's remarks very much. I would hope that the chairman of the committee would agree that it is indeed the desire of the subcommittee to do what they can to provide maximum facilities at minimum cost to the taxpayers.

I yield to the chairman of the subcommittee.

Mr. NEDZI. I do not think there is any question that is the goal of the committee and certainly we would do all in our power to assure we get maximum facilities at minimum cost.

Mr. BEDELL. I would like to thank the chairman of the subcommittee for helping us to get the pilot project and approval of the pilot project.

Mr. NEDZI. Mr. Chairman, I yield 3 minutes to the gentleman from California (Mr. PANETTA).

Mr. PANETTA. Mr. Chairman, I thank the chairman for yielding.

Mr. Chairman, I would like to compliment the members of the committee for their fine work preparing the military construction authorization bill that is before the House today. I am particularly pleased that the committee has included an authorization in the amount of \$4,149,000 for two construction projects at Fort Ord, Calif., which is in my district.

These two projects, tactical equipment shops and facilities and a direct support maintenance facility, are important parts of the master plan for the Fort Ord complex and are vital to the fulfillment of its new mission as home of the 7th Infantry Division. The designs of these structures were begun in September and October of 1975 and carefully fit the overall needs of a growing installation. Once completed, these facilities will service the repair and maintenance needs of hundreds of military vehicles as well as providing modernization and maintenance of military field equipment.

Another result of the new mission of Fort Ord is the increase in demand for low cost family housing both on base and in the surrounding communities. With the Army anticipating an increase of over 1,000 active duty personnel stationed at Fort Ord in the next year, the already difficult housing shortage in the Monterey Bay Area promises to get worse. Without some relief, increasing numbers of enlisted personnel will be

forced to live as far away as San Jose and Santa Clara and to commute as many as 100 miles each day.

The committee has recognized the particularly acute need for family housing by including section V of the military construction bill which allows the Secretary of Defense to construct and to acquire family housing units in certain military impacted areas. I compliment the committee for addressing this problem and encourage its members to expand upon section V in future deliberation to help alleviate the serious housing shortages at and around the Fort Ord complex.

In closing, I again want to praise the committee for its fine work in this area. I know that its members have worked long and hard reviewing the construction needs of the various branches of the Armed Forces, and have included in the authorization bill those projects that truly merit funding. It goes without saying that the will of the Armed Services Committee as presented in this balanced and fiscally responsible authorization bill should be reflected in full by the Appropriations Committee.

Mr. NEDZI. Mr. Chairman, I yield 2 minutes to the gentleman from Washington (Mr. Dicks).

Mr. DICKS. Mr. Chairman, I wish to compliment the chairman and the ranking minority member of the subcommittee for the work they have done on this bill. I was particularly pleased with the work they have done on the Trident base and the Trident impact funds. Mr. Jack Watson, Secretary of the President's Cabinet, visited that area and said he considered this a model project on how Government projects should operate. That result would not have happened, I think, without the help of this committee.

There are 520 units of housing for the Trident base under active review by the General Accounting Office. I am confident when the General Accounting Office makes its report it will be favorable and I hope that the committee will take another look at the housing requirements because in Kitsap County we have a serious housing shortage not only because of the Trident base but also because of the employee growth at Puget Sound Naval Shipyard.

I compliment the committee and I appreciate their help in working with this Member on these important projects.

Mr. ZEFERETTI. Mr. Chairman, today we consider the military construction authorization bill, and I would just like to briefly remind my colleagues of the problems that many of us have had with the transfer and the closure of military facilities within our districts.

While the legislation before us does not deal directly with the base realignment question, it is certainly related. We will approve the authorization of billions of dollars for the construction of military facilities. Yet when military departments decide that certain bases and activities are to be transferred or closed, Congress has little or no voice in protecting the

taxpayers' huge investment in these properties.

Hopefully, that problem will be partially alleviated as a result of an amendment included in the House-passed Defense Authorization Act for fiscal year 1978. But the process being practiced today gives the military departments too much of a free hand in determining the fate of these facilities, all of which play an integral part in the economy of our districts and the livelihoods of our constituents. They announce their plans to close or relocate these facilities, conduct an environmental impact statement—which is often inaccurate—and then go ahead with their plans. One of the glaring inequities overlooked in this process is the impact these base realignments have on local communities.

The Army is currently planning to drastically reduce many of the operations now being performed at Fort Hamilton in Brooklyn, which is the only full service military installation remaining in New York City. This proposed realignment, which I am fighting tooth and nail to prevent, is another example of the geographical favoritism practiced by the military. As I am sure many of my colleagues will agree, the Northeastern States have been methodically stripped of nearly all viable military facilities.

The military services use as their all-purpose excuse the argument that these closings are an economy measure and will save us money—an argument that is shot full of holes in light of the enormous transfer costs and the ensuing unemployment. What they fail to realize are the human costs involved: the uprooting of families and massive unemployment for most of the civilian work force. Any cutback in Fort Hamilton's operations would be a severe blow to the Brooklyn community and would further drain the State and Federal treasuries by adding more names to the unemployment roles. We must also recognize the "ripple effect" such an action would have on the local economy through the loss of payroll dollars.

Periodically, the Defense Department announces a management efficiency action which involves 14 or 15 civilian jobs here or there. Just last week, a permanent manpower reduction of five jobs was being implemented. These piecemeal reductions further fuel the deliberate job erosion currently going on in the New York metro area.

So while we consider military construction authorization, let us not forget our responsibility of harnessing our military departments and stem the tide of military facilities realignment. These installations play a vital role in the economy of our communities and are an important link in maintaining a strong U.S. military posture, of which I am a staunch advocate.

Mr. D'AMOURS. Mr. Chairman, I rise in support of H.R. 6990, the military construction authorization bill for fiscal year 1978 and to congratulate the members of the Armed Services Committee for their excellent efforts to improve and modernize our Nation's defense facilities.

Congressman NEDZI and his subcommittee have had the thankless task of reviewing hundreds of construction proposals across the United States and overseas in order to determine their relative importance to our national defense effort, and the economic costs and benefits of each project to the U.S. taxpayer.

I am particularly pleased that the committee saw fit to include in its fiscal year 1978 authorization legislation \$10 million for the construction of 200 new family housing units at the Portsmouth Naval Shipyard.

These 200 housing units represent almost half of the nationwide allotment of new family housing units for fiscal year 1978 and will alleviate a critical housing problem at the shipyard. The units will replace "Admiralty Village" a facility which was built as temporary housing during World War II.

Despite the fact that it was only intended to be temporary and that it has been classified as substandard for some time, many hundreds of naval officers and their families have been forced to live in houses which should have been torn down years ago and which cannot be adequately repaired. In addition due to their age and the temporary construction materials which were used in their construction, the Admiralty Village units have required an abnormally large quantity of heating oil—at great cost to the Government. The new housing units will be much more fuel efficient.

I am also pleased that the committee included authorization for several other long overdue projects at the Navy yard, and at nearby Pease Air Force Base. The modernization program at the Navy yard will include electrical power improvements, an improved compressed air system, dredging for three berthing spaces and a channel to dry dock No. 3. These improvements will help to make the work facilities at the yard more flexible and efficient. At Pease Air Force Base \$910,000 has been authorized for a new control tower which will greatly improve the base's capability to monitor and control air traffic.

The affirmative action of the House Armed Services Committee, and I hope by the full House this afternoon, is a testament to the continued excellence and efficiency of the Portsmouth Navy Yard and the Pease Air Force Base. Despite the fact that it is our Nation's oldest shipyard the Portsmouth Navy Yard remains one of our Nation's most efficient shipyards due to the industriousness of its workers and the modernization of its physical plant. Just this very morning construction began on a new machine central tool shop, the first of several modernization projects which will enable the yard to service the new SSN-688 attack submarines in the 1980's. As I am sure my colleagues are already aware, these submarines form the most important and easily protected leg of our national defense triad.

Once again I would like to thank the members of the committee for responding to these urgent needs at the Portsmouth Navy Yard and at Pease Air Force

Base. I urge all my colleagues to support the committee's bill and to work with me to insure full funding of these projects next week when the House considers the fiscal year 1978 military construction appropriations bill.

Mr. GILMAN. Mr. Chairman, I rise in favor of this appropriation, and particularly in favor of the \$3,047,000 slated for construction at the U.S. Military Academy at West Point, N.Y.

The approved projects are to modernize the field house, to air condition the West Point printing plant and to separate power and communication ducts.

Mr. Chairman, the U.S. Military Academy at West Point is not only the pre-eminent service academy in the world, but is also one of the major tourist attractions of our Nation. It is incumbent upon the Congress to provide this foremost training institution with facilities that are as modern and adequate as possible.

The field house at West Point was originally constructed in 1938, and has not been renovated or modernized since that time. The current structure is used for a substantial number of activities, including the annual physical fitness tests for all cadets, drills and other military training exercises in inclement weather, an auxiliary practice area for the sports teams and for the use of the Army's troops stationed at West Point.

Yet, despite the number of diverse uses which this building is utilized, it does not even conform to modern fire codes. The roof is in a sad state of disrepair, and floor has literally been worn away after nearly 40 years of use without replacement.

The U.S. Military Academy has waited for many years for the funding to repair this building to bring it up to modern standards. These items should not be delayed any longer.

Knowing the deserving reputation of the committee and its distinguished chairman for thoroughness and integrity, I am confident that the other appropriations in this measure are just as worthy as those that affect my district.

Accordingly, I urge my colleagues to grant approval to this important legislation.

Mr. MITCHELL of New York. Mr. Chairman, we have no further requests for time.

Mr. NEDZI. Mr. Chairman, we have no further requests for time.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

#### TITLE I—ARMY

SEC. 101. The Secretary of the Army may establish or develop military installations and facilities by acquiring, constructing, converting, rehabilitating, or installing permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment, for the following acquisition and construction:

##### INSIDE THE UNITED STATES

##### UNITED STATES ARMY FORCES COMMAND

Fort Bragg, North Carolina, \$4,145,000.  
Fort Campbell, Kentucky, \$553,000.  
Fort Carson, Colorado, \$815,000.

Fort Hood, Texas, \$7,284,000.

Fort Lewis, Washington, \$615,000.

Fort Ord, California, \$4,149,000.

Fort Polk, Louisiana, \$48,720,000.

Fort Riley, Kansas, \$531,000.

Fort Sam Houston, Texas, \$10,000,000.

Schofield Barracks, Hawaii, \$10,189,000.

Fort Stewart/Hunter Army Air Field, Georgia, \$10,991,000.

Fort Wainwright, Alaska, \$6,985,000.

##### UNITED STATES ARMY TRAINING AND DOCTRINE COMMAND

Fort Benning, Georgia, \$25,269,000.

Fort Knox, Kentucky, \$15,541,000.

Fort Rucker, Alabama, \$9,941,000.

Fort Sill, Oklahoma, \$370,000.

Various Locations, \$1,810,000.

##### UNITED STATES ARMY MATERIEL DEVELOPMENT AND READINESS COMMAND

Aberdeen Proving Ground, Maryland, \$6,738,000.

Anniston Army Depot, Alabama, \$6,484,000.

Corpus Christi Army Depot, Texas, \$2,213,000.

Lexington Blue Grass Depot, Kentucky, \$1,827,000.

Picatinny Arsenal, New Jersey, \$6,770,000.

Pine Bluff Arsenal, Arkansas, \$4,439,000.

Pueblo Army Depot, Colorado, \$3,011,000.

Rock Island Arsenal, Illinois, \$6,618,000.

Tooele Army Depot, Utah, \$17,415,000.

Umatilla Army Depot, Oregon, \$2,921,000.

Various Locations, \$33,939,000.

##### AMMUNITION FACILITIES

Holston Army Ammunition Plant, Tennessee, \$4,616,000.

Indiana Army Ammunition Plant, Indiana, \$1,009,000.

Iowa Army Ammunition Plant, Iowa, \$11,192,000.

Longhorn Army Ammunition Plant, Texas, \$555,000.

Louisiana Army Ammunition Plant, Louisiana, \$4,345,000.

Milan Army Ammunition Plant, Tennessee, \$10,467,000.

Radford Army Ammunition Plant, Virginia, \$203,000.

Riverbank Army Ammunition Plant, California, \$584,000.

Unspecified, \$334,710,000.

Volunteer Army Ammunition Plant, Tennessee, \$597,000.

##### UNITED STATES MILITARY ACADEMY

United States Military Academy, West Point, New York, \$3,047,000.

##### NUCLEAR WEAPONS SECURITY

Various Locations, \$7,764,000.

##### OUTSIDE THE UNITED STATES

##### UNITED STATES ARMY FORCES COMMAND

Panama Area, Canal Zone, \$2,831,000.

##### UNITED STATES ARMY, JAPAN

Various Locations, \$3,518,000.

##### EIGHTH UNITED STATES ARMY, KOREA

Various Locations, \$19,536,000.

##### KWJALEIN MISSILE RANGE

National Missile Range, \$2,603,000.

##### UNITED STATES ARMY SECURITY AGENCY

Various Locations, \$2,164,000.

##### UNITED STATES ARMY, EUROPE

Classified Location, \$32,000,000.

Germany, Various Locations, \$176,925,000.

Italy, Various Locations, \$3,770,000.

Various Locations: For the United States share of the cost of multilateral programs for the acquisition or construction of military facilities and installations, including international military headquarters, for the collective defense of the North Atlantic Treaty area, \$85,000,000. Within thirty days after the end of each quarter, the Secretary of the Army shall furnish to the Committees on Armed Services and on Appropriations of the Senate and House of Representatives a description of obligations incurred as the United States share of such multilateral programs.

##### NUCLEAR WEAPONS SECURITY

Various Locations, \$6,800,000.

SEC. 102. The Secretary of the Army may establish or develop Army installations and facilities by proceeding with construction made necessary by changes in Army missions and responsibilities which have been occasioned by (1) unforeseen security considerations, (2) new weapons developments, (3) new and unforeseen research and development requirements, or (4) improved production schedules, if the Secretary of Defense determines that deferral of such construction for inclusion in the next Military Construction Authorization Act would be inconsistent with interests of national security and, in connection therewith, may acquire, construct, convert, rehabilitate, or install permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment, in the total amount of \$20,000,000. The Secretary of the Army, or his designee, shall notify the Committees on Armed Services of the Senate and House of Representatives, immediately upon reaching a final decision to implement, of the cost of construction of any public work undertaken under this section, including those real estate actions pertaining thereto. This authorization will expire upon the date of enactment of the Military Construction Authorization Act for fiscal year 1979 except for those public works projects concerning which the Committees on Armed Services of the Senate and House of Representatives have been notified pursuant to this section prior to such date.

Mr. NEDZI (during the reading). Mr. Chairman, I ask unanimous consent that title I be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The CHAIRMAN. Are there any amendments to title I?

Mr. LEGGETT. Mr. Chairman, I move to strike the last word.

Mr. Chairman, in its markup of this bill the committee has included \$550,000 for consolidation of the Air Force Environmental and Radiological Health Laboratories at Brooks Air Force Base. The committee cited as rationale the necessity for meeting NEPA and OSHA standards. I do not at this time intend to offer an amendment to debate this project. If the committee had held a public hearing on this matter, such hearings would have uncovered the existence of a voluminous GAO report challenging the wisdom of this consolidation.

The report mentions, among other things, that top level laboratory operating personnel believe, despite headquarters claims to the contrary, that the proposed consolidation will be less efficient than the current laboratory structure. Deficiencies include a design inadequate for large scale analytical sample testing and inadequate space for missions to be performed.

The report states that qualified officials see no technical reason for consolidation of radiological and environmental health functions.

The report raises serious questions as to the adequacy of Air Force cost esti-

mates. GAO estimates that the Air Force has underestimated costs associated with the consolidation by about \$1 billion. The Air Force has submitted a revised estimate, but as nearly as I can tell these are largely unsupported numbers which still fall significantly short of GAO estimates.

These are matters which could and should have been covered in hearings. They are matters for serious reservation. The Appropriations Committee has expressed reservation enough to withhold its approval of expenditure of funds pending further study. The Senate is so reserved about the matter that none of its committees have included this project in any of its bills.

Mr. Chairman, colleagues, serious questions have been raised about this project which are as yet unanswered. They should be answered. I have raised a few, and there are more. What, for example, is to become of the physical facility at McClellan Air Force Base which was not only designed as an environmental health lab but also designed for expansion as mission requirements mounted? And why is that prior planning now being ignored?

In light of the many uncertainties surrounding this project, I strongly urge my colleagues on the committee not to insist on this project in conference. The case for urgency is shaky at best, and the apparent drawbacks are significant. If this project must be accomplished, we should insist on adequate justification which has not been forthcoming. Caution in this matter is our best protection, and I urge it on my colleagues.

The CHAIRMAN. Are there any amendments to title I? If not, the Clerk will read.

The Clerk read as follows:

#### TITLE II—NAVY

SEC. 201. The Secretary of the Navy may establish or develop military installations and facilities by acquiring, constructing, converting, rehabilitating, or installing permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment, for the following acquisition and construction:

##### INSIDE THE UNITED STATES

###### TRIDENT FACILITIES

Various Locations, \$106,910,000.

###### MARINE CORPS

Marine Corps Base, Camp Lejeune, North Carolina, \$12,350,000.

Marine Corps Base, Camp Pendleton, California, \$5,450,000.

Marine Corps Air Station, Cherry Point, North Carolina, \$3,550,000.

Marine Corps Air Station, Kaneohe Bay, Hawaii, \$160,000.

Marine Corps Recruit Depot, Parris Island, South Carolina, \$3,500,000.

Marine Corps Base, Twentynine Palms California, \$11,965,000.

###### CHIEF OF NAVAL OPERATIONS

Naval Academy, Annapolis, Maryland, \$165,000.

Commander in Chief Pacific, Headquarters, Pearl Harbor, Hawaii, \$4,200,000.

Naval Support Activity, Mare Island, Vallejo, California, \$2,900,000.

###### COMMANDER IN CHIEF, ATLANTIC FLEET

Naval Station, Charleston, South Carolina, \$180,000.

Naval Air Station, Jacksonville, Florida, \$2,950,000.

Naval Submarine Base, New London, Connecticut, \$3,100,000.

Flag Administrative Unit Atlantic, Norfolk, Virginia, \$90,000.

Fleet Intelligence Center Europe and Atlantic, Norfolk, Virginia, \$1,137,000.

Naval Air Station, Norfolk, Virginia, \$14,350,000.

Naval Station, Norfolk, Virginia, \$3,800,000.

###### COMMANDER IN CHIEF, PACIFIC FLEET

Naval Station, Adak, Alaska, \$14,200,000.

Naval Air Station, Barbers Point, Hawaii, \$7,197,000.

Commander Oceanographic System, Pacific, Pearl Harbor, Hawaii, \$7,400,000.

Naval Station, Pearl Harbor, Hawaii, \$2,050,000.

Naval Submarine Base, Pearl Harbor, Hawaii, \$1,850,000.

Naval Station, San Diego, California, \$12,666,000.

CHIEF OF NAVAL EDUCATION AND TRAINING  
Naval Amphibious School, Coronado, San Diego, California, \$3,450,000.

Naval Submarine Training Center, Pearl Harbor, Hawaii, \$410,000.

Naval Technical Training Center, Pensacola, Florida, \$2,400,000.

Naval Air Station, Whiting Field, Florida, \$530,000.

###### BUREAU OF MEDICINE AND SURGERY

National Naval Medical Center, Bethesda, Maryland, \$8,000,000.

Naval Regional Medical Center, Bremerton, Washington, \$1,450,000.

###### CHIEF OF NAVAL MATERIAL

Puget Sound Naval Shipyard, Bremerton, Washington, \$11,600,000.

Polaris Missile Facility Atlantic, Charleston, South Carolina, \$18,150,000.

Charleston Naval Shipyard, Charleston, South Carolina, \$7,526,000.

Naval Weapons Station, Charleston, South Carolina, \$850,000.

Naval Weapons Station, Concord, California, \$1,350,000.

Portsmouth Naval Shipyard, Kittery, Maine, \$10,030,000.

Long Beach Naval Shipyard, Long Beach, California, \$8,080,000.

Naval Underwater Systems Center, New London, Connecticut, \$950,000.

Naval Supply Center, Pearl Harbor, Hawaii, \$13,400,000.

Pearl Harbor Naval Shipyard, Pearl Harbor, Hawaii, \$1,080,000.

Navy Public Works Center, Pearl Harbor, Hawaii, \$3,000,000.

Philadelphia Naval Shipyard, Philadelphia, Pennsylvania, \$15,300,000.

Mare Island Naval Shipyard, Vallejo, California, \$24,100,000.

Naval Weapons Station, Yorktown, Virginia, \$2,350,000.

Various Locations, Atlantic Fleet Ballistic Missile Refit Site, \$19,500,000.

###### NAVAL SECURITY GROUP COMMAND

Naval Security Group Department, Adak, Alaska, \$2,350,000.

Naval Security Group Detachment, Sugar Grove, West Virginia, \$900,000.

###### NUCLEAR WEAPONS SECURITY

Various Locations, \$20,658,000.

###### OUTSIDE THE UNITED STATES

###### CHIEF OF NAVAL OPERATIONS

Naval Support Facility, Diego Garcia, Indian Ocean, \$7,300,000.

###### COMMANDER IN CHIEF, ATLANTIC FLEET

Naval Facility, Antigua, British West Indies, \$180,000.

Naval Station, Keflavik, Iceland, \$161,000.

Naval Station, Roosevelt Roads, Puerto Rico, \$170,000.

###### COMMANDER IN CHIEF, PACIFIC FLEET

Navy Fleet Activities, Yokosuka, Japan, \$1,850,000.

###### NAVAL FORCES EUROPE

Naval Air Facility, Sigonella, Italy, \$4,300,000.

###### BUREAU OF MEDICINE AND SURGERY

Naval Regional Medical Clinic, Pearl Harbor, Midway Island Detachment, \$4,350,000.

###### NAVAL TELECOMMUNICATIONS COMMAND

Naval Communication Area Master Station, Naples, Italy, \$1,700,000.

Naval Communications Unit, Thurso, Scotland, \$350,000.

###### NAVAL SECURITY GROUP COMMAND

Naval Security Group Department, Rota, Spain, \$2,400,000.

SEC. 202. The Secretary of the Navy may establish or develop Navy installations and facilities by proceeding with construction made necessary by changes in Navy missions and responsibilities which have been occasioned by (1) unforeseen security considerations, (2) new weapons developments, (3) new and unforeseen research and development requirements, or (4) improved production schedules, if the Secretary of Defense determines that deferral of such construction for inclusion in the next Military Construction Authorization Act would be inconsistent with interests of national security and, in connection therewith, may acquire, construct, convert, rehabilitate, or install permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment, in the total amount of \$20,000,000. The Secretary of the Navy, or his designee, shall notify the Committees on Armed Services of the Senate and House of Representatives, immediately upon reaching a final decision to implement, of the cost of construction of any public work undertaken under this section, including those real estate actions pertaining thereto. This authorization will expire upon the date of enactment of the Military Construction Authorization Act for fiscal year 1979 except for those public works projects concerning which the Committees on Armed Services of the Senate and House of Representatives have been notified pursuant to this section prior to such date.

SEC. 203. Construction authorized under section 201 for recreational facilities at the Naval Station, San Diego, California, may not be carried out until the Secretary of the Navy enters into an agreement with the San Diego Unified Port District, as current holder of the lessor interest of the City of San Diego in the existing Naval Athletic Field at such Naval Station (held by the Secretary of the Navy under a lease from the City of San Diego dated August 9, 1949), which provides that (1) the San Diego Unified Port District shall pay to the United States an amount equal to the amount of the total cost of such construction, and (2) the Secretary of the Navy agrees to the termination of the interest of the United States in the lease and abandonment of the existing facilities of the United States on the leasehold. Any such agreement shall specify that such lease shall not be terminated, and the Secretary of the Navy shall not be required to relinquish use of any part of the leasehold, until such recreational facilities are available for use, as determined by the Secretary.

Mr. NEDZI (during the reading). Mr. Chairman, I ask unanimous consent that title II be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The CHAIRMAN. Are there any amendments to the title II? If not, the Clerk will read.

The Clerk read as follows:

### TITLE III—AIR FORCE

Sec. 301. The Secretary of the Air Force may establish or develop military installations and facilities by acquiring, constructing, converting, rehabilitating, or installing permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment, for the following acquisition and construction:

#### INSIDE THE UNITED STATES AEROSPACE DEFENSE COMMAND

Peterson Air Force Base, Colorado, \$150,000.

Tyndall Air Force Base, Florida, \$3,860,000.

#### AIR FORCE LOGISTICS COMMAND

Hill Air Force Base, Utah, \$18,820,000.

Kelly Air Force Base, Texas, \$5,810,000.

Robins Air Force Base, Georgia, \$566,000.

Tinker Air Force Base, Oklahoma, \$12,310,000.

Wright-Patterson Air Force Base, Ohio, \$4,064,000.

#### AIR FORCE SYSTEMS COMMAND

Brooks Air Force Base, Texas, \$550,000.

Buckley Air National Guard Base, Colorado, \$1,100,000.

Edwards Air Force Base, California, \$11,750,000.

Eglin Air Force Base, Florida, \$13,005,000.

Los Angeles Air Force Station, California, \$500,000.

Various locations, \$2,826,000.

#### AIR TRAINING COMMAND

Chanute Air Force Base, Illinois, \$7,400,000.

Columbus Air Force Base, Mississippi, \$77,000.

Lackland Air Force Base, Texas, \$4,700,000.

Lowry Air Force Base, Colorado, \$3,380,000.

Randolph Air Force Base, Texas, \$425,000.

Sheppard Air Force Base, Texas, \$980,000.

Williams Air Force Base, Arizona, \$247,000.

#### ALASKAN AIR COMMAND

Elmendorf Air Force Base, Alaska, \$4,900,000.

King Salmon Airport, Alaska, \$631,000.

Shemya Air Force Base, Alaska, \$3,094,000.

#### MILITARY AIRLIFT COMMAND

Altus Air Force Base, Oklahoma, \$805,000.

Andrews Air Force Base, Maryland, \$782,000.

Dover Air Force Base, Delaware, \$165,000.

McChord Air Force Base, Washington, \$133,000.

McGuire Air Force Base, New Jersey, \$640,000.

Pope Air Force Base, North Carolina, \$1,119,000.

Travis Air Force Base, California, \$9,480,000.

#### PACIFIC AIR FORCES

Hickam Air Force Base, Hawaii, \$2,140,000.

#### STRATEGIC AIR COMMAND

Barksdale Air Force Base, Louisiana, \$140,000.

Carswell Air Force Base, Texas, \$400,000.

Castle Air Force Base, California, \$234,000.

Dyess Air Force Base, Texas, \$672,000.

Ellsworth Air Force Base, South Dakota, \$125,000.

Griffiss Air Force Base, New York, \$645,000.

March Air Force Base, California, \$1,387,000.

McConnell Air Force Base, Kansas, \$116,000.

Offutt Air Force Base, Nebraska, \$1,364,000.

Pease Air Force Base, New Hampshire, \$910,000.

Plattsburgh Air Force Base, New York, \$140,000.

Rickenbacker Air Force Base, Ohio, \$137,000.

Vandenberg Air Force Base, California, \$2,193,000.

Various Locations, \$6,955,000.

#### TACTICAL AIR COMMAND

Davis-Monthan Air Force Base, Arizona, \$262,000.

George Air Force Base, California, \$3,073,000.

Holloman Air Force Base, New Mexico, \$2,377,000.

Homestead Air Force Base, Florida, \$90,000.

Langley Air Force Base, Virginia, \$3,649,000.

Luke Air Force Base, Arizona, \$9,242,000.

Moody Air Force Base, Georgia, \$1,740,000.

Nellis Air Force Base, Nevada, \$5,180,000.

Seymour-Johnson Air Force Base, North Carolina, \$3,816,000.

Shaw Air Force Base, South Carolina, \$117,000.

#### UNITED STATES AIR FORCE ACADEMY

United States Air Force Academy, Colorado, \$1,740,000.

#### NUCLEAR WEAPONS SECURITY

Various locations, \$44,298,000.

#### OUTSIDE THE UNITED STATES

##### AEROSPACE DEFENSE COMMAND

Sondrestrom Air Base, Greenland, \$310,000.

Thule Air Base, Greenland, \$350,000.

##### PACIFIC AIR FORCES

Kadena Air Base, Japan, \$1,585,000.

##### STRATEGIC AIR COMMAND

Andersen Air Force Base, Guam, \$1,905,000.

##### UNITED STATES AIR FORCES IN EUROPE

Germany, \$16,077,000.

United Kingdom, \$8,847,000.

Various locations, \$97,905,000.

##### NUCLEAR WEAPONS SECURITY

Various locations, \$10,162,000.

##### SPECIAL FACILITIES

Various locations, \$2,356,000.

Sec. 302. The Secretary of the Air Force may establish or develop Air Force installations and facilities by proceeding with construction made necessary by changes in Air Force missions and responsibilities which have been occasioned by (1) unforeseen security considerations, (2) new weapons developments, (3) new and unforeseen research and development requirements, or (4) improved production schedules, if the Secretary of Defense determines that deferral of such construction for inclusion in the next Military Construction Authorization Act would be inconsistent with interests of national security and, in connection therewith, may acquire, construct, convert, rehabilitate, or install permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment, in the total amount of \$20,000,000. The Secretary of the Air Force, or his designee, shall notify the Committees on Armed Services of the Senate and House of Representatives, immediately upon reaching a final decision to implement, of the cost of construction of any public work undertaken under this section, including those real estate actions pertaining thereto. This authorization will expire upon the date of enactment of the Military Construction Authorization Act for fiscal year 1979 except for those public works projects concerning which the Committees on Armed Services of the Senate and House of Representatives have been notified pursuant to this section prior to such date.

Mr. NEDZI (during the reading). Mr. Chairman, I ask unanimous consent that title III be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The CHAIRMAN. Are there any amendments to title III? If not, the Clerk will read.

The Clerk read as follows:

### TITLE IV—DEFENSE AGENCIES

Sec. 401. The Secretary of Defense may establish or develop military installations and facilities by acquiring, constructing, converting, rehabilitating, or installing permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment, for defense agencies for the following acquisition or construction:

#### INSIDE THE UNITED STATES

##### NATIONAL SECURITY AGENCY

Fort George G. Meade, Maryland, \$650,000.

##### EMERGENCY CONSTRUCTION

Sec. 402. (a) The Secretary of Defense may establish or develop installations and facilities which he determines to be vital to the security of the United States and, in connection therewith, may acquire, construct, convert, rehabilitate, or install permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment, in the total amount of \$30,000,000. The Secretary of Defense, or his designee, shall notify the Committees on Armed Services of the Senate and House of Representatives, immediately upon reaching a final decision to implement, of the cost of construction of any public works undertaken under this section, including real estate actions pertaining thereto.

(b) Any authorization, or any part of any authorization, in any prior Military Construction Authorization Act which permits the Secretary of Defense to establish or develop military installations and facilities which he determines to be vital to the security of the United States for which appropriations have not been enacted before the date of enactment of this Act is repealed.

### TITLE V—MILITARY FAMILY HOUSING AND HOMEOWNERS ASSISTANCE PROGRAM

#### AUTHORIZATION TO CONSTRUCT OR ACQUIRE HOUSING

Sec. 501. (a) The Secretary of Defense, or his designee, is authorized to construct or acquire sole interest in existing family housing units in the numbers and at the locations hereinafter named, but no family housing construction shall be commenced at any such locations in the United States until the Secretary shall have consulted with the Secretary of the Department of Housing and Urban Development as to the availability of suitable private housing at such locations. If agreement cannot be reached with respect to the availability of suitable private housing at any location, the Secretary of Defense shall notify the Committees on Armed Services of the Senate and the House of Representatives, in writing, of such difference of opinion, and no contract for construction at such location shall be entered into for a period of thirty days after such notification has been given. This authority shall include the authority to acquire land, and interests in land, by gift, purchase, exchange of Government-owned land, or otherwise.

(b) With respect to the family housing units authorized to be constructed by this section, the Secretary of Defense is authorized to acquire sole interest in privately owned or Department of Housing and Urban Development held family housing units in lieu of constructing all or a portion of the family housing authorized by this section, if he, or his designee, determines such action to be in the best interests of the United States, but any family housing units acquired under authority of this subsection

shall not exceed the cost limitations specified in this section for the project nor the limitations on size specified in section 2684 of title 10, United States Code. In no case may family housing units be acquired under this subsection through the exercise of eminent domain authority, and in no case may family housing units other than those authorized by this section be acquired in lieu of construction unless the acquisition of such units is hereafter specifically authorized by law.

(c) Family housing units:

Fort Polk, Louisiana, one hundred units, \$3,565,000.

Naval Complex, Adak, Alaska, one hundred units, \$8,519,000.

Portsmouth Naval Complex, Kittery, Maine, two hundred units, \$8,124,000.

Naval Security Group Activity, Winter Harbor, Maine, thirty-two units, \$1,456,000.

Defense Attache Office, Quito, Ecuador, two units, \$105,000.

Defense Attache Office, Wellington, New Zealand, two units, \$88,000.

(d) Any of the amounts specified in this section may, at the discretion of the Secretary of Defense, or his designee, be increased by 10 per centum, if he determines that such increase (1) is required for the sole purpose of meeting unusual variations in cost, and (2) could not have been reasonably anticipated at the time such estimate was submitted to the Congress. The amounts authorized include the costs of shades, screens, ranges, refrigerators, and all other installed equipment and fixtures, the cost of the family housing unit, design, supervision, inspection, overhead, land acquisition, site preparation, and installation of utilities.

IMPROVEMENT OF EXISTING QUARTERS

SEC. 502. The Secretary of Defense, or his designee, is authorized to accomplish alterations, additions, expansions, or extensions, not otherwise authorized by law, to existing public quarters at a cost not to exceed—

(1) for the Department of the Army, \$7,736,000;

(2) for the Department of the Navy, \$6,353,000, of which not less than \$2,500,000 shall be available only for energy conservation projects; and

(3) for the Department of the Air Force, \$5,640,000, of which not less than \$201,000 shall be available only for energy conservation projects.

EXCEPTIONS TO IMPROVEMENT LIMITATION

SEC. 503. The Secretary of Defense, or his designee, within the amounts specified in section 502, is authorized to accomplish repairs and improvements to existing public quarters in amounts in excess of the \$15,000 limitation prescribed in section 610(a) of Public Law 90-110, as amended (81 Stat. 305), as follows:

Fort Bliss, Texas, one unit, \$50,000.

Marine Corps Development and Education Command, Quantico, Virginia, thirty-three units, \$739,880.

LEASED QUARTERS

SEC. 504. (a) (1) Chapter 159 of title 10, United States Code, relating to real property, is amended by adding at the end thereof the following new section:

"§ 2686. Leases: military family housing

"(a) The Secretaries of the Army, Navy, and Air Force, respectively, are authorized to lease housing facilities for assignment as public quarters to military personnel and their dependents, without rental charge, at or near any military installation in the United States, Puerto Rico, or Guam, if the Secretary of Defense, or his designee, finds that there is a lack of adequate housing at or near such military installation and that—

"(1) there has been a recent substantial increase in military strength and such increase is temporary, or

"(2) the permanent military strength is to be substantially reduced in the near future, or

"(3) the number of military personnel assigned is so small as to make the construction of family housing uneconomical, or

"(4) family housing is required for personnel attending service school academic courses on permanent change of station orders, or

"(5) family housing has been authorized but is not yet completed or a family housing authorization request is in a pending military construction authorization bill.

"(b) Housing facilities may be leased under subsection (a) on an individual unit basis, and not more than ten thousand such units may be so leased at any one time.

"(c) Expenditures for the rental of such housing facilities, including the cost of utilities and maintenance and operation of such facilities, may not exceed—

"(1) for housing facilities in the United States (other than Alaska, Hawaii, and Guam) and Puerto Rico, (A) an average of \$280 per month for each military department, or (B) \$450 per month for any one unit; and

"(2) for housing facilities in Alaska, Hawaii, and Guam, (A) an average of \$350 per month for each military department, or (B) \$450 per month for any one unit.

The Secretary of Defense may exclude from the computation of average expenditures for the purposes of paragraphs (1) (A) and (2) (A) not more than one thousand units leased for assignment as public quarters to personnel assigned to detached duty."

(2) The table of chapters at the beginning of chapter 159 of title 10, United States Code, is amended by adding at the end thereof the following new item:

"2686. Leases: military family housing."

(b) Section 515 of Public Law 84-161, approved July 15, 1955 (10 U.S.C. 2674 note), as amended, is repealed.

(c) The amendments made by subsection (a) and the repeal made by subsection (b) shall take effect October 1, 1977.

LEASES FOR FAMILY HOUSING FACILITIES IN FOREIGN COUNTRIES

SEC. 505. (a) Section 2675 of title 10, United States Code, is amended—

(1) by striking out the period at the end of subsection (a) and inserting in lieu thereof ", except that a lease under this section for military family housing facilities and real property relating thereto may be for a period of more than five years but may not be for a period of more than ten years."; and

(2) by inserting after "under this section" in subsection (b) the following: "or any other provision of law for structures, family housing facilities, or related real property in any foreign country"; and

(3) by adding at the end thereof the following new subsection:

"(d) The average unit rental for Department of Defense family housing acquired by lease in foreign countries may not exceed \$435 per month for the Department and in no event shall the rental for any one unit exceed \$760 per month, including the costs of operation, maintenance, and utilities; and not more than fifteen thousand family housing units may be so leased at any one time. The Secretary of Defense, or his designee, may waive these cost limitations for not more than one hundred fifty units leased for: incumbents of special positions, personnel assigned to Defense Attache Offices, or in countries where excessive costs of housing would cause undue hardship on Department of Defense personnel."

(b) Section 507(b) of the Military Construction Authorization Act, 1974 (87 Stat. 676), is repealed.

(c) The amendments made by subsection

(a) and the repeal made by subsection (b) shall take effect October 1, 1977.

ENERGY CONSUMPTION METERING DEVICES

SEC. 506. (a) The Secretary of Defense is authorized to accomplish the installation of energy consumption metering devices on military family housing facilities in existence or authorized before the date of enactment of this Act at a cost not to exceed—

(1) for the Department of the Army, \$36,500,000;

(2) for the Department of the Navy, \$55,600,000; and

(3) for the Department of the Air Force, \$69,000,000.

(b) In addition to all other authorized variations of cost limitations contained in this Act and prior Military Construction Authorization Acts, the Secretary of Defense may permit increases in such cost limitations by such amounts as may be necessary to install energy consumption metering devices on military family housing facilities as authorized by subsection (a).

(c) This section shall apply with respect to any military family housing facility in any State, the District of Columbia, the Commonwealth of Puerto Rico, or Guam.

EXCESS ENERGY CONSUMPTION CHARGES

SEC. 507. (a) In order to accomplish energy conservation, the Secretary of Defense shall, under such regulations as he may prescribe—

(1) establish a reasonable ceiling for the consumption of energy in any military family housing facility equipped with an appropriate energy consumption metering device; and

(2) assess the member of the Armed Forces who is the occupant of such facility a charge, at rates to be determined by the Secretary of Defense, for any energy consumption metered at such facility in excess of the ceiling established for such facility pursuant to paragraph (1).

(b) Any proceeds from excess consumption charges under subsection (a) shall be deposited in the Department of Defense family housing management account established by section 501(a) of the Act entitled "An Act to authorize certain construction at military installations, and for other purposes", approved July 27, 1962 (42 U.S.C. 1594-a1(a)).

(c) This section shall apply with respect to any military family housing facility in any State, the District of Columbia, the Commonwealth of Puerto Rico, or Guam.

APPROPRIATIONS LIMITATIONS

SEC. 508. There is authorized to be appropriated during fiscal year 1978 for use by the Secretary of Defense, or his designee, for military family housing and homeowners assistance as authorized by law for the following purposes:

(1) For construction of, or acquisition of sole interest in, family housing, including demolition, authorized improvements to public quarters, minor construction, relocation of family housing, rental guarantee payments, and planning, an amount not to exceed \$10,681,000.

(2) For support of military family housing including operating expenses, leasing, maintenance of real property, payments of principal and interest on mortgage debts incurred, payment to the Commodity Credit Corporation, and mortgage insurance premiums authorized under section 222 of the National Housing Act, as amended (12 U.S.C. 1715m), an amount not to exceed \$1,416,440,000.

(3) For homeowners assistance under section 1013 of the Demonstration Cities and Metropolitan Development Act of 1966 (42 U.S.C. 3374), including acquisition of properties, an amount not to exceed \$3,000,000.

(4) For procurement and installation of energy consumption measuring devices, an amount not to exceed \$161,100,000.

## TITLE VI—GENERAL PROVISIONS

## WAIVER OF RESTRICTIONS

SEC. 601. The Secretary of each military department may proceed to establish or develop installations and facilities under this Act without regard to section 3648 of the Revised Statutes, as amended (31 U.S.C. 529), and sections 4774 and 9774 of title 10, United States Code. The authority to place permanent or temporary improvements on land includes authority for surveys, administration, overhead, planning, and supervision incident to construction. That authority may be exercised before title to the land is approved under section 355 of the Revised Statutes, as amended (40 U.S.C. 255), and even though the land is held temporarily. The authority to acquire real estate or land includes authority to make surveys and to acquire land, and interests in land (including temporary use), by gift, purchase, exchange of Government-owned land, or otherwise.

## APPROPRIATIONS LIMITATIONS

SEC. 602. There are authorized to be appropriated during fiscal year 1978 such sums as may be necessary for the purposes of this Act, but appropriations for public works projects authorized by titles I, II, III, IV, and V, shall not exceed—

- (1) for title I: Inside the United States, \$629,372,000; outside the United States, \$335,147,000; or a total of \$964,519,000.
- (2) for title II: Inside the United States, \$399,534,000; outside the United States, \$22,761,000; or a total of \$422,295,000.
- (3) for title III: Inside the United States, \$207,411,000; outside the United States, \$139,497,000; or a total of \$346,908,000.
- (4) for title IV: A total of \$30,650,000.
- (5) for title V: Military family housing and homeowners assistance, \$1,591,221,000.

## COST VARIATIONS

SEC. 603. (a) Except as provided in subsections (b) and (c), any of the amounts specified in titles I, II, III, and IV of this Act may, at the discretion of the Secretary of the military department or Director of the defense agency concerned, be increased by 5 per centum when inside the United States (other than Hawaii and Alaska), and by 10 per centum when outside the United States or in Hawaii and Alaska, if he determines that such increase (1) is required for the sole purpose of meeting unusual variations in cost, and (2) could not have been reasonably anticipated at the time such estimate was submitted to the Congress.

(b) When the amount named for any construction or acquisition in title I, II, III, or IV of this Act involves only one project at any military installation and the Secretary of the military department or Director of the defense agency concerned determines that the amount authorized must be increased by more than the applicable percentage prescribed in subsection (a), he may proceed with such construction or acquisition if the amount of the increase does not exceed by more than 25 per centum the amount named for such project by the Congress.

(c) When the Secretary of Defense determines that any amount named in title I, II, III, or IV of this Act must be exceeded by more than the percentages permitted in subsections (a) and (b) to accomplish authorized construction or acquisition, the Secretary of the military department or Director of the defense agency concerned may proceed with such construction or acquisition after a written report of the facts relating to the increase of such amount, including a statement of the reasons for such increase, has been submitted to the Committees on Armed Services of the Senate and House of Representatives, and either (1) thirty days have elapsed from date of submission of such report, or (2) both committees have indicated

approval of such construction or acquisition. Notwithstanding the provisions in prior military construction authorization Acts, the provisions of this subsection shall apply to such prior Acts.

(d) Notwithstanding the foregoing provisions of this section, the total cost of all construction and acquisition in each such title may not exceed the total amount authorized to be appropriated in that title.

(e) No individual project authorized under title I, II, III, or IV of this Act for any specifically listed military installation for which the current working estimate is \$400,000 or more may be placed under contract if—

(1) the approved scope of the project is reduced in excess of 25 per centum; or

(2) the current working estimate, based upon bids received, for the construction of such project exceeds by more than 25 per centum the amount authorized for such project by the Congress,

until a written report of the facts relating to the reduced scope or increased cost of such project, including a statement of the reasons for such reduction in scope or increase in cost, has been submitted to the Committees on Armed Services of the Senate and House of Representatives, and either thirty days have elapsed from date of submission of such report, or both committees have indicated approval of such reduction in scope or increase in cost, as the case may be.

(f) The Secretary of Defense shall submit an annual report to the Congress identifying each individual project which has been placed under contract in the preceding twelve-month period and with respect to which the then current working estimate of the Department of Defense based upon bids received for such period exceeded the amount authorized by the Congress for that project by more than 25 per centum. The Secretary shall also include in such report each individual project with respect to which the scope was reduced by more than 25 per centum in order to permit contract award within the available authorization for such project. Such report shall include all pertinent cost information for each individual project, including the amount in dollars and percentage by which the current working estimate based on the contract price for the project exceeded the amount authorized for such project by the Congress.

## CONSTRUCTION SUPERVISION

SEC. 604. Contracts for construction made by the United States for performance within the United States and its possessions under this Act shall be executed under the jurisdiction and supervision of the Corps of Engineers, Department of the Army, or the Naval Facilities Engineering Command, Department of the Navy, or such other department or Government agency as the Secretaries of the military departments recommend and the Secretary of Defense approves to assure the most efficient, expeditious, and cost-effective accomplishment of the construction herein authorized. The Secretaries of the military departments shall report annually to the President of the Senate and the Speaker of the House of Representatives a breakdown of the dollar value of construction contracts completed by each of the several construction agencies selected together with the design, construction supervision, and overhead fees charged by each of the several agents in the execution of the assigned construction. Further, such contracts (except architect and engineering contracts which, unless specifically authorized by the Congress shall continue to be awarded in accordance with presently established procedures, customs, and practice) shall be awarded, insofar as practicable, on a competitive basis to the lowest responsible bidder, if the national security will not be impaired and the award is consistent with chapter 137 of title 10, United States Code. The Secre-

taries of the military departments shall report annually to the President of the Senate and the Speaker of the House of Representatives with respect to all contracts awarded on other than a competitive basis to the lowest responsible bidder. Such reports shall also show, in the case of the ten architect-engineering firms which, in terms of total dollars, were awarded the most business; the names of such firms; the total number of separate contracts awarded each such firm; and the total amount paid or to be paid in the case of each such action under all such contracts awarded such firm.

## REPEAL OF PRIOR AUTHORIZATIONS; EXCEPTIONS

SEC. 605. (a) As of January 1, 1979, all authorizations for military public works, including family housing, to be accomplished by the Secretary of a military department in connection with the establishment or development of installations and facilities, and all authorizations for appropriations therefor, that are contained in titles I, II, III, IV, and V of the Act of September 30, 1976, Public Law 94-431 (90 Stat. 1349), and all such authorizations contained in Acts approved before September 30, 1976, and not superseded or otherwise modified by a later authorization, are repealed except—

(1) authorizations for public works and for appropriations therefor that are set forth in those Acts in the titles that contain the general provisions;

(2) authorizations for public works projects as to which appropriated funds have been obligated for construction contracts, land acquisition, or payments to the North Atlantic Treaty Organization, in whole or in part, before January 1, 1979, and authorizations for appropriations therefor.

(b) Notwithstanding the repeal provisions of section 605 of the Act of September 30, 1976, Public Law 94-431 (90 Stat. 1349, 1364), authorizations for the following item shall remain in effect until January 1, 1980:

Relocation of the weapons range from the Culebra Complex in the amount of \$12,000,000 for the Atlantic Fleet Weapons Range, Roosevelt Roads, Puerto Rico, authorized in section 204 of the Act of November 29, 1973 (87 Stat. 668), as amended, and extended in section 605(b) (H) of the Act of October 7, 1975 (89 Stat. 565), as amended.

## UNIT COST LIMITATIONS

SEC. 606. None of the authority contained in titles I, II, III, and IV of this Act shall be deemed to authorize any building construction project inside the United States in excess of a unit cost to be determined in proportion to the appropriate area construction cost index, based on the following unit cost limitations where the area construction index is 1.0:

(1) \$42 per square foot for permanent barracks;

(2) \$45 per square foot for bachelor officer quarters;

unless the Secretary of Defense, or his designee, determines that because of special circumstances, application to such project of the limitations on unit costs contained in this section is impracticable. Notwithstanding the limitations contained in prior Military Construction Authorization Acts on unit costs, the limitations on such costs contained in this section shall apply to all prior authorizations for such construction not heretofore repealed and for which construction contracts have not been awarded by the date of enactment of this Act.

## INCREASES FOR SOLAR HEATING AND SOLAR COOLING EQUIPMENT

SEC. 607. The Secretary of Defense shall encourage the utilization of solar energy as a source of energy for projects authorized by this Act where utilization of solar energy would be practical and economically feasible. In addition to all other authorized variations of cost limitations or floor area limita-

tions contained in this Act prior Military Construction Authorization Acts, the Secretary of Defense, or his designee, may permit increases in the cost limitations or floor area limitations by such amounts as may be necessary to equip any project with solar heating equipment, solar cooling equipment, or both solar heating and solar cooling equipment.

#### AUTHORITY OF DEFENSE AGENCIES TO CARRY OUT MINOR CONSTRUCTION

SEC. 608. Section 2674 of title 10, United States Code, is amended—

(1) by inserting "or the Director of a defense agency" in subsection (a) after "the Secretary of a military department;" each place it appears;

(2) by striking out "Secretary concerned" in subsections (b) and (e) and inserting in lieu thereof "Secretary of the military department or Director of the defense agency concerned";

(3) by inserting "and the Director of each defense agency" in subsection (f) after "The Secretary of each military department"; and

(4) by adding after subsection (f) the following new subsection:

"(g) The Directors of the defense agencies shall carry out the authority provided under this section by or through a military department designated by the Secretary of Defense under section 2632 of this title."

#### LAND CONVEYANCE, CALIFORNIA

SEC. 609. Notwithstanding any other provisions of law, the Secretary of the Navy is authorized to convey to the City of Los Angeles, California, subject to such terms and conditions as the Secretary shall deem to be in the public interest, all right, title, and interest of the United States in and to a parcel of land consisting of approximately thirty-five acres with improvements thereon, located in the City of Los Angeles north of and separated by Seaside Avenue from Reeves Field, in exchange for the conveyance by the City of Los Angeles to the United States of the unencumbered fee title to approximately thirty-five acres of land adjacent to the western boundary of the Naval Support Activity, Long Beach, California, to be improved in a manner acceptable to the Secretary, and subject to such other conditions as the Secretary shall deem to be in the public interest. The exact acreages and legal descriptions of both properties are to be determined by accurate surveys as mutually agreed upon by the Secretary and the City of Los Angeles.

#### LAND CONVEYANCE, CALIFORNIA

SEC. 610. The Secretary of the Navy is authorized to convey to the City of San Diego, California, all right, title, and interest of the United States in land at the Naval Regional Medical Center, San Diego, in exchange for a lease of not to exceed fifty years, with an option to renew such lease for twenty-five years, for an identical number of acres for hospital and related uses.

#### LAND CONVEYANCE, NEW HAMPSHIRE

SEC. 611. (a) (1) Notwithstanding any other provision of law, the Secretary of the Army (hereinafter in this section referred to as the "Secretary") is authorized to convey to the Manchester Airport Authority, of Manchester, New Hampshire, subject to such terms and conditions as the Secretary considers appropriate, all right, title, and interest of the United States in and to a portion of land adjacent to the Manchester Municipal Airport consisting of approximately 8.3 acres, together with any improvements thereon.

(2) In consideration for the conveyance by the Secretary under paragraph (1), the Manchester Airport Authority shall convey to the United States unencumbered fee title to an area of land which the Secretary considers to be of equivalent value to the land conveyed by the Secretary under paragraph (1) and

which is otherwise acceptable to the Secretary.

(b) The exact acreages and legal descriptions of the lands to be conveyed under subsection (a) shall be determined by surveys as mutually agreed upon by the Secretary and the Manchester Airport Authority.

(c) The Secretary is authorized to accept the lands conveyed to the United States under subsection (a) (2), which lands shall be administered by the Secretary.

#### LAND CONVEYANCE, COLORADO

SEC. 612. Notwithstanding any other provision of law, the Secretary of the Air Force is authorized to acquire, by exchange with the city of Colorado Springs, Colorado, all rights, title and interest of the city in approximately one hundred and sixty-seven acres of land lying adjacent to the northerly boundary of Peterson Air Force Base, El Paso County, Colorado. As consideration for this exchange, the Secretary of the Air Force is authorized to convey to the city land and improvements on Ent Air Force Base, in the city of Colorado Springs, equal in monetary value to the land to be acquired. The exact acreages and legal descriptions of both such properties are to be determined by accurate surveys as mutually agreed upon by the Secretary and the city of Colorado Springs.

#### REVISION IN NUMBER OF NAVAL DISTRICTS

SEC. 613. (a) Chapter 516 of title 10, United States Code, is repealed.

(b) The table of chapters at the beginning of subtitle C and at the beginning of part I of subtitle C of title 10, United States Code, are each amended by striking out

"516. Naval Districts..... 5221".

#### SHORT TITLE

SEC. 614. Titles I, II, III, IV, V, and VI of this Act may be cited as the "Military Construction Authorization Act, 1978".

#### TITLE VII—GUARD AND RESERVE FORCES FACILITIES

##### AUTHORIZATION FOR FACILITIES

SEC. 701. Subject to chapter 133 of title 10, United States Code, the Secretary of Defense may establish or develop additional facilities for the Guard and Reserve Forces, including the acquisition of land therefor, but the cost of such facilities shall not exceed—

- (1) for the Department of the Army—
  - (A) for the Army National Guard of the United States, \$44,377,000; and
  - (B) for the Army Reserve, \$41,390,000;
- (2) for the Department of the Navy, for the Naval and Marine Corps Reserves, \$19,800,000; and

- (3) for the Department of the Air Force—
  - (A) for the Air National Guard of the United States, \$37,300,000; and
  - (B) for the Air Force Reserve, \$10,100,000.

##### WAIVER OF CERTAIN RESTRICTIONS

SEC. 702. The Secretary of Defense may establish or develop installations and facilities under this title without regard to section 3648 of the Revised Statutes, as amended (31 U.S.C. 529), and sections 4774 and 9774 of title 10, United States Code. The authority to place permanent or temporary improvements on lands includes authority for surveys, administration, overhead, planning, and supervision incident to construction. That authority may be exercised before title to the land is approved under section 355 of the Revised Statutes, as amended (40 U.S.C. 255), and even though the land is held temporarily. The authority to acquire real estate or land includes authority to make surveys and to acquire land, and interests in land (including temporary use), by gift, purchase, exchange, of Government-owned land, or otherwise.

#### SHORT TITLE

SEC. 703. This title may be cited as the "Guard and Reserve Forces Facilities Authorization Act, 1978".

Mr. NEDZI (during the reading). Mr. Chairman, I ask unanimous consent that the entire bill be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The CHAIRMAN. Are there any amendments to any title?

#### AMENDMENT OFFERED BY MR. HAGEDORN

Mr. HAGEDORN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HAGEDORN: Page 34, line 21: Strike out the period following the word "Code", and insert in its place ", excluding section 2304(f) (2) of title 10."

Mr. HAGEDORN. Mr. Chairman, this amendment will save the Federal Government an estimated \$35 million in defense expenditures by limiting the applicability of the Davis-Bacon Act for contracts authorized by H.R. 6990. While not a major reduction relative to total military spending, it is a rare savings that can be effected with no lessening of levels of military preparedness, and no deterioration in the quality of military facilities. The amendment makes no other changes in military procurement procedures.

While I believe that the exclusion of the Davis-Bacon Act from all military construction contracts would be justified, this amendment does not attempt to do this. Because of the germaneness rule, an amendment to the military construction authorization cannot directly limit the scope of the Davis-Bacon Act itself. It can, however, reach those contracts which would not be covered by Davis-Bacon except for specific language in the military procurement statutes. An estimated 10 percent of the contracts authorized by H.R. 6990, according to the Department of Defense, do not involve formally advertised specifications of the sort required for Davis-Bacon to apply.

Because formal advertising is a rigid and mechanical procedure, frequently inappropriate for military contracts, the Armed Services Procurement Act of 1947 carved out certain exceptions to the general rule that contracts be formally advertised. These exceptions are listed in section 2304 of title 10 of the United States Code. Negotiation is the methods for selecting among bidders without formal advertising and formal price competition. While adequate safeguards remain that the Defense Department accept the lowest bid, factors other than price can play an important role in the selection process. Contracts for research and development, for example, will normally be negotiated because the Department is interested in a contractor's technical capabilities, technical approaches, and management ability as well as simply cost. With respect to such contracts, it is the basic need that is advertised, not the specifications themselves as required by Davis-Bacon.

Apparently appreciating the inapplicability of the Davis-Bacon Act to ne-

gotiated contracts, section (f) of section 2304 of title 10 states:

For the purposes of the following law [which include the Davis-Bacon Act], purchases or contracts negotiated under this section shall be treated as if they were made with formal advertising.

All this amendment does is to repeal that language and treat as formally advertised only those contracts which are, in fact, formally advertised.

The Davis-Bacon Act is an antiquated law virtually without redeeming quality. It was born in an era of depression, insecure trade unions, and heavy supplies of itinerant labor, and ought to have died with that era. Not simply with respect to military spending—but wherever it is applied—its "prevailing wage" requirements for public construction costs insure public construction costs well above comparable private construction costs. As diverse a group of economists as Walter Heller, Arthur Burns, Hendrick Houthakker, and Milton Friedman agree that the act fuels inflation and results in wasteful, unnecessary Government spending by, in effect, requiring the payment of "superminimum" wages on all Federal and on most federally assisted construction.

The General Accounting Office in a 1971 study concluded that the primary impact of Davis-Bacon was to increase public construction costs by 5 to 15 percent, translating into approximately \$1 to \$3 billion annually. In addition, Davis-Bacon imposes burdensome paperwork costs upon contractors and subcontractors—often running as high as 1 to 2 percent of total projects costs—discourages full utilization of apprentices and helpers, contributes to declining employee morale, and impacts heavily upon totally private construction. It is wholly unrealistic to suppose that wage rates on the 30 percent of total national construction that is covered by Davis-Bacon do not affect rates on the 70 percent that is not, especially among contractors who do a high percentage of public construction work.

Originally designed to curb the importation of low wage rates on public construction as a result of contractors hiring platoons of workers from low wage areas of the country for work in higher wage areas, the Davis-Bacon Act today accomplishes the exact opposite result. Instead of conducting comprehensive wage surveys to determine accurately area prevailing wages, the Department of Labor has increasingly found it far easier to simply look to union wage rates in the nearest organized communities, and impose them as the prevailing rate. A study by the American Enterprise Institute concluded that:

In practice, it appears that an overwhelming proportion of wage determinations carry union wage rates regardless of area or type of construction . . . The bias in favor of union wage rates is also likely to be a consequence of the very large number of determinations that have to be made each year and resulting pressure for expedience in making determinations.

As a result, it is extremely common for

the Labor Department to look to urban areas many miles away in order to justify prevailing wages for small rural projects. Again the American Enterprise Institute study concludes that, in this process, local contractors and often local workers are excluded from public construction jobs. When matching funds are involved, smaller communities have increasingly opted out of Federal financing completely rather than complying with Davis-Bacon rates.

Mr. Chairman, the purpose of the immediate amendment is simply to extend the basic principle of competitive bidding to all aspects of military procurement. It is simply a matter of insuring that the Defense Department gets the most for its money. In no area of Government spending is it more imperative that we eliminate policies that have the effect of artificially increasing costs. This is especially indefensible when the supposed beneficiaries of the economic redistribution are individuals with incomes well above the national median, and well above the income levels of the taxpayers who are doing the subsidizing.

Mr. GOODLING. Mr. Chairman, will the gentleman yield?

Mr. HAGEDORN. I yield to the gentleman from Pennsylvania.

Mr. GOODLING. Mr. Chairman, I would like to compliment the gentleman for offering this amendment. I am not familiar with costs in military construction, but I know that in the school construction business, we have spent millions and millions of dollars beyond what we would have had to spend of taxpayers' money, because they base the Davis-Bacon going wage on the Philadelphia area, not the York, Pa., area. It became very expensive to local taxpayers, and an unnecessary expense.

Mr. HAGEDORN. I thank the gentleman from Pennsylvania for his comments. I noted the comments of the gentleman from Iowa (Mr. BEDELL) earlier when he talked about military construction costs of hospitals. This is certainly prevalent in the same area and in many other areas. Davis-Bacon is involved with many different areas of the Federal Government, and I am convinced that we are going to have to start to chop away at it one at a time to bring public attention to this super-minimum wage which was mandated by Congress and established in an era at a time of severe depression and at a time when we did not have the competitiveness we have today.

The CHAIRMAN. The time of the gentleman from Minnesota has expired.

(By unanimous consent Mr. HAGEDORN was allowed to proceed for 2 additional minutes.)

Mr. LEGGETT. Mr. Chairman, will the gentleman yield?

Mr. HAGEDORN. I yield to the gentleman from California.

Mr. LEGGETT. Mr. Chairman, I appreciate the remarks made by the gentleman from Minnesota, but I disagree with him on this issue, although I do agree with him on other issues.

But, is it not a fact that Richard Nixon was the one who made the last reduction in this last program? In fact, he eliminated Davis-Bacon, thinking he was going to save money. He thought about it for about a month, and then reversed his field and reversed his Executive order.

Mr. HAGEDORN. Unfortunately, former President Nixon succumbed to the political pressures of certain powerful labor interests of this nation when he failed to preserve suspension of Davis-Bacon in 1971. This was why it takes unified action on the part of this body. We can start now to make up lost time.

Mr. FORD of Michigan. Mr. Chairman, would the gentleman yield?

Mr. HAGEDORN. I yield to the gentleman from Michigan.

Mr. FORD of Michigan. Mr. Chairman, I am a little bit surprised that the gentleman attributes to the former President partisan political considerations in this, in view of the fact that the Davis-Bacon is authored by an outstanding Republican Member of this House from the State of New York, and it was signed into law by an outstanding—from the gentleman's point of view, I am sure—Republican President named Herbert Hoover, in 1931. I just thought I would bring that up so that this would not turn into a truly partisan discussion of Davis-Bacon. It is not a New Deal scheme.

Does the gentleman feel that President Hoover and Representative Bacon were motivated by the same kind of partisan political considerations he just mentioned?

Mr. HAGEDORN. Times have changed, and that was an error long before I came here. I think that if they were here today, they too would recognize the error of their ways and be right here supporting this amendment.

Mr. FORD of Michigan. I might say to the gentleman that the Republican attitude toward working people has changed.

Mr. CRANE. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, the purpose of this amendment, is threefold: First, to cut some fat out of the defense budget; second, to enable more firms to compete for certain types of military construction contracts; and third, to reverse the practice of aiding a special interest group at the expense of the national interest. It should have a particular attraction for all those who have urged a cut in the defense budget because not only does it provide for such a cut but the cut will, in no way, have an adverse effect on our Nation's military defenses.

Briefly put, what this amendment does is drop from the bill we have before us (H.R. 6990) the wording in section 604 that applies Davis-Bacon Act requirements to those types of contracts that would not otherwise be covered by Davis-Bacon. Specifically, the contracts affected are of two types—nonadvertised negotiated and turnkey—both of which are frequently used for military housing projects. Between them, they comprise

roughly 10 percent of the contracts authorized in this \$3.5 billion bill.

What this amendment does, therefore, is save that percentage of \$350 million which is represented by the added cost of contractors having to pay workers on these projects the prevailing wage rate, which is usually the union scale in the nearest metropolitan area. In 1971, the GAO did a study on this added cost factor and determined that the Davis-Bacon Act, which requires it, increased the cost of Federal construction projects by an average of 5 to 15 percent. Individual examples compiled from GAO and other sources by Dr. Armand Thieblot and published by the University of Pennsylvania's prestigious Wharton School of Business, bear out the results of the GAO study.

Illustrative of the problem is the Capehart case where the Marine Corps contracted for a 450-unit housing project in the vicinity of its base at Quantico, Va., instead of paying the prevailing wage in the Quantico area, the GAO determined that the wage rates that were actually paid were actually those paid in Washington, D.C., some 35 miles away. As a result, labor costs were increased by over \$1 million which, in turn, required the omission of certain desirable features that were in the original plans.

Similarly, in 1968, the Air Force awarded a contract for the construction of 162 units of family housing for Tinker Air Force Base in Oklahoma. Subsequent analysis indicated that the wage rate applied as a result of Davis-Bacon drove the cost of the project \$431,000 higher than if it had been private residential housing of the same type. A similar thing happened at Langley Air Force Base in Virginia where it was estimated that the cost of 23 housing units similar to private residential construction was \$188,000 above what it would have been had the project been private and Davis-Bacon had not been applicable.

If one compares this estimated Davis-Bacon cost with the total cost of each of these last two projects, the percentage add-on comes to 12.3 percent for the Tinker Air Force Base project and 13.6 percent for the Langley Air Force Base project. Even higher percentages for other projects, coupled with the fact that the scope of Davis-Bacon has certainly not decreased since 1968, strongly suggest that a 15 percent of total cost estimate for the effect of Davis-Bacon is more realistic than 5 percent and even that may be too low. Without this amendment, I suspect that the American taxpayers will be spending at least \$50 million on military construction that they should not have to spend—and for no good reason.

The question we need to examine is, if this kind of money can be saved and our military capability will not be adversely affected, why have Davis-Bacon provisions been included—not only in this bill but in previous bills? To argue, as the original framers did, that Davis-Bacon is necessary to prevent wage busting that will undermine the construction trades unions is obviously anachronistic.

In reality, Davis-Bacon provisions which mandate artificial wage boosting undermine nonunion construction workers and contractors—which is why the construction unions favor their continuation. Or, to put it another way, in times of prosperity as opposed to depression—when Davis-Bacon was originally enacted—such provisions constitute no more and no less than an organizing tool for a single special interest group—the construction trades unions.

Consider, if you will, the plight of the nonunion contractor who is interested in bidding on a Federal construction project, in this case military housing. That contractor knows he is going to have to pay a higher rate than he has been paying, or he would otherwise pay, his employees. Even if he could afford it, he would soon be faced with some real problems, notably: First, dissatisfaction on the part of other employees of his who are working private jobs and are being paid less; and second, reluctance on the part of the employees who worked the Federal project to take what seems like a pay cut on the next private project. So, rather than face such problems, the nonunion contractor is reluctant to bid and the job goes to a union contractor. Ironically, that union contractor may be from outside the area—a perverse reversal of the depression era concern about the possibility of itinerant nonunion contractors coming in and undercutting the unions. What is worse, such a state of affairs is only possible because the Federal Government, by virtue of having left the Davis-Bacon Act on the books, is effectively taking the side of the unions which certainly do not need any more protection than they have already.

In addition to the fact that Davis-Bacon keeps down nonunion competition and helps attract construction workers to the unions, the act also does the proverbial legwork of the labor unions—the organizing of workers and collectively bargaining on their behalf. Instead of having to negotiate for wages, the unions have the pay scale established by the Department of Labor even though it may not reflect union strength or the pay scale for private construction. As Dr. Thieblot pointed out in his aforementioned book, what Davis-Bacon does for the construction unions is similar to what European governments do for, or to, their workers—make the union wage scale binding on all workers without requiring the unions to have first organized those workers on their own.

And, if all that is not enough, Davis-Bacon may even be used as a jurisdictional weapon by the construction unions. If, for instance, the project in question could be carried out by either industrial workers or construction workers, the applicability of the Davis-Bacon Act would favor the latter.

The biggest irony of all this, and there are a number or ironies, is that, on the heels of common situs, the House is considering continuance of yet another special advantage for the construction trades unions. Granted, H.R. 6990 does not expand the special advantage but, as

the common situs vote clearly indicated, the American people oppose such advantages in the first place.

In closing, let me make a couple of final points. First of all, waiving Davis-Bacon, whether it be on military construction contracts or on all Federal contracts, will not result in "wage wars" that would drive pay scales down to subsistence levels. Even if there were an oversupply of workers large enough to make that possible, the minimum wage and unemployment compensation laws mitigate against that happening.

Moreover, a little more opportunity for competition would be a good thing; not only would it keep costs down to a level more in line with the norm for the area but it would give more people the opportunity to work without having to join a union. Arguments to the contrary should not be taken for granted; instead they should be examined for what they are—examples of special interest rhetoric.

The second and last point is that, if we are a more equitable balance of power between labor and management, the Federal Government cannot, through legislative enactment, take a position favoring one side or the other. From that standpoint, Davis-Bacon is no different than giving food stamps for strikers; it frees the unions from the free market restraints that would otherwise work to bring about compromises on the part of both labor and management and ultimately negotiated settlements agreeable to both. To the extent that those restraints are lifted, the unions benefit at the expense of management and ultimately the American people. I mention the latter group because a settlement that is more or less extorted, as opposed to negotiated, is likely to be artificially generous which will mean higher prices to cover the added costs which, in turn, will contribute to more inflation.

This last point cannot be stressed enough. The Davis-Bacon Act is inherently inflationary and in the case of these military construction contracts, its application will cost the American people at least \$17 million, probably as much as \$53 million and possibly more. At a time when we are running budget deficits of \$60 billion or more a year while concurrently witnessing a rapid buildup of Soviet military power, we cannot afford the luxury of tolerating fat in the defense budget while cramping the muscle.

Mr. Chairman, this amendment will produce more bang for the buck and defense for the dollar. I urge its adoption.

Mr. NEDZI. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, this is obviously a very complicated issue. The subcommittee has not had this matter under consideration at all. We first learned of it late Friday afternoon. I would state to the Members present that the Armed Services Subcommittee held nine days of hearings on this measure. We permitted Members of the House to come in and testify on any provision of the legis-

lation. No one advised the committee that they desired to appear with reference to this issue and, as I indicated, I was not advised of it until late Friday afternoon. We reviewed the amendment, and it re-forms all of chapter 137, title X, United States Code, which would be all of the procurement regulations governing the Defense Department. So, Mr. Chairman, for that reason, among others, I have to oppose the amendment, and I ask that the Members vote it down.

Mr. BEARD of Tennessee. Mr. Chairman, will the gentleman yield?

Mr. NEDZI. I yield to the gentleman from Tennessee (Mr. BEARD).

Mr. BEARD of Tennessee. I thank the gentleman for yielding.

Mr. Chairman, first of all, I would like to take this opportunity to compliment my chairman on the extended hearings he did hold. He did an excellent job on this particular piece of legislation, one I think we all should be proud of. I would like to say that this is an issue that has been brought up, I think, for the past 4 years that I have been on the subcommittee. To the man, every witness has stated that it is a very costly burden to have to pay wages, say, in North Carolina, at Camp Lejeune, that have to be paid in Atlanta, Ga., almost twice the amount as in North Carolina.

I appreciate what the gentleman is saying about the complicated issue of it. At this time I would like to ask my chairman if he would agree that this is an important enough issue, because it does deal in savings of dollars, to conduct hearings on the Davis-Bacon Act so that we can give these gentlemen an opportunity and other witnesses an opportunity to fully discuss it.

Mr. NEDZI. Mr. Chairman, I would just like to say to the gentleman that he is in error with respect to the wage rates.

Wage rates in North Carolina have nothing to do with wage rates in Georgia. The idea is that we pay the prevailing wage rate in the area in which the work under the contract is being performed.

Mr. BEARD of Tennessee. Mr. Chairman, I would say to the subcommittee chairman that that is not totally the case. However, I would rather not get into a debate on that. All I ask is that we do have hearings on this particular issue because I think it is significant enough to justify the holding of hearings.

Mr. NEDZI. Mr. Chairman, if sufficient interest is indicated on the issue, we will, of course, hold hearings on it.

Mr. FORD of Michigan. Mr. Chairman, will the gentleman yield?

Mr. NEDZI. I yield to the gentleman from Michigan.

Mr. FORD of Michigan. Mr. Chairman, I understand the generosity of my colleague, the gentleman from Michigan (Mr. NEDZI), in responding to the question, but I would like to caution both gentlemen who are involved in this colloquy that the jurisdiction over this legislation concerning any change in the provisions of the Davis-Bacon Act with respect to how we determine the prevailing wage is in the Committee on Education and Labor, and I can assure both gentlemen that any legislation that is

introduced for that purpose would have our complete and very careful attention.

The jurisdiction belongs in the Committee on Education and Labor, not in the Committee on Armed Services. That is why this amendment should be voted down. It is the wrong fight in the wrong place at the wrong time, and the best we can do with this is to confuse Members. Last year we only confused 35 Members, and 267 were not confused. I suspect we will have a similar outcome today.

Mr. Chairman, it is not fair to the people to suggest that this type of legislation should be a part of our consideration and that this committee should burden itself with a very technical piece of legislation like the Davis-Bacon Act.

Mr. BEARD of Tennessee. Mr. Chairman, if the gentleman will yield further, I would like to say that that is the same argument I have heard about OSHA reform, about welfare reform, and also about educational reform.

Mr. HAGEDORN. Mr. Chairman, will the gentleman yield?

Mr. NEDZI. I yield to the gentleman from Minnesota.

Mr. HAGEDORN. Mr. Chairman, I appreciate the statement of the gentleman from Michigan (Mr. FORD) and his suggestion that this legislation ought to evolve out of the Committee on Education and Labor. I have introduced comprehensive legislation to reform this act. I would solicit the encouragement and assistance of the Members to get the committee chairman to schedule hearings so we can bring forth the facts relative to this matter and so we can demonstrate clearly and concisely what is happening across this Nation and show instances where the Davis-Bacon Act is deliberately being misused.

Mr. HOWARD. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, the Davis-Bacon provision that is being discussed in this legislation is contained in, I suppose, every piece of legislation that deals with Federal money being used in construction. It is in the HEW provisions and is applied when we build hospitals using the taxpayers' money, and several years ago it was included in the highway construction legislation.

Year after year we have heard complaints about the Davis-Bacon provisions, and people come to the Congress asking us to repeal the whole thing.

The Davis-Bacon provision simply states that when we use the taxpayers' money for construction, the prevailing wage ought to be paid to the people who take part in that construction. There seems to be no disagreement over the philosophy or the fact that when we use the taxpayers' money—money that is paid not just by contractors but by wage earners and laborers—they ought to have a right to be sure they will get a fair shake in being paid the prevailing wage.

In hearings before the Committee on Public Works and Transportation on this provision of Davis-Bacon, we had the president of the National Association of

Manufacturers in to testify, and he represents certainly about the most anti-labor position anyone could hold in this country. When he was asked whether or not he found disagreement with the philosophy of Davis-Bacon in paying the prevailing wage to the people whose tax dollars we use, he said he could not.

The big complaint is always that it is not being administered properly, that the Department of Labor is using false statistics. If that is the case, then I submit that the argument is not here in the Congress; it is downtown; it is in the application of the Davis-Bacon provision by the Department of Labor. But we should not try to solve that problem here in the Congress by saying that we are going to abandon the philosophy and the idea that we are going to pay the people who do the work and perform the construction, the people whose taxes are being used for this purpose, a prevailing wage.

Mr. Chairman, it is a good and a fair provision. It ought to stay in the law. If we do anything unwise this afternoon and take out this provision, we know that we are going to get this amendment in every kind of construction bill that comes down the pike. It is just not fair to repeal the Davis-Bacon provision, and I hope we do not do that here today because our actions could have very bad complications across the country. It is not being administered properly, let us correct it downtown, not by legislation here in Congress.

Mr. LEGGETT. Mr. Chairman, will the gentleman yield?

Mr. HOWARD. I yield to the gentleman from California.

Mr. LEGGETT. Mr. Chairman, I want to commend the gentleman from New Jersey (Mr. HOWARD) for his remarks. Certainly he has made very clear statements about Davis-Bacon and the standards that are set.

As I understand it, these contracts that are negotiated in local areas are negotiated under the Landrum-Griffin Act or the earlier Wagner Act legislation; is that not correct?

Mr. HOWARD. That is correct, as far as I know.

I would like to say to the gentleman also that in using the taxpayers' money, whether the contractors bid or not on this job, they know when they bid that they are going to keep it within an area in which they are surely going to get the prevailing profit on this construction.

I think the least they can do is make sure the workers who build it have a chance to make the prevailing wage as well. I think it is only fair.

Mr. LEGGETT. If the gentleman will yield further, if one wanted to save money, could he not also provide that contractors bidding on Federal work need not comply with the Fair Labor Standards Act, and pay the minimum wage?

Mr. HOWARD. That would make as much sense.

Mr. GOODLING. Mr. Chairman, will the gentleman yield?

Mr. HOWARD. I yield to the gentleman from Pennsylvania.

Mr. GOODLING. Mr. Chairman, the

objection is not to the philosophy, as the gentleman mentioned, as long as they pay prevailing wages on construction jobs in that area, but unfortunately that is not always true.

The gentleman says that we have no responsibility. Where is the oversight responsibility to make sure that the law is carried out?

Mr. HOWARD. The oversight responsibility could be in looking into it through, perhaps, the major committee, the Committee on Education and Labor. However, I say the solution is not to abandon a good philosophy. The solution is down-town, and it might be with an investigative committee that is not a legislative committee on oversight.

I would just as soon see it taken care of in that way rather than having us abandon the whole principle of prevailing wage in the legislation here so that there is no hope of even getting it done in a fair way.

Mr. GOODLING. I would only like to say that I serve on that committee, and I hope that we can get a fair hearing on the issues.

Mr. HOWARD. I hope so.

The CHAIRMAN. The time of the gentleman from New Jersey (Mr. HOWARD) has expired.

(By unanimous consent, Mr. HOWARD was allowed to proceed for 1 additional minute.)

Mr. HAGEDORN. Mr. Chairman, will the gentleman yield?

Mr. HOWARD. I yield to the gentleman from Minnesota.

Mr. HAGEDORN. Mr. Chairman, would the gentleman from New Jersey (Mr. HOWARD) join with me in calling for investigations by the Subcommittee on Investigations and Review of the Committee on Education and Labor?

Mr. HOWARD. Absolutely; I would join with the gentleman right now in sending letters to the Department of Labor or to the Committee on Education and Labor.

The only thing I do not want to do is to use that argument, which may or may not be legitimate—I believe it is legitimate—to really do something very unfair in this legislation.

Therefore, Mr. Chairman, I will join the gentleman in his request, and maybe the gentleman would be willing to withdraw his amendment.

Mr. CRANE. Mr. Chairman, will the gentleman yield?

Mr. HOWARD. I yield to the gentleman from Illinois.

Mr. CRANE. Mr. Chairman, I would like to harken back to a comment made by our distinguished colleague, the gentleman from Michigan, recently about the timing of the origination of this system in 1931. In that year things were infinitely different; and one, I think, can certainly understand the rationale of that era. However, that is a time long since past. We are living now in an era when our primary concern is that we should try to live within our means, and this is the way in which to do it.

Mr. FORD of Michigan. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I rise in opposition to the amendment of the gentleman from Minnesota (Mr. HAGEDORN). First let me say that, contrary to the impression apparently held by the author of this amendment, the Davis-Bacon Act was not some post New Deal scheme, sponsored by Democrats and labor unions.

Although the act was first passed in 1931 and signed into law by President Hoover as the first prevailing wage statute for the construction industry, it was originally conceived by a Republican Congressman, Robert Bacon of New York, in 1926 or 1927.

The purpose of this act was not, as suggested, to increase industry construction wages in any given area. In fact, by its nature, it cannot do this.

In supporting this legislation in 1927, Congressman Bacon cited the example of the construction in his district of a Veterans Bureau Hospital. When bids were solicited, New York contractors, bidding with prevailing wages then in the area, lost out to an out-of-State contractor who imported out-of-State workers, put them into poor housing and paid them very low wages. It is clear that Congressman Bacon intended to protect not only the New York labor that was displaced in this fashion, but also the employee-employer relationship in that area between construction workers and their employers.

While the Davis-Bacon Act does not automatically apply to all Federal construction programs, since that time Congress has repeatedly written other legislation to make it apply to virtually every Federal act which provides construction money from Federal tax revenues.

A guiding principle has been that the Federal Government, spending tax dollars collected from both workers and contractors, should not support competitive wage policies created by itinerant contractors attempting to exploit Federal construction dollars to depress existing wage rates.

It is clear from the statements made by supporters of the Hagedorn amendment, who claim not to disagree with the basic philosophy of this act, that what they seek is changes in the method of establishing wage standards by the Secretary of Labor, rather than a blanket repeal of the law, which would have an effect on all military construction. In effect, the supporters of this amendment are asking the House to repeal a basic principle almost a half-century old by virtue of a briefly considered and little understood amendment here on the floor today.

If the gentleman wishes to make changes in the basic Davis-Bacon Act, he should pursue the normal legislative process to change that law so that all persons interested—in business, labor, and government—might be heard before such legislation is considered.

Mr. Chairman, this same amendment was offered to a military construction bill before the House on May 7, 1976, and it was defeated by a vote of 279 yeas to 35 nays. I recommend that members of the committee today follow the greater wis-

dom shown by the House last year and help us to soundly defeat this amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Minnesota (Mr. HAGEDORN).

The question was taken; and the Chairman announced that the yeas appeared to have it.

Mr. CRANE. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

The CHAIRMAN. A quorum of the Committee of the Whole has not appeared.

The Chair announces that a regular quorum call will now commence.

Members who have not already responded under the noticed quorum call will have a minimum of 15 minutes to record their presence. The call will be taken by electronic device.

The call was taken by electronic device, and the following Members failed to respond:

[Roll No. 310]

| Gephardt        | Pike           |               |

Accordingly the Committee rose; and the Speaker pro tempore (Mr. WRIGHT) having assumed the chair, Mr. MIKVA, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill H.R. 6990, and finding itself without a quo-

rum, he had directed the Members to record their presence by electronic device, whereupon 310 Members recorded their presence, a quorum, and he submitted herewith the names of the absentees to be spread upon the Journal.

The Committee resumed its sitting.

## RECORDED VOTE

The CHAIRMAN. The pending business is the request of the gentleman from Illinois (Mr. CRANE) for a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 76, noes 298, not voting 59, as follows:

[Roll No. 311]

| Bevill        | Kemp          | Sawyer      |
| Breaux        | Koch          | Sebelius    |
| Clawson, Del  | Levitas       | Steers      |
| Collins, Ill. | Lloyd, Calif. | Teague      |
| Dent          | Lott          | Thompson    |
| Devine        | McHugh        | Thornton    |
| Dornan        | McKinney      | Traxler     |
| Eckhardt      | Marlenee      | Tucker      |
| Flippo        | Mathis        | Weaver      |
| Florio        | Metcalf       | Whitehurst  |
| Frey          | Milford       | Wilson, Bob |
| Hammer        | Mineta        | Wylder      |
| Schmidt       | Myers, Gary   | Young, Fla. |
| Hansen        | Pettis        | Young, Tex. |

The Clerk announced the following pairs:

On this vote:

Mr. Teague for, with Mr. Thompson against.

Mr. Ashbrook for, with Mr. Pritchard against.

Mr. Lott for, with Mr. McHugh against.

Mr. Hansen for, with Mr. Hollenbeck against.

Mr. Devine for, with Mr. Steers against.

Mr. Sebelius for, with Mr. Hawkins against.

Mr. Del Clawson for, with Mr. Levitas against.

Mr. WAMPLER and Mr. TRIBLE changed their vote from "aye" to "no."

So the amendment was rejected.

The result of the vote was announced as above recorded.

The CHAIRMAN. Are there any further amendments? If not, under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. WRIGHT)

having assumed the chair, Mr. MIKVA, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 6990) to authorize certain construction at military installations, and for other purposes, pursuant to House Resolution 602, he reported the bill back to the House.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

Mr. SYMMS. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 351, nays 24, not voting 58, as follows:

[Roll No. 312]

## YEAS—351

Mr. Milford with Mr. Ryan.  
Mr. Bob Wilson with Mr. Young of Texas.  
Mr. Hollenbeck with Mr. Whitehurst.  
Mr. Sawyer with Mr. Kemp.

So the bill was passed.  
The result of the vote was announced  
as above recorded.

A motion to reconsider was laid on the  
table.

Mr. NEDZI. Mr. Speaker, I ask unani-  
mous consent to take from the Speaker's  
table the Senate bill (S. 1474) to author-  
ize certain construction at military in-  
stallations, and for other purposes, and  
ask for its immediate consideration.

The Clerk read the title of the Senate  
bill.

The SPEAKER pro tempore. Is there  
objection to the request of the gentle-  
man from Michigan?

There was no objection.

The Clerk read the Senate bill, as fol-  
lows:

*Be it enacted by the Senate and House of  
Representatives of the United States of  
America in Congress assembled,*

## TITLE I—ARMY

SEC. 101. The Secretary of the Army may  
establish or develop military installations  
and facilities by acquiring, constructing,  
converting, rehabilitating, or installing per-  
manent or temporary public works, includ-  
ing land acquisition, site preparation, ap-  
purtenances, utilities, and equipment for  
the following acquisition and construction:

Various locations: For the United States share of the cost of multilateral programs for the acquisition or construction of military facilities and installations, including international military headquarters, for the collective defense of the North Atlantic Treaty Area, \$85,000,000. Within thirty days after the end of each quarter, the Secretary of the Army shall furnish to the Committees on Armed Services and on Appropriations of the Senate and House of Representatives a description of obligations incurred as the United States share of such multilateral programs.

#### NUCLEAR WEAPONS SECURITY

Various locations, \$6,800,000.

#### EMERGENCY CONSTRUCTION

SEC. 102. The Secretary of the Army may establish or develop Army installations and facilities by proceeding with construction made necessary by changes in Army missions and responsibilities which have been occasioned by (1) unforeseen security considerations, (2) new weapons developments, (3) new and unforeseen research and development requirements, or (4) improved production schedules if the Secretary of Defense determines that deferral of such construction for inclusion in the next Military Construction Authorization Act would be inconsistent with interests of national security, and in connection therewith to acquire, construct, convert, rehabilitate, or install permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment in the total amount of \$10,000,000. The Secretary of the Army, or his designee, shall notify the Committees on Armed Services of the Senate and House of Representatives, immediately upon reaching a final decision to implement, of the cost of construction of any public work undertaken under this section, including those real estate actions pertaining thereto. This authorization will expire upon the date of enactment of the Military Construction Authorization Act for fiscal year 1979 except for those public works projects concerning which the the Committees on Armed Services of the Senate and House of Representatives have been notified pursuant to this section prior to such date.

#### TITLE II—NAVY

SEC. 201. The Secretary of the Navy may establish or develop military installations and facilities by acquiring, constructing, converting, rehabilitating, or installing permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment for the following acquisition and construction:

#### INSIDE THE UNITED STATES

##### TRIDENT FACILITIES

Various locations, \$106,910,000.

Marine Corps Base, Twentynine Palms, California, \$11,965,000.

#### CHIEF OF NAVAL OPERATIONS

Naval Academy, Annapolis, Maryland, \$365,000.  
Naval Observatory, Flagstaff, Arizona, \$80,000.  
Commander in Chief Pacific, Headquarters, Pearl Harbor, Hawaii, \$4,200,000.  
Naval Support Activity, Mare Island, Vallejo, California, \$2,900,000.  
Naval District Headquarters, Washington, District of Columbia, \$1,200,000.

#### COMMANDER IN CHIEF, ATLANTIC FLEET

Naval Air Station, Brunswick, Maine, \$3,750,000.  
Naval Air Station, Cecil Field, Florida, \$90,000.  
Naval Station, Charleston, South Carolina, \$180,000.  
Fleet Combat Direction Systems Training Center, Dam Neck, Virginia, \$400,000.  
Naval Amphibious Base, Little Creek, Virginia, \$3,600,000.  
Naval Station, Mayport, Florida, \$1,310,000.  
Naval Submarine Base, New London, Connecticut, \$470,000.  
Flag Administrative Unit Atlantic, Norfolk, Virginia, \$90,000.  
Fleet Intelligence Center Europe and Atlantic, Norfolk, Virginia, \$1,137,000.  
Naval Air Station, Norfolk, Virginia, \$14,350,000.  
Naval Station, Norfolk, Virginia, \$4,340,000.  
Naval Air Station, Norfolk, Oceana, Virginia, \$640,000.

#### COMMANDER IN CHIEF, PACIFIC FLEET

Naval Station, Adak, Alaska, \$11,000,000.  
Naval Air Station, Barbers Point, Hawaii, \$7,197,000.  
Naval Amphibious Base, Coronado, California, \$130,000.  
Naval Air Station, Miramar, California, \$3,830,000.  
Naval Air Station, Moffett Field, California, \$810,000.  
Naval Air Station, North Island, California, \$6,000,000.  
Commander Oceanographic System, Pacific, Pearl Harbor, Hawaii, \$7,400,000.  
Naval Station, Pearl Harbor, Hawaii, \$5,350,000.  
Naval Submarine Base, Pearl Harbor, Hawaii, \$2,090,000.  
Naval Station, San Diego, California, \$8,566,000.  
Naval Submarine Support Facility, San Diego, California, \$1,670,000.  
Naval Air Station, Whidbey Island, Washington, \$900,000.

#### CHIEF OF NAVAL EDUCATION AND TRAINING

Naval Air Station, Kingsville, Texas, \$550,000.  
Naval Education and Training Center, Newport, Rhode Island, \$270,000.  
Armed Forces Staff College, Norfolk, Virginia, \$160,000.  
Naval Training Center, Orlando, Florida, \$200,000.

Naval Amphibious School, Coronado, San Diego, California, \$3,450,000.  
Naval Submarine Training Center, Pearl Harbor, Hawaii, \$410,000.  
Naval Technical Training Center, Pensacola, Florida, \$2,400,000.

#### BUREAU OF MEDICINE AND SURGERY

Naval Regional Medical Center, Bremerton, Washington, \$1,450,000.  
Naval Regional Medical Center, Norfolk, Virginia, \$600,000.

#### CHIEF OF NAVAL MATERIAL

Naval Ship Research and Development Center, Annapolis, Maryland, \$280,000.  
Naval Ship Research and Development Center, Bethesda, Maryland, \$200,000.  
Puget Sound Naval Shipyard, Bremerton, Washington, \$11,600,000.

Polaris Missile Facility Atlantic, Charleston, South Carolina, \$18,150,000.

Charleston Naval Shipyard, Charleston, South Carolina, \$8,700,000.  
Naval Weapons Station, Charleston, South Carolina, \$850,000.  
Naval Air Rework Facility, Cherry Point, North Carolina, \$360,000.  
Naval Weapons Center, China Lake, California, \$900,000.  
Naval Weapons Station, Concord, California, \$2,550,000.  
Navy Public Works Center, Great Lakes, Illinois, \$850,000.  
Naval Avionics Facility, Indianapolis, Indiana, \$90,000.  
Naval Ordnance Station, Indian Head, Maryland, \$180,000.  
Naval Air Rework Facility, Jacksonville, Florida, \$1,200,000.  
Naval Torpedo Station, Keyport, Washington, \$3,540,000.  
Portsmouth Naval Shipyard, Kittery, Maine, \$10,030,000.  
Naval Air Station, Lakehurst, New Jersey, \$160,000.  
Long Beach Naval Shipyard, Long Beach, California, \$9,020,000.  
Naval Air Rework Facility, Norfolk, Virginia, \$390,000.  
Naval Supply Center, Norfolk, Virginia, \$1,200,000.  
Navy Public Works Center, Norfolk, Virginia, \$4,150,000.  
Naval Air Test Center, Patuxent River, Maryland, \$6,089,000.  
Naval Supply Center, Pearl Harbor, Hawaii, \$17,100,000.  
Pearl Harbor Naval Shipyard, Pearl Harbor, Hawaii, \$1,080,000.  
Navy Public Works Center, Pearl Harbor, Hawaii, \$3,000,000.  
Navy Public Works Center, Pensacola, Florida, \$1,650,000.  
Philadelphia Naval Shipyard, Philadelphia, Pennsylvania, \$17,500,000.  
Pacific Missile Test Center, Point Mugu, California, \$1,980,000.  
Naval Construction Battalion Center, Port Hueneme, California, \$2,510,000.  
Norfolk Naval Shipyard, Portsmouth, Virginia, \$100,000.  
Naval Undersea Center, San Diego, California, \$250,000.  
Navy Public Works Center, San Francisco, California, \$480,000.  
Naval Air Propulsion Test Center, Trenton, New Jersey, \$240,000.  
Mare Island Naval Shipyard, Vallejo, California, \$24,100,000.  
Naval Research Laboratory, Washington, District of Columbia, \$330,000.  
Naval Surface Weapons Center, White Oak, Maryland, \$280,000.  
Naval Weapons Station, Yorktown, Virginia, \$5,800,000.

#### NAVAL TELECOMMUNICATIONS COMMAND

Naval Communications Station, Adak, Alaska, \$300,000.

#### NAVAL SECURITY GROUP COMMAND

Naval Security Group Department, Adak, Alaska, \$2,350,000.  
Naval Security Group Detachment, Sugar Grove, West Virginia, \$900,000.  
Naval Security Station, Washington, District of Columbia, \$90,000.

#### NUCLEAR WEAPONS SECURITY

Various locations, \$20,658,000.

#### OUTSIDE THE UNITED STATES

##### CHIEF OF NAVAL OPERATIONS

Naval Support Facility, Diego Garcia, Indian Ocean, \$7,300,000.

##### COMMANDER IN CHIEF, ATLANTIC FLEET

Naval Facility, Antigua, British West Indies, \$180,000.  
Naval Station, Keflavik, Ireland, \$161,000.  
Naval Station, Roosevelt Roads, Puerto Rico, \$320,000.

## COMMANDER IN CHIEF, PACIFIC FLEET

Naval Public Works Center, Guam, Mariana Islands, \$2,800,000.

Navy Fleet Activities, Yokosuka, Japan, \$1,850,000.

## NAVAL FORCES EUROPE

Naval Air Facility, Sigonella, Italy, \$4,300,000.

## BUREAU OF MEDICINE AND SURGERY

Naval Regional Medical Clinic, Pearl Harbor, Midway Island Detachment, \$4,350,000.

## NAVAL TELECOMMUNICATIONS COMMAND

Naval Communication Area Master Station, Naples, Italy, \$1,700,000.  
Naval Communications Unit, Thurso, Scotland, \$350,000.

## NAVAL SECURITY GROUP COMMAND

Naval Security Group Department, Rota, Spain, \$2,400,000.

## EMERGENCY CONSTRUCTION

Sec. 202. (a) The Secretary of the Navy may establish or develop Navy installations and facilities by proceeding with construction made necessary by changes in Navy missions and responsibilities which have been occasioned by (1) unforeseen security considerations, (2) new weapons developments, (3) new and unforeseen research and development requirements, or (4) improved production schedules, if the Secretary of Defense determines that deferral of such construction for inclusion in the next Military Construction Authorization Act would be inconsistent with interest of national security, and in connection therewith to acquire, construct, convert, rehabilitate, or install permanent or temporary public works including land acquisition, site preparation, appurtenances, utilities, and equipment, in the total amount of \$20,000,000. The Secretary of the Navy, or his designee, shall notify the Committees on Armed Services of the Senate and House of Representatives, immediately upon reaching a final decision to implement, of the cost of construction of any public work undertaken under this section, including those real estate actions pertaining thereto. This authorization will expire upon the date of enactment of the Military Construction Authorization Act for fiscal year 1979 except for those public works projects concerning which the Committees on Armed Services of the Senate and House of Representatives have been notified pursuant to this section prior to such date.

(b) The Secretary of the Navy may use the authority contained in subsection (a) to provide the necessary facilities at King's Bay, Georgia, or at such other site as he may determine, to accommodate the submarine squadron currently stationed in Rota, Spain. Funds may not be expended for such purpose until the Secretary of the Navy has completed a site selection study and has publicly announced his final site decision.

(c) Section 202 of Public Law 94-431 is amended by striking out "This authorization will expire upon the date of enactment of the Military Construction Authorization Act for fiscal year 1978" and inserting in lieu thereof "This authorization will expire upon the date of enactment of the Military Construction Authorization Act for fiscal year 1979".

## REPLACEMENT OF LEASED FACILITIES, SAN DIEGO

Sec. 203. Notwithstanding any other provision of law, the Secretary of the Navy is authorized (1) to construct at the United States Naval Station, San Diego, California, recreational facilities necessary to replace those facilities located on the Navy Athletic Field, Naval Station, San Diego, which field is held under lease (dated August 9, 1949) from the city of San Diego, and (2) to expend for such construction funds paid to the United States by the San Diego Unified Port District (the current holder of the lessor's interest in

the premises on which such Navy Athletic Field is situated) pursuant to an agreement, to be negotiated between the Secretary and the Unified Port District, providing for Navy termination of the lease and abandonment of its existing facilities on the leasehold in consideration of the Unified Port District paying to the United States the cost of replacement recreational facilities. However, such lease shall not be terminated and the Department of the Navy shall not be required to relinquish use of any part of the leasehold until the new facilities authorized to be constructed herein are available for use, as determined by the Secretary, or his designee.

## TRANSFER OF AUTHORIZATION

Sec. 204. The Secretary of the Navy may utilize the \$100,000,000 authorization for the National Naval Medical Center, Bethesda, Maryland, contained in section 201 of Public Law 94-107 (89 Stat. 550), for the construction of a south parking structure serving the 500-bed replacement hospital.

## TITLE III—AIR FORCE

Sec. 301. The Secretary of the Air Force may establish or develop military installations and facilities by acquiring, constructing, converting, rehabilitating, or installing permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment, for the following acquisition and construction:

## INSIDE THE UNITED STATES

## AEROSPACE DEFENSE COMMAND

Kingsley Field, Oregon, \$115,000.  
Peterson Air Force Base, Colorado, \$773,000.  
Tyndall Air Force Base, Florida, \$690,000.

## AIR FORCE LOGISTICS COMMAND

Hill Air Force Base, Utah, \$23,020,000.  
Kelly Air Force Base, Texas, \$9,878,000.  
McClellan Air Force Base, California, \$4,086,000.  
Newark Air Force Station, Ohio, \$2,080,000.  
Robins Air Force Base, Georgia, \$11,884,000.  
Tinker Air Force Base, Oklahoma, \$12,894,000.

Wright Patterson Air Force Base, Ohio, \$7,274,000.

## AIR FORCE SYSTEMS COMMAND

Arnold Engineering Development Center, Tennessee, \$1,280,000.  
Buckley Air National Guard Base, Colorado, \$1,895,000.  
Edwards Air Force Base, California, \$13,532,000.  
Eglin Air Force Base, Florida, \$16,485,000.  
Los Angeles Air Force Station, California, \$500,000.  
Patrick Air Force Base, Florida, \$300,000.  
Various locations, \$2,826,000.

## AIR TRAINING COMMAND

Chanute Air Force Base, Illinois, \$8,026,000.  
Columbus Air Force Base, Mississippi, \$1,183,000.  
Keesler Air Force Base, Mississippi, \$850,000.

Lackland Air Force Base, Texas, \$4,700,000.  
Lowry Air Force Base, Colorado, \$5,188,000.  
Mather Air Force Base, California, \$115,000.  
Randolph Air Force Base, Texas, \$425,000.  
Sheppard Air Force Base, Texas, \$980,000.  
Williams Air Force Base, Arizona, \$679,000.

## AIR UNIVERSITY

Gunter Air Force Base, Alabama, \$248,000.

## ALASKAN AIR COMMAND

Elmendorf Air Force Base, Alaska, \$297,000.  
Elmendorf Air Force Base, Alaska, \$5,042,000.  
King Salmon Airport, Alaska, \$631,000.  
Shemya Air Force Base, Alaska, \$3,947,000.

## MILITARY AIRLIFT COMMAND

Altus Air Force Base, Oklahoma, \$805,000.  
Andrews Air Force Base, Maryland, \$3,626,000.

Bolling Air Force Base, District of Columbia, \$133,000.

Dover Air Force Base, Delaware, \$165,000.  
Little Rock Air Force Base, Arkansas, \$573,000.

McChord Air Force Base, Washington, \$6,011,000.

McGuire Air Force Base, New Jersey, \$640,000.

Norton Air Force Base, California, \$3,636,000.

Pope Air Force Base, North Carolina, \$1,669,000.

Travis Air Force Base, California, \$9,980,000.

## PACIFIC AIR FORCES

Hickam Air Force Base, Hawaii, \$2,140,000.

## STRATEGIC AIR COMMAND

Barksdale Air Force Base, Louisiana, \$2,253,000.

Beale Air Force Base, California, \$409,000.  
Blytheville Air Force Base, Arkansas, \$941,000.

Carwell Air Force Base, Texas, \$400,000.

Castle Air Force Base, California, \$884,000.  
Dyess Air Force Base, Texas, \$672,000.

Ellsworth Air Force Base, South Dakota, \$376,000.

Griffiss Air Force Base, New York, \$645,000.

Grissom Air Force Base, Indiana, \$6,300,000.

March Air Force Base, California, \$1,387,000.

McConnell Air Force Base, Kansas, \$216,000.

Offutt Air Force Base, Nebraska, \$1,364,000.

Pease Air Force Base, New Hampshire, \$2,314,000.

Plattsburgh Air Force Base, New York, \$518,000.

Rickenbacker Air Force Base, Indiana, \$815,000.

Vandenberg Air Force Base, California, \$2,193,000.

## TACTICAL AIR COMMAND

Bergstrom Air Force Base, Texas, \$874,000.

Cannon Air Force Base, New Mexico, \$937,000.

Davis Monthan Air Force Base, Arizona, \$262,000.

England Air Force Base, Louisiana, \$585,000.

George Air Force Base, California, \$3,073,000.

Holloman Air Force Base, New Mexico, \$2,377,000.

Homestead Air Force Base, Florida, \$90,000.

Langley Air Force Base, Virginia, \$5,202,000.

Luke Air Force Base, Arizona, \$9,242,000.

MacDill Air Force Base, Florida, \$2,420,000.

Moody Air Force Base, Georgia, \$5,555,000.

Mountain Home Air Force Base, Idaho, \$195,000.

Myrtle Beach Air Force Base, South Carolina, \$718,000.

Nellis Air Force Base, Nevada, \$5,180,000.

Seymour-Johnson Air Force Base, North Carolina, \$3,816,000.

Shaw Air Force Base, South Carolina, \$763,000.

## UNITED STATES AIR FORCE ACADEMY

United States Air Force Academy, Colorado, \$1,872,000.

## NUCLEAR WEAPONS SECURITY

Various locations, \$44,298,000.

## OUTSIDE THE UNITED STATES

## AEROSPACE DEFENSE COMMAND

Sondrestrom Air Base, Greenland, \$310,000.

Thule Air Base, Greenland, \$350,000.

## PACIFIC AIR FORCES

Kadena Air Base, Japan, \$2,372,000.

Osan Air Base, Korea, \$1,255,000.

Yokota Air Base, Japan, \$2,448,000.

## STRATEGIC AIR COMMAND

Andersen Air Force Base, Guam, \$1,905,000.

## UNITED STATES AIR FORCES IN EUROPE

Germany, \$16,417,000.  
United Kingdom, \$11,730,000.  
Various locations, \$97,905,000.

## UNITED STATES AIR FORCE SECURITY SERVICE

Misawa Air Base, Japan, \$732,000.

## NUCLEAR WEAPONS SECURITY

Various locations, \$10,162,000.

## SPECIAL FACILITIES

Various locations, \$2,356,000.

## EMERGENCY CONSTRUCTION

SEC. 302. The Secretary of the Air Force may establish or develop Air Force installations and facilities by proceeding with construction made necessary by changes in Air Force missions and responsibilities which have been occasioned by (1) unforeseen security considerations, (2) new weapons developments, (3) new unforeseen research and development requirements, or (4) improved production schedules, if the Secretary of Defense determines that deferral of such construction for inclusion in the next Military Construction Authorization Act would be inconsistent with interests of national security, and in connection therewith to acquire, construct, convert, rehabilitate, or install permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment in the total amount of \$20,000,000. The Secretary of the Air Force, or his designee, shall notify the Committees on Armed Services of the Senate and House of Representatives, immediately upon reaching a final decision to implement, of the cost of construction of any public work undertaken under this section, including those real estate actions pertaining thereto. This authorization will expire upon the date of enactment of the Military Construction Authorization Act for fiscal year 1979 except for those public works projects concerning which the Committees on Armed Services of the Senate and House of Representatives have been notified pursuant to this section prior to such date.

## TITLE IV—DEFENSE AGENCIES

SEC. 401. The Secretary of Defense may establish or develop military installations and facilities by acquiring, constructing, converting, rehabilitating, or installing permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment, for defense agencies for the following acquisition or construction:

## INSIDE THE UNITED STATES

## NATIONAL SECURITY AGENCY

Fort George G. Meade, Maryland, \$650,000.

## DEFENSE SYSTEMS MANAGEMENT COLLEGE

Fort Belvoir, Virginia, \$1,810,000.

## HIGH ENERGY LASER FACILITY

White Sands, New Mexico, \$33,449,000.

## OUTSIDE THE UNITED STATES

## DEFENSE LOGISTICS AGENCY

Defense Property Disposal Office, Ludwigsburg, Germany, \$1,650,000.

## EMERGENCY CONSTRUCTION

SEC. 402. The Secretary of Defense may establish or develop installations and facilities which he determines to be vital to the security of the United States, and in connection therewith to acquire, construct, convert, rehabilitate, or install permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment in the total amount of \$20,000,000. The Secretary of Defense, or his designee, shall notify the Committees on Armed Services of the Senate and House of Representatives, immediately upon reaching a final decision to implement, of the cost of construction of any public works undertaken under this section, including real estate actions pertaining thereto.

TITLE V—MILITARY FAMILY HOUSING  
AUTHORIZATION TO CONSTRUCT OR ACQUIRE  
HOUSING

SEC. 501. (a) The Secretary of Defense, or his designee, is authorized to construct or acquire sole interest in existing family housing units in the numbers and at the locations hereinafter named, but no family housing construction shall be commenced at any such locations in the United States until the Secretary shall have consulted with the Secretary of the Department of Housing and Urban Development as to the availability of suitable private housing at such locations. If agreement cannot be reached with respect to the availability of suitable private housing at any location, the Secretary of Defense shall notify the Committees on Armed Services of the Senate and the House of Representatives, in writing, of such difference of opinion, and no contract for construction at such location shall be entered into for a period of thirty days after such notification has been given. This authority shall include the authority to acquire land, and interests in land, by gift, purchase, exchange of Government-owned land, or otherwise.

(b) With respect to the family housing units authorized to be constructed by this section, the Secretary of Defense is authorized to acquire sole interest in privately owned or Department of Housing and Urban Development held family housing units in lieu of constructing all or a portion of the family housing authorized by this section, if he, or his designee, determines such action to be in the best interests of the United States; but any family housing units acquired under authority of this subsection shall not exceed the cost limitations specified in this section for the project nor the limitations on size specified in this section 2684 of title 10, United States Code. In no case may family housing units be acquired under this subsection through the exercise of eminent domain authority; and in no case may family housing units other than those authorized by this section be acquired in lieu of construction unless the acquisition of such units is hereafter specifically authorized by law.

## (c) Family housing units:

Fort Polk, Louisiana, one hundred units, \$3,545,000.

Naval Complex, Adak, Alaska, one hundred units, \$8,500,000.

Portsmouth Naval Complex, Kittery, Maine, two hundred units, \$8,086,000.

Naval Security Group Activity, Winter Harbor, Maine, thirty-two units, \$1,450,000.

Naval Complex, Bremerton, Washington, five hundred twenty units, \$24,602,000.

Defense Attache Office, Quito, Ecuador, two units, \$105,000.

Defense Attache Office, Wellington, New Zealand, two units, \$88,000.

(d) Any of the amounts specified in this section may, at the discretion of the Secretary of Defense, or his designee, be increased by 10 per centum, if he determines that such increase (1) is required for the sole purpose of meeting unusual variations in cost, and (2) could not have been reasonably anticipated at the time such estimate was submitted to the Congress. The amounts authorized include the costs of shades, screens, ranges, refrigerators, and all other installed equipment and fixtures, the cost of the family housing unit, design, supervision, inspection, overhead, land acquisition, site preparation, and installations of utilities.

## IMPROVEMENT OF EXISTING QUARTERS

SEC. 502. The Secretary of Defense, or his designee, is authorized to accomplish alterations, additions, expansions, or extensions, not otherwise authorized by law, to existing public quarters at a cost not to exceed—

(1) for the Department of the Army, \$20,-

891,000, including \$223,000 for energy conservation projects;

(2) for the Department of the Navy, \$10,353,000, including \$3,500,000 for energy conservation projects; and

(3) for the Department of the Air Force, \$15,022,000, including \$485,000 for energy conservation projects.

## EXCEPTIONS TO IMPROVEMENT LIMITATION

SEC. 503. The Secretary of Defense, or his designee, within the amounts specified in section 502, is authorized to accomplish repairs and improvements to existing public quarters in amounts in excess of the \$15,000 limitation prescribed in section 610(a) of Public Law 90-110, (81 Stat. 279, 305), as amended, as follows:

Fort Bliss, Texas, one unit, \$50,000.

Marine Corps Development and Education Command, Quantico, Virginia, thirty-three units, \$739,880.

## LEASED QUARTERS

SEC. 504. (a) The third sentence of section 515 of Public Law 84-161 (69 Stat. 324, 352) is amended to read as follows: "Expenditures for the rental of such housing facilities, including the cost of utilities and maintenance and operation, may not exceed: For the United States (other than Alaska, Hawaii, and Guam) and Puerto Rico, an average of \$280 per month for each military department, or the amount of \$450 per month for any one unit; and for Alaska, Hawaii, and Guam, an average of \$350 per month for each military department, or the amount of \$450 per month for any one unit."

(b) Section 507(b) of Public Law 93-166 (87 Stat. 661, 676), as amended, is amended by striking out "\$405" and "\$700" in the first sentence, and inserting in lieu thereof "\$435" and "\$760", respectively.

## MAXIMUM TERM OF FOREIGN LEASES

SEC. 505. Notwithstanding with other provision of law, the Secretary of Defense, or his designee, may acquire by lease, in any foreign country, family housing facilities and real property relating thereto that are needed for military purposes. A lease under this section may be for a period of not more than ten years.

## APPROPRIATIONS LIMITATIONS

SEC. 506. There is authorized to be appropriated for use by the Secretary of Defense, or his designee, for military family housing and homeowners assistance as authorized by law for the following purposes:

(1) for construction or acquisition of sole interest in family housing, including demolition, authorized improvements to public quarters, minor construction, relocation of family housing, rental guarantee payments, and planning an amount not to exceed \$65,200,000.

(2) for support of military family housing, including operating expenses, leasing, maintenance of real property, payments of principal and interest on mortgage debts incurred, payment to the Commodity Credit Corporation, and mortgage insurance premiums authorized under section 222 of the National Housing Act, as amended (12 U.S.C. 1715m), an amount not to exceed \$1,451,440,000.

(3) for homeowners assistance under section 1013 of Public Law 89-754 (80 Stat. 1255, 1290), as amended, including acquisition of properties, an amount not to exceed \$3,000,000.

## TITLE VI—GENERAL PROVISIONS

## WAIVER OF RESTRICTIONS

SEC. 801. The Secretary of each military department may proceed to establish or develop installations and facilities under this Act without regard to section 3648 of the Revised Statutes, as amended (31 U.S.C. 529), and sections 4774 and 9774 of title 10, United States Code. The authority to place

permanent or temporary improvements on land includes authority for surveys, administration, overhead, planning, and supervision incident to construction. That authority may be exercised before title to the land is approved under section 355 of the Revised Statutes, as amended (40 U.S.C. 255), and even though the land is held temporarily. The authority to acquire real estate or land includes authority to make surveys and to acquire land, and interests in land (including temporary use), by gift, purchase, exchange of Government-owned land, or otherwise.

#### APPROPRIATIONS LIMITATIONS

SEC. 602. There are authorized to be appropriated such sums as may be necessary for the purposes of this Act, but appropriations for public works projects authorized by titles I, II, III, IV, and V, shall not exceed—

- (1) For title I: Inside the United States, \$843,550,000; outside the United States, \$270,830,000; or a total of \$1,114,380,000.
- (2) For title II: Inside the United States, \$428,087,000; outside the United States, \$25,711,000; or a total of \$453,798,000.
- (3) For title III: Inside the United States, \$280,347,000; outside the United States, \$147,942,000; or a total of \$428,289,000.
- (4) For title IV: A total of \$57,559,000.
- (5) For title V: Military Family Housing, \$1,519,640,000.

#### COST VARIATIONS

SEC. 603. (a) Except as provided in subsections (b) and (c), any of the amounts specified in titles I, II, III, and IV of this Act may, at the discretion of the Secretary of the military department or Director of the defense agency concerned, be increased by 5 per centum when inside the United States (other than Hawaii and Alaska), and by 10 per centum when outside the United States or in Hawaii and Alaska, if he determines that such increase (1) is required for the sole purpose of meeting unusual variations in cost, and (2) could not have been reasonably anticipated at the time such estimate was submitted to the Congress.

(b) When the amount named for any construction or acquisition in title I, II, III, or IV of this Act involves only one project at any military installation and the Secretary of the military department or Director of the defense agency concerned determines that the amount authorized must be increased by more than the applicable percentage prescribed in subsection (a), he may proceed with such construction or acquisition if the amount of the increase does not exceed by more than 25 per centum the amount named for such project by the Congress.

(c) When the Secretary of Defense determines that any amount named in title I, II, III, or IV of this Act must be exceeded by more than the percentages permitted in subsections (a) and (b) to accomplish authorized construction or acquisition, the Secretary of the military department or Director of the defense agency concerned may proceed with such construction or acquisition after a written report of the facts relating to the increase of such amount, including a statement of the reasons for such increase, has been submitted to the Committees on Armed Services of the Senate and House of Representatives, and either (1) thirty days have elapsed from date of submission of such report, or (2) both committees have indicated approval of such construction or acquisition. Notwithstanding the provisions in prior military construction authorization Acts, the provisions of this subsection shall apply to such prior Acts.

(d) Notwithstanding the foregoing provisions of this section, the total cost of all construction and acquisition in each such title may not exceed the total amount authorized to be appropriated in that title.

(e) No individual project authorized under title I, II, III, or IV of this Act for any specifically listed military installation for which the current working estimate is \$400,000 or more may be placed under contract if—

(1) the approved scope of the project is reduced in excess of 25 per centum; or

(2) the current working estimate, based upon bids received, for the construction of such project exceeds by more than 25 per centum the amount authorized for such project by the Congress, until a written report of the facts relating to the reduced scope or increased cost of such project, including a statement of the reasons for such reduction in scope or increase in cost, has been submitted to the Committees on Armed Services of the Senate and House of Representatives, and either (A) thirty days have elapsed from date of submission of such report, or (B) both committees have indicated approval of such reduction in scope or increase in cost as the case may be.

(f) The Secretary of Defense shall submit an annual report to the Congress identifying each individual project which has been placed under contract in the preceding twelve-month period and with respect to which the then current working estimate of the Department of Defense based upon bids received for such project exceeded the amount authorized by the Congress for that project by more than 25 per centum. The Secretary shall also include in such report each individual project with respect to which the scope was reduced by more than 25 per centum in order to permit contract award within the available authorizations for such project. Such report shall include all pertinent cost information for each individual project, including the amount in dollars and percentage by which the current working estimate based on the contract price for the project exceeded the amount authorized for such project by the Congress.

#### CONSTRUCTION SUPERVISION

SEC. 604. Contracts for construction made by the United States for performance within the United States and its possessions under this Act shall be executed under the jurisdiction and supervision of the Corps of Engineers, Department of the Army; or the Naval Facilities Engineering Command, Department of the Navy; or such other department or Government agency as the Secretaries of the military departments recommend and the Secretary of Defense approves to assure the most efficient, expeditious, and cost-effective accomplishment of the construction herein authorized. The Secretaries of the military departments shall report annually to the President of the Senate and the Speaker of the House of Representatives a breakdown of the dollar value of construction contracts completed by each of the several construction agencies selected together with the design, construction supervision, and overhead fees charged by each of the several agents in the execution of the assigned construction. Further, such contracts (except architect and engineering contracts which, unless specifically authorized by the Congress, shall continue to be awarded in accordance with presently established procedures, customs, and practice) shall be awarded, insofar as practicable, on a competitive basis to the lowest responsible bidder, if the national security will not be impaired and the award is consistent with chapter 137 of title 10, United States Code. The Secretaries of the military departments shall report annually to the President of the Senate and the Speaker of the House of Representatives with respect to all contracts awarded on other than a competitive basis to the lowest responsible bidder. Such reports shall also show, in the case of the ten architect-engineering firms which, in terms of total dollars, were awarded the most business; the names of such firms; the total

number of separate contracts awarded each such firm; and the total amount paid or to be paid in the case of each such action under all such contracts awarded such firm.

#### REPEAL OF PRIOR AUTHORIZATIONS: EXCEPTIONS

SEC. 605. (a) As of October 1, 1978, all authorizations for military public works, including family housing, to be accomplished by the Secretary of a military department in connection with the establishment or development of installations and facilities, and all authorizations for appropriations therefor, that are contained in titles I, II, III, IV, and V of the Act of September 30, 1976, Public Law 94-431 (90 Stat. 1349), and all such authorizations contained in Acts approved before September 30, 1976, and not superseded or otherwise modified by later authorizing legislation are repealed except—

(1) authorizations for public works and for appropriations therefor that are set forth in those Acts in the titles that contain the general provisions; and

(2) authorizations for public works projects as to which appropriated funds have been obligated for construction contracts, land acquisition, or payments to the North Atlantic Treaty Organization, in whole or in part, before January 1, 1979, and authorizations for appropriations therefor.

(b) Notwithstanding the repeal provisions of section 605 of the Act of September 30, 1976, Public Law 94-431 (90 Stat. 1349, 1364), authorizations for the following items shall remain in effect until January 1, 1980:

(1) Aeromedical research building in the amount of \$9,139,000 at Fort Rucker, Alabama, authorized in title I, section 101 of the Act of October 7, 1975 (89 Stat. 546), as amended.

(2) Pier utilities construction in the amount of \$633,000 at Fort Eustis, Virginia, authorized in title I, section 101 of the Act of October 7, 1975 (89 Stat. 546), as amended.

(3) Academic Building construction in the amount of \$5,315,000 at Fort Huachuca, Arizona, authorized in title I, section 101 of the Act of October 7, 1975 (89 Stat. 547), as amended.

(4) Solar energy plant construction in the amount of \$690,000 at Fort Huachuca, Arizona, authorized in title I, section 101 of the Act of October 7, 1975 (89 Stat. 547), as amended.

(5) Relocate the weapons range from the Culebra Complex in the amount of \$12,000,000 for the Atlantic Fleet Weapons Range, Roosevelt Roads, Puerto Rico, authorized in title II, section 204 of the Act of November 29, 1973 (87 Stat. 688), as amended and extended in section 605(b) (II) of the Act of October 7, 1975 (89 Stat. 545), as amended.

(6) Solar observation facilities construction in the amount of \$2,011,000 at various locations worldwide, authorized in title III, section 301 of the Act of October 7, 1975 (89 Stat. 555), as amended.

#### UNIT COST LIMITATIONS

SEC. 606. None of the authority contained in titles I, II, III, and IV of this Act shall be deemed to authorize any building construction projects inside the United States in excess of a unit cost to be determined in proportion to the appropriate area construction cost index, based on the following unit cost limitations where the area construction index is 1.0:

(1) \$42 per square foot for permanent barracks; or

(2) \$45 per square foot for bachelor officer quarters;

unless the Secretary of Defense, or his designee, determines that because of special circumstances, application to such project of the limitations on unit costs contained in this section is impracticable. Notwithstanding the limitations contained in prior Military Construction Authorization Acts of unit costs, the limitations on such costs con-

tained in this section shall apply to all prior authorizations for such construction not heretofore repealed and for which construction contracts have not been awarded by the date of enactment of this Act.

#### INCREASES FOR SOLAR HEATING AND SOLAR COOLING EQUIPMENT

Sec. 607. The Secretary of Defense shall encourage the utilization of solar energy as a source of energy for projects authorized by this Act where utilization of solar energy would be practical and economically feasible. In addition to all other authorized variations of cost limitations or floor area limitations contained in this Act or prior Military Construction Authorization Acts, the Secretary of Defense, or his designee, may permit increases in the cost limitations or floor area limitations by such amounts as may be necessary to equip any projects with solar heating and/or solar cooling equipment.

#### MINOR CONSTRUCTION PROJECTS

Sec. 608. (a) Section 2674 of title 10, United States Code, is amended to read as follows:

"§ 2674. Minor construction projects

"(a) Under such regulations as the Secretary of Defense may prescribe, the Secretary of a military department or the director of a defense agency may acquire, construct, convert, extend, and install at military installations and facilities, permanent or temporary public works not otherwise authorized by law including the preparation of sites and the furnishing of appurtenances, utilities, and equipment, but excluding the construction of family quarters.

"(b) This section does not authorize a project costing more than \$1,000,000. A project costing more than \$500,000 must be approved in advance by the Secretary of Defense, and a project costing more than \$300,000 must be approved in advance by the Secretary of a military department or the director of the defense agency concerned.

"(c) The total costs for all projects initiated under authority of this section by any military department or by defense agencies in any fiscal year (except those projects funded from appropriations available for operations and maintenance as provided in subsection (e)) may not exceed the total amount authorized for minor construction projects in the annual military construction authorization Act for such military department or defense agencies, as the case may be, for such fiscal year.

"(d) Not more than \$50,000 may be spent under this section during a fiscal year to convert structures to family quarters at any one installation or facility.

"(e) Only funds appropriated to a military department or to the defense agencies for minor construction projects may be used by such department or by such agencies to accomplish minor construction projects, except that the Secretary of a military department or the director of a defense agency may spend, from appropriations available for maintenance and operations, amounts necessary for any project costing not more than \$100,000 that is authorized under this section.

"(f) The Secretary of each military department and the Secretary of Defense for the defense agencies shall report in detail annually to the Committees on Armed Services and Appropriations of the Senate and House of Representatives on the administration of this section. In addition, such committees shall be notified in writing of any such approved project costing more than \$300,000 at least thirty days before funds are obligated for such project.

"(g) For the purposes of this section, 'project' means a single undertaking which includes all construction work, land acquisition and items of installed equipment necessary to accomplish a specific purpose and produce (1) a complete and usable facility,

or (2) a complete and usable improvement to an existing facility.

"(h) The directors of the defense agencies will execute the construction of minor projects under authority of this section by or through a military department designated by the Secretary of Defense as provided in section 2682 of this title."

(b) The table of sections at the beginning of chapter 159 of title 10, United States Code, is amended by striking out

"1674. Establishment and development of military facilities and installations costing less than \$300,000."

and inserting in lieu thereof

"2674. Minor construction projects."

(c) The amendments made by this section shall become effective October 1, 1978.

#### USE OF PROPERTY SALE PROCEEDS FOR NATIONAL GUARD FACILITIES

Sec. 609. (a) The Secretary of Defense, or his designee, is directed to report to the General Services Administration for disposal at fair market value the forty-three acres, more or less, together with any improvements thereon, formerly known as the Air Force San Patricio Fuel Storage Site, San Juan, Puerto Rico. The net proceeds from the sale may be used to construct new facilities for the Puerto Rico National Guard in accordance with Department of Defense criteria.

(b) Section 804 of Public Law 91-142, December 5, 1969, is repealed.

#### USE OF PROCEEDS FROM TIMBER SALES

Sec. 610. Section 2665(d) of title 10, United States Code, is amended to read as follows:

"(d) Appropriations of the Department of Defense available for operation and maintenance may be reimbursed during the current fiscal year for all expenses of production of lumber or timber products pursuant to this section from amounts received as proceeds from the sale of any such property."

#### REVISION IN NUMBER OF NAVAL DISTRICTS

Sec. 611. (a) Chapter 516 of title 10, United States Code, is repealed.

(b) The table of chapters at the beginning of subtitle C and at the beginning of part I of subtitle C of title 10, United States Code, are each amended by striking out

"516. Naval District..... 5221".

#### BASE REALIGNMENTS

Sec. 612. (a) Notwithstanding any other provision of law, no action may be taken to effect or implement—

(1) the closure of any military installation;

(2) any realignment involving a reduction in the authorized level of civilian personnel at any military installation by more than one thousand civilian personnel or 50 per centum of the level of such personnel authorized at the time that the Secretary of Defense or the Secretary of the military department concerned notifies the Congress that such installation is a candidate for closure or significant realignment; or

(3) any construction, conversion, or rehabilitation at any other military installation (whether or not such installation is a military installation as defined in subsection (b)) which will or may be required as a result of the relocation of civilian personnel to such other installation by reason of any closure or realignment to which this section applies;

unless—

(A) the Secretary of Defense or the Secretary of the military department concerned publicly announces and notifies the Committees on Armed Services of the Senate and the House of Representatives in writing that such military installation is a candidate for closure or significant realignment;

(B) the Secretary of Defense or the Secretary of a military department concerned

complies with the requirements of the National Environmental Policy Act of 1969;

(C) the Secretary of Defense or the Secretary of the military department concerned submits to the Committees on Armed Services of the Senate and the House of Representatives his final decision to close or significantly realign such installation and a detailed justification for his decision, together with the estimated fiscal, local economic, budgetary, environmental, strategic, and operational consequences of the proposed closure or realignment; and

(D) a period of at least sixty days expires following the date on which the justification referred to in clause (C) has been submitted to such committees, during which period the Secretary of Defense or the Secretary of the military department concerned may take no irrevocable action to implement the decision.

(b) For purposes of this section—

(1) The term "military installation" means any camp, post, station, base, yard, or other facility under the authority of the Department of Defense—

(A) which is located within any of the several States, the District of Columbia, the Commonwealth of Puerto Rico, or Guam; and

(B) at which not less than one thousand civilian personnel are authorized to be employed.

Such term does not include any facility used primarily for civil works; rivers and harbors projects or flood control projects.

(2) The term "civilian personnel" means direct-hire permanent civilian employees of the Department of Defense.

(3) The term "realignment" includes any action which both reduces and relocates functions and civilian personnel positions but specifically excludes reductions in force resulting from workload adjustments, reduced personnel or funding levels, skill imbalances or other similar causes.

(c) This section shall not apply to any closure or realignment if the President certifies to Congress that such closure or realignment must be implemented for reasons of any military emergency or national security or if such closure or realignment was publicly announced prior to October 1, 1977.

(d) Section 613, Public Law 89-568 is repealed.

#### LAND CONVEYANCE, CALIFORNIA

Sec. 613. Notwithstanding any other provisions of law, the Secretary of the Navy or his designee, is authorized to convey to the city of Los Angeles, California, subject to such terms and conditions as the Secretary shall deem to be in the public interest, all right, title, and interest of the United States in and to a parcel of land consisting of approximately thirty-five acres with improvements thereon, located in the city of Los Angeles north of and separated by Seaside Avenue from Reeves Field, in exchange for the conveyance by the city of Los Angeles to the United States of the unencumbered fee title to approximately thirty-five acres of land adjacent to the western boundary of the Naval Support Activity, Long Beach, California, to be improved in a manner acceptable to the Secretary, and subject to such other conditions as the Secretary shall deem to be in the public interest. The exact acreages and legal descriptions of both properties are to be determined by accurate surveys as mutually agreed upon by the Secretary and the city of Los Angeles.

#### LAND CONVEYANCE, COLORADO

Sec. 614. Notwithstanding any other provision of law, the Secretary of the Air Force is authorized to acquire, by exchange with the city of Colorado Springs, Colorado, all rights, title and interest of such city in approximately one hundred sixty seven acres of land lying adjacent to the northerly

boundary of Peterson Air Force Base, El Paso County, Colorado. As consideration for this exchange, the Secretary of the Air Force is authorized to convey to the city land and improvements on Ent Air Force Base, in the city of Colorado Springs, equal in monetary value to the land to be acquired. The exact acreages and legal descriptions of both such properties are to be determined by accurate surveys as mutually agreed upon by the Secretary and the city of Colorado Springs.

#### AUTHORITY FOR LONG TERM CONTRACT REFUSE DERIVED FUEL

SEC. 615. Notwithstanding any other provisions of law, the Secretary of a military department, or his designee, is authorized to enter into long-term contracts (not to exceed ten years) for the purchase of fuels derived from waste materials (commonly known as refuse-derived fuel (RDF)). Such contracts may also provide for the collection and disposal of solid waste from Department of Defense installations, and may result in delivery to a Department of Defense installation of RDF which, by weight, exceeds that installation's generation of solid waste. Funds for such contracts shall be provided from annual operations and maintenance appropriations.

#### USE OF COMMISSARY SURCHARGE FUNDS FOR THE CONSTRUCTION OF COMMISSARIES OVERSEAS

SEC. 616. Section 2685(b) of title 10, United States Code, is amended by striking out "within the United States".

#### GAS PRICING, BARROW, ALASKA

SEC. 617. The Secretary of the Navy is authorized and directed, with respect to any natural gas supplied by the Department of the Navy to villages and facilities at or near Point Barrow, Alaska, between October 1, 1974, and April 6, 1976, inclusive, to charge such villages and facilities for such gas at a rate equal to the rate charged for natural gas supplied to such villages and facilities by the Department of the Navy (pursuant to section 104(e) of the Naval Petroleum Reserve Production Act of 1976 (90 Stat. 305)) subsequent to April 6, 1976.

#### LAND CONVEYANCE, EL PASO COUNTY, TEXAS

SEC. 618. Notwithstanding any other provision of law, the Secretary of the Army is authorized to acquire by exchange, under such terms and conditions as he shall deem to be in the public interest, all rights, title and interests in lands, within a sixty thousand one hundred and sixty acre area contiguous to the eastern boundary of maneuver area numbered 1 of the Fort Bliss Military Reservation, El Paso, Texas. As consideration for this exchange, the Secretary of the Army is authorized to convey such land under the jurisdiction of the Department of the Army in El Paso County, Texas, equal in monetary value to the land to be acquired. The exact acreages and legal descriptions of such properties are to be determined by accurate surveys as shall be authorized by the Secretary of the Army.

#### LAND CONVEYANCE, SAN FRANCISCO, CALIFORNIA

SEC. 619. (a) The first section of the Act entitled "An Act authorizing the Secretary of the Army to convey certain lands to the city and county of San Francisco", approved October 13, 1949 (63 Stat. 844), is amended by adding "or jointly for public park and recreational uses and other public purposes".

(b) The Secretary of the Army shall issue such written instructions, deeds, or other instruments as may be necessary to bring the conveyance made to the city and county of San Francisco, California, under authority of the Act of October 13, 1949 (63 Stat. 844), into conformity with this section.

#### SHORT TITLE

SEC. 620. Titles I, II, III, IV, V, and VI of this Act may be cited as the "Military Construction Authorization Act, 1978".

### TITLE VII—GUARD AND RESERVE FORCES FACILITIES

#### AUTHORIZATION FOR FACILITIES

SEC. 701. Subject to chapter 133 to title 10, United States Code, the Secretary of Defense may establish or develop additional facilities for the Guard and Reserve Forces, including the acquisition of land therefor, but the cost of such facilities shall not exceed—

- (1) For the Department of the Army:
  - (A) Army National Guard of the United States, \$44,377,000.
  - (B) Army Reserve, \$41,390,000.
- (2) For the Department of the Navy; Naval and Marine Corps Reserves, \$19,800,000.
- (3) For the Department of the Air Force:
  - (A) Air National Guard of the United States, \$37,300,000.
  - (B) Air Force Reserve, \$10,100,000.

#### WAIVER OF CERTAIN RESTRICTIONS

SEC. 702. The Secretary of Defense may establish or develop installations and facilities under this title without regard to section 3648 of the Revised Statutes, as amended (31 U.S.C. 529), and sections 4774 and 9774 of title 10, United States Code. The authority to place permanent or temporary improvements on lands includes authority for surveys, administration, overhead, planning, and supervision incident to construction. That authority may be exercised before title to the land is approved under section 355 of the Revised Statutes, as amended (40 U.S.C. 255), and even though the land is held temporarily. The authority to acquire real estate or land includes authority to make surveys and to acquire land, and interests in land (including temporary use), by gift, purchase, exchange, of Government-owned land, or otherwise.

#### SHORT TITLE

SEC. 703. This title may be cited as the "Guard and Reserve Forces Facilities Authorization Act, 1978".

#### MOTION OFFERED BY MR. NEDZI

Mr. NEDZI. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. NEDZI moves to strike out all after the enacting clause of the Senate bill S. 1474 and to insert in lieu thereof the provisions of H.R. 6990, as passed by the House.

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

A similar House bill (H.R. 6990) was laid on the table.

#### GENERAL LEAVE

Mr. NEDZI. Mr. Speaker, I ask unanimous consent that I may have 5 legislative days in which to extend my remarks and include extraneous matter on the bill (H.R. 6990), and that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous material on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

#### MAKING THE FEDERAL RESERVE SYSTEM MORE ACCOUNTABLE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. REUSS) is recognized for 30 minutes.

Mr. REUSS. Mr. Speaker, I am today introducing legislation to make the Federal Reserve System more accountable to the public.

The bill would:

First. Establish a permanent Congressional-Federal Reserve dialog on monetary policy. Chairman Arthur Burns has appeared quarterly before the House and Senate Banking Committees to discuss the Fed's goals for monetary policy pursuant to House Concurrent Resolution 133, of March 1975. This resolution expired last December. This bill makes permanent the requirement that representatives of the Federal Reserve testify before the congressional committees quarterly on Fed's proposed monetary policy for the following 12-month period. It also for the first time requires monetary policy to serve the goals of maximum employment, production, and price stability. The Fed would be required to testify concerning its proposed monetary aggregates, anticipated monetary velocity, estimated levels of interest rates—particularly on business loans and on long-term mortgages, and the composition of its portfolio. These guidelines would broaden the focus from total concentration on the monetary aggregates.

Second. Broaden the economic interest of Federal Reserve Bank directors. Under present law, the nine directors of each of the 12 Federal Reserve banks have unduly narrow backgrounds. Commercial banks elect six of the nine—three class A directors, always bankers, as their direct "representatives," and three class B directors from "commerce, agriculture, or some other industrial pursuit." The three class C directors are chosen by the Federal Reserve Board of Governors, with nothing said as to who they may be.

As the Banking Committee staff study—"Federal Reserve Directors: A Study of Corporate and Banking Influence," August 1976—disclosed, this has produced a representation grossly banker-oriented at the expense of other groups. Furthermore, it has resulted in the virtual exclusion of women, blacks, and representatives of labor unions, consumer interest organizations, and non-managerial and nonproducer interest groups.

The bill would remedy the situation with respect to discrimination by requiring that all directors—A, B, and C—be chosen "without discrimination on the basis of race, creed, color, sex, or national origin." As to economic representation, the three class A directors would be left as they are now—bankers. Class B directors would be specifically designated "public" and broadened from the present "commerce, agriculture, or some other industrial pursuit" to "with due but not exclusive consideration to the interests of agriculture, commerce, industry, services, labor, and consumers."

This not only gets us out of the belching smokestack of the existing 1913 "industrial" language—services are today moving ahead faster than manufacturing—but introduces labor and consumers as groups of our citizenry whose economic interests entitle them to consideration for a seat at the table.

Third. Require Senate confirmation of the Chairman of the Board of Governors. Under existing law, members of the Federal Reserve Board of Governors, who serve 14-year terms, are subject to Senate confirmation at the time of their appointment; one of the Board members is designated by the President to serve as Chairman for a 4-year term, but without Senate confirmation. Thus, the President can designate as Chairman someone who was confirmed by the Senate some 13 years previously, yet the Senate be powerless to confirm the appointee to what was recently called "the Nation's No. 2 position." The bill would make the President's choice of Chairman subject to the advice and consent of the Senate.

Fourth. Regulate lobbying of Congress on Government time. The minutes of the Federal Reserve Banks Directors' meetings disclose a consistent pattern of extensive lobbying by Federal Reserve officials on legislation before the Congress. Much of this lobbying is done on Government time, and using funds that, in fact, must be paid over to the Treasury by the Fed and thus belong essentially to the taxpayers. In some cases, the Fed has even prevailed upon bankers—who are deeply beholden to the Fed because of the Fed's ability to give or withhold a discount window loan, or to give or withhold such privileges as approval for a merger, holding company acquisition or an Edge Act office—to conduct lobbying with Government officials on the Fed's behalf. Although attempts by regulatory agencies to orchestrate lobbying campaigns against bills affecting their agencies are illegal when money appropriated by the Congress is used (18 U.S.C. 1913), the Fed is technically exempt from this statute because its funds are not appropriated by Congress.

The bill closes this loophole and places the Federal Reserve System on a par with other Government agencies with respect to lobbying. It prohibits the use of income of the Federal Reserve System for lobbying except in response to requests from a Member of Congress, or through the proper official channels concerning legislation which the executive branch deems "necessary for the efficient conduct of the public business."

Fifth. Prohibit Federal Reserve officers, employees, and directors from acting where they have a conflict of interest. Under existing law, employees and officers of the U.S. Government may not participate in any matter before the Government in which they or a member of their family or business have an interest, unless there is first a full disclosure of this interest and an official written determination by an official that this interest is not substantial. The Fed is not covered. My bill extends this prohibition to Federal Reserve Bank officers, employees, and directors.

Sixth. Require an audit of the Federal Reserve System by the GAO. This bill requires the Comptroller General to conduct an audit of all operations of the Federal Reserve System, except for transactions involving foreign central banks, monetary policy, and commercial bank examinations—activities which the Fed has asked be exempted. The audit

would cover all other operations of the Federal Reserve System, including check clearing operations, coin and currency transfers, physical plant management, and other general business operations of the Fed.

A copy of the Federal Reserve Reform Act of 1977, follows:

#### H.R. —

A bill to promote the accountability of the Federal Reserve System

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

#### § 1. Congressional-Federal Reserve Dialogue on Monetary Policy

Insert a new section 2A immediately after section 2 of the Federal Reserve Act to read as follows:

#### "SECTION 2A. GENERAL POLICY: CONGRESSIONAL REVIEW

"(a) The formulation and implementation of monetary policy under this Act shall be governed by the national policy to promote maximum employment, production, and price stability.

"(b) At quarterly hearings conducted alternately by the Committee on Banking, Housing and Urban Affairs of the Senate and the Committee on Banking, Finance and Urban Affairs of the House, representatives of the Federal Reserve System shall testify concerning the Board of Governors' and the Federal Open Market Committee's proposed monetary policy for the next twelve months, including proposed monetary aggregates, anticipated monetary velocity, estimated levels of interest rates (particularly on business loans and on long-term housing mortgages), and the proposed composition of the Federal Reserve's portfolio."

#### § 2. Boards of Directors of Federal Reserve Banks

The following paragraphs of section 4 of the Federal Reserve Act are amended:

(a) the tenth paragraph by inserting after the comma the following: "without discrimination on the basis of race, creed, color, sex, or national origin,"

(b) the eleventh paragraph by striking all after "members," and substituting "who shall represent the public and shall be elected without discrimination on the basis of race, creed, color, sex, or national origin, and with due but not exclusive consideration to the interests of agriculture, commerce, industry, services, labor and consumers."

(c) the twelfth paragraph by inserting immediately after the first sentence thereof the following sentence: "They shall be selected to represent the public, without discrimination on the basis of race, creed, color, sex, or national origin, and with due but not exclusive consideration to the interests of agriculture, commerce, industry, services, labor and consumers."

#### § 3. Senate Confirmation of Chairman of Board of Governors

The second paragraph of section 10 of the Federal Reserve Act is amended by striking out the third sentence and inserting in lieu thereof the following: "Of the persons thus appointed, the President shall appoint one, by and with the advice and consent of the Senate, to serve as Chairman of the Board for a term of four years and one shall be designated by the President as Vice Chairman of the Board for a term of four years."

#### § 4. Lobbying Congress on Government Time

The first undesignated subsection of section 1913 of title 18, United States Code, is amended by inserting "or income of the Federal Reserve System" immediately before "shall, in the absence of express authorization by Congress".

#### § 5. Conflicts of Interest

Subsection 208(a) of title 18, United States Code is amended by adding "a Federal Re-

serve Bank Officer, employee or director," immediately before "or of the District of Columbia".

#### § 6. General Accounting Office Audit of the Federal Reserve System

(a) The Comptroller General of the United States shall, under such rules and regulations as he shall prescribe, audit the Federal Reserve Board, the Federal Open Market Committee, and all Federal Reserve Banks and their branches and facilities. Such audit shall not include monetary policy; transactions involving foreign central banks; and commercial bank examinations.

(b) The Comptroller General shall, within six months after the end of each fiscal year, or as soon thereafter as may be practicable, make a report to the Congress on the results of the audit work performed for such year, and he shall make any special or preliminary reports he deems desirable for the information of the Congress. A copy of each report made under this subsection shall be sent to the President of the United States, the Federal Reserve Board, and the Federal Reserve banks. In addition to other matters, the report shall include such comments and recommendations as the Comptroller General may deem advisable, including recommendations for attaining a more economical and efficient administration of the entities audited, and the report shall specifically show any program, financial transaction or undertaking observed in the course of the audit which in the opinion of the Comptroller General has been carried on without authority of law.

#### § 7. References to Federal Reserve Act Paragraphs

References in this Act to paragraphs of the Federal Reserve Act refer to the paragraphs as designated in the compilation of the Federal Reserve Act as amended through 1974, compiled under the direction of the Board of Governors of the Federal Reserve System in its Legal Division.

#### § 8. Short Title

The short title of this Act shall be the "Federal Reserve Reform Act of 1977."

#### SECTION 504 OF VOCATIONAL REHABILITATION ACT MAY PROVE TO BE COSTLY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Vermont (Mr. JEFFORDS) is recognized for 10 minutes.

Mr. JEFFORDS. Mr. Speaker, in 1973 the Congress passed the Vocational Rehabilitation Act of 1973 which included section 504 that said that no one may discriminate against the handicapped. Specifically 504 says:

SEC. 504. No otherwise qualified handicapped individual in the United States, as defined in section 7(6) shall, solely by reason of his handicap be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal assistance.

Secretary Califano, upon signing the regulations for section 504, said:

The 504 Regulation today becomes the law of the land, and it is critically important that we obey that law and make these new rules a reality for handicapped Americans. In implementing the regulation, I pledge that HEW will move promptly and firmly....

President Carter, speaking at the White House Conference for the Handicapped last week said:

As you know, section 504... has provided a framework for the regulations that have not been adopted, and Joe Califano assures

their experiences, and will be for perhaps the rest of their lives. When they grow up, they may be inclined to sexually abuse children themselves.

I urge my colleagues to support these hearings and to aid in the fight to end child abuse.

#### HUMAN RIGHTS—HOW DEEP IS OUR COMMITMENT?

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. MARKS) is recognized for 10 minutes.

Mr. MARKS. Mr. Speaker, on June 5, I had the honor of delivering the commencement address at the Shenango Valley Campus of Pennsylvania State University.

The topic of my address was "Human Rights—How Deep Is Our Commitment?" In view of the current discussion and debate concerning the human rights issue, I would like to share with my colleagues the remarks I made on that occasion:

Thank you, Dr. Lammie. Ladies and gentlemen of the graduating class, Father Karg, members of the administration, members of the faculty, parents and guests.

When I first accepted the invitation to present the commencement address I realized I was faced with a very difficult challenge. This challenge was not in preparing and presenting an address, but rather in trying to prepare and present an address that would be both meaningful and, hopefully, remembered.

Looking back on my own graduation I realize that I not only do not know who spoke, but I also have no recollection whatsoever of the message.

College graduation is a major milestone in anyone's life. In like manner, what history may show to be a major milestone in our quest for lasting world peace is the current impetus being given to human rights by the Carter administration.

Its strong rhetoric on behalf of the international observance of human rights has stirred controversy concerning the extent of our commitment to advancement of human rights as a centerpiece of our foreign policy.

In his inaugural address, President Carter stated: "Because we are free, we can never be indifferent to the fate of freedom elsewhere." Later, at a meeting of the Organization of American States, he said: "You will find this country . . . eager to stand beside those nations which respect human rights and which promote democratic ideals."

To back these words, the President has taken both symbolic action, such as sending a letter to Soviet dissident Andrei Sakharov; and substantive action, such as ending military aid to Uruguay and cutting it to Ethiopia on human rights grounds. In so doing, he has sought to maintain a consistent position on human rights, attacking violations by Communist and non-Communist nations alike.

"Human rights" if, of course, a shorthand for several concepts. Secretary of State Cyrus Vance, in a law day address at the University of Georgia Law School, set forth a three-tiered definition of what the administration means by the term "human rights." I will read his rather lengthy definition, since it is important to understand the concepts involved:

"First, there is the right to be free from governmental violation of the integrity of the person. Such violations include torture; cruel, inhuman or degrading treatment or punishment; and arbitrary arrest or imprisonment. And they include denial of fair

public trial, and invasion of the home. Second, there is the right to the fulfillment of such vital needs as food, shelter, health care, and education. We recognize that the fulfillment of this right will depend, in part, upon the stage of a nation's economic development. But we also know that this right can be violated by a government's action or inaction—for example, through corrupt official processes which divert resources to an elite at the expense of the needy, or through indifference to the plight of the poor. Third, there is the right to enjoy civil and political liberties—freedom of thought, of religion, of assembly; freedom of speech; freedom of the press; freedom of movement both within and outside one's own country; freedom to take part in government."

These, then, are the basic precepts of our Nation's human rights policy.

Despite the noble, altruistic tenor of that policy, critics have attacked it for a number of reasons. I believe these criticisms can be reduced to four principal objections.

First, other countries have different forms of government and different cultures. It does not make sense to impose our values concerning human rights on those nations.

Second, we should mind our own business and not interfere in the internal affairs of other sovereign nations. We have enough problems here at home.

Third, our attention to human rights violations in the Soviet Union hurts détente and damages the prospects of peace and the opportunity to reduce international tensions.

And fourth, our insistence on human rights embarrasses allies who may not be able to meet our standards in this regard. In attacking what we consider their violations of human rights, we actually are undermining our friends and playing into the hands of leftist and Communist elements at work within those countries.

Let us examine these four objections to determine their validity.

The first objection I cited holds that it is both arrogant and pointless for us to impose our human rights standards on the rest of the world, since other nations have different systems of government and different cultural and cognitive values.

I would submit that the basic human rights we are talking about are universal in nature and properly the concern of all the peoples on earth. Let me review the salient historical foundations of this premise.

The recognition of individual human rights within the framework of international relations became a matter of scholarly concern during the renaissance with the rise of city states and increased international commerce. The renaissance spirit fostered the growth of the view of the intellectual dignity of man as an individual.

An emphasis on individual rights was at the heart of the writings of Hugo Grotius, one of the fathers of international law. According to Grotius, laws are created by common agreement of the people so that the obligation to respect them is founded upon the consent of the contracting individuals. In going further to examine the concept of citizenship, Grotius states, "By the name of citizens who should understand that we are speaking not of the citizens of this or that region but of the citizens of that one general community which consists of the entire human mankind."

His view of individual liberty was further developed in the "age of enlightenment." Rousseau, in his contract theory of government, emphasizes that sovereignty rests with the people and only can be exercised by the people. Moreover, Rousseau teaches that man has certain inherent natural rights. As we know, this theory soon found legal embodiment.

The first form of a declaration of rights of man in the history of the world was authored by George Mason and adopted in

Virginia on June 12, 1776. It proclaimed that men by nature are free and have a right to the enjoyment of life and liberty and to own property and to pursue happiness. Shortly thereafter, these principles were included in the Declaration of Independence of the United States and the French declaration of the rights of man and of citizen of 1789.

It was in the Twentieth Century that the individual became more fully recognized as an object of the protection of international law. In 1921, Professor De La Pradelle drafted for the Institute of International Law a declaration of the rights and duties of nations in which he asserted not only that man is a subject of international law, but that the protection of his rights is the essential social purpose of international law.

In the wake of the ineffectiveness of the League of Nations and the atrocities committed by the totalitarian regimes during World War II, the world community began to realize that the protection of individual freedoms could no longer be left to the sole discretion of individual States. Gaining widespread acceptance was the concept that the rights of the individual are derived not from his status as a citizen of a certain State but from his membership in the human family. Because of that membership, he has, under international law, rights and duties as well as responsibilities toward his fellow man beyond the borders of his own land.

The culmination of international respect for human rights came with the founding of the United Nations. Indeed, the U.N. charter revolves around a central idea—that peace cannot be established in a durable fashion so long as oppression, injustice, and economic distress prevail in the world. The recognition and protection of human rights runs throughout the entire charter as one of the principal objectives of the United Nations.

The U.N. Universal Declaration on Human Rights, approved in 1948, stands today as the greatest statement of the collective conscience of the world concerning the recognition of the inherent dignity and of the equal and inalienable rights of all members of the human family. In thirty short articles, it sets forth civil and political freedoms, as well as economic, social, and cultural rights. The importance of the universal declaration was reiterated in April, 1968, in the proclamation of Teheran of the U.N. conference on human rights which declared:

"The universal declaration of human rights states a common understanding of the peoples of the world concerning the inalienable and inviolable rights of all members of the human family and constitutes an obligation for the members of the international community."

Therefore, I conclude that despite the global variety of cultural values and systems of government, all nations must observe basic standards of human rights, such as those enumerated in the universal declaration.

Cliches such as "life is cheap over there" or "it's a backward country" do not excuse violations of the rights all men and women possess. As responsible members of the international community, we have an obligation to speak out when human rights are placed in jeopardy.

The second objection I cited to an aggressive human rights policy is that we should not interfere in the internal affairs of other nations. Concern about human rights and various methods of "intervention" into the affairs of other states to preserve those rights have been with us, I would suggest, as long as governments have existed.

It is interesting to note that cases in intervention have been common ever since Gelon, Prince of Syracuse, having defeated Carthage in the year 480 B.C., made it a condition of peace that the Carthaginians abandon their time-honored custom of sacrificing their children to Saturn.

me and he assures you that these regulations are going to be enforced.

Secretary Califano also said that he "intends to vigorously implement and enforce that mandate."

HEW projects that it will cost \$2.4 billion per year to implement section 504. My projections are that it will cost many billions more than that because the regulations require extensive education provisions and services, the removal of architectural barriers, broad supplemental services, and many other costly items.

If we accept HEW's projections that the cost of implementing 504 is "only" \$2.4 billion to carry out their proscribed regulations, and since 504 applies to every department and agency of the Federal Government, it is safe to assume that similar costs will be necessary for the others as well.

I normally do not advocate big spending by the Federal Government. In this case, however, if the Federal Government really means what it says about ending discrimination against the handicapped and if money is needed to help bring about equality for this segment of our population, then we cannot expect the total obligation to be borne by local and State governments as well as public and private organizations who receive Federal funds. If our words are sincere, then I feel it is necessary for the Federal Government to put its money where its mouth—and regulations—are and provide a major share of the costs of implementing this new Federal mandate.

Because I believe the regulations carry a responsibility as well as an obligation, I am introducing a bill which amends section 504. The bill is designed to make the Federal Government a full partner in eliminating discrimination of the handicapped. The bill is short and to the point. It adds no new words or requirements to section 504, only a one-time special authorization for dollars to implement the law and the regulations.

I can envision that the money will be used in a variety of ways. Because the greatest single expense in the regulations is for education, I am earmarking 33 1/3 percent for educational purposes. The remainder of the funding could be used for the removal of architectural barriers, the creation of jobs, interpreter services, and other aids, to mention just a few areas.

I must emphasize that money alone will not end discrimination for the disabled and handicapped of this Nation because many of the problems they face are based upon centuries of false stereotypes and distorted images, and not on their abilities or lack thereof.

If Congress does not take this action, I am concerned that as HEW pushes to enforce the regulations that there may be considerable backlash throughout the country and I fear that the handicapped will be hurt, not helped. Section 504 is one sentence long and just opened the door a crack. If we do not do something to guarantee it will be opened all the way, there is a chance it will be slammed shut again. Some money is

necessary and my bill seeks to address that point. In the final analysis, however, we cannot legislate the attitudes, actions, and behavior for the hearts of the American people.

The amendment reads as follows:

Section 504 of the Vocational Rehabilitation Act of 1973 is amended by adding at the end thereof:

There is hereby authorized \$6 billion to carry out the purposes of this section. Of the total appropriated, not less than thirty-three and one-third percentum must be used for educational purposes.

Mr. Speaker, I am inserting at this point letters that I have sent to the President and Secretary Califano requesting their support for my amendment. I hope that all Members will join with me in supporting this action.

The letters follow:

HOUSE OF REPRESENTATIVES,  
Washington, D.C., June 6, 1977.

THE PRESIDENT,  
The White House,  
Washington, D.C.

DEAR MR. PRESIDENT: Since taking office you have been speaking out for human rights and I commend you for that stand. During your speech at the White House Conference for the Handicapped last month, you spoke out strongly about the rights of the handicapped and indicated that Section 504 of the Vocational Rehabilitation Act was the vehicle through which those rights will be implemented.

While I applaud your stand, I recognize that through Section 504 the Federal government places new requirements on State and local governments as well as public and private institutions and agencies. I don't think that it is appropriate for the Federal government to pass laws which State and local entities must carry out using their own dollars, while the Federal government assumes no financial obligation at all. Therefore, today I am introducing a bill which amends Section 504 adding a one-time special authorization of \$6 billion to implement the law and the regulations. HEW predicts that it will cost \$2.4 billion to implement Section 504. My predictions are that it will cost many billions more. It is unimportant as to who is right, the fact remains that it will be expensive to implement the new regulations. Furthermore, if we accept HEW's projection of \$2.4 billion, and recognize that Section 504 applies to every Department and agency of the Federal government, there is no question that many, many billions of dollars will be required to give the handicapped of America all that is required by the regulations.

I am fully supportive of your efforts to develop a balanced budget, but in achieving that balance I do not think that we can simply shift the financial burden of Federal mandates to State and local governments. Therefore, I think the Federal government has an obligation to put its money where its mouth (and regulations) are and provide a major share of the cost to implement this new Federal commitment to the handicapped of America.

I would hope that you will put the full force of your good office behind this amendment and support it with the same vigor that you advocate for human rights. Section 504 just opened the door a crack and if we do not provide money to help implement it, I fear that it may be slammed shut again.

I look forward to hearing from you as soon as possible on this most vital matter.

Sincerely,

JAMES M. JEFFORDS,  
Member of Congress.

HOUSE OF REPRESENTATIVES,  
Washington, D.C., June 6, 1977.

HON. JOSEPH A. CALIFANO, JR.,  
Secretary of Health, Education, and Welfare,  
Washington, D.C.

DEAR MR. SECRETARY: Attached is a letter that I sent to the President this morning which is self-explanatory. Because you have said on numerous occasions that you intend to vigorously implement and enforce the mandate and regulations of Section 504, I would hope that you would put the full weight of your efforts behind this amendment and vigorously support it.

I would greatly appreciate hearing from you at your earliest convenience as to the Department's position on this amendment. The amendment reads as follows:

"Section 504 of the Vocational Rehabilitation Act of 1973 is amended to read as follows:

"There is hereby authorized \$6 billion to carry out the purposes of this section. Of the total appropriated, not less than thirty-three and one-third percentum must be used for educational purposes."

Thank you for your assistance in this matter.

Sincerely,

JAMES M. JEFFORDS,  
Member of Congress.

#### CHILD PORNOGRAPHY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. RAILSBACK) is recognized for 5 minutes.

Mr. RAILSBACK. Mr. Speaker, Members of the House, this week the Subcommittee on Crime along with the Subcommittee on Select Education will continue hearings on the issue of child pornography. During the 2 days of hearings held in May by the Subcommittee on Crime, I was shocked at what I heard and saw. This is an issue that involves thousands of children and is spread throughout the entire Nation.

Investigator Lloyd Martin of the Los Angeles Police Department told us that conservatively 30,000 children were sexually exploited in his jurisdiction each year. This number is perhaps as high as 120,000 in New York City and also involves thousands of children in my own State, Illinois.

Many so-called adult book stores have been selling volumes describing how to pick up young children from school playgrounds and how to use children for sexual gratification. Our subcommittee was told of films and magazines showing children as young as 3 years of age involved in various sexual acts and perversions with adults and with other children. According to the reporters many adults enjoy and have a sense of pride in showing pictures of children with whom they have committed these acts.

Many of these children are runaways, emotionally troubled children who have left broken homes, and where many have been abused. These children trade themselves for money or for what they see as affection. Even more shocking are the cases when children are sold into this degrading life by their parents.

The question is not simply one of obscenity, or to what limits will allow pornography to go. Rather, child pornography is child abuse. Expert witnesses told the subcommittee that the children involved are emotionally damaged by

Renaissance writer Hugo Grotius, whom I mentioned earlier, went so far as to assert that state laws contrary to human rights should be nullified by international law, with other states free to intervene "in a just war" to protect an individual from a government's violation of his rights.

At the end of the eighteenth century, Catherine II of Russia, along with the Prussian and British Governments, effectively exercised influence on the king of Poland who was repressing his orthodox and Protestant subjects.

And in the early Nineteenth Century, the multi-national Congress of Vienna heard petitions and made recommendations concerning the protection of minorities and national and racial discrimination within the German States and Switzerland. Later in that century, the Congress of Berlin received 130 petitions from individuals and private organizations requesting international protection of the rights of such minority groups as the Jews in the Balkans and the Armenians in Turkey.

In this century, we have witnessed the creation of international machinery to protect human rights. This includes the U.N. Commission on Human Rights, the Subcommittee on Prevention of Discrimination and Protection of Minorities, the Inter-American Commission on Human Rights of the Organization of American States, and the Council of Europe's Commission and Court of Human Rights. The European Commission and Court of Human Rights represent the most advanced efforts to provide for collective enforcement of the ideals expressed in the universal declaration of human rights. Remarkably, eleven European countries have agreed to allow individuals to submit human rights claims against them to a supra-national body. This is a strong testament to the view that human rights violations anywhere are a matter of concern to free, peace-loving nations.

It is clear that the lessons of the past show that we cannot afford to turn our backs on human rights violations on the grounds that they are not our business. As a participant in a world community increasingly conscious of the rights of the individual, this nation cannot excuse itself from supporting the ideals upon which it was founded and upon which a peaceful world order can only be established.

The third objection I noted is that encouragement of the cause of human rights threatens détente with the Soviet Union. This is sometimes referred to as the pragmatic or "realpolitik" objection. I have two comments to make in this regard.

First, I believe the efforts for détente and for the relaxation of international tensions will continue regardless of the human rights emphasis. This is in the interests of both countries. Threatened with the specter of nuclear holocaust, we will continue to seek arms reductions and improved relations.

Second, as the champion of the "free world," we have a moral obligation to speak out on human rights. Are not freedom, liberty, and human rights the issues at stake between our system and that of the communists? To withdraw from this cause for fear of offending the Russians is to betray the principles which we and free men everywhere hold dear.

Though our support and attention outside the Iron Curtain, we make it possible for those within to carry on the struggle for their rights. Indeed, unlike the Soviets, we are not seeking to assist dissidents in overthrowing their government. Rather, we are pressing the Russians to grant to their citizens the very rights provided on paper in their own constitution.

Regardless of whatever benefits it derives from détente, the Soviet Union has not abandoned its efforts to export communism to the rest of the world. So too, let us not

abandon our commitment to human rights everywhere, including within the Soviet Union.

The fourth objection I wish to address concerns the matter of our allies who fail to observe human rights. Although the abuses which take place within the communist world have long been a matter of concern, attention to such activities within friendly countries has developed recently. This is an indication of the expanding concern in this area which we are seeing in this amazing era of international recognition of individual rights.

Reports continue to come in concerning rights violations in non-communist countries. Only last week, members of Congress received a dossier from Amnesty International on political prisoners held in secret detention camps in Chile. Amnesty International has made public this information in order to help convince the Chilean government to account for the more than 1,500 persons detained who since have "disappeared." We continue to hear about denials of freedom in countries like Argentina, Iran, South Korea, and the Philippines.

Admittedly, it is not easy to have to criticize countries which are anti-Communist and which we number generally as friends. Yet to be credible, our stand on rights violations must be both universal and consistent.

In addition, our commitment to human rights is likely to carry considerable weight in these nations, since they are so dependent upon us for military and economic assistance. Indeed, the International Security Assistance Act of 1976 states that no security aid should be granted to governments that engage in a "consistent pattern of gross violations" of human rights.

Regardless of the problems we may incur under this policy, we cannot remain silent in the face of injustice. Harvard Professor Walter Laqueur has expressed this most forcefully:

"Excuses for inaction may be made by small countries whose capacity to influence the course of world politics is by necessity limited. But a great nation hesitant or afraid to speak up and to act on its beliefs and values at a crucial juncture of world history is forfeiting its international standing and embarking on a course of moral and political decline."

In my opinion, the basis for our commitment to the advancement of human rights must be firm and irreversible. The question I raise concerns the depth of that commitment.

Certainly there will be tests of that commitment in the near future if the Senate considers ratification of the Genocide Convention and the treaty for the elimination of all forms of racial discrimination. And we in the House of Representatives will face votes, as we did a few weeks ago on the International Security Assistance bill, to cut military aid to countries like Argentina where violations of rights have been documented.

But the answer to the question about the extent of our rights commitment ultimately rests with you, this graduating class of the Shenango Valley Campus of Penn State, and your generation.

The connection here may seem rather remote, especially at a time when your most immediate concerns are finding jobs, building new careers and new families, or perhaps pursuing further education.

However, as intelligent and informed citizens in a participatory democracy, your concern about national and international issues seems assured. You will be opinion-shapers, I am sure, in whatever fields of endeavor you enter.

We already have seen the incredible advance of the cause of human rights in this century. In an increasingly smaller and in-

terdependent world, developments in once far-removed lands now impact us directly. The aspirations of freedom-loving peoples everywhere truly are matters of our own concern. When their rights are threatened, our rights and those of our children cannot be considered secure.

While we are not the world's policeman, neither are we an isolated fortress, impervious to injustice outside the walls.

Since you have listened to so many professors in your learning experience, I think it is appropriate that I leave you with the observations of yet another professor, Alessandra Luini Del Russo, concerning the challenge ahead of you with respect to human rights:

"Only through individual and community effort will governments be persuaded and encouraged to proceed with alacrity in the continued protection of that spiritual and living heritage which we called freedom under law. Perhaps the young people of today in their halting and confused ways are aiming precisely to that end. It is an undertaking which will lead all nations toward the attainment of a world order based on law, justice, and those eternal principles of human liberty which each man bears in his heart as the indelible imprint of his creator. This is a work for peace."

So this is the challenge to which you are called. Your generation may well be the one which must stand at the crossroads of the future of human rights on this planet. Now is the time to prepare for the difficult decisions ahead.

As you move forward with your careers, I hope you will keep in mind the issues I have sought to bring to your attention. Consider what is at stake, and let your voices be heard both locally and in Washington.

Your response will be the measure of our national commitment to human rights and to the building of a better world and lasting peace.

#### SECRETARY CALIFANO'S VIEWS ON QUOTAS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. WALKER) is recognized for 10 minutes.

Mr. WALKER. Mr. Speaker, I call to my colleagues' attention an article from the New York Times of June 6, 1977, concerning the views of Health, Education, and Welfare Secretary Joseph Califano on quotas. Because HEW has used quotas and goals to implement policy through the years, Secretary Califano's views are of considerable interest.

For many years, I have opposed the use of quotas to discriminate against individuals seeking an education or a job. Persons seeking employment or entry into a college or university should succeed or fail on individual qualifications. They must merit success or deserve failure on their own assets and liabilities, not because a quota system has been established to include or to exclude certain numbers of people.

While Secretary Califano does speak out on the issue of quotas in the Times' article, it is not quite clear what he is saying. He states his opposition to quotas, but expresses support for goals. Secretary Califano tries to make a distinction where there is no difference. His comments on goals sound like the rhetoric of quotas. If the tools of a quota system are to be used to enforce goals, we will still have the Government dealing

with people as numbers rather than human beings.

# CALIFANO ASKS "GOALS" NOT "QUOTAS" ON MINORITY STUDENTS IN COLLEGES

(By Peter Kihss)

Joseph A. Califano, Jr., Secretary of Health, Education and Welfare, said yesterday that the Federal Government "must rely on numerical goals" to monitor college and university efforts to recruit and help minority-group students.

Speaking at City College's 131st commencement, Secretary Califano contended that goals and accompanying "timetables" would differ from "rigid, arbitrary, long-term quotas."

"Arbitrary quotas will not be part of our enforcement program," he said. "We want to rely on the good faith and special effort of all who join in the final march against discrimination. But we will also rely—because we must rely—on numerical goals as benchmarks of progress."

In an interview, Mr. Califano said he preferred not to go any further in explaining how "goals" would differ from "quotas."

He called in his address for "more strenuous efforts" to seek out talented and motivated minority students, to develop "imaginative programs of compensatory training," to set up "new institutional programs" of financial and other help and to find new ways "to measure true human potential."

Asked by a reporter what Federal "enforcement" he envisioned for the new goals, Mr. Califano said the first reliance would be attempts at "inspiration."

Queried specifically about theories by some college officials that there could be pressure by withholding Federal research grants and contracts or even diverting students with Federal scholarship grants away from some colleges, the Secretary smilingly said, "Not in the near term."

Mr. Califano had incurred outbursts of criticism in suggesting "quotas" for preferential hiring and admissions in higher education in an interview last March 17.

Thereafter, on March 31, Mr. Califano said he had made a mistake in using the "nerve-jangling" word "quotas," and had intended to urge "affirmative action" against discrimination, such as efforts to find and give special training to deserving people.

In his remarks yesterday at the graduation ceremonies at South Field, 133d Street and Convent Avenue, he said City College "offers an example to the nation" in a commitment to both equality and excellence. A third of its students have entered through "special affirmative action programs," he said. More than a quarter entered under open admissions—more than 10 percent through the SEEK program, Mr. Califano added.

SEEK helps students from families with incomes below the poverty level. The open-admissions program, admitting any graduate of a high school in the city before City University's fiscal crisis, was restricted last year for senior colleges to students with averages of 80 percent or in the upper third of their high schools. Neither sets an ethnic standard.

## REVERSE DISCRIMINATION

Actually, City College was held judicially to have engaged in reverse discrimination last year. This grew out of a \$399,885 contract for the 1974-75 school year from the Department of Health, Education and Welfare whose students could go on to medical schools.

The contract called for a recruitment program with a pool of applicants, "the goal of which will reflect the proportions of women and minority group members as are contained in the total New York City population."

Federal Judge Marvin E. Frankel last Aug. 16 upheld a complaint by white applicants and ruled that 19 whites and Asians

had been wrongly and "intentionally eliminated on the basis of race" at the 1974 admission stage. He said admissions—not just the applicants' pool—had been based on race, with a goal set at a "50 percent quota for blacks and Hispanics."

Currently, about one-fourth of the 200 students at the center are black and Hispanic. Its first 30 graduates yesterday included the commencement's valedictorian, Wai Hung Lee, who has been working at the Chinatown Health Clinic.

Sophie Davis, in whose honor the biomedical center has been named and an alumna of City College's former Baruch School of Business, was one of six recipients of honorary degrees. She was named Doctor of Humane Letters.

Secretary Califano was made an honorary Doctor of Laws with a citation that said his policies affected lives of more Americans than those of any official except the President.

## A BLACK SINGLED OUT

Noting that a fourth of the 2,800 students were black and a fourth were Hispanic, Asian or members of other minorities, Secretary Califano singled out one black, Keith Bailey. Mr. Bailey, he said, had described himself as "drifting" when he got out of high school.

"Today," Mr. Califano said, evoking applause, "Keith Bailey is going somewhere. He is graduating summa cum laude, with a perfect 4.0 average in his math major. He is a track star: this year's City University male Scholar-Athlete of the Year."

Before the ceremonies, Secretary Califano said that, in his budget request to Congress, he is asking for \$4 million to start a program this fall in high schools throughout the nation to try to learn how to identify minority students of talent and limited financial resources.

Yesterday's commencement was City College's first since the imposition of tuition fees in City University, the graduates were told by Dr. Robert E. Marshak, the college president.

Dr. Marshak said that experience had shown that "imposing tuition was a weak political act and not a sensible economic one." Of \$8 million in tuition fees from City College students this year, he said \$6.5 million had come from state and Federal funds.

## MARSHAK CITES TUITION EFFECT

"An additional \$1.5 million in the tax-levy budget would have permitted City College to continue its magnificent tradition of free higher education," Dr. Marshak said. "The effect of tuition on the City University as a whole has been to deny an education to over 50,000 students in one year alone."

The other recipients of honorary degrees were:

Fred M. Hechinger, president-designate of the New York Times Foundation, Doctor of Humane Letters for writing on educational effectiveness.

Robert Mangum, Judge of the State Court of Claims, Doctor of Laws, for improving human relationships.

Adrian W. A. DeWind, president of the Association of the Bar of the City of New York, Doctor of Laws, for stressing that law is to serve, not oppress, people.

Dr. Isidor I. Rabi, Nobel Prize laureate in physics, Doctor of Science, an atomic pioneer who, the citation said, was a City College physics tutor from 1924 to 1927, "not reappointed because of an administrative technicality."

## WALSH AMENDMENT TO H.R. 7553

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. WALSH) is recognized for 10 minutes.
